

## Force Sensors

FSA Series, Compensated/Amplified

32311096

Issue B

Datasheet

### DESCRIPTION

The FSA Series are piezoresistive-based force sensors offering a ratiometric analog or digital output for reading force over the specified full scale force span and temperature range. They are fully calibrated and temperature compensated for sensor offset, sensitivity, temperature effects, and nonlinearity using an on-board Application Specific Integrated Circuit (ASIC). Direct mechanical coupling allows for easy interface with the sensor, coupling with tubing, membrane or a plunger, providing repeatable performance and a reliable mechanical interface to the application. The package also provides excellent corrosion resistance and isolation to external package stress. All products are designed and manufactured according to ISO 9001 standards.

### VALUE TO CUSTOMERS

The FSA Series are designed to meet the customers' need for a compensated, amplified force sensor that provides analog and digital outputs, a variety of force sensing ranges, and enhanced durability and accuracy. Their flexible design provides multiple standard configurations over a wide operating temperature range.

### DIFFERENTIATION

- Multiple force ranges allow the customer to choose the force range to maximize sensitivity and improve system resolution/performance
- Overforce provides enhanced durability in applications where overforce may exist
- Enhanced accuracy includes all errors due to force non-linearity, force hysteresis, and non-repeatability
- Total Error Band enhances system performance
- Digital output enhances performance through reduced conversion requirements and the convenience of direct interface to microprocessors
- Diagnostics functions allow the user to determine if the sensor is working correctly by detecting if the electrical paths are broken or shorted inside the sensor
- Supply voltage provides customers flexibility of design within the application

### FEATURES

- Wide variety of force ranges
  - Newton (N): 5, 7.5, 10, 15, 20, 25
  - pound (lb): 1, 1.5, 2, 3, 5
  - gram (g): 500, 750
  - kilogram (kg): 1, 2
- Total Error Band:  $\pm 5\%$ FSS
- Accuracy:  $\pm 3\%$ FSS
- Ratiometric analog or SPI- or I<sup>2</sup>C-compatible digital output
- Fully calibrated and temperature compensated over a temperature range of 5°C to 50°C [41°F to 122°F]
- Overforce: 6804 g [15 lb]
- Supply voltage: 3.3 Vdc typ. or 5.0 Vdc typ.
- Low power consumption: 13 mW (analog) or 20 mW (digital)
- Excellent part-to-part repeatability
- Enhanced reliability
- Stable interface plunger
- Internal diagnostic functions available
- REACH and RoHS compliant

### POTENTIAL APPLICATIONS

Medical:

- Ambulatory non-invasive pump pressure
- Infusion pumps
- Kidney dialysis machines
- Occlusion detection

Industrial:

- Load and compression sensing

### PORTFOLIO

The FSA Series joins the FSG Series, FSS Series, FSS-SMT Series, TBF Series, and 1865 Series.

# Force Sensors, FSA Series Compensated/Amplified

**Table 1. Operating Specifications**

Characteristic	Analog			Digital			Unit
	Min.	Typ.	Max.	Min.	Typ.	Max.	
Supply voltage ( $V_{supply}$ ): <sup>1,2,3</sup> 3.3 Vdc 5.0 Vdc	3.0 4.75	3.3 5.0	3.6 5.25	3.0 4.75	3.3 5.0	3.6 5.25	Vdc
Supply current: 3.3 Vdc 5.0 Vdc	— —	2.0 2.6	— —	— —	2.8 3.9	3.9 4.6	mA
Power input	13			20			mW
Operating temperature range <sup>4</sup>	0 [32]	—	70 [158]	0 [32]	—	70 [158]	°C [°F]
Compensated temperature range <sup>5</sup>	5 [41]	—	50 [122]	5 [41]	—	50 [122]	°C [°F]
Storage temperature range	-40 [-40]	—	85 [185]	-40 [-40]	—	85 [185]	°C [°F]
Startup time (power up to data ready)	—	—	5	—	—	3	ms
Response time	—	1	—	—	0.42	0.84	ms
Clipping limit: upper lower	— 2.5	— —	97.5 —	— —	— —	— —	% $V_{supply}$
SPI/I <sup>2</sup> C voltage level: low high	— —	— —	— —	— 80	— —	20 —	% $V_{supply}$
Pull up on SDA/MISO, SCL/SCLK, SS	—	—	—	1	—	—	kOhm

<sup>1</sup>Sensors are either 3.3 Vdc or 5.0 Vdc based on the catalog listing selected.

<sup>2</sup>Ratiometricity of the sensor (the ability of the device output to scale to the supply voltage) is achieved within the specified operating voltage.

<sup>3</sup>The sensor is not reverse polarity protected. Incorrect application of supply voltage or ground to the wrong pin may cause electrical failure.

<sup>4</sup>Operating temperature range: The temperature range over which the sensor will produce an output proportional to force.

<sup>5</sup>Compensated temperature range: The temperature range over which the sensor will produce an output proportional to force within the specified performance limits.

<sup>6</sup>Accuracy: The maximum deviation in output from a Best Fit Straight Line (BFSL) fitted to the output measured over the force range at 25°C [77°F]. Includes all errors due to force non-linearity, force hysteresis, and non-repeatability.

<sup>7</sup>Full Scale Span (FSS): The algebraic difference between the output voltage at full scale force and the output at zero force.

<sup>8</sup>Total Error Band (TEB): Combined error from calibration, accuracy and temperature effects over the compensated temperature range at 5.0V from 15 %FSS to 95 %FSS.

<sup>9</sup>Long-term stability after 1000 hr of operation at 25°C [77°F].
