

Synchronous motors

6/2 Introduction

6/4 1FT6 motors

- 6/6 Core type, natural cooling
- 6/8 Standard type, natural cooling
- 6/18 Standard type, forced ventilation
- 6/22 Standard type, water cooling

6/26 1FT7 Compact motors

- 6/28 Core type, natural cooling
- 6/30 Standard type, natural cooling

6/40 1FK7 Compact/ 1FK7 High Dynamic motors

- 6/42 Compact, natural cooling
- 6/46 High Dynamic, natural cooling
- 6/48 Compact/High Dynamic, natural cooling for Power Modules

6/50 Gearboxes

- 6/50 Series SP+ planetary gearbox for 1FT6 motors
- 6/55 Series SP+ planetary gearbox for 1FK7 motors
- 6/61 Series LP+ planetary gearbox for 1FK7 motors

6/63 Geared motors

- 6/63 1FK7-DYA compact geared motors

6/66 1FN3 linear motors

- 6/76 Standard type, water cooling
- 6/76 Hall-effect sensor box
- 6/76 Connector box
- 6/77 Measuring systems
- 6/77 Liquid cooling

6/78 1FW6 built-in torque motors

- Standard type, water cooling

6/86 1FE1 built-in motors

- Standard type, water cooling
- 6/97 VPM Voltage Protection Module

6/98 2SP1 ECS motor spindles

- Standard type, water cooling

6/104 Selection guides

- Type/mounting position
- Degree of protection

6/105 Dimension drawings

- 6/105 1FT6 motors
- 6/117 1FT7 Compact motors
- 6/119 1FK7 Compact/
1FK7 High Dynamic motors
- 6/122 1FT6 motors with SP+ planetary gearbox
- 6/127 1FK7 motors with SP+ planetary gearbox
- 6/132 1FK7 motors with LP+ planetary gearbox
- 6/135 1FK7-DYA compact geared motors
- 6/136 1FN3 linear motors
- 6/138 1FW6 built-in torque motors
- 6/96 1FE1 built-in motors
- 6/139 2SP1 ECS motor spindles

Synchronous motors for SINAMICS S120

Introduction

Overview

	1FT6	1FT7 Compact	1FK7 Compact 1FK7 High Dynamic
Cooling	Natural cooling Forced ventilation Water cooling	Natural cooling	Natural cooling
Rated speed	1500 ... 6000 rpm	1500 ... 6000 rpm	2000 ... 6000 rpm
Static torque M_0	0.4 ... 300 Nm (3.54 ... 2655 lb _f -in)	2 ... 70 Nm (17.7 ... 620 lb _f -in)	0.85 ... 48 Nm (7.52 ... 425 lb _f -in) (1FK7 Compact) 1.3 ... 28 Nm (11.5 ... 248 lb _f -in) (1FK7 High Dynamic)
Overload capability up to max.	$4 \times M_0$	$4 \times M_0$	$3 \times M_0$
Encoder system, built-in, for motors with/without DRIVE-CLiQ interface	• Incremental encoder • Absolute encoder • Resolver See the technical specifications and the selection and ordering data for the required motor for information about a compatible encoder system.		
Sound pressure level in accordance with EN ISO 1680	55 ... 74 dB (A)	65 ... 74 dB (A)	55 ... 74 dB (A)
Degree of protection EN 60034-5 (IEC 60034-5)	IP64 ... IP68	IP64 ... IP67	IP64 IP65, additional IP67 drive end flange
Insulation of the stator winding EN 60034-1 (IEC 60034-1)	Temperature class 155 (F) for a winding temperature rise of $\Delta T = 100$ K at an ambient temperature of 40 °C (104 °F)		
	With water cooling, inlet temperature max. 30 °C (86 °F)	–	–
Type of motor	Permanent-magnet-excited synchronous motor, 3-phase		
Paint finish	Anthracite RAL 7016	Pearl dark grey RAL 9023	Unpainted, anthracite RAL 7016 (option)
Holding brake	Built-in (option)		
Mounted gearing	• Planetary gearbox series SP+ $i = 4$ to 10 (single-stage) $i = 16$ to 50 (2-stage)	–	• Planetary gearbox series LP+ $i = 5$, $i = 10$ (single-stage) • Planetary gearbox series SP+ $i = 4$ to 10 (single-stage) $i = 16$ to 50 (2-stage)

Application

There are many fields of application for the 1FT6/1FT7/1FK7/1FN3/1FW6 synchronous motors.

On machine tools, they are designated and used as feed motors.

On production machines such as printing, packaging and textile machines they are designated as synchronous servo motors.

The motors are referred to generally in this documentation as synchronous motors, due to their principle of operation.

The 1FE1 built-in motors are used as motor spindles in machine tools for turning, milling, or grinding. The 2SP1 ECS motor spindles are a motorized spindle series used in machine tools for milling.

Core types can be supplied for certain motor types. These core types can be express delivered as replacement motors in the event of plant outages and offer the advantage of a quicker spare parts supply. For this reason, core types should be used for configuration wherever possible.

²⁾ Sound pressure level of stock removal and tool changing are not taken into account.

Synchronous motors

Feed motors for SINAMICS S120

1FT6 motors

Overview

1FT6 motors are permanent-magnet excited synchronous motors with compact dimensions.

1FT6 motors with built-in encoders are suitable for use with the SINAMICS S120 drive system.

The fully digital control system of the SINAMICS S120 drive system and the encoder technology of the 1FT6 motors fulfill the highest demands in terms of dynamic performance, speed setting range, and shaft and flange accuracy.

1FT6 motors are available with natural cooling, forced ventilation, or water cooling. With the natural cooling method, heat is dissipated through the surface of the motor, whereas with the forced ventilation method, heat is forced out by means of built-on fans. Maximum power ratings, as well as a high degree of protection, can be achieved using water cooling.

Benefits

- Optimum surface quality of the workpiece thanks to high rotational accuracy (sinusoidal current injection)
- Short non-productive times thanks to high dynamic performance
- Power and signal connections for use in severely contaminated areas
- Easy installation thanks to reduced cabling overhead
- Can absorb high cantilever forces
- High thermal reserves for continuous and overload conditions
- High momentary overload capability (250 ms)
- Extremely high efficiency
- Extremely good dynamic response of the drive due to the lower rotor moments of inertia
- Low torque ripple (average value 1%)
- High degree of protection

Application

- High-performance machine tools
- Machines with stringent requirements in terms of dynamic response, precision and flexibility, e.g. packaging machines, high-bay racking vehicles, conveyor systems, handling equipment, and printing machines

Synchronous motors

Feed motors for SINAMICS S120

1FT6 motors

Technical specifications

Product name	1FT6 motor
Type of motor	Permanent-magnet-excited synchronous motor
Magnet material	Rare-earth magnet material
Cooling	Natural cooling, forced ventilation, water cooling For water cooling max. inlet temperature 30 °C (86 °F) Avoid condensation
Temperature monitoring	KTY 84 temperature sensor in the stator winding
Insulation of the stator winding in accordance with EN 60034-1 (IEC 60034-1)	Temperature class 155 (F) for a winding temperature of $\Delta T = 100$ K at an ambient temperature of 40 °C (104 °F)
Type in accordance with EN 60034-7 (IEC 60034-7)	IM B5 (IM V1, IM V3) IM B14 (IM V18, IM V19) IM B35 with 1FT613
Degree of protection in accordance with EN 60034-5 (IEC 60034-5)	IP64 standard type, IP65 core type
Shaft extension on the drive end in accordance with DIN 748-3 (IEC 60072-1)	Plain shaft
Shaft and flange accuracy¹⁾ in accordance with DIN 42955 (IEC 60072-1)	Tolerance N
Vibration magnitude in accordance with EN 60034-14 (IEC 60034-14)	Grade A is observed up to rated speed
Sound pressure level in accordance with EN ISO 1680, max.	
• Motors with natural/water cooling	
- 1FT602 ... 1FT604	55 dB (A)
- 1FT606 ... 1FT613	70 dB (A)
• Motors with forced ventilation	
- 1FT608/1FT610	70 dB (A)
- 1FT613	74 dB (A)

