

11/91 AWA 27-772

## SUCOS PS 316

### Allgemeine Hinweise

#### Transport, Lagerung, Austausch

Zur Verhinderung elektrostatischer Entladungen empfehlen wir, die Baugruppen nur am Griff und/oder an der Frontplatte anzufassen.

**Die Baugruppen nur bei spannungsloser PS ziehen oder stecken.  
Baugruppencodierung beachten!**

### General notes

#### Transport, storage, exchange

In order to prevent cards being damaged, we recommend that you hold the cards only by the handle and/or the front plate.

**Switch off PS316 before inserting or removing the cards.  
Note the coding of the cards!**

### Remarques générales

#### Transport, stockage, remplacement

Afin d'éviter les décharges électrostatiques, il est recommandé de ne saisir les modules que par la poignée et/ou le plastron.

**Avant d'embrocher ou de débrocher un module, mettre toujours l'automate  
hors tension.  
Attention au codage des modules!**

### Istruzioni generali

#### Trasporto, montaggio, sostituzione

Per evitare che le schede vengano danneggiate si raccomanda di prenderle solo per l'impugnatura e/o sulla piastra frontale.

**Togliere tensione al PS 316 prima di inserire o rimuovere i moduli.  
Fare attenzione alla codifica della scheda!**

### Indicaciones generales

#### Transporte, almacenamiento, sustitución

Para evitar daños en la tarjeta, recomendamos sujetarla solo desde la maneta y/o de la placa frontal.

**Las tarjetas deben insertarse o extraerse sólo con el PS desconectado.  
¡Atención a la codificación de las tarjetas!**

## Baugruppenträgeranordnung

## Rack arrangement

## Disposition des racks

## Disposizione dei rack

## Disposición de los racks

### Achtung:

Typen BK-BPx.1 und BK-BPx.2 nicht gemischt in einem Aufbau verwenden.

### Attention:

Types BK-BPx.1 and BK-BPx.2 cannot be mixed.

### Attention:

Les types BK-BPx.1 et BK-BPx.2 ne doivent pas être combinés.

### Attenzione:

I tipi BK-BPx.1 e BK-BPx.2 non possono essere utilizzati assieme.

### Atención:

Los tipos BK-BPx.1 y BK-BPx.2 no deben mezclarse.

### Montage der Basisgeräte PS 316.x 08 und PS 316.x 12

Kabelklammern aufkleben, Klebestellen vorher mit fettlösendem Reinigungsmittel säubern.

### Fitting the PS 316.x 08 and PS 316.x 12 basic units

Stick the cable clamp in place after cleaning area with a degreasing agent.

### Montage des appareils de base PS 316.x 08 et PS 316.x 12

Coller les attaches de câbles après avoir nettoyé les emplacements avec un solvant de graisses.

### Montaggio dei rack base PS 316.x 08 e PS 316.x 12

Incollare il guida cavo dopo aver pulito la superficie con un solvente per grassi.

### Montaje de las unidades base PS 316.x 08 y PS 316.x 12

Pegar los sujetacables después de limpiar el área con un desengrasante.

### Verdrahtung

110-V-/220-V- AC-Leitungen sind getrennt von 24-V-DC-Leitungen zu verlegen.

### Wiring

110V/220V a.c. cables are to be laid separately from 24V d.c. cables.

### Câblage

Les lignes 110V/220V CA doivent être posées séparément des lignes 24V CC.

### Cablaggio

Le linee a 110V/220V AC devono essere separate dalle linee a 24V DC

### Conexión

Los cables de 110V/220V AC deben quedar separados de los cables de 24V DC.

# Steckplatzbelegung des Basisgerätes

## Module location of the basic unit

## Affectation des postes d'enchâfrage de l'appareil de base

## Inserimento dei moduli sul rack base

## Ubicación de las tarjetas en la unidad base

## Systemausbau

Maximal 1 Basisgerät + 4 Erweiterungsgeräte mit BK-BP x. 1  
maximal 1 Basisgerät + 7 Erweiterungsgeräte mit BK-BP x.2  
Bei mehr als 2 Erweiterungsgeräten muß ein Netzfilter FIL-PS vor die Netzteile EBE 241.1 geschaltet werden.

