# A Servo Motor for Every Application

## Reliability and Innovation

Control Techniques designs its products using a proven development process that prioritizes innovation and reliability. This process has resulted in Control Techniques' market-leading reputation for performance and quality.

Control Techniques offers a wide range of reliable servo motors designed to meet specific application requirements. When matched to a Control Techniques Unidrive SP, Digitax ST Epsilon EP or MDS Servo drive, the resulting drive/motor combination provides an optimized system in terms of ratings, performance, cost and ease of use.

Today, businesses of all sizes are searching for partners who understand the unique demands of today's global economy. Time and again they turn to Emerson Industrial Automation. With our world-class brands, broad industry experience and extensive global presence, Emerson Industrial Automation is uniquely positioned to deliver cost-effective solutions for the ever-changing industrial manufacturing market.

*The Unimotor HD series servo motor expands the capabilities of Control Techniques motion systems that provide high torque in a small size as well as support for incremental encoders, absolute encoders and resolver motor feedback.*

## Performance Advantage

### Unimotor HD

Compact low-inertia servo motor for high-dynamic applications

- **Voltage Rating:** 230V/460V
- **Continuous Torque:** 6.4 to 752lb-in (0.72 to 85.0Nm)
- **Multiple Feedback Choices:** resolver, encoder and abs encoder
- **Frame Sizes:** 55, 67, 89, 115, 142 and 190mm
- **Ratings:** IP65; UL, CE and RoHS compliant

### NT Motor

Compact NEMA or metric flange motors

- **Voltage Rating:** 230V
- **Continuous Torque:** 7.5 to 56lb-in (0.85 to 6.3Nm)
- **Multiple Feedback Choices:** resolver, encoder and abs encoder
- **Flying Lead Option**
- **Frame Sizes:** English (NEMA 23 or 34) or Metric (IEC-72-1)
- **Ratings:** IP65; UL and CE compliant (RoHS options available)

### XV Motor

Economical metric motors

- **Voltage Rating:** 230V
- **Continuous Torque:** 0.9 to 101lb-in (0.11 to 11.5Nm)
- **Frame Sizes:** 40, 60, 80 and 130mm
- **Ratings:** IP55 and IP65; UL, CE and RoHS compliant

### Unimotor FM

Designed for flexible configuration for use in a wide range of applications with a high inertia option

- **Voltage Rating:** 230V/460V
- **Continuous Torque:** 6.4 to 1204lb-in (0.72 to 136Nm)
- **Multiple Feedback Choices:** resolver, encoder and abs encoder with multiple connector options
- **Frame Sizes (with NEMA flange options):** 55, 75, 95, 115, 142 and 190mm
- **Ratings:** IP65; UL and CE compliant

### Unimotor FM Fan Blown

Based on Unimotor FM mechanics with modified electromagnetic construction, the fan blown version is designed to give greater performance across the torque range.

- **Voltage Rating:** 460V
- **Continuous Torque:** 46 to 699lb-in (5.2 - 79.0Nm)
- **Multiple Feedback Devices:** resolver, incremental and absolute encoders
- **Frame Sizes:** 75,95,115,142 and 190mm
- **Ratings:** UL and CE compliant
- **Fan:** 208Vac

*Shaft seals standard on Unimotor HD, FM and NT Series motors*

## Why Motion Customers Choose Control Techniques' Motion Control Solutions...

- A full line of servo motors up to 1200lb-in
- Single-source motion control lowers total system costs
- FREE software offers the ultimate programming capability and greatly reduces programming time
- Multiple fieldbus options including EtherCAT, EtherNet I/P, Modbus TCP/IP and more
- High-speed, peer-to-peer communications
- 14 feedback types supported as standard
- Integrated programs eliminate need for PLC
- Drive and Application Center support
- Zero-space EMI and dynamic braking options
- AC drives with closed-loop vector control and sensorless rotor control

# Selecting the Right Motor for the Right Drive

Control Techniques drive-and-motor combinations provide an optimized system in terms of ratings, performance, cost and ease of use. Use Control Techniques' FREE CTSize software (for Control Techniques Epsilon and MDS Servo drives) or CTSelect (for Control Techniques Unidrive SP and Digitax ST drives) to select system components or manually select the system using the following steps.

1. Determine the application's continuous and peak torque requirements at various motor shaft speeds, then refer to motor data tables and the visual-reference overview to help determine which motor family will be most appropriate for the application.
2. Once the motor family is selected, use this brochure to select a specific motor model that delivers the required torque and speed. Make note of the continuous and peak current (Amps) requirements of the selected motor.
3. Check the specification tables in Control Techniques' brochures for Digitax ST (BRO-DST-1107), Epsilon EP (BRO-EPP-1107) or Unidrive SP (BRO-USPSRVO-1107) Servo drives to select the drive model that delivers adequate continuous and peak torque for the selected motor.
4. Go to the table of contents of this brochure to select the motor power and feedback cables for the selected motor and drive. Confirm that the ratio of rotor inertia to load inertia is <10:

$$\text{load inertia/rotor inertia} < 10$$

Note: A gear reducer will reduce the load inertia based on the following equation:

$$\text{Reflected load inertia} = \text{load inertia/gear ratio}^2$$

Note: When specifying a motor system, be sure to consider such options as user-interfaces (HMI), braking resistors and other options and accessories that will enhance the system's performance and value.

## Electronic Nameplates

Some motors fitted with high-resolution SinCos or absolute encoders are pre-loaded with the motor "electronic nameplate" data during the manufacturing process. This data can be read by Control Techniques' Servo drives and used to automatically optimize the drive settings. This feature simplifies commissioning and maintenance, ensures consistent performance and saves time.