Product name	1FT6 motor
Encoder systems, built-in, for motors without DRIVE-CLiQ interface	• Incremental encoder sin/cos 1 V_{pp} 2048 S/R • Absolute encoder multi-turn (traversing range 4096 revolutions) with EnDat interface 1FT603 ... 1FT613: 2048 S/R 1FT602: 512 S/R • Multi-pole resolver (number of poles corresponds to number of pole pairs of the motor) • 2-pole resolver
Encoder systems, built-in, for motors with DRIVE-CLiQ interface	• 22 bit incremental encoder (2048 S/R internal) • Absolute encoder single-turn + 12 bit multi-turn (traversing range 4096 revolutions) 1FT603 ... 1FT613: 22 bit single-turn (2048 S/R internal) 1FT602: 20 bit single-turn (512 S/R internal) • 15 bit resolver • 14 bit resolver
Connection	Connectors for signals and power Terminal box possible on 1FT61
Paint finish	Anthracite RAL 7016
2nd rating plate	Enclosed separately
Options	• Shaft extension on the drive end with fitted key and keyway (half-key balancing) • Vibration magnitude Grade R • Built-in holding brake • Degree of protection IP67, IP68 M5 sealing air connection present (except with forced ventilation) • Terminal box for power terminal • Planetary gearbox, built-on (requirement: Plain shaft extension, shaft and flange accuracy tolerance N, vibration magnitude grade A, and IP65 degree of protection)

S/R = signals/revolution

¹⁾ Shaft extension run-out, concentricity of spigot and shaft and perpendicularity of mounting face of flange to shaft.

¹⁾ If the absolute encoder is used, M_{rated} is reduced by 10%.

²⁾ Same flange as for IM B5 type, but with metric threaded insert in the four fixing holes.

³⁾ With the specified Motor Module, the motor cannot be fully utilized with M_0 at $\Delta T = 100 \text{ K}$ winding temperature rise. If a Motor Module with a higher rating is used, you must check whether the specified power cable can be connected to it.

⁴⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C under continuous operating conditions at an ambient air temperature of 40 °C (104 °F), designed for I_0 (100 K), PVC/PUR-insulated cable.

⁵⁾ With default setting of the pulse frequency.

⁶⁾ $P_{\text{calc}} [\text{kW}] = \frac{M_0 [\text{Nm}] \times n_{\text{rated}}}{9550}$ $P_{\text{calc}} [\text{HP}] = \frac{M_0 [\text{lb}_f\text{-in}] \times n_{\text{rated}}}{63000}$

¹⁾ If the absolute encoder is used, M_{rated} is reduced by 10%.

²⁾ Same flange as for IM B5 type, but with metric threaded insert in the four fixing holes.

³⁾ With the specified Motor Module, the motor cannot be fully utilized with M_0 at $\Delta T = 100$ K winding temperature rise. If a Motor Module with a higher rating is used, you must check whether the specified power cable can be connected to it.

⁴⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C under continuous operating conditions at an ambient air temperature of 40 °C (104 °F), designed for I_0 (100 K), PVC/PUR-insulated cable.

⁵⁾ With default setting of the pulse frequency.

⁶⁾ $P_{calc} [kW] = \frac{M_0 [Nm] \times n_{rated}}{9550}$ $P_{calc} [HP] = \frac{M_0 [lb_f-in] \times n_{rated}}{63000}$

Notes on forced ventilation

	Shaft heights SH 80 and SH 100	Shaft height SH 132
Direction of air flow	From NDE to DE	From DE to NDE
Connection system	Connector size 1	Terminal box
Type of connecting cable	6FX.002-5CA01-....	6FX.008-1BB11-....
Pin and terminal assignment	Pin 1: L1, Pin 2: N	U1/L1: V2/L2: W3/L3
Supply voltage	220/260 V 1 AC, 50/60 Hz	400/460 V 3 AC, 50/60 Hz
Max. fan current	0.3 A	0.4 A
Weight of the fan module, approx.	4.8 kg (10.6 lb)	5.6 kg (12.3 lb)
Sound pressure level	70 dB (A)	74 dB (A)

¹⁾ If the absolute encoder is used, M_{rated} is reduced by 10%.

²⁾ Not for use in environments containing electrically conductive dust. Forced ventilation cannot be used if flammable, chemically aggressive, electrically-conductive or explosive dust is present.

³⁾ Same flange as for IM B5 type, but with metric threaded insert in the four fixing holes.

⁴⁾ The degree of protection refers to the motor. The built-on fan meets the requirements of degree of protection IP54.

⁵⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C under continuous operating conditions at an ambient air temperature of 40 °C (104 °F), designed for I_0 (100 K), PVC/PUR-insulated cable.

⁶⁾ With default setting of the pulse frequency.

⁷⁾ $P_{calc} [kW] = \frac{M_0 [Nm] \times n_{rated}}{9550}$ $P_{calc} [HP] = \frac{M_0 [lb_f-in] \times n_{rated}}{63000}$

....

Notes on forced ventilation

	Shaft heights SH 80 and SH 100	Shaft height SH 132
Direction of air flow	From NDE to DE	From DE to NDE
Connection system	Connector size 1	Terminal box
Type of connecting cable	6FX.002-5CA01-....	6FX.008-1BB11-....
Pin and terminal assignment	Pin 1: L1, Pin 2: N	U1/L1: V2/L2: W3/L3
Supply voltage	220/260 V 1 AC, 50/60 Hz	400/460 V 3 AC, 50/60 Hz
Max. fan current	0.3 A	0.4 A
Weight of the fan module, approx.	4.8 kg (10.6 lb)	5.6 kg (12.3 lb)
Sound pressure level	70 dB (A)	74 dB (A)

¹⁾ If the absolute encoder is used, M_{rated} is reduced by 10%.

²⁾ Not for use in environments containing electrically conductive dust. Forced ventilation cannot be used if flammable, chemically aggressive, electrically-conductive or explosive dust is present.

³⁾ Same flange as for IM B5 type, but with metric threaded insert in the four fixing holes.

⁴⁾ The degree of protection refers to the motor. The built-on fan meets the requirements of degree of protection IP54.

⁵⁾ With the specified Motor Module, the motor cannot be fully utilized with M_0 at $\Delta T = 100$ K winding temperature rise. If a Motor Module with a higher rating is used, you must check whether the specified power cable can be connected to it.

⁶⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C under continuous operating conditions at an ambient air temperature of 40 °C (104 °F), designed for I_0 (100 K), PVC/PUR-insulated cable.

⁷⁾ With default setting of the pulse frequency.

⁸⁾ $P_{calc} [kW] = \frac{M_0 [Nm] \times \eta_{rated}}{9550}$ $P_{calc} [HP] = \frac{M_0 [lb_f-in] \times \eta_{rated}}{63000}$

Notes on water cooling:

- Inlet temperature of cooling water: 30 °C (86 °F) max.
- Cooling water throughput: At least 5 l/min
(5 l = 1.1 British gallons/1.32 US gallons)
- Pressure at motor inlet: $p_{max} = 3$ bar
- Cooling water connection: G 3/8"
- Coolant: Water with up to 25% corrosion protection
(recommendation: Tyfocor)
- Loss of pressure between inlet and outlet < 0.1 bar

¹⁾ Delivered as standard with water connection on top.

²⁾ Water connection on right side: Add **-Z** + order code **Q20** to order number
Water connection on left side: Add **-Z** + order code **Q21** to order number
Water connection at bottom: Add **-Z** + order code **Q22** to order number.

³⁾ Same flange as for IM B5 type, but with metric threaded insert in the four fixing holes.

⁴⁾ With the specified Motor Module, the motor cannot be fully utilized with M_0 at $\Delta T = 100$ K winding temperature rise. If a Motor Module with a higher rating is used, you must check whether the specified power cable can be connected to it.

