

A wide range of applications

Inflection resistant cable type available for all models

Inflection resistant cable type with improved flex resistance is available for all models. Select the model suitable for your specific application. The standard type comes with lead wires with the same diameter as previous models, but the outside diameter of the cable is 2.0 mm **0.079 in** and thinner than the cables of the **EX-10** series. This facilitates cable routing.

IP67 protective structure

The sensors features an IP67 protective structure to allow their use in process lines where water is used or splashed. Rust-resistant stainless steel sensor mounting brackets and screws are available.

Note: If water splashes on the sensor during sensing operation, it may sense water as an object.

Examples of applications

Detection of parts in parts feeder

Detection of presence / absence of test tube tray

Options

A variety of mounting brackets are available!

A spacer for mounting at the back (1 type) for through-wall sensing and sensor mounting brackets (3 types) are available to meet a diversity of sensor installation needs.

Spacer for mounting at the back (for front sensing type only)

Operation indicator (orange) can be checked from the rear side.

Through-wall detection

Detection of LED lead