For comprehensive Control Techniques motor drive information, refer to the following brochures:

**Unidrive SP** (BRO-USP-1107), **Unidrive SP Servo** (BRO-USPSRVO-1107), **Digitax ST** (BRO-DST-1107), **Epsilon EP** (BRO-EEP-1107)

**Example** (using Control Techniques' NT Motor family and Digitax ST Servo drive family):

**Step 1:** The application requires 12lb-in continuous torque.

**Step 2:** The Control Techniques Servo Motors brochure lists the NT-212 motor with 2.7A stall current.

Motor Frame Size	2in	
	230Vrms	
Model	NT-207	<b>NT-212</b>
Continuous Stall Torque (lb-in)	7.5	12.5
Continuous Stall Torque (Nm)	0.85	1.4
Standard Inertia (lb-in-sec <sup>2</sup> )	0.000094	<b>0.000164</b>
Standard Inertia (kgm <sup>2</sup> )	0.0000106	<b>0.0000185</b>
Peak Torque (lb-in)	22.5	37.5
Peak Torque (Nm)	2.54	4.24
Maximum Cogging (lb-in)	0.094	0.12
Maximum Cogging (Nm)	0.011	0.014
Motor Weight (lbs)	3	4
Motor Weight (kg)	1.36	1.81
Rated Speed 5000 rpm Kt (Nm/A) =	5.12	5.08
Kt (Nm/A) =	0.58	0.57
Ke (V/krpm) =	35	34.7
Rated Torque (lb-in)	7.50	12.50
Rated Torque (Nm)	0.85	1.4
Stall Current (A)	1.7	<b>2.7</b>
Rated Power (kW)	0.432	0.740
R (ph-ph) (Ω)	11.1	4.56
L (ph-ph) (mH)	39.1	18.9

**Step 3:** Select the Digitax ST drive with adequate current rating.

## Ratings — Digitax ST

Drive Model Number	Voltage / Ø	Output Current*	
		Cont. A	Peak A
DST1201	200-230 3Ø	1.7	5.1

Drive switching frequency at 6kHz for rated performance

\*Peak current is duty cycle limited

\*\*Derate continuous current above 6kHz drive switching frequency

# Unimotor HD 230V / 460V

## Compact, Powerful High-Dynamic AC Servo Motors

Designed for maximum torque density, the Unimotor HD brushless AC Servo motor series provides an exceptionally compact, low-inertia solution for applications that require very high torque during rapid acceleration and deceleration profiles. Unimotor HD motors fitted with high-resolution SinCos or absolute encoders are pre-loaded with the motor “electronic nameplate” data during the manufacturing process. This data can be read by Control Techniques Servo drives and used to automatically optimize the drive settings. This feature simplifies commissioning and maintenance, ensures consistent performance and saves time.

The Unimotor HD torque profile is closely matched to Digitax ST Servo drives providing up to 300% peak overload for maximum dynamic performance.

### Key Features

- Torque range: 6.4 to 752lb-in (0.72 to 85.0Nm)
- High torque-to-inertia ratio for high-dynamic performance
- Compact and powerful
- Optional holding brake
- IP65 conformance
- Segmented stator design
- World class performance
- Winding to suit 230V and 460V
- Speeds include 2000, 3000, 4000 and 6000rpm
- Large shafts to increase torsional rigidity
- Multiple feedback options:
  - Incremental encoder: high accuracy, medium resolution
  - Inductive absolute: medium accuracy, medium resolution, single-turn and multi-turn
  - Optical SinCos/absolute: high accuracy, high resolution, single-turn and multi-turn
  - Hiperface (SICK) and EnDAT (Heidenhain) protocols supported
  - Resolver: robust for extreme applications and conditions; lower accuracy, medium resolution

# Unimotor HD Selection Considerations

## Feedback Options

Feedback Device Order Code	Feedback Type	Encoder Supply Voltage	SinCos Cycles or Incremental Pulses per Revolution	Resolution Available to Position Loop <sup>1,2</sup>	Feedback Accuracy <sup>3</sup>
<b>055-067 Motors</b>					
AR	Resolver	7V rms Excitation 5kHz	1	Medium 16384 (14 bit)	Low +/- 600 arc sec
CR	Incremental encoder	5Vdc	4096	Medium 16384 (14 bit)	Medium +/- 150 arc sec
EM (Multi-Turn) FM (Single-Turn)	Inductive absolute encoder EnDat 2.1 (Heidenhain)	5Vdc	16	High 2.62 x 10 <sup>5</sup> (18 bits)	Medium +/- 480 arc sec
<b>089, 115, 142 and 190 Motors</b>					
AE	Resolver	6V rms Excitation 6kHz	1	Medium 16384 (14 bit)	Medium +/- 720 arc sec
CA	Incremental encoder	5Vdc	4096	Medium 16384 (14 bit)	High +/- 60 arc sec
EC (Multi-Turn) FC (Single-Turn)	Inductive absolute encoder EnDat 2.1 (Heidenhain)	7 - 10Vdc	32	Medium absolute position 524288 (19 bits)	Medium +/- 280 arc sec
RA (Multi-Turn) SA (Single-Turn)	SinCos optical encoder Hiperface (SICK Stegmann)	7 - 12Vdc	1024	Very high 1.04 x 10 <sup>6</sup> (20 bits)	High For SinCos integral non-linearity +/- 45 arc sec For SinCos differential non-linearity +/- 7 arc sec (total accuracy +/- 52 arc sec)
EB (Multi-Turn) FB (Single-Turn)	Optical absolute encoder EnDat 2.2 (Heidenhain)	3.6 - 14Vdc	2048	Very high 2.08 x 10 <sup>6</sup> (21 bits)	Very high +/- 20 arc sec (differential non-linearity +/- 1% signal period)

### NOTES:

<sup>1</sup> The sine and cosine outputs from the SinCos optical encoders are analog outputs; with Unidrive SP and Digitax ST, the resolutions quoted above are true when the encoder type is set to either SC Endat or SC Hiper, depending on the encoder

<sup>2</sup> The information is supplied by the feedback device manufacturer and relates to it as a standalone device; the values may change when mounted into the motor and connected to a drive

<sup>3</sup> The output from the resolver is an analog output; the resolution is determined by the analog-to-digital converter used; the value shown is when the resolver is used in conjunction with the SM-Resolver Option Module

## Motor Selection

### Motor Derating

Adverse operating conditions require that the motor performance be derated. These conditions include ambient temperature above 104 °F (40 °C), motor mounting position, drive switching frequency or a drive oversized for the motor.

### Ambient Temperatures

For ambient temperatures above 104 °F (40 °C), the torque must be derated using the following formula as a guideline for motors up to 3000 rpm. Consult factory for higher-speed motor derating information.

$$\text{New derated torque} = \frac{\text{Specified torque} \times \sqrt{1 - ((\text{ambient temperature} - 40) / 100)}}$$

\*Measured in °C

For example, with an ambient temperature of 169 °F (76 °C), the new derated torque will be 0.8 x specified torque.