⁵⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C under continuous operating conditions at an ambient air temperature of 40 °C (104 °F), designed for I_0 (100 K), PVC/PUR-insulated cable.

⁶⁾ With default setting of the pulse frequency.

⁷⁾ $P_{calc} [kW] = \frac{M_0 [Nm] \times \eta_{rated}}{9550}$ $P_{calc} [HP] = \frac{M_0 [lb_f-in] \times \eta_{rated}}{63000}$

Notes on water cooling

- Inlet temperature of cooling water: 30 °C (86 °F) max.
- Cooling water throughput: At least 8 l/min
(8 l = 1.76 British gallons/2.11 US gallons)
- Pressure at motor inlet: $p_{max} = 6$ bar
- Cooling water connection: G 3/8"
- Coolant: Water with up to 25% corrosion protection
(recommendation: Tyfocor)
- Loss of pressure between inlet and outlet < 0.1 bar

¹⁾ With the specified Motor Module, the motor can only be utilized for a short time after M_0 .

²⁾ Terminal box type: gk 630

³⁾ With default setting of the pulse frequency.

⁴⁾ $P_{calc} [kW] = \frac{M_0 [Nm] \times n_{rated}}{9550}$ $P_{calc} [HP] = \frac{M_0 [lb_f-in] \times n_{rated}}{63000}$

Synchronous motors

Feed motors for SINAMICS S120

1FT7 Compact motors

Overview

The new 1FT7 Compact motors are permanent-magnet-excited synchronous motors with very compact dimensions and an optically attractive design. Due to the well proven cross-profile, quick and easy mounting of the motors is possible.

The 1FT7 Compact motors fulfill the highest demands on dynamic performance, speed setting range including field weakening, shaft and flange accuracy. They are equipped with state-of-the-art encoder technology and optimized for operation on our fully digital drive and control systems.

Benefits

- High shaft and flange accuracy
- Low torque ripple (average value <1%)
- High dynamic performance
- High overload capability (up to $4 \times M_0$)
- Compact design
- High degree of protection
- Rugged, vibration-isolated encoder mounting
- Easy encoder replacement on site without alignment
- Quick and easy mounting due to cross-profile
- Rotatable connectors
- New flange type with recessed flange surface, especially suitable for toothed-belt output and vertical assembly (IM V1). The previous flange design, compatible with the 1FT6 motors, can be ordered as an option.

Application

- High-performance machine tools
- Machines with stringent requirements in terms of dynamic response and precision, such as packaging machines, foil extractor machines, printing machines and handling equipment

Synchronous motors

Feed motors for SINAMICS S120

1FT7 Compact motors

Technical specifications

Product name	1FT7 Compact motor
Type of motor	Permanent-magnet-excited synchronous motor
Magnet material	Rare-earth magnet material
Cooling	Natural cooling
Temperature monitoring	KTY 84 temperature sensor in the stator winding
Insulation of the stator winding in accordance with EN 60034-1 (IEC 60034-1)	Temperature class 155 (F) for a winding temperature of $\Delta T = 100 \text{ K}$ at an ambient temperature of 40 °C (104 °F)
Type in accordance with EN 60034-7 (IEC 60034-7)	IM B5 (IM V1, IM V3) with flange 0
Degree of protection in accordance with EN 60034-5 (IEC 60034-5)	IP65
Shaft extension on the drive end in accordance with DIN 748-3 (IEC 60072-1)	Plain shaft
Shaft and flange accuracy in accordance with DIN 42955 (IEC 60072-1)¹⁾	Tolerance N
Vibration magnitude in accordance with EN 60034-14 (IEC 60034-14)	Grade A is observed up to rated speed
Sound pressure level in accordance with EN ISO 1680, max. • 1FK703: • 1FT704 ... 1FT706: • 1FT708 ... 1FT710:	60 dB (A) 65 dB (A) 70 dB (A)
Encoder systems, built-in, for motors without DRIVE-CLiQ interface	• Incremental encoder sin/cos 1 V_{pp} 2048 S/R • Absolute encoder, multi-turn, 2048 S/R (traversing range 4096 revolutions) with EnDat interface
Encoder systems, built-in, for motors with DRIVE-CLiQ interface	• Incremental encoder 22 bit (2048 S/R internal) • Absolute encoder 22 bit single-turn (2048 S/R internal) + 12 bit multi-turn (traversing range 4096 revolutions)
Connection	Connectors for signals and power can be rotated up to 270°
Paint finish	Pearl dark grey (RAL 9023)
2nd rating plate	Enclosed separately
Options	• Type IM B5 (IM V1, IM V3) with flange 1 (compatible with 1FT6) • Shaft extension on the drive end with fitted key and keyway (half-key balancing) • Built-in holding brake • Degree of protection IP64, IP67 • Shaft and flange accuracy Tolerance R

S/R = signals/revolution

¹⁾ Shaft extension run-out, concentricity of spigot and shaft and perpendicularity of mounting face of flange to shaft.

Synchronous motors

Feed motors for SINAMICS S120

1FK7 motors

Overview

1FK7 motors are extremely compact, permanent-magnet-excited synchronous motors. The available options, gearboxes and encoders, together with the expanded product range, mean that 1FK7 motors can be optimally adapted to any application. They therefore also satisfy the permanently increasing demands of state-of-the-art machine generations.

1FK7 motors can be combined with the SINAMICS S120 drive system to create a powerful system with high functionality. The integrated encoder systems for speed and position control can be selected depending on the application.

The motors are designed for operation without external cooling and the heat is dissipated through the motor surface. 1FK7 motors have a high overload capability.

Benefits

1FK7 Compact motors offer:

- Space-saving installation thanks to extremely high power density
- Can be used universally for many applications
- Wide range of motors

1FK7 High Dynamic motors offer:

- Extremely high dynamic response due to low rotor moment of inertia

Application

- Machine tools
- Robots and handling systems
- Wood, glass, ceramics and stone working
- Packaging, plastics and textile machines
- Auxiliary axes

Synchronous motors

Feed motors for SINAMICS S120

1FK7 motors

Technical specifications

Product name	1FK7 Compact motor 1FK7 High Dynamic motor
Type of motor	Permanent-magnet-excited synchronous motor
Magnet material	Rare-earth magnet material
Cooling	Natural cooling
Temperature monitoring	KTY 84 temperature sensor in stator winding
Insulation of the stator winding in accordance with EN 60034-1 (IEC 60034-1)	Temperature class 155 (F) for a winding temperature rise of $\Delta T = 100$ K at an ambient temperature of 40 °C (104 °F)
Type in accordance with EN 60034-7 (IEC 60034-7)	IM B5 (IM V1, IM V3)
Degree of protection in accordance with EN 60034-5 (IEC 60034-5)	IP64
Shaft extension on the drive end in accordance with DIN 748-3 (IEC 60072-1)	Plain shaft
Shaft and flange accuracy in accordance with DIN 42955 (IEC 60072-1)¹⁾	Tolerance N
Vibration magnitude in accordance with EN 60034-14 (IEC 60034-14)	Grade A is observed up to rated speed
Sound pressure level in accordance with EN ISO 1680, max.	
• 1FK701 ... 1FK704:	55 dB (A)
• 1FK706:	65 dB (A)
• 1FK708 ... 1FK710:	70 dB (A)
Encoder systems, built-in for motors without DRIVE-CLiQ interface	• Incremental encoder sin/cos 1 V_{pp} 2048 S/R • Absolute encoder, multi-turn (traversing range 4096 revolutions) with EnDat interface 1FK704 ... 1FK710: 2048 S/R 1FK701 ... 1FK703: 512 S/R 1FK704 ... 1FK710: 32 S/R 1FK701 ... 1FK703: 16 S/R • Multi-pole resolver (number of poles corresponds to number of pole pairs of the motor) • 2-pole resolver

Encoder systems, built-in for motors with DRIVE-CLiQ interface

- Incremental encoder 22 bit (2048 S/R internal)
- Absolute encoder single-turn + 12 bit multi-turn (traversing range 4096 revolutions)
1FK704 ... 1FK710: 22 bit single-turn (2048 S/R internal)
1FK701 ... 1FK703: 20 bit single-turn (512 S/R internal)
1FK704 ... 1FK710: 16 bit single-turn (32 S/R internal)
1FK701 ... 1FK703: 15 bit single-turn (16 S/R internal)
- 15 bit resolver
- 14 bit resolver

Connection	Connectors for signals and power can be rotated (270°)
Paint finish	Unpainted
2nd rating plate	Attached in the NDE cover
3rd rating plate	Enclosed separately
Options²⁾	• Shaft extension on the drive end with fitted key and keyway (half-key balancing) • Built-in holding brake • Degree of protection IP65, plus DE flange IP67 • Planetary gearbox, built-on (requires: plain shaft extension, degree of protection IP64 for LP+ and IP65 for SP+) • Anthracite paint finish

S/R = signals/revolution

¹⁾ Shaft extension run-out, concentricity of spigot and shaft and perpendicularity of mounting face of flange to shaft.

