Q Series

DC-HVDC Converter

1/2 Watt

- Output voltages from 100VDC to 10,000VDC
- Output Proportional to Input
- 0.7VDC Turn-on Voltage
- Wide Operating Temperature Range
- Short Circuit Protection
- Low Ripple <1%
- 500VDC Input to Output Isolation
- No minimum load
- 3 Year Warranty

No external components or minimum load are required. Variations include dual output (centertap), a separate control pin, and an external shield. These component-sized converters operate over a wide temperature range making them ideal for portable, battery-powered equipment requiring minimal size and weight.

Notes

- 1. Maximum output current is available at maximum rated output voltage, and derates linearly as input voltage is decreased.
- Output Voltage is load dependent. Under light or no-load conditions, reduce the Input Voltage so maximum rated Output Voltage is not exceeded.
- Specifications are after 30 minute warm-up, full-load at 25°C, unless otherwise noted.
- Proper thermal management techniques are required to maintain safe case temperature at maximum power output.
- 5. See Application Notes for connection diagrams, page 8.
- 6. All orderable part numbers are listed on pages 3 and 4.
