

# **Current Transducer CTSR series**

# $I_{PRN}$ = 300, 600 mA

## Ref: CTSR 0.3-P, CTSR 0.6-P

For the electronic measurement of current: DC, AC, pulsed..., with galvanic separation between the primary circuit and the secondary circuit.

### **Features**

- Closed loop (compensated) current transducer
- Voltage output
- Single supply voltage
- · PCB mounting.

### **Advantages**

- High accuracy
- · Very low offset drift over temperature
- · Wide aperture
- High overload capability
- · High insulation capability
- Reference pin with two modes, Ref In and Ref Out
- · Degauss and test functions.

### **Applications**

- · Residual current measurement
- Leakage current measurement in transformerless PV inverters
- First human contact protection of PV arrays
- Failure detection in power sources
- Symmetrical fault detection (e.g. after motor inverter)
- Leakage current detection in stacked DC sources
- Single phase or three phase nominal current measurement up to ± 30 A per wire (DC or AC).

#### **Standards**

• EN 50178: 1997

• IEC 61010-1: 2010

• UL 508: 2010.

### **Application Domain**

- Industrial
- Suitable to fulfil VDE 0126-1-1 and UL 1741.

### **Absolute maximum ratings**

Parameter	Symbol	Unit	Value
Supply voltage	U <sub>c</sub>	V	7
Primary conductor temperature	T <sub>B</sub>	°C	110
Impulse overload (100 µs, 500 A/µs)	$\hat{I}_{_{P}}$	А	3300

Stresses above these ratings may cause permanent damage. Exposure to absolute maximum ratings for extended periods may degrade reliability.

### **UL 508: Ratings and assumptions of certification**

File # E189713 Volume: 2 Section: 3

#### **Standards**

- CSA C22.2 NO. 14-10 INDUSTRIAL CONTROL EQUIPMENT Edition 11 Revision Date 2011/08/01
- UL 508 STANDARD FOR INDUSTRIAL CONTROL EQUIPMENT Edition 17 Revision Date 2010/04/15

#### **Ratings**

Parameter	Symbol	Unit	Value Version P	Value Version TP
Primary involved potential*		V AC/DC	600	1000
Max surrounding air temperature	$T_{A}$	°C	105	
Primary current	$I_{_{\mathrm{P}}}$	А	According to series primary currents	
Secondary supply voltage	U <sub>c</sub>	V DC	7	
Output voltage	V <sub>out</sub>	V	0 to 7	

<sup>\*</sup> Environmental: For use in Pollution degree 3.

#### **Conditions of acceptability**

When installed in the end-use equipment, consideration shall be given to the following:

- 1 A suitable enclosure shall be provided in the end-use application.
- 2 The insulation between the primary and the secondary sensing circuits were evaluated with 4250 V AC for CTSR 0.6-TP/ SP and 2200 V AC for CTSR 0.6-P in dielectric voltage withstand test.
- 5 CTSR series is intended to be mounted on the printed wiring board of the end-use equipment.
- 7 The uninsulated live parts of primary feeder and secondary circuit clearance spacing of Model CTSR XX-P series shall maintain at least 5.5 mm apart.
- 8 Primary feeder of the devices shall be connected after an overvoltage device or system which has been evaluated by the Standard for Transient Voltage Surge Suppressors, UL 1449.

#### Marking

Only those products bearing the UL or UR Mark should be considered to be Listed or Recognized and covered under UL's Follow-Up Service. Always look for the Mark on the product.