²⁾ 1FK701 only available in degree of protection IP54 and anthracite paint finish, separately packed rating plate, planetary gearbox not available.

Without brake cores With brake cores							C D
For length code as well as power and signal cables, see Connection system MOTION-CONNECT.							

¹⁾ If the absolute encoder is used, M_{rated} is reduced by 10%.

²⁾ This power cable is fitted with a connector with M17 thread at the motor end and brake cores as standard (4 x 1.5 mm² + 2 x 1.5 mm²).

³⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C under continuous operating conditions at an ambient air temperature of 40 °C (104 °F), designed for I_0 (100 K), PVC/PUR-insulated cable.

⁴⁾ Motors with shaft height 20 are not available with a DRIVE-CLiQ interface. The encoder systems are connected via the SMC (Sensor Module Cabinet-Mounted).

⁵⁾ With default setting of the pulse frequency.

⁶⁾ $P_{\text{calc}} [\text{kW}] = \frac{M_0 [\text{Nm}] \times n_{\text{rated}}}{9550}$ $P_{\text{calc}} [\text{HP}] = \frac{M_0 [\text{lb}_f\text{-in}] \times n_{\text{rated}}}{63000}$

Synchronous motors

Gearboxes

Series SP+ planetary gearbox for 1FT6 motors

Overview

1FT6 motors can be combined with planetary gearboxes to form compact coaxial drive units. The gearboxes are flanged directly to the drive end of the motors.

When selecting the gearboxes, ensure that the permissible speed of the gearbox is not exceeded by the maximum speed of the motor. In the case of high operating frequencies, allowance must be made for the factor f_2 (see Configuration Manual for synchronous motors). The frictional losses of the gearbox must always be taken into account in planning.

The gearboxes are only available in non-balanced design.

Benefits

- High efficiency
Single-stage: > 97%
Two-stage: > 94%
- Minimum torsional backlash
Single-stage: ≤ 4 arcmin
Two-stage: ≤ 6 arcmin
- Power transmission from the central sun wheel via planet wheels
- No shaft deflections in the planet wheel set due to symmetrical force distribution
- Very low moment of inertia and hence short acceleration times of the motors
- Output shaft bearings dimensioned for high lateral and axial loads with preloaded tapered-roller bearings
- The gearboxes are connected to the motor shaft via an integrated clamping hub. A plain motor shaft extension is necessary for this purpose. Shaft and flange accuracy tolerance N in accordance with DIN 42955 and vibration magnitude grade A in accordance with EN 60034-14 are sufficient. The motor flange is adapted by means of adapter plates.
- Output shaft of gearbox exactly coaxial with the motor
- The gearboxes are enclosed (seal between gearbox and motor) and filled with oil at the factory. They are lubricated and sealed for their service life. Gearboxes of frame sizes SP 060S to SP 180S are suitable for all mounting positions. The oil filling quantity for gearboxes of frame sizes SP 210 and SP 240 depends on the mounting position. The mounting position has to be specified when ordering.
- Degree of protection of gearbox: IP65 (IP64 for frame sizes SP 210/SP 240)
- Small dimensions
- Low weight

Synchronous motor with mounted planetary gearbox series SP+

Integration

1FT602 and 1FT613 motors can be supplied ex works (Siemens AG) complete with flange-mounted planetary gearbox.

The gearboxes assigned to the individual motors and gear ratios i available for these motor/gearbox combinations are listed in the selection table. When making a selection, account must be taken of the maximum permissible input speed of the gearbox (this is the same as the maximum motor speed).

The motor/gearbox combinations listed in the selection tables are mainly intended for cycle operation S3-60% (ON time ≤ 60% and ≤ 20 min). Reduced maximum motor speeds and output torques apply for use in S1 continuous duty (ON time > 60% or > 20 min). The gearbox temperature must not exceed 90 °C (194 °F).

Follow the instructions contained in the Configuration Manual for synchronous motors when assigning gearboxes to the motor.

1FT6 motors must be designed with plain motor shaft extension, shaft and flange accuracy tolerance N and vibration magnitude grade A/degree of protection IP65 (for 1FT602: IP64) for mounting onto the gearbox.

¹⁾ The limit values in the table apply for S1 continuous duty (ON time > 60% or > 20 min) for a maximum gearbox temperature of 90 °C (194 °F).

Synchronous motors

Gearboxes

Series SP+ planetary gearbox for 1FK7 motors

Overview

1FK7 motors can be combined with planetary gearboxes to form compact coaxial drive units. The gearboxes are flanged directly to the drive end of the motors.

When selecting the gearboxes, ensure that the permissible speed of the gearbox is not exceeded by the maximum speed of the motor. In the case of high operating frequencies, allowance must be made for the factor f_2 (see Configuration Manual for synchronous motors). The frictional losses of the gearbox must always be taken into account in planning.

The gearboxes are only available in non-balanced design.

Benefits

- High efficiency
Single-stage: > 97%
Two-stage: > 94%
- Minimum torsional backlash
Single-stage: ≤ 4 arcmin,
two-stage: ≤ 6 arcmin
- Power transmission from the central sun wheel via planet wheels
- No shaft deflections in the planet wheel set due to symmetrical force distribution
- Very low moment of inertia and hence short acceleration times of the motors
- Output shaft bearings dimensioned for high lateral and axial loads with preloaded tapered-roller bearings
- The gearboxes are connected to the motor shaft via an integrated clamping hub. A plain motor shaft extension is necessary for this purpose. Shaft and flange accuracy tolerance N in accordance with DIN 42955 and vibration magnitude grade A in accordance with EN 60034-14 are sufficient. The motor flange is adapted by means of adapter plates.
- Output shaft of gearbox exactly coaxial with the motor
- The gearboxes are enclosed (seal between gearbox and motor) and filled with oil at the factory. They are lubricated and sealed for their service life. Gearboxes of frame sizes SP 060S to SP 180S are suitable for all mounting positions. The oil filling quantity for gearboxes of frame sizes SP 210 and SP 240 depends on the mounting position. The mounting position has to be specified when ordering.
- Degree of protection of gearbox: IP65 (IP64 for frame sizes SP 210/SP 240)
- Small dimensions
- Low weight

Synchronous motor with mounted planetary gearbox series SP+

Integration

1FK702 to 1FK710 motors can be supplied ex works (Siemens AG) complete with flange-mounted planetary gearbox.

The gearboxes assigned to the individual motors and gear ratios i available for these motor/gearbox combinations are listed in the selection table. When making a selection, account must be taken of the maximum permissible input speed of the gearbox (this is the same as the maximum motor speed).

The motor/gearbox combinations listed in the selection tables are mainly intended for cycle operation S3-60% (ON time ≤ 60% and ≤ 20 min). Reduced maximum motor speeds and output torques apply for use in S1 continuous duty (ON time > 60% or > 20 min). The gearbox temperature must not exceed 90 °C (194 °F).

Follow the instructions contained in the Configuration Manual for synchronous motors when assigning gearboxes to the motor.