### Drive Switching Frequency

Most drive current ratings are reduced at higher switching frequencies. See individual drive manuals for details.

See the table below for motor derating factors (these figures are for guidance only).

Switching Frequency	Motor Type/Frame					
	055	067	089	115	142	190
3kHz	0.92	0.93	0.89	0.89	0.83	0.90
4kHz	0.93	0.94	0.91	0.92	0.85	0.95
5/6kHz	0.95	0.95	0.95	0.96	0.88	1
8kHz	0.96	0.98	0.97	0.98	0.91	1
10/12/16kHz	1	1	1	1	1	1

### Mounting Arrangements

In general, motor torque should be derated if the motor mounting surface is heated from an external source such as a gearbox, the motor is connected to a poor thermal conductor, or the motor is mounted in a confined space with restricted air flow.

### Thermal Test Conditions

The performance data shown was recorded with an ambient temperature of 68 °F (20 °C) and the motor mounted on a thermally-isolated aluminum plate.

Motor Type/Frame	Aluminum Heatsink Plate	
	(in)	(mm)
055	4.3 x 4.3 x 1.06	110 x 110 x 27
067, 089	9.8 x 9.8 x 0.6	250 x 250 x 15
115 to 142	13.8 x 13.8 x 0.8	350 x 350 x 20
190	19.7 x 19.7 x 0.8	500 x 500 x 20

### Thermal Protection

Thermistor protection to 293 °F (145 °C) is built into the motor windings and gives an indication of serious overheating problems. *The installer must connect the thermistor to the drive. Failure to do so will invalidate the motor warranty if winding burns out.*

### Environmental Conditions

Any liquids or gases that may come into contact with the motor must be confirmed to ensure compliance with the correct international standards.

### 230V and 460V HD Motor Holding Brake Specifications

Motor Frame Size (mm)	Power Supply (Vdc)	Power (Watts)	Static Torque		Release Time (ms) nom.	Added Inertia		Backlash Degrees*	Added Weight	
			(lb-in)	(Nm)		(lb-in-sec <sup>2</sup> )	(kgcm <sup>2</sup> )		(lbs)	(kg)

190 F	24	54.5	885	100	CF	0.00683	7.72	0.75	5.3	5.3

**NOTES:**

- Figures shown in individual motor sections are at 68 °F (20 °C) ambient
- Apply a derate factor of 0.7 to standard brake torque figures if motor temperature is above 212 °F (100 °C)
- \*Backlash will increase over time

# NT Motor 230V

## Compact NEMA or Metric Flange Motors

The NT Motor is a compact, high-performance motor designed to maximize torque and minimize size. The NT Motor uses powerful Neodymium magnets and is manufactured with a segmented core to maximize stator efficiency.

NT Motors are available with direct motor-to-drive connector terminations for Control Techniques Epsilon EP, Unidrive SP and Digitax ST Servo drives – cable lengths up to 20ft are available.

### Key Features

- Torque range: 7.5 to 56lb-in (0.85 to 6.3Nm)
- Very low inertia for high acceleration and cycle rates
- Medium inertia options
- English (NEMA 23 or 34) or Metric (IEC- 72-1) flanges
- Available with or without holding brakes
- Direct connect available – no additional cables required!
- Flying-lead cabling option (ex: NTE-320-LONS-0000) with improved ingress protection; flying leads are available with or without MS connectors
- IP65 conformance (IP67S and IP68S optional)
- Standard 2048 optical encoder (absolute and resolver feedback available)
- Installed shaft seal are standard with all motors
- White epoxy food-grade finish option

Use the information below to create an order code for an NT motor (top row is an example).

### NT Motor 230V Order Information

**CONS/CBNS**

**NOTES:**

- Includes drive feedback connector terminations specifically for Epsilon EP, Unidrive SP and Digitax ST

# NT Motor Selection Considerations

## Feedback Options

Feedback Device Order Code	Feedback Type	Encoder Supply Voltage	SinCos or Incremental Pulses per Revolution	Resolution Available to Position Loop	Feedback Accuracy
-T_NS, -C_NS, -L_NS, -E_NS, -F_NS	Incremental Encoder	5Vdc	2048	16384 (14 bits)	±600 arc sec.
-EOAS	Inductive Absolute Encoder EnDat 2.1 (Heidenhain) Multi-Turn	5Vdc	16	262,000 (18 bits)	±480 arc sec.
-EORS	Resolver	7-10Vdc, 7Vrms Excitation 10kHz	1	16384 (14 bits)	±600 arc sec.

## Motor Selection

### Motor Derating

Any adverse operating conditions require that the motor performance be derated. These conditions include ambient temperature above 104 °F (40 °C), motor mounting position, drive switching frequency or a drive oversized for the motor.

### Drive Switching Frequency

Most drive current ratings are reduced at higher switching frequencies. See individual drive manuals for details.

### Mounting Arrangements

In general, motor torque should be derated if the motor mounting surface is heated from an external source such as a gearbox, the motor is connected to a poor thermal conductor, or the motor is mounted in a confined space with restricted air flow.

### Thermal Test Conditions

The performance data shown was recorded with an ambient temperature of 68 °F (20 °C) and the motor mounted on a thermally-isolated aluminum plate.

Motor Model	Frame Size	Mounting Plate Dimensions
NT	2"	6" x 6" x 1/4"
	3"	10" x 10" x 3/8"

### Thermal Protection

Thermistor protection to 284 °F (140 °C) is built into the motor windings and gives an indication of serious overheating problems. *The installer must connect the thermistor to the drive. Failure to do so will invalidate the motor warranty if winding burns out.*

### Environmental Conditions

Any liquids or gases that may come into contact with the motor must be confirmed to ensure compliance with the correct international standards.

### Ingress Protection

All NT Motors have shaft seals installed as standard. Standard models have an ingress rating (IP rating) of IP65. Lead configuration "E" models are rated IP67S. Configuration "F" models are rated IP 68S.

# XV Motor 230V

## Economical Metric AC Servo Motor

The XV Servo motor series is a high-performance, low-inertia and high-torque motor in a compact economical package – ideal for high-volume applications. CE, UL and RoHS approved, XV Motors offer low-cost solutions with the features of a premium-priced servo offering.

