Easy

“Mounts Anywhere”

Wide Variety

Variously-shaped, compact heads allow installation in any small space.

Suitable for Harsh Environments

Fiber Units are available for various installation conditions and can be installed as is, even in harsh environments.

“Achieve Easy Detection in Many Applications”

Smart Tuning

Just press the button to set the optimum incident level and threshold. Consistent settings are achieved for all users with this ultra-easy procedure.

Automatic Setting of Optimum Values

Threshold + Incident Level

5000 9999

Set to the intermediate value between the incident levels with and without a workpiece. Incident level adjustment with and without a workpiece.

Optimum Light Intensity Adjustment from Transparent Objects to Black Workpieces

The incident level is optimized to enable stable detection even for saturated or insufficient incident levels.

“Smooth Wiring and Setting”

Reduced Wiring

Simply link the Fiber Amplifier Units together for easy wiring and checking.

Separate Installation

Use the Distributed Sensor Unit for distributed installation to reduce introduction costs and work.

Easy Setup

Commissioning time is reduced with batch setting from a Touch Panel or backup data for process switchovers.