1FK7 motors must be designed with plain motor shaft extension/shaft and flange accuracy tolerance N, degree of protection IP65 and anthracite paint finish for mounting onto the gearbox.

Synchronous motors

Gearboxes

Series LP+ planetary gearbox for 1FK7 motors

Overview

1FK7 motors can easily be combined with planetary gearboxes to form compact coaxial drive units. The gearboxes are flanged directly to the drive end of the motors.

When selecting the gearboxes, ensure that the permissible speed of the gearbox is not exceeded by the maximum speed of the motor. In the case of high operating frequencies, allowance must be made for the factor f_2 (see Configuration Manual for synchronous motors). The frictional losses of the gearbox must always be taken into account in planning.

The gearboxes are only available in non-balanced design and with fitted key.

Benefits

- High efficiency, single-stage: > 97%
- Torsional backlash, single-stage: ≤ 12 arcmin
- Power transmission from the central sun wheel via planet wheels
- No shaft deflections in the planet wheel set due to symmetrical force distribution
- The gearboxes are connected to the motor shaft via an integrated clamping hub. A plain motor shaft extension is necessary for this purpose. Shaft and flange accuracy tolerance N in accordance with DIN 42955 and vibration magnitude grade A in accordance with EN 60034-14 are sufficient. The motor flange is adapted by means of adapter plates.
- Output shaft of gearbox exactly coaxial with the motor
- The gearboxes are enclosed (seal between gearbox and motor) and filled with grease at the factory. They are lubricated and sealed for their service life
- Degree of protection of gearbox: IP64
- Small dimensions
- Low weight

Synchronous motor with mounted planetary gearbox series LP+

Integration

1FK702 to 1FK710 motors can be supplied ex works (Siemens AG) complete with flange-mounted planetary gearbox.

The gearboxes assigned to the individual motors and gear ratios i available for these motor/gearbox combinations are listed in the selection table. When making a selection, account must be taken of the maximum permissible input speed of the gearbox (this is the same as the maximum motor speed).

The motor/gearbox combinations listed in the selection table are mainly intended for cycle operation S3-60% (ON time $\leq 60\%$ and ≤ 20 min). Reduced maximum motor speeds and output torques apply for use in S1 continuous duty (ON time > 60% or > 20 min). The gearbox temperature must not exceed 90 °C (194 °F).

Follow the instructions contained in the Configuration Manual for synchronous motors when assigning gearboxes to the motor.

1FK7 motors must be designed with plain motor shaft extension/ shaft and flange accuracy tolerance N, degree of protection IP64 and anthracite paint finish for mounting onto the gearbox.

Geared motors

1FK7-DYA compact geared motors

Overview

The 1FK7-DYA compact geared motor combines electrical and mechanical components in the smallest space possible. This mechatronic unit consists of a permanent-magnet-excited synchronous motor and a directly mounted single-stage planetary gearbox.

The 1FK7-DYA compact geared motors with degree of protection IP64 are designed for operation without external cooling as the heat is dissipated over the motor surface. The integrated planetary gearboxes have high maximum torques and permit high radial and axial forces at the shaft extension.

1FK7-DYA compact geared motors can be combined with the SINAMICS S120 drive system to create a powerful system with high functionality. The integrated encoder system for speed and position control can be selected depending on the application.

Benefits

- Space-saving installation due to the high power density of the motor and integration of the planetary gearbox directly into the motor end shield. This greatly simplifies gear mounting on the machine and reduces logistics to a minimum.
- Highly dynamic due to lower motor moment of inertia; this means shorter cycle times.
- Maintenance-free
- Suitable for S1 continuous duty
- High positioning accuracy thanks to low mechanical torsional backlash of <8 arcmin
- Mechanical compatibility with regard to IM B14 flange and shaft extension for the LP+ planetary gearbox

Application

In general mechanical engineering, wherever coaxial drive units are used, such as in

- Packaging machinery
- Wood, glass and ceramic working machines
- Plastic injection molding and foil stretching machines
- Handling systems
- Machine tools
- All kinds of auxiliary axes

³⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C under continuous operating conditions at an ambient air temperature of 40 °C (104 °F), designed for I_0 (100 K), PVC/PUR-insulated cable.

⁴⁾ With default setting of the pulse frequency.

Synchronous motors

Linear motors for SINAMICS S120

1FN3 linear motors Water cooling

Overview

In combination with the SINAMICS S120 drive system, 1FN3 linear motors provide an optimally tuned linear direct drive system for the requirements of modern mechanical engineering.

The motors comprise a primary section and a secondary section with magnets made of rare-earth material. The primary section has fixed dimensions, while the secondary section is made up of individual elements (segments) to suit the required traversing range. Through parallel operation of the motors, feedrate force and length can be scaled beyond the available spectrum.

Benefits

- Outstanding dynamic response and very high traversing velocity
- Excellent precision
- Easy installation
- Drive components are free of wear thanks to contactless drive force transmission

The main advantage of linear direct drive technology is the extensive avoidance of the effects of elasticity, play, and friction, as well as natural oscillation in the drive train. This results in a higher dynamic response and increased precision. If suitable measuring systems are used and the temperature conditions are appropriate, the motors can be positioned in the nanometer range.

Design

The simple mechanical construction without transmission elements, such as ballscrew, coupling or belt, enhances the reliability of the drive components.

Heat loss occurs almost exclusively in the primary section and is dissipated via an integrated liquid cooling system. The optional Thermo-Sandwich dual-circuit cooling system permits both a thermal decoupling of the motor from the machine, and also a low-priced cooling design.

The stainless metal encapsulation of the primary section ensures the high mechanical ruggedness and resistance to soiling required for use in machine tools, as well as high resistance to corrosive liquids. In addition, the motor places minimal demands on the preparation of mounting surfaces thanks to the large air gap. The mounting tolerances for the air gap are ± 0.3 mm (0.012 in).

Design variants

1FN linear motors are available as single-sided or double-sided motors.

- **Single-sided motors**
The single-sided version consists of a primary section that is mounted parallel to the associated secondary section.
- **Double-sided motors**
The special secondary section of the double-sided version lies between two primary sections (one primary section with standard winding and one with complementary winding). The design as a double-sided motor is particularly suitable for applications with movable secondary section and small traversing paths with fast acceleration (e.g. non-circular machining).

Application

Version for peak load

Used in machine axes that are temporarily accelerated (e.g. S3 duty) or when large forces are required for a short time.

Typical applications:

- High-dynamic and flexible machine tool construction
- Laser machining
- Handling

Version for continuous load

Used in machine axes with constant acceleration changes (e.g. S1 duty), with high process/weight forces or for operation without water cooling.

Typical applications:

- Grinding
- Non-circular machining (e.g. oscillating applications)
- Z-axes without weight compensation, quills
- Handling, Cartesian robots

Synchronous motors

Linear motors for SINAMICS S120

1FN3 linear motors
Water cooling

Technical specifications

Product name	1FN3 linear motors	
	Peak load	Continuous load
Type of motor	Permanent-magnet-excited synchronous linear motor	
Magnet material	Rare-earth magnet material	
Insulation of stator winding in accordance with EN (IEC) 60034-1	Temperature class 155 (F) for a winding temperature of 120 °C (248 °F)	
Overload ratio ($F_{MAX}:F_{rated}$) up to max.	2.75	1.7
Degree of protection in accordance with EN 60034-5 (IEC 60034-5)	IP65	
Type of cooling	Water cooling	
Water cooler connections	G 1/8 internal thread on all primary and secondary section coolers	
Temperature influence on surrounding construction with precision cooling, max.	+4 K	
Coolant inlet temperature, permissible	35 °C (95 °F) (avoid condensation) > 35 °C (95 °F) on reduction of rated motor power	
Temperature monitoring integrated in the primary section winding	2 monitoring circuits (Temp-S with PTC thermistor) and Temp-F with KTY 84 temperature sensor (for 1FN3050, Temp-S only) Evaluation via Sensor Module External SME120/SME125 ¹⁾	
Available configurations	Different gradations due to modular construction	
Secondary section cover	Exchangeable through all segments or segment by segment	
2nd rating plate	Enclosed separately	
Recommended measuring systems	See Overview of measuring systems	
Type of connection	Prepared for separate connection of the power and signal cable	

The 1FN3 linear motors have an overload range available for acceleration processes. The maximum force F_{MAX} can only be utilized up to a maximum velocity $v_{MAX}(F_{MAX})$; up to velocity $v_{MAX}(F_{rated})$, only the feedrate force F_{rated} is available.

