Options & Accessories

The NORDAC VECTOR MC combines small size with the features and high-performance formerly reserved for more expensive AC Frequency Inverters. Sensorless vector control (ISD) maximizes torque and response at all speeds and extends the useful output frequency range. The many standard features allow direct use in a wide range of applications and plug-in, pre-engineered option modules provide additional flexibility.

PRE ENGINEERED, PLUG-IN TECHNOLOGY UNIT OPTIONS

Plug into front cover of the Frequency Inverter to provide flexible programming, display, control and Field Bus connection choices (choice of 1).

- Control Box mc
 - Local ability to:
 - Set parameters
 - Save and transfer program
 - Operate frequency inverter
 - Display operating data
 - Diagnose faults
 - 4 digit, 7 segment LED display
 - Operation/programming control buttons
 - Indicator LEDs
- Field Bus Interface Modules
 - RS 232
 - DeviceNet
 - CAN Bus
 - CANopen
 - Profibus

BIPOLAR (+/-) 10V) REFERENCE BOARD OPTION

Connects to the control terminal board of the vector mc to permit interface with an external bipolar reference signal of +/- 10 VDC.

NORDAC PARAMETER BOX (P-BOX)

External add-on unit that can be used to program and display parameters and control the operation of the connected Frequency Inverter. Features multi-line plain text display selectable in six languages. Manages and stores up to five unique inverter programs. Connects to any NORDAC inverter via RS485 communication on inverter or plug-in option (adapter cables sometimes required). Available as:

- SK PAR-2H Handheld version with 10 foot cable
- SK PAR-2E Panel Mount version

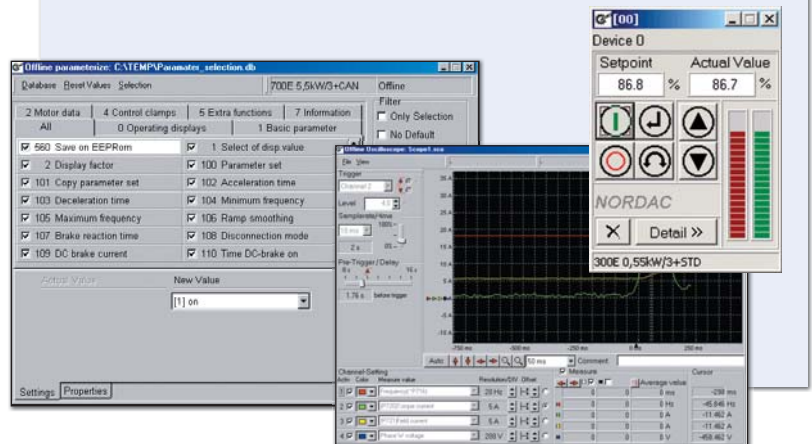

NORD CON SOFTWARE

NORD CON Software is a Windows-based PC program that enables the control and programming of NORDAC Frequency Inverters. It provides for accessing up to 31 Frequency Inverters simultaneously via the RS485 interface. It features both off-line and on-line programming and data management modes.

NORD CON allows user to:

- Program inverters and upload/download parameter files
- Control connected inverters for test/troubleshooting
- Monitor connected inverters and examine up to four variables versus time with built-in oscilloscope feature
- Produce macros to test process sequences
- Display parameter information in six languages
