Magnetic Contactors and Starters

SC and SW series

Design features

SC-03, 0, 05, 4-0, 4-1, 5-1 SC-N1, N2, N2S, N3

Description

Small frame contactors with new functions join the SC series.

The SC line up, which is based on high level technology, now extends from the SC-03 to the SC-N16.

The SC series contactors have such options as additional auxiliary contact blocks and operation counter unit with snap-on fittings, and coil surge suppressors. Modification can be made quickly and easily on site.

Improved contact materials and structure double the electrical life compared with existing contactors 2 million operations.

Bifurcated type auxiliary contacts have a high degree of contact reliability.

Therefore, they can be used in low-level circuits of 5V, 3mA and directly input to electronic equipment.