¹⁾ For SME120/SME125, see SINAMICS S120 drive system.

Type of connection:

Frame sizes 1FN3100 to 1FN3900

Connection cover prepared for separate power and signal cables

Frame size 1FN3050

Permanently connected power and signal cables with open core ends
Length: 2 m (6.56 ft)

Frame size 1FN3050

Permanently connected power and signal cables pre-assembled,
with connectors
Length: 0.5 m (1.64 ft)

Designation	Order No.
Pre-assembled signal cable with M17 connector	
• 1FN3100/1FN3150 motors	6FX7002-2SL01-....
• 1FN3300 to 1FN3900 motors	6FX7002-2SL02-....

¹⁾ For water cooling with inlet temperature 35 °C (95 °F).

²⁾ A reduction of up to 30% must be expected in case of motor standstill, at very low speeds, or with very short traverse paths.

³⁾ Velocity values refer to a converter DC link voltage of 600 V DC.

⁴⁾ No precision cooler available.

⁵⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C, Table 5, under continuous operating conditions at an ambient air temperature of 40 °C (104 °F).

⁶⁾ Permanently connected power and signal cables, length 2 m (6.56 ft), with open core ends:

⁷⁾ Permanently connected power and signal cables, length 0.5 m (1.64 ft), with power connector size 1 or M17 connector.

Cooling: Internal air cooling External air cooling					0 1				
Motor Module: Single Motor Module Double Motor Module					1 2				
For length code as well as power and signal cables, see Connection system MOTION-CONNECT.									

Designation	Order No.
Pre-assembled signal cable with M17 connector	
• 1FN3100/1FN3150 motors	6FX7002-2SL01-....
• 1FN3300 to 1FN3900 motors	6FX7002-2SL02-....

⁴⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C, Table 5, under continuous operating conditions at an ambient air temperature of 40 °C (104 °F).

⁵⁾ Sold by the meter only (4 x 16 mm²). Connected to primary section with 16 mm² (< 1.5 m (4.92 ft)) then routed onwards through terminal box with 25 mm².

⁶⁾ Sold by the meter only (4 x 25 mm²).

Type of connection:

Frame sizes 1FN3100 to 1FN3900

Connection cover prepared for separate power and signal cables

Frame size 1FN3050

Permanently connected power and signal cables with open core ends

Length: 2 m (6.56 ft)

Frame size 1FN3050

Permanently connected power and signal cables pre-assembled, with connectors

Length: 0.5 m (1.64 ft)

B

E

F

¹⁾ For water cooling with inlet temperature 35 °C (95 °F).

²⁾ A reduction of up to 30% must be expected in case of motor standstill, at very low speeds, or with very short traverse paths.

³⁾ Velocity values refer to a converter DC link voltage of 600 V DC.

- ³⁾ Frame sizes 1FN3050 to 1FN3450:
2 units per secondary section track.
1FN3600 to 1FN3900:
3 units per secondary section track.
The maximal available length of a single-part heat-sink profile is 3 m (9.84 ft).
For the following frame sizes, this corresponds to:
1FN3050 to 1FN3150, a maximum of 24 secondary sections (AB to CE)
1FN3300 to 1FN3900, a maximum of 16 secondary sections (AB to BG).

- ⁴⁾ Available only in length AC (equals 2 secondary sections). The difference in the secondary section track length must be compensated through assembly with the heatsink profile 1FN300.-0TK04-1..0.

Synchronous motors

Linear motors for SINAMICS S120

1FN3 linear motors Hall-effect sensor box

Overview

The motor position can be identified with an incremental linear measuring system using an additional hall-effect sensor box, or also motion-based if certain supplementary conditions are taken into account.

1FN3 linear motors Connector box

Overview

A connector box is required to connect a hall-effect sensor box (option).

For design of the coolers, see Configuration Manual (see documentation for Order No.).

Synchronous motors

Torque motors for SINAMICS S120

1FW6 standard type built-in torque motors Water cooling

Overview

1FW6 built-in torque motors are liquid-cooled, multi-pole permanent-magnet-excited AC synchronous motors with hollow-shaft rotor. The 1FW6 motors are supplied as built-in components that are held together in the delivered state by transport locks. For a complete drive unit, an additional bearing and shaft encoder are required.

Each frame size is available in different axis lengths. The stator and rotor are equipped with flanges at each end with centering surfaces and threaded holes for installation in the machine.

Please note that when 1FW6 direct motors (torque motors) are used in fork heads for machine tools or robots, a license for US patent US5584621 and the associated international patent protection may be required.

Benefits

- No elasticity in the drive train
- High availability, since there are no gear components subject to wear in the drive train
- High torque, compact design and low construction volume
- Low moment of inertia
- Direct coupling to the machine using flanges

Application

In conjunction with the SINAMICS S120 drive system, the built-in torque motors can be used as direct drive for the following machine applications:

- Rotary indexing machines, rotary tables, swivel axes
- Rotary axes (A, B, C axis in 5-axis machine tools)
- Turret indexing and cylinder indexing for single-spindle and multi-spindle machines
- Dynamic tool magazines
- Rotating spindles in milling machines
- Roller and cylinder drives
- Infeed and handling axes

Design

The 1FW6 built-in torque motor comprises the following components:

Stator

Iron core with a 3-phase AC winding. To improve dissipation of the heat loss, the motor can be force-cooled by means of a liquid cooler (main cooler).

Rotor

Cylindrical hollow shaft made of steel with permanent magnets fixed to the circumference.

If the main cooler and precision cooler are used together in a heat exchanger, a cooling connection adapter (accessory) can be ordered separately for simpler connection.

Cooler types

The design of the cooler system is dependent on the size (external diameter) of the motor.

1FW6 motor Type	Type of cooling
1FW6090/1FW6130	Jacket cooling
1FW6160 to 1FW6290	Integrated cooling

Synchronous motors

Torque motors for SINAMICS S120

1FW6 standard type built-in torque motors
Water cooling

Design (continued)

Motors with jacket cooling

The coolant inlet and outlet must be provided by the machine manufacturer in the surrounding construction.

Motor components of sizes 1FW6090/1FW6130 with jacket cooling (rotor, stator)

Motors with integrated cooling

These motors feature a ready-to-connect, integrated dual-circuit cooling system and are therefore thermally insulated against the mechanical axis construction to a considerable extent.

Motor components of sizes 1FW6160 to 1FW6290 with integrated cooling (rotor, stator)

Integration

The 1FW6 motors which must be fed from the SINAMICS S120 drive system are designed for operation on a 600 V DC-link voltage level and require a sinusoidal current.

The cable connection is brought out of the front face of the stator and the free cable end must be connected to a terminal box provided by the machine manufacturer. The length of the power and signal cables from the motor to the drive system must not exceed 50 m (164 ft).