Intended for higher throughputs and smaller machines, XV Motors are available in 4 frame sizes: 40, 60, 80 and 130mm with speeds ranging from 2000 to 5000rpm. Applications with continuous torque requirements up to 101lb-in (11.4Nm) are the perfect match for XV Motors.

XV Motors with 40, 60 and 90mm are fitted with AMP (Tyco® Mate-n-Lock™) connectors on 1-ft flying leads. (For added strain relief, these connectors can be snapped into place through holes in panels or brackets.)

### Key Features

- Torque range: 0.95 to 101lb-in (0.1 to 11.4Nm)
- Speed rating to 5000rpm
- Four frame sizes: 40, 60, 80 and 130mm
- CE, UL and RoHS approved
- Ambient operating temperature: 32 to 122 °F (0 to 40 °C)
- Atmosphere: no corrosive gas, flammable gas, oil mist or dust

### Order Code

# XV Motor Selection Considerations

## XV Motor Feedback – All Frame Sizes

XV Motors include a 5Vdc incremental encoder with 2048 pulses per revolution.

## Motor Selection

### Motor Derating

Any adverse operating conditions require that the motor performance be derated. These conditions include ambient temperature above 104 °F (40 °C), motor mounting position, drive switching frequency or a drive oversized for the motor.

### Ambient Temperatures

For ambient temperatures above 104 °F (40 °C), the torque must be derated.

### Mounting Arrangements

In general, motor torque should be derated if the motor mounting surface is heated from an external source such as a gearbox, the motor is connected to a poor thermal conductor, or the motor is mounted in a confined space with restricted air flow.

### Drive Switching Frequency

Most drive current ratings are reduced at higher switching frequencies. See individual drive manuals for details.

### Thermal Test Conditions

The performance data shown was recorded with an ambient temperature of 68 °F (20 °C) and the motor mounted on a thermally-isolated aluminum plate.

Motor Frame Size (mm)	Aluminum Heatsink Plate	
	(in)	(mm)
40	5.91 x 5.91 x 0.24	150 x 150 x 6
60	5.91 x 5.91 x 0.24	150 x 150 x 6
80	9.84 x 9.84 x 0.39	250 x 250 x 10
130	9.84 x 9.84 x 0.39	250 x 250 x 10

## Thermal Protection

The XV Motors do not have and are not offered with a winding thermal temperature sensor. Motor feedback cables have the Motor Temperature Sensor lines defeated (shorted between pin 14 (GND) and pin 15 (5V)). These cables include cable model numbers XUFTS-xxx and XUFCS-xxx (where -xxx is cable length in feet).

All Control Techniques Servo drives have a current-limiting algorithm in the firmware specifically to limit current levels. When properly matched and limited to the motor specifications, the drive firmware will fault the drive when the rated rms current of the motor is exceeded.

## Environmental Conditions

Any liquids or gases that may come into contact with the motor must be confirmed to ensure compliance with the correct international standards.

## Ingress Protection

Standard models have an ingress rating (IP rating) as listed in the table below.

Frame Size	IP rating	Exclusions
40mm	IP55*	Shaft through area of face plate and connectors
60mm	IP55*	Shaft through area of face plate and connectors
80mm	IP65*	Shaft through area of face plate and connectors
130mm	IP65*	Shaft through area of face plate

NOTE:

\* Shaft seal option is not available

## XV Motor Holding Brake Specifications

Motor Frame Size (mm)	Power Supply (Vdc)	Current (A)	Static Torque		Mechanical Engagement Time (ms)	Added Inertia		Added Weight (kg)
			(lb-in)	(Nm)		(lb-in-sec <sup>2</sup> )	(kgcm <sup>2</sup> )	
40	24	0.25	2.8	0.318	20	0.000023	0.003	0.2
60	24	0.27	13.0	1.47	50	0.000045	0.048	0.6
80	24	0.38	28.6	3.23	60	0.00011	0.125	0.7
130	24	0.29	70.8	8	40	0.000478	0.54	0.83

NOTES:

- Figures shown in individual motor sections are at 68 °F (20 °C) ambient
- Apply a derate factor of 0.7 to standard brake torque figures if motor temperature is above 212 °F (100 °C)

# Unimotor FM 230V / 460V

## Flexible Configuration, Medium-inertia Servo Motors

Unimotor FM is a high-performance, brushless AC Servo motor range matched for use with Control Techniques drives. “FM” stands for “flexible motor” and is designed to accommodate a wide range of applications. The motors are available in seven frame sizes with various mounting arrangements and motor lengths. Control Techniques motors and drives are designed to function as an optimized system. Unimotor FM is the perfect partner for Unidrive SP, Digitax ST and Epsilon EP Servo drives.

### Key Features

- Torque range: 6.4 to 648lb-in (0.72 to 73.2Nm)
- Optional high peak torque motors; up to 5 times stall torque
- Medium inertia design with high inertia option available
- Connector styles include vertical, 90° low profile and 90° rotatable
- Variety of flange possibilities (IEC/NEMA)
- Standard and high-energy dissipation brake options
- IP65 conformance
- Winding to suit 230V and 460V
- Speeds include 1500, 2000, 2500, 3000, 4000, 4500, 5000 and 6000rpm
- Multiple feedback options:
  - Resolver: robust for extreme applications and conditions – lower accuracy, medium resolution
  - Incremental encoder: high accuracy, medium resolution
  - Inductive absolute: medium accuracy, medium resolution, single-turn and multi-turns
  - Optical SinCos/absolute: high accuracy, high resolution, single-turn and multi-turn
  - Hiperface (SICK) and EnDAT (Heidenhain) protocols supported

### Approvals

## Unimotor

### Electronic Nameplate Capability

When a Control Techniques Servo drive is connected to a Unimotor FM fitted with a SinCos or absolute encoder, it can recognize and communicate with the motor to obtain the “electronic nameplate” data. This motor data can then be used to automatically optimize the drive settings. This feature simplifies commissioning and maintenance, ensures consistent performance and saves time.

# Unimotor FM Order Information

Use the information below to create an order code for a Unimotor FM (top row is an example).

