

# **Current Transducer HAL 50..600-S**

For the electronic measurement of currents: DC, AC, pulsed..., with galvanic isolation between the primary circuit (high power) and the secondary circuit (electronic circuit).

Е	lect	rica	data

	Deviation in output when	n tested to EN 61000-4-3		< 20	% of I <sub>PN</sub>

 $\underline{\text{Notes}}$  :  $^{1)}$  Overvoltage Category III, Pollution Degree 2  $^{2)}$  Excludes the electrical offset

- 3) Derating is needed to avoid excessive core heating at high frequency.
- 4) Please consult characterisation report for more technical details and application advice.

I<sub>PN</sub> = 50 .. 600 A

#### **Features**

- Hall effect measuring principle
- Galvanic isolation between primary and secondary circuit
- Isolation voltage 3000V
- Low power consumption
- Extended measuring range(3 x I<sub>PN</sub>)
- · Isolated plastic case recognized according to UL 94-V0

#### **Advantages**

- Easy installation
- · Small size and space saving
- Only one design for wide current ratings range
- · High immunity to external interference

### **Applications**

- AC variable speed drives
- DC motor drives
- Battery supplied applications
- Uninterruptable Power Supplies (UPS)
- Switched Mode Power Supplies (SMPS)
- Power supplies for welding applications.

## **Application domain**

Industrial

## **Dimensions HAL 50..600-S** (in mm. 1 mm = 0.0394 inch)

#### **Mechanical characteristics**

General tolerance ± 0.5 mm
 Primary through-hole 20 mm x 15 mm
 Connection of secondary Molex 5045-04-A

#### **Remarks**

- $\bullet~~{\rm V_{OUT}}$  is positive when  ${\rm I_{P}}$  flows in the direction of the arrow.
- Temperature of the primary conductor should not exceed 90°C.
- This is a standard model. For different versions please contact us.

#### **Safety**

This transducer must be used in electric/electronic equipment with respect to applicable standards and safety requirements in accordance with the manufacturer's operating instructions.

Caution, risk of electrical shock

When operating the transducer, certain parts of the module can carry hazardous voltage (eg. primary busbar, power supply). Ignoring this warning can lead to injury and/or cause serious damage.

This transducer is a built-in device, whose conducting parts must be inaccessible after installation.

A protective housing or additional shield could be used. Main supply must be able to be disconnected.
