## D200 Series <br> D200 Series

## High Power 200W reed relay with 7kV isolation

- 200W switching power
- 7kV Isolation across contacts
- Low Contact Resistance
- PCB Mount
- Excellent AC characteristics

The D200 series combines a high power 200W switching capacity with isolation of 7 kV across the contacts.

This switching performance is achieved through the use of high vacuum reed switches with Tungsten contacts and make these relays suitable for high reliability applications, such as test equipment and high voltage power supplies.

These are PCB Mount relays, though custom options may be available on request.