95	U	2	B	30	5	B	A	CA	A	100	190

**NOTES:**

- \* Stocked motor standard feedback
- Stocked motors cover the range of FM motors and are available with short lead times for low quantities
- Consult factory for lead times for high-volume orders or on select feedback options
- Brake motors are not included in stock motor list

# Unimotor FM Fan Blown Motors 460V

## Overview

Based on Unimotor FM mechanics with modified electromagnetic construction, the fan blown version has been designed to give greater performance across the torque range. For example, the 190 fan blown variant increases the stall torque from 447.8 to 601.9lb-in (50.6 to 68Nm) when compared to the standard Unimotor FM motor. This extra torque allows for increased application performance with higher rms values achievable.

The motors available have been selected to give the best torque increases across the available frame sizes. To allow for the higher currents required, the 142 fan blown range is only available with the size 1.5 (53A rated) power connector.

## Ordering information

Use the information below to create an order code for a Unimotor FM (top row is an example). (Std = Standard selection, Opt = Optional selection)

095	U	4	D	60	0	V	A	MA	A	100	220
Frame size	Motor voltage	Peak torque selection	Stator length	Winding speed (rpm)	Brake	Connection type*	Output shaft	Feedback device	Inertia	PCD	Shaft diameter

				Absolute position	+/- 280"
				524288	
				(19 bits)	
RA (Multi-turn) SA (Single-turn)	SinCos Optical Encoder Hiperface	7 - 12V	1024	Very high	High
				1.04x10 <sup>6</sup>	For SinCos Integral non-linearity +/- 45" For SinCos Differential non-linearity +/- 7" (Total accuracy +/- 52")
				(20 bits)	
EB (Multi-turn) FB (Single-turn)	Optical Absolute Encoder EnDat 2.2	3.6 - 14V	2048	Very High	Very High
				2.08x10 <sup>6</sup>	+/- 20" (Differential non linearity +/- 1% signal period)
				(21 bits)	

- Notes:**
- 1) The output from the resolver is an analog output; the resolution is determined by the analog to digital converter used; the value shown is when the resolver is used in conjunction with the SM-Resolver
  - 2) The sin and cosine outputs from the SinCos optical encoders are analog outputs; with Unidrive SP and Digitax ST the resolutions quoted above are when the encoder type is set to either SC Endat or SC Hiperface depending on the encoder
  - 3) The information is supplied by the feedback device manufacturer and relates to it as a standalone device; the values may change when mounted into the motor and connected to a drive

## Unimotor FM Peak Torque Information

Unimotor FM has two levels of peak torque available within the range – standard peak torque (code 2) and the high peak torque range (code P). On some frame sizes, full peak torque cannot be achieved at the full 100% rms current level. As shown below, the 055 and 075 motors are not affected by the reduced levels and remain constant up to 100% rms current, whereas the 095 to 190 motors all show a drop at

some point along the % rms current line. The graph below shows the standard peak factor for each frame size.

As shown below, the 075 increases to 5 times, the 095 increases to 4.5 times, the 115 increases to 4 times across the % rms current line and the 142 shows an increase to 4 times up to 57% rms current dropping to 2.5 times at 100%.

### Standard (2) Peak Torque

### High (P) Peak Torque

# Unimotor FM Motor Selection Considerations

## Motor Selection

### Motor Derating

Any adverse operating conditions require that the motor performance be derated. These conditions include ambient temperature above 104 °F (40 °C), motor mounting position, drive switching frequency or a drive oversized for the motor.

### Ambient Temperatures

For ambient temperatures above 104 °F (40 °C), the torque must be derated using the following formula as a guideline (only applies to motors up to 3000rpm and assumes copper losses dominate).

$$\text{New derated torque} = \frac{\text{Specified torque} \times \sqrt{1 - ([\text{ambient temperature}^* - 40] / 100)}}{\text{Measured in } ^\circ\text{C}}$$

\*Measured in °C

For example, with an ambient temperature of 169 °F (76 °C), the new derated torque will be 0.8 x specified torque.

### Drive Switching Frequency

Most drive current ratings are reduced at higher switching frequencies. See individual drive manuals for details.

See the table below for motor derating factors (these figures are for guidance only).

### Motor Derating Factors

Switching Frequency	Motor Type/Frame								
	055 A-C	075 A-D	095 A-E	115 A-C	115 D-E	142 A-C	142 D-E	190 A-B	190 C-H
3kHz	0.92	0.93	0.88	0.89	0.84	0.87	0.81	0.98	N/A
4kHz	0.93	0.94	0.91	0.91	0.87	0.91	0.86	0.99	0.55
5/6kHz	0.95	0.95	0.93	0.93	0.90	0.94	0.89	0.99	0.77
8kHz	0.96	0.98	0.97	0.97	0.95	0.97	0.96	1	0.90
10/12/16kHz	1	1	1	1	1	1	1	1	1

### Mounting Arrangements

In general, motor torque should be derated if the motor mounting surface is heated from an external source such as a gearbox, the motor is connected to a poor thermal conductor, or the motor is mounted in a confined space with restricted air flow.

Motor Type/Frame	Aluminum Heatsink Plate	
	(in)	(mm)
055	4.3 x 4.3 x 1.06	110 x 110 x 27
075-095	9.8 x 9.8 x 0.6	250 x 250 x 15
115-142	13.8 x 13.8 x 0.8	350 x 350 x 20
190	19.7 x 19.7 x 0.8	500 x 500 x 20

### IP Ratings

#### Motor

IP65S - No ingress of dust; no contact with or approach to live or moving parts inside the enclosure. Water projected by a nozzle against enclosure from any direction shall have no harmful effects (excluding the front shaft seal); S = device standing still during water test

#### Fan motor and circuit board

IP54 - The fan motor and circuit board are coated to protect them against water splash and humidity.

#### Complete Unimotor fan blown motor assembly

IP20 - Protected against solid objects > 12mm (e.g. fingers)

# Cables for Servo Motors

## Servo Motor Cables

Cables are a vital part of a servo motor installation. Using Control Techniques' comprehensive range of high quality cables and connector options, installers can avoid the time and risks involved in manufacturing custom assemblies.

The matched power and feedback cables provide rapid worry-free installation. Control Techniques' servo motor-to-drive cables meet EMC standards to ensure a system free from unwanted noise and interference.

