Measurement diagram

- Note:**
1. Measurement conditions for the ZX1-LD□□: Ambient temperature of 25°C in Standard Mode after executing Smart Tuning.
 2. The ambient conditions or workpiece may adversely affect the engineering data of the ZX1-LD□□.
 3. The X-axis displacement indicates the measurement distance displayed on a digital display.
The measurement distance displayed on a digital display takes the measurement center distance as 0 and displays the near side of the Sensor as positive and the far side as negative.

Safety Precautions

This datasheet contains information only for selecting the appropriate model.
Be sure to read the Instruction Sheet for usage precautions prior to using the product.

Laser Safety
WARNING

ZX1-LD□□□: Class 2, ZX1-LD□□□L: Class1

Do not expose your eyes to the laser radiation either directly or indirectly (i.e., after reflection from a mirror or shiny surface).

The laser radiation has a high power density and exposure may result in loss of sight.

Do not disassemble the product.
Doing so may cause the laser beam to leak, resulting in the danger of visual impairment.

Note: For Precautions for safe use and Precautions for correct use, refer to the Instruction Sheet supplied with the product.