Technical specifications

Product name	1FW6 built-in torque motors
Type of motor	Synchronous motor with permanent magnet rotor, multi-pole (number of rotor poles 44 ... 98)
Torque ripple	$\leq 1.5\% M_0$
Insulation of the stator winding in accordance with EN 60034-1 (IEC 60034-1)	Temperature class 155 (F)
Type	Individual components: Stator, rotor
Degree of protection in accordance with IEC 60034-5	IP23 The final degree of protection (minimum degree of protection is IP54) for the installed motor is determined by the machine manufacturer. Protection against touch, foreign bodies and water for electrical equipment is specified in accordance with IEC 60034-5.
Coolant inlet temperature, max.	35 °C (95 °F)
Pressure in cooling circuit, max.	10 bar (static)
Temperature monitoring	2 x PTC thermistor drilled hole with response threshold 130/150 °C (266/302 °F) (in accordance with DIN 44081/44082) and 1 x KTY84 thermistor (in accordance with IEC 60034-11) in the stator. Evaluation via Sensor Module External SME120/SME125. ¹⁾
Paint finish	Unpainted
Encoder system (not included in scope of supply)	The encoder must be selected according to the mechanical and converter-specific boundary conditions.
Connection, electrical	Permanently connected power and signal cables

¹⁾ For SME120/SME125, see SINAMICS S120 drive system.

¹⁾ Torque and current at low speeds.

²⁾ The values refer to a supply voltage of 400 V 3 AC ±10% (converter DC link voltage 600 V DC).

³⁾ In case of water cooling with inlet temperature of 35 °C (95 °F) and maximum rotor flange temperature of 60 °C (140 °F).

⁴⁾ Selection optimized to size of power module. The next higher power module offers 100% torque utilization.

⁵⁾ Permanently connected power and signal cables.

⁶⁾ The current carrying capacity of the power cables complies with IEC 60204-1 for installation type C, Table 5, under continuous operating conditions at an ambient air temperature of 40 °C (104 °F).

Synchronous motors

Main spindle motors for SINAMICS S120

1FE1 standard type built-in motors Water cooling

Overview

The 1FE1 built-in motors are water-cooled, synchronous motors that are supplied as stator and rotor components. When the rotor has been mounted to the spindle in the spindle box, a complete spindle unit is created.

Benefits

- Compact design (e. g. for turning machines and vertical milling machines) by dispensing with mechanical components, such as motor switch armature, belt drive, gearbox and spindle encoder
- High power density thanks to water cooling
- Maximum speed up to 40000 rpm, torque up to 820 Nm for S1 duty
- Higher torque - up to 60% - with the same active component volume, consequently more compact machine design compared to 1PH2
- Extremely short ramp-up and braking times (50%) thanks to higher torque compared to 1PH2
- Cold rotor due to excitation using permanent magnets, this means significantly less power loss in the rotor in the lower speed range and therefore less bearing heating and spindle expansion
- The stator and rotor are **ready to install**, no finishing is necessary.
- The absence of drive transverse forces permits extremely high accuracy on the workpiece thanks to smooth, accurate spindle motion even at very low speeds.
- Larger rotor inner bore than squirrel-cage rotor of asynchronous motors, but with the same outer diameter, which is an advantage with regard to the bar capacity of automatic turning machines and results in higher spindle stiffness due to larger shaft diameters for milling spindles.
- Increased rigidity of the spindle drive achieved by mounting the motor components between the spindle main bearings
- Less cooling capacity required for the same power compared to 1PH2, i. e. greater efficiency
- Only one encoder (hollow-shaft measuring system) for sensing motor speed and spindle position
- Simple servicing by replacing complete motor spindles

Benefits (continued)

- Compatible system of SINUMERIK, SINAMICS and motor, therefore fast commissioning is ensured
- Higher machine productivity:
The permanent-magnet-excited motor spindles (PE spindles) increase the power density and economic efficiency of CNC machines. The optimized combination of 1FE1 built-in motor, drive control and CNC offers further opportunities for rationalization, such as lower workpiece machining times and fewer clamping faces.

Application

The 1FE1 built-in water-cooled synchronous motors are used in combination with the SINAMICS drive system where there is a requirement for

- excellent machining quality, accuracy and running smoothness, and
- very short ramp-up times.

The 1FE1 built-in motors are offered in two main versions:

- **High-Torque series**
6-pole/8-pole synchronous motors are available that have been developed for turning and grinding machines with moderate maximum speeds.
These motors are characterized by an extremely high torque utilization. In this case, the speed range is approximately 1:2.
- **High-Speed series**
In this series, 4-pole synchronous motors are available for milling. These motors are optimized for high maximum speeds and a speed range of over 1:4. A voltage limitation module is required for these motors when they are operated up to the maximum speed.

Design

The 1FE1 built-in motor comprises:

- A laminated, permanently excited rotor, which, as an option, can be designed with a sleeve for simple mounting and removal.
- A wound stator core with cooling jacket and encapsulated winding overhang.
 - Free cable ends of 0.5 m/1.5 m (1.64 ft/4.92 ft)
 - Two integral PTC thermistors (incl. 1 spare), optionally with full or universal protection
 - A cooling jacket into which the stator has been inserted

Rotor with sleeve

Torque is transmitted to the spindle mechanically without play by means of a cylindrical stepped press fit. The rotor is mounted on the spindle by thermal shrinking.

The rotor with sleeve is pre-balanced and can be removed and subsequently remounted. The bond can be released by pressure-oil injection without affecting the joint surfaces.

Rotor without sleeve

Torque is transmitted to the spindle mechanically without play by means of a cylindrical stepped press fit. The rotor is mounted on the spindle by thermal shrinking.

Removal of the rotor is not possible with this type of mounting. Rotors without sleeves are not pre-balanced.

Synchronous motors

Main spindle motors for SINAMICS S120

1FE1 standard type built-in motors
Water cooling

Characteristics

Comparison of synchronous/asynchronous spindle

Advantages of 1FE1 synchronous spindle over asynchronous spindle

Comparison of power/speed characteristics

Comparison of torque/speed characteristics

Power/speed and torque/speed characteristics of PE spindles compared to the asynchronous version under the following supplementary conditions: identical active part volume and identical rated current (60 A) of the power section.

Technical specifications

Product name	1FE1 built-in motors
Type of motor	Synchronous spindle with permanent-magnet-excited rotor
Constant power range	1:2 (6-/8-pole) / 1:4 (4-pole)
Insulation of the stator winding in accordance with EN 60034-1 (IEC 60034-1)	Temperature class 155 (F) for a coolant inlet temperature of 25 °C (77 °F)
Type (cf. ISO)	Individual components: Stator, rotor, motor encoder
Degree of protection in accordance with IEC 60034-5	IP00
Recommended coolant inlet temperature, approx.	25 °C (77 °F)
Standard protection – temperature monitoring	2 KTY thermistors in the stator winding, 1 as spare
Full protection optional Application example: processing at motor standstill	In addition to standard protection 3 x PTC thermistor drilling Evaluation possibility e. g. using thermal motor protection: Order No.: 3RN1013-1GW10
Universal protection optional	- Full protection + - NTC PT3-51F - NTC K227
Balance quality of rotor in accordance with ISO 1940-1 • Rotor with sleeve • Rotor without sleeve	Pre-balanced depending on the design, balance quality G 2.5 Reference speed 3600 rpm, or unbalanced for complete balancing after mounting Not pre-balanced
Recommended motor encoder (not included in scope of supply)	Hollow-shaft measuring system SIMAG H2 or L&B GEL 244 for speeds greater than 33,000 rpm
Motor connection	Free cable ends with l = 0.5/1.5 m (1.64 ft/4.92 ft) length

For a list of heat exchanger manufacturers, please refer to Asynchronous motors – Liquid cooling.

¹⁾ Data for $\Delta T = 105$ K, special windings on request.

²⁾ Observe limit for power section.

³⁾ Standard scope of supply: Encapsulated winding with 2xKTY (1 spare).

⁴⁾ Stator without cooling jacket, with impregnated winding on request.

⁵⁾ Ordering spare parts: Stator: 1FE1...-.....-2.W.

⁶⁾ Ordering spare parts: Rotor: 1FE1...-.....-3W..

⁷⁾ Full protection option, application example: Load at motor standstill, external tripping unit required: Order No. 3RN1013-1GW10.

⁸⁾ Universal protection option: Full protection + NTC PT3-51F + NTC K227.

⁹⁾ For moment of inertia with sleeve, see Configuration Manual.

¹⁰⁾ For cable design, see Configuration Manual

¹¹⁾ Power section with integrated VPM available soon.