Each power cable has drive terminations that make it convenient to connect to the specific drive used.

Cables are available for braked and unbraked motors and in standard or flexible duty formats.

★ PBB_F_	005, 010, 015, 020, 025, 030	Digitax ST, Unidrive SP (size 0, 1 and 2) motor power with ferrules (ring lugs on ground), flex rated
★ PBB_G_	005, 010, 015, 020, 025, 030	Unidrive SP (size 3) motor power with brake leads with ring lugs, flex rated
★ PBB_J_	005, 010, 015, 020, 025, 030	Unidrive SP (size 4) motor power with brake leads with ring lugs, flex rated
★ PBBGKA	005, 010, 015, 020, 025, 030	Epsilon EP202 to EP216 motor power with brake leads with ferrules, flex rated
BRM-1	—	Brake module, DIN rail mount

**NOTE:**

\* Custom lengths available in 2m increments

# Cable Selection – Unimotor HD, Unimotor FM, NT (-ExxS)

## Power Extension Cable Options: Motor to SP/DST/EP

Part Number	Standard Lengths (m)	Description – Connector Kits (includes brake pins)
IM/0039/KI	—	Power connector kit, female 055, 115, 142 frame (30A); B connector type
IM/0044/KI	—	Power connector kit, female 055, 115, 142 frame (39A); J connector type
IM/0053/KI	—	Power connector kit, female 190 frame up to (53A)
IM/0054/KI	—	Power connector kit, female 190 frame up to (70A)
7579179	—	Bulkhead flange kit for power connector size 1
Part Number	Standard Lengths (m)	Description – Power Extension Cable*
★PSB_CA	005, 010, 015, 020, 025, 030	Motor power extension, flex rated, 055 to 115 frames and NT (-EOxS); 142 frame B connector type
★PBB_CA	005, 010, 015, 020, 025, 030	Motor power extension w/brake leads, flex rated, 055 to 115 frames and NT (-EOxS); 142 frame J connector type
★PSB_CB	005, 010, 015, 020, 025, 030	Motor power, extension flex rated, 190 frame
★PBB_CB	005, 010, 015, 020, 025, 030	Motor power extension w/brake leads, flex rated, 190 frame
Part Number	Standard Lengths (m)	Description – Cable
Undressed cable is available using cut-end order code option (example PSBAXX)		

**NOTES:**

- \* Custom lengths available in 2m increments
- Fill in blank with appropriate conductor size

Conductor Size	Drive
G = 1.5mm <sup>2</sup> (16A)	All Digitax ST, All Epsilon EP, MD-404, MD-407, MD410
A = 2.5mm <sup>2</sup> (22A)	Unidrive SP up to 22A, MD-420
B = 4.0mm <sup>2</sup> (30A)	Unidrive SP up to 30A
C = 6.0mm <sup>2</sup> (39A)	Unidrive SP up to 39A, MD-434
D = 10.0mm <sup>2</sup> (53A)	Unidrive SP up to 53A
E = 16.0mm <sup>2</sup> (70A)	Unidrive SP up to 70A

## Cable Selection – Unimotor HD, Unimotor FM, NT (-EOxS)

Feedback Cables					
SI	B	A	A	A	015
Cable Type	Jacket	Special Options	Connection Details – Drive End	Connection Details – Motor End	Cable Length
SI = Incremental encoder hyperboloid pins	B = PUR	A = Standard cable	A = Digitax ST/Unidrive SP/Epsilon EP incremental encoder 15-pin connector	A = Incremental encoder connector	Min = 001 (meters)
SR = Resolver		E = Twisted screened SS cable option only	B = Resolver/SinCos encoder ferrules	B = Resolver connector	Max = 100 (meters)
SS = SinCos encoder			F = MDS incremental encoder 26-pin connector	C = SinCos connector (Hiperface) (SICK Stegmann)	
			I = Extension connector male pins	E = 17-way extension connector	
		H = Digitax ST/Unidrive SP SinCos, 15-pin connector	N = SinCos connector (EnDat) (Heidenhain)		
			X = Cut end	X = Cut end	

### Feedback Cable Options – Motor to SP/DST/EP – Incremental Encoders

Part Number	Standard Lengths (m)	Description – Feedback Cables* and Connectors
★SIBAAA	005, 010, 015, 020, 025, 030	Incremental encoder feedback, connectors both ends, drive and motor connection, flex duty
★SIBAIA	005, 010, 015, 020, 025, 030	Extension cable, Incremental encoder feedback, connectors both ends, connects to SIBAAA cable and motor connector, flex duty
★SIBAXX	005, 010, 015, 020, 025, 030	Incremental encoder feedback, connector on drive end, flex duty
★SIBAXA	005, 010, 015, 020, 025, 030	Incremental encoder feedback, connector on motor end, flex duty
★SIBAXX	2-meter increments	Incremental encoder feedback cable, no connectors, flex duty
IM/0022/KI	—	Feedback connector kit, incremental encoders, 055 frame
IM/0063/KI	—	Feedback connector kit, includes pins, drive end, 15-pin
7579160	—	Optional feedback connector flange kit for bulkhead, size 1.0 connector
Part Number	Standard Lengths (m)	Description – Encoder Breakout Board
STI-ENC	—	Epsilon EP drive encoder breakout PCB, push-in terminals
SM-ECT	—	Unidrive SP, Digitax ST drives encoder breakout PCB, screw terminals

NOTE:

\*Custom lengths available in 2m increments

# Cable Selection – Unimotor HD, Unimotor FM, NT (-EOxS)

## Feedback Cable Options – Motor to SP/DST – Absolute and Resolver Feedback

Part Number	Standard Lengths (m)	Description – Feedback Cables*
★SSBABC	005, 010, 015, 020, 025, 030	Sick/Stegmann (Hiperface) SinCos encoder feedback cable, 12-pin on encoder end, flying leads on drive end, flex duty
★SSBAHC	005, 010, 015, 020, 025, 030	Sick/Stegmann (Hiperface) SinCos encoder feedback cable, 12-pin on encoder end, 15-pin d-sub on drive end, flex duty
★SSBAHN	005, 010, 015, 020, 025, 030 (30m max.)	Heidenhain (EnDat) SinCos encoder feedback cable, 12-pin on encoder end, 15-pin d-sub on drive end, flex duty
★SSBEHN	005, 010, 015, 020, 025, 030 (100m max.)	Heidenhain (EnDat) SinCos encoder feedback cable, noise immune, 12-pin on encoder end, 15-pin d-sub on drive end, flex duty
Part Number	Standard Lengths (m)	Description – Feedback Cable Connectors
IM/0022/KI	–	Feedback connector kit, Heidenhain SinCos encoders
IM/0023/KI	–	Feedback connector kit, Sick/Stegmann SinCos encoders or resolver
IM/0063/KI	–	Feedback connector kit, includes pins, drive end, 15-pin
7579160	–	Optional feedback connector flange kit for bulkhead; size 1.0 connector
Part Number	Standard Lengths (m)	Description – Feedback Extension Cables*
★SSBAIC	005, 010, 015	Feedback extension cable for feedback options TL, UL, RA, SA (SICK SinCos Hiperface), flex duty
★SSBAIN	005, 010, 015	Feedback extension cable for feedback options EM, FM, EC, EB, FB (-EOAS[NT] Heidenhain SinCos EnDat) flex duty
★SRBAIB	005, 010, 015, 020, 025, 030	Feedback extension cable for feedback options AR, AE, -EORS(NT) (resolver) flex duty
Part Number	Standard Lengths (m)	Description – Cable
★SRBAXX	2-meter increments	Cable for resolver feedback, no connectors, flex duty
★SSBAXX	2-meter increments	Cable for SinCos feedback, no connectors, flex duty, must specify SICK or Heidenhain cable types with order
Part Number	Standard Lengths (m)	Description – Encoder Breakout Board
STI-ENC	–	Epsilon EP drive encoder breakout PCB, push-in terminals
SM-ECT	–	Unidrive SP, Digitax ST drives encoder breakout PCB, screw terminals

NOTE:

\*Custom lengths available in 2m increments

# Cable Selection – Unimotor HD, Unimotor FM, NT Motor (-EOxS)

## Power – PUR Basic Cable Diameters

Cable Code	Phase and Conductor Size (Current Rating Cenlec En60204.1) (mm <sup>2</sup> )	Overall Cable Diameter			
		No Brake		Braked	
		(in)	(mm)	(in)	(mm)
PxBG	G - 1.5 (16A)	0.334	8.5	0.425	10.8
PxBA	A - 2.5 (22A)	0.394	10.0	0.496	12.6
PxBB	B - 4.0 (30A)	0.461	11.7	0.555	14.1
PxBC	C - 6.0 (39A)	0.685	17.4	0.685	17.4

**NOTES:**

- Minimum bend radius = 10x dia. long chain, 7.5x dia. short chain
- Bending life 10,000,000 cycles
- Maximum acceleration = 65.6ft/s<sup>2</sup> (20m/s<sup>2</sup>)
- Temperature rating = 14 to 176 °F (-10 to 80 °C)

## Feedback – PUR Basic Cable Diameters

Cable Code	Overall Cable Diameter	
	(in)	(mm)
SIBA	0.429	10.9
SRBA/SSBA	0.378	9.6

**NOTES:**

- Minimum bend radius = 10x dia. long chain, 7.5x dia. short chain
- Bending life 10,000,000 cycles
- Maximum acceleration: SRBA/SSBA = 65.6ft/s<sup>2</sup> (20m/s<sup>2</sup>)  
SIBA/SIBL = 32.8ft/s<sup>2</sup> (10m/s<sup>2</sup>)
- Temperature rating = 14 to 176 °F (-10 to 80°C)

## Motor Connector Details

# Cable Selection – NT Motors to Drives

## Power Cable Options: Motor to SP/DST/EP

Part Number	Standard Lengths (ft)	Description – Power Cables and Connectors
CMDS	-005, -015, -025, -050, -100	Molded cable, 16 AWG for 2" and 3" motors: connector on motor end, ferrules on drive end; IP-65 shielded connector
CMMS	-005, -015, -025, -050, -100	Molded cable, 12 AWG for 4" and 6" motors, connector on motor end, ferrules on drive end; IP-65 shielded connector
CMLS	-005, -015, -025, -050, -100	Molded cable, 8 AWG for 8" motors, connector on motor end, ferrules on drive end; IP-65 shielded connector
CMDCS*	—	Molded cable, connects to bulkhead on one end, motor connector on the other end for 2" and 3" motors
★CMDF	-005, -015, -025	Molded flex cable, connector at motor end for 2" and 3" motors; min. bend radius 5.6"
★CMMF	-005, -015, -025	Molded flex cable, connectors at both ends for 4" and 6" motors; min. bend radius 9.0" flexing, 6" stationary
★CMLF	-005, -015, -025	Molded flex cable, connector at motor end for 8" motors; min. bend radius 9" flexing, 6" for stationary
★CMDEF	-005, -015, -025	Molded flex extension cable, connectors at both ends for 2" and 3" motors; min. bend radius 5.6"
★CMMEF	-005, -015, -025	Molded flex cable, connectors at both ends for 4" and 6" motors; min. bend radius 9.0" flexing, 6" stationary
★CMDCF*	—	Flex cable, connects bulkhead on one end, motor on the other for 2" and 3" motors; min. bend radius 5.6"
4X08SS	—	Cable for 8" motors, 4-wire, 8AWG w/shield; 0.480" (12.2mm) diameter
4X12SS	—	Cable for 4" and 6" motors, 4-wire 12AWG w/shield; 0.440" (11.2mm) diameter
4X16SS	—	Cable for 2" and 3" motors, 4-wire, 16 AWG w/shield; 0.380" (9.7mm) diameter
★4X16SF	—	Flex cable for 2" and 3" motors, 4-wire, 16AWG, w/shield; min. bend radius 5.6"
★4X12SF	—	Flex cable for 4" and 6" motors, 4-wire, 12AWG, w/shield; min. bend radius 9.0"
★4X08SF	—	Flex cable for 8" motors, 4-wire, 8AWG, min. bend radius 9.2" for flexing
PT06A-16-8SSR	—	Motor power connector for 2" and 3" NT motors, female, not IP-65, not shielded, flex or non-flex cable
★PT06E-16-8SWSF	—	Motor end power cable, female, w/backshell, IP-65, IP-65 shielded connector for 2" and 3" motors
★PT01E-16-8PWSF	—	Extension (male) mates with motor end of motor cable; IP-65, shielded, for 2" and 3" motors
MS3106A-20-15SSR	—	Motor power connector for 4" and 6" NT motors, female, not IP-65, not shielded
★MS3106A-20-15SWSF	—	4" motor power connector, female, not IP-65 shielded
★MS3101A-20-15PWSF	—	Power cable extension plug for 4" motors, male; mates with motor end of motor cable (not shown above)
PTB-16-8	—	Motor bulkhead connector for 2" and 3" motors
Part Number	Standard Lengths (ft)	Description – Brake Cables and Connectors
CBMS	-005, -015, -025, -050, -100	Molded cable, standard duty, connector at motor only
★CBMF	-005, -015, -025, -050, -100	Flex cable, connector at drive, leads at motor; IP-65 shielded connector for 2", 3", 4", 6" motors; min. bend radius 3"
★CBMCS	—	Cable to be connected to bulkhead connector on one end and motor connector on the other end
PT06A-8-3SSR	—	Brake connector kit (not shown above)
PTB-8-3	—	Brake bulkhead connector
BRM-1	—	Brake relay module, 24V, 1 contract, 6A, DIN rail mounting