**ACHTUNG:**  
Bei Aufbauten mit mehr als 4 Erweiterungsgeräten müssen für alle Geräte die Buskoppeleinheiten BK-BP x.2 verwendet werden.

---

## System Expansion

Max. 1 basic unit + 4 expander racks with BK-BP x.1  
Max. 1 basic unit + 7 expander racks with BK-BP x.2  
An FIL-PS mains filter must be connected in front of the EBE 241.1 power supply units if more than 2 expander racks are used.

**CAUTION:**  
The BK-BP x.2 bus coupling units must be used for all systems involving more than 4 expander racks.

---

## Extension du système

Max. 1 appareil de base + 4 appareils d'extension avec BK-BP x.1  
Max. 1 appareil de base + 7 appareils d'extension avec BK-BP x.2  
S'il y a plus de 2 appareils d'extension, un filtre d'alimentation doit être connecté en série avec les blocs d'alimentation EBE 241.1

**ATTENTION:**  
Pour les systèmes avec plus de 4 appareils d'extension, les unités de couplage pour bus BK-BP x.2 doivent être utilisés pour tous les appareils.

---

## Espansione del sistema

Max. 1 rack base + 4 rack espansione con BK-BP x.1  
Max. 1 rack base + 7 rack espansione con BK-BP x.2  
Se vengono utilizzati più di 2 rack di espansione deve essere montato un filtro di alimentazione sul lato frontale dell'alimentatore EBE 241.1.

**ATTENZIONE:**  
Per i sistemi con più di 4 rack di espansione devono essere utilizzate le unità di accoppiamento bus BK-BP x.2.

---

## Configuración del sistema

1 unidad base + 4 racks de extensión con BK-BP x.1 como máximo  
1 unidad base + 7 racks de extensión con BK-BP x.2 como máximo  
En sistemas con más de 2 racks de extensión debe utilizarse un filtro FIL-PS para las fuentes de alimentación EBE 241.1

**ATENCION:**  
En sistemas con más de 4 racks de extensión deben utilizarse en todos los racks las tarjetas de acoplamiento de bus BK-BP x.2.

# Buskopplung zu Erweiterungsgeräten

## Bus coupling for expander racks

### Couplage des bus pour appareils d'extension

### Collegamento bus per rack di espansione

### Acoplamiento de bus a racks de extensión

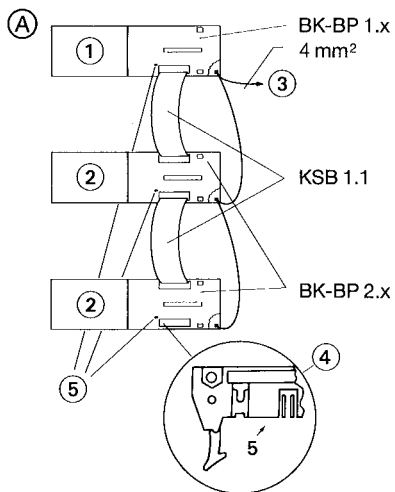

#### Montage

#### Installation

#### Montage

#### Montaggio

#### Montaje

## Kodierung / Kabelanschluß

- Ⓐ Bit-I/O-Buskopplung
  - Ⓑ Parallelbuskopplung
- ① Basisgerät (Rückseite)
  - ② Erweiterungsgerät (Rückseite)
  - ③ Bei Betrieb mit potentialgebundenen Baugruppen (z. B. EBE 200, EBE 250): 0-V-Brücke zur Spannungsversorgung der potentialgebundenen Baugruppe.
  - ④ Jumper auf Stiftpaar Nr. 5 (von links)
  - ⑤ Kodierbrücke: immer offen
- 

## Coding / Cable connection

- Ⓐ Bit-I/O-Bus coupling
  - Ⓑ Parallel bus coupling
- ① Basic unit (rear)
  - ② Expander unit (rear)
  - ③ For potential-dependent modules, e. g. EBE 200 and EBE 250, connect the 0V-bridge to the power supply of the potential-dependent module concerned.
  - ④ Jumper on pin pair No. 5 (from left)
  - ⑤ Coding: always open
- 

