

Power Up With Confidence.
SITOP – Reliable 24 VDC Power

sitop

SIEMENS

Reliable Power – Safety Included.

Reliability has a name: SITOP

Modern automation technology is becoming more and more demanding, incorporating electronics that are increasingly sophisticated and sensitive. Therefore, a reliable power supply is the prerequisite for safe efficient system operations. For over a decade, Siemens has engineered SITOP power supplies to be the best solutions - in terms of reliability, sturdiness and expandability. The proof? More than five million units sold protecting our customers against system downtime and production losses.

Mix and match – for your safety

SITOP. The perfectly harmonized and complete offer

Highly flexible solutions – Customized to your system

SITOP. One platform - unlimited possibilities

*SITOP modular:
power supplies meeting
your requirements*

The quality of the 24 V power packs alone does, however, not guarantee uninterrupted power. Total loss of power, extreme network voltage fluctuations or a single faulty load may cause system downtime and considerable financial loss. For this reason, SITOP offers a unique range of add-on modules for protection against various safety hazards. Thanks to its flexible expansion options, SITOP can even be retrofitted in such a way as to provide all-round protection.

The product family of SITOP DIN rail power packs consists of two product lines. The extra-narrow SITOP smart line, featuring all standard functions and the SITOP modular line for even higher demands.

Both product lines stand out with maximum quality and reliability. Moreover, their high degree of functionality offers optimum safety in case of power failures. Combined with other SITOP add-on modules, your system can be protected against all external impacts and precisely tailored to special safety