NOTE:

\*Custom lengths available in 5ft increments

# Cable Selection – NT Motors to Drives

## Feedback Cable Options: Motor to SP/DST/EP – Incremental Encoders

Part Number	Standard Lengths (ft)	Description – Feedback Cables and Connectors
UFCS	-005, -015, -025, -050, -100	Molded cable, connector both ends
MGFS	*	Standard duty cable for 2" and 3" motors, 8-pair with shield
★MGFF	*	Flex cable for 2" and 3" motors, 8 pair with shield; min. bend radius 5.6" for flexing, 10 million cycles
CFOCS	*	Molded extension cable, connects to bulkhead on one end, motor connector on the other end
★CFCF	-005, -015, -025, -050, -100	Flex duty feedback cable for use with PTB-16-23 bulkhead connector, min. bend radius: 5.6" flexing, 10 million cycles
★CFEF	-005, -015, -025, -050, -100	Flex extension cable for encoder feedback motors w/circ. connectors both ends; min. bend radius: 5.6" flexing, 10 million cycles
CFOF	-005, -015, -025, -050, -100	Flex motor feedback cable, connector at motor end only; min. bend radius 5.6" for flexing, 10 million cycles
CFOS	-005, -015, -025, -050, -100	Motor feedback cable, connector at motor only
PT06A-16-23SSR	—	Female connector for motor feedback cable, not IP-65, not shielded
★PT01E-16-23PWSF	—	Male connector for standard motor feedback cable, use at enclosure end with PTB-16-23, IP-65 shielded connector
PTB-16-23	—	Through-the-wall bulkhead connector for feedback cables
★SIBAAX	Lengths are in meters	Incremental feedback cable, connector drive end, high density 15-pin
IM/0063/KI	—	High density 15-pin connector, motor feedback connector on SP,DST, EP
Part Number	Standard Lengths (m)	Description – Encoder Breakout Board
STI-ENC	—	Epsilon EP drive encoder breakout PCB, push-in terminals
SM-ECT	—	Unidrive SP, Digitax ST drives encoder breakout PCB, screw terminals

NOTE:

\*Custom lengths available in 5-ft increments

# Cable Selection – XV Motors to Drives

## XV Motor Cables

Part Number	Standard Lengths (ft)	Description – Feedback Cables and Connectors
XUFCS	-005, -015, -025, -050, -100	XV Motor feedback cable.
XUFTS	-005, -015, -025, -050, -100	XV 40, 60, 80mm motor to DSUB connector on drive end; 15-pin, high density socket.
XUFTEF	-005, -015, -025, -050	Flex extension feedback cable for XV 40, 60, 80mm motor frames, connectors on both ends; bend radius: 5.6" flexing
XUFCEF	-005, -015, -025, -050	Flex extension feedback cable for XV 130mm motor frames, connectors on both ends; bend radius: 5.6" flexing
Part Number	Standard Lengths (ft)	Description – Power Cables
XCMDS	-005, -015, -025	Motor power cable
XTMD5	-005, -015, -025, -050, -100	Motor power cable
Part Number	Standard Lengths (ft)	Description – Power (Flex) Cables
XCMDEF	-005, -015, -025	Flex motor power cable extension. For use with XCMDS; min. bend radius 5.6"
XTMDEF	-005, -015, -025	Flex motor power cable extension. For use with XTMD5; min. bend radius 5.6"
XTBMDEF	-005, -015, -025, -050	Flex duty brake cable for XV 40, 60, 80mm motor frames; TBNS male connector to TBNS female connector; designed as extension of XCMDS cable
XCMDBS	-005, -015, -025, -050	Flex duty brake cable for XV 40, 60, 80mm motor frames. TBNS male connector to TBNS female connector; designed as extension of XCMDS cable
Part Number	Standard Lengths (ft)	Description – Brake Cables
XTBMS	-005, -015, -025, -050, -100	Motor brake cable, standard duty, connector at motor only
Part Number	Standard Lengths (ft)	Description – Brake (Flex) Cable and Connectors
XCMDBEF	-005, -015, -025	Flex motor brake cable extension for use with XCMDBS; min. bend radius 5.6"

## Unimotor FM Fan Kits

The FM Servo motors 075 to 190 frames can be field fitted with a cooling fan. These fan kits are intended for use in applications that operate near the thermal limit of the motor. Each FM Motor is thermally protected with an internal winding thermistor. If the motor experiences a thermal trip condition and is found to be operating near the thermal limit, a fan kit may help provide continuous operation during times of high continuous torque output. The motor thermal protection should never be defeated or bypassed as this could cause permanent damage to the motor.

Fan kits are IP20 and include mounting hardware. A terminal box mounted on the top rear of the fan shroud allows connection to the 230V fan leads.

### Unimotor FM Fan Kits

Part Number	Description
075FB21	075 FM Motor Fan Box
095FB21	095 FM Motor Fan Box
115FB21	115 FM Motor Fan Box
142FB21	142 FM Motor Fan Box
190FB21	190 FM Motor Fan Box