## Codage / Raccordement des câbles

- Ⓐ Couplage de bus bit E/S
  - Ⓑ Couplage de bus parallèle
- ① Appareil de base (face arrière)
  - ② Appareil d'extension (face arrière)
  - ③ Pour opération sous potentiel (EBE 200, EBE 250): Pont 0V pour bloc d'alimentation des modules sous potentiel.
  - ④ Shunt sur paire de broches no. 5 (vu de gauche)
  - ⑤ Codage: toujours ouvert
- 

## Codifica / collegamento cavi

- Ⓐ Collegamento del bus a bit I/O
  - Ⓑ Collegamento del bus parallelo
- ① Rack di base (retro)
  - ② Rack di espansione (retro)
  - ③ Per il funzionamento con moduli non separati galvanicamente (p. es. EBE 200, EBE 250) ponte 0V per l'alimentazione dei moduli non separati galvanicamente.
  - ④ Jumper su coppia di spine N° 5 (da sinistra)
  - ⑤ Ponte di codifica: sempre aperto.
- 

## Codificación / Conexión de cables

- Ⓐ Acoplamiento del bus de I/Q de bit
  - Ⓑ Acoplamiento del bus paralelo
- ① Unidad base (parte posterior)
  - ② Rack de extensión (parte posterior)
  - ③ Al usar tarjetas con potencial (p. e. EBE 200, EBE 250): puente 0V a la alimentación de la tarjeta con potencial.
  - ④ Puente en pins N° 5 (desde la izquierda)
  - ⑤ Codificación: siempre abierto
-

## Stromversorgungen

Eine Kombination der Typen EBE241.1 und EBE243.1 in einem Aufbau ist unzulässig. EBE 240.1 nur für Einzelgeräte verwenden.

### Kodierung der EBE 241.1 / EBE 243.1

- ① Überwachungsfunktionen (BUS aktiv und LOOP)

---

## Power supplies

A combination of types EBE 241.1 and EBE 243.1 is not permissible. Use type EBE 240.1 only for basic units without expander racks.

### Coding of EBE 241.1 / EBE 243.1

- ① Monitoring functions (BUS ACTIVE with LOOP)

---

## Alimentations

L'utilisation simultanée des EBE 241.1 et EBE 243.1 est interdite. Utiliser EBE 240.1 seulement pour appareils de base sans appareils d'extension.

### Codage de l'EBE 241.1 / EBE 243.1

- ① Fonctions de surveillance (BUS ACTIVE et LOOP)

---

## Alimentazione

Non è possibile la combinazione dei moduli EBE 241.1 e EBE 243.1 nella stessa configurazione. Utilizzare il tipo EBE 240.1 solo per rack base senza rack espansione.

### Codifica dell'EBE 241.1 / EBE 243.1

- ① Funzioni di controllo (BUS ATTIVO e LOOP)

---

## Fuentes de alimentación

Una combinación de las tarjetas EBE 241.1 y EBE 243.1 en el mismo sistema no está permitido. La tarjeta EBE 240.1 debe utilizarse solo en unidades base (sin racks de extensión).

### Codificación de la EBE 241.1 / EBE 243.1

- ① Función de supervisión (BUS ACTIVO y LOOP)

EBE 241.1/  
EBE 243.1

**Achtung!**

Bei Parallelbusbetrieb ist nur die Kodierung „aktiv“ erlaubt!

**Caution!**

Only “active” coding permissible with parallel bus operation.

**Attention!**

En cas de fonctionnement avec bus parallèle, seul le codage «actives» est admis.

**Attenzione!**

In caso di funzionamento con bus parallelo è ammessa soltanto una codifica “attiva”.

**¡Atención!**

En caso de funcionamiento con el bus paralelo, sólo se permite la codificación “activo”.

**Codierung** Alle Baugruppen dürfen nur bei ausgeschalteter Versorgungsspannung ausgetauscht werden.

**Coding** Cards must be exchanged only while the supply voltage is disconnected.

**Codage** Les modules doivent tous être remplacés hors tension.

**Codifica** Togliere tensione prima di inserire o rimuovere i moduli.

**Codificación** Las tarjetas deben insertarse o extraerse sólo con la alimentación desconectada.

**Schalter** 0 = off/open 1 = on

**Switches**

**Codeurs**

**Interruttori**
