

FEATURES

- Non-isolated SIP POL DC/DC power module
- 8.3-14Vdc input voltage range
- Programmable output voltage from 0.7525-5.5Vdc
- 10 Amp (T/10) or 16 Amp (T/16) output current models
- Drives 1000 μ F ceramic capacitive loads
- High power conversion efficiency 94.5% at 3.3 Vout
- Outstanding thermal derating performance
- Over temperature and over current protection
- On/Off control, Sense and optional Sequence/Tracking input
- UL/EN/IEC 60950-1 safety
- Industry-standard (DOSA) SIP format
- RoHS-6 hazardous substance compliance

Typical unit

PRODUCT OVERVIEW

The OKX-T/10 and -T/16 series are miniature SIP non-isolated Point-of-Load (POL) DC/DC power converters for embedded applications. The module is fully compatible with Distributed-power Open Standards Alliance (DOSA) industry-standard specifications (www.dosapower.com). Applications include powering CPU's, datacom/telecom systems, programmable logic and mixed voltage systems.

The wide input range is 8.3 to 14 Volts DC. Two maximum output currents are offered, 10 Amps (T/10 models) or 16 Amps (T/16 models). Based on fixed-frequency synchronous buck converter switching topology, the high power conversion

efficient Point of Load (POL) module features programmable output voltage and On/Off control. An optional Sequence/Tracking input allows controlled ramp-up and ramp-down outputs. The Sense input provides load compensation. These converters also include under voltage lock out (UVLO), output short circuit protection, over-current and over temperature protections.

These units are designed to meet all standard UL/EN/IEC 60950-1 safety and FCC EMI/RFI emissions certifications and RoHS-6 hazardous substance compliance.

Connection Diagram

Figure 1. OKX2-T/10, -T/16

Note: Murata Power Solutions strongly recommends an external input fuse, F1. See specifications.

PERFORMANCE SPECIFICATIONS SUMMARY AND ORDERING GUIDE

Model Number ②	Output						Input				Efficiency		On/Off Logic	Sequence/ Tracking	Package C86, Pinout P84
	V _{OUT} (Volts)	I _{OUT} (Amps max)	Power (Watts)	R/N (mVp-p) Max. ④	Regulation (Max.)		V _{IN} Nom. (Volts)	Range (Volts) ①	I _{IN} , no load (mA)	I _{IN} , full load (Amps)					Case
					Line	Load					Dimensions are in inches (mm)

① The input voltage range must be 13.2 Volts max. for V_{OUT} ≥ 3.63 V.

② All specifications are at nominal line voltage, V_{OUT}=nominal (5V for D12 models) and full load, +25 deg.C. unless otherwise noted.
Output capacitors are 1 µF ceramic and 10 µF electrolytic in parallel. Input cap is 22 µF. See detailed specifications.
I/O caps are necessary for our test equipment and may not be needed for your application.

③ Use adequate ground plane and copper thickness adjacent to the converter.

④ Ripple and Noise (R/N) is shown at V_{OUT}=1V. See specs for details.

⑤ Please note and be aware that the mechanical drawing for this special model will be unique; see page 14.

PART NUMBER STRUCTURE

***Special quantity order is required; samples available with standard pin length only.**

Note:
Some model number combinations may not be available. See website or contact your local Murata sales representative.