Note:

Rotors without rotor sleeve "-.A." are supplied without pre-balancing. Rotors with rotor sleeve "-.B./-.C./-.D./-.E." are supplied pre-balanced.

Synchronous motors

Main spindle motors for SINAMICS S120

VPM Voltage Protection Module

Overview

The VPM is used with motors 1FE1...-...1-... and 2SP1 with EMF of $\hat{U} > 800 \text{ V}$ to 2000 V (U_{eff} 570 V to 1400 V) to limit the DC link voltage at the converter in the event of a fault. If the line voltage fails at maximum motor speed or if the drive converter pulses are canceled as a result of the power failure, the synchronous motor regenerates at high voltage back into the DC link.

The VPM detects a DC link voltage that is too high ($> 800 \text{ V DC}$) and short-circuits the three motor supply cables. The power remaining in the motor is converted to heat via the short circuit in the VPM and motor.

The VPM can withstand short-circuit braking a number of times.

Integration

The VPM is only operational in conjunction with SINAMICS S120 and 1FE1/2SP1 motors.

The VPM must be installed between motor and drive system (at a maximum distance from the drive system of 1.5 m (4.92 ft)). 6FX8 shielded motor supply cables must be used in combination with the VPM.

System requirements for operating 1FE1/2SP1 motors:

- SINAMICS S120
- SINUMERIK 840D sl SW version 1.3 and higher

Motor spindles for SINAMICS S120

2SP1 ECS standard type motor spindles Water cooling

Overview

The 2SP1 ECS motor spindle product range comprises compact standard motor spindles for milling machines that can be used as an alternative to belt-driven spindles and can be used both for rough cutting and for precise fine machining.

The 2SP1 motor spindle contains all the classical elements of a motor spindle, such as a tool interface, tool clamping and release mechanism, spindle bearings suitable for absorbing the machining forces, water-cooled drive motor, spindle casing for fixing and sensors for indexing and monitoring tool changeover.

The motorized spindles are available in 2 diameters of 200 mm (7.87 in) (2SP120) and 250 mm (9.84 in) (2SP125) and are offered with different torque and speed graduations to match the respective milling machine family. The motor spindles are ideally matched to the performance levels of SINAMICS S120.

The complete product range of 2SP1 motor spindles was developed in cooperation with and is manufactured at Weiss Spindeltechnologie GmbH.

Benefits

The 2SP1 ECS motor spindles offer the user the following important advantages over conventional belt-driven solutions:

- Compact spindle solution and "everything included" in the spindle box
- Fewer components and easy installation
- Economical standard solution as compared with today's belt-driven solutions
- Drive train with high degree of rigidity
- High torque and speed and therefore high productivity thanks to high cutting efficiency and reduction of non-productive time
- Higher speed and shorter start-up times as compared with conventional belt-driven or gear solutions
- Economical pneumatic tool release mechanism or optional fast hydraulic tool release mechanism
- Worldwide system delivery including spindle mechanics from a single source – from Siemens
- Extremely short tool change times with 2SP210 thanks to 2-channel technology and clamping set with optional latching capability

Application

The main application area for 2SP1 ECS motor spindles are main spindles for simple milling machines and machining centers in the job shop area of the machine tools sector.

The 2SP120 motor spindles are particularly suitable for the area of light metal machining at low torque and high speeds.

The 2SP125 motor spindles are characterized by a high torque. The main area of application is in the machining of steel and castings.

Design

The 2SP1 ECS motor spindles are characterized by a rugged design.

Depending on the version, the following options are available for 2SP1 ECS motor spindles:

- Various tool interfaces
- Internal tool cooling
- External tool cooling

Synchronous motors

Motor spindles for SINAMICS S120

2SP1 ECS standard type motor spindles
Water cooling

Integration

The 2SP1 ECS motor spindle can generally be used with:

- SINAMICS S120
- SINUMERIK 802D sl
- SINUMERIK 840Di sl
- SINUMERIK 840D sl

A VPM 120 Voltage Protection Module must be used with ECS motor spindles in synchronous design, see 1FE1 built-in motors.

More information

Please refer to Asynchronous motors – Liquid cooling for a list of heat exchanger manufacturers.

In addition to the standard motor spindles in the 2SP1 product range, it is also possible to use individually customized motor spindle designs.

For information about other motor spindles for turning, grinding, milling and drilling, please contact:

Weiss Spindeltechnologie GmbH

– a Siemens Company –
Rudolf-Diesel-Str. 35
97424 SCHWEINFURT, Germany

Phone: +49 (0)97 21 - 77 01 - 10
Fax: +49 (0)97 21 - 77 01 - 13 3

More information is available on the Internet at

<http://www.weissgmbh.de>

¹⁾ No options included.
Internal tool cooling: + 1 kg (2.21 lb)
External tool cooling: + 8 kg (17.6 lb).

Synchronous motors

Selection guides

Type/mounting position

Type/ mounting position	Designa- tion	Type/ mounting position	Designa- tion	Type/ mounting position	Designa- tion
	IM B3		IM B5 IM B14		IM B35
	IM V5		IM V1 IM V18		IM V15
	IM V6		IM V3 IM V19		IM V35

Degree of protection

The degree of protection designation in accordance with EN 60034-5 (IEC 60034-5) is made using the letters "IP" and two digits (e.g., IP64). The second digit in the degree of protection designation represents the protection against water, the first digit the protection against penetration of foreign matter.

Since coolants used for machine tools and transfer machines usually contain oil, are able to creep, and may also be corrosive, protection against water alone is insufficient. The indicated degree of protection should only be considered here as a guideline. The motors must be protected by suitable covers. Attention must be paid to providing suitable sealing of the motor shaft for the selected degree of protection for the motor.

The table can serve as a decision aid for selecting the proper degree of protection for motors. For a mounting position with vertical shaft end IM V3/IM V19, static fluid on the flange is only permitted with degree of protection IP67/IP68 and recessed DE flange in some cases.

	Liquids	General work- shop environ- ment	Water; gen. coolant (95% water, 5% oil); oil	Creep oil; petroleum; aggressive coolants
Effect				
Dry		IP64	–	–
Water-enriched environment		–	IP64	IP67 ¹⁾
Mist		–	IP65	IP67
Spray		–	IP65	IP68
Jet		–	IP67	IP68
Surge, brief immersion; constant inundation		–	IP67	IP68

¹⁾ IP64 with dry run at shaft exit.

2SP1255³⁾						919 (36.21)			

2SP120**2SP125**

1) The spindle is approx. 43 mm (1.69 in) shorter without turning bushing.

2) HSK A63 tool interface.

3) SK40, CAT40, BT40 tool interfaces.

4) Spindle length L1 is approx. 118 mm (4.65 in) shorter, L3 approx. 147 mm (5.79 in) shorter and L4 approx. 30 mm (1.18 in) longer with a hydraulic tool clamping device.

Synchronous motors

CAD CREATOR

Dimension drawing and 2D/3D CAD generator

Overview

The CAD CREATOR provides a user-friendly interface which helps you to create product-specific data quickly and supports you in generating plant documentation containing project-specific information.

Benefits

- Multilingual operator interface in English, French, German, Italian and Spanish
- Dimension drawings with measurements in mm or inches
- Dimension drawings and 2D/3D CAD data for
 - 1FT6/1FT7/1FK7 synchronous motors
 - 1PH7/1PH4/1PM4/1PM6 asynchronous motors
 - 1FT6/1FK7/1FK7-DYA geared motors
 - 1FW3 torque motors
 - 1FE1 built-in motors

The CAD CREATOR provides you with various options to begin with product configuration:

- Order number
- Order number search
- Geometric data

Benefits (continued)

Once a product is successfully configured, the product-specific information, such as dimension drawings and 2D/3D CAD data are displayed and made available for storing in various formats, e.g.: *.pdf, *.dxf, *.stp or *.igs.

The CAD CREATOR is available on CD-ROM and as an Internet application.

Additional information is available on the Internet at:
