

# Features

**Compact size allows:**  
**4m\*** safety zone,  
**270°** detection angle.

\* When Safety Zone is maximum 4m,  
the minimum object resolution is 70mm.

World's Most Compact Level\*

Small size

**104.5mm** \*As of March,2014

Compact and versatile safety laser scanner

Lightweight

**1.3kg**

Lightweight body for easy handling and installation

Low Power  
Consumption

**5w**

Power saving, low power consumption(3.75 W in standby mode)

## Reducing Erroneous Detections in Safety Zone **NEW**

PTM (Pollution Tolerance Mode) enables a filter that allows the OS32C to distinguish between more than one detected reflection pulses. Ignoring small reflection pulses which could be caused by airborne dust or other contaminants in the safety zone. This function prevents nuisance machine stops due to dust.

## New convenient and easy-to-use functions

Replacable sensor, no reprogramming needed

No reprogramming needed, the configuration is stored in the I/O block. Replacing a damaged sensor is fast and easy.

Reference Boundary Monitoring function

The OS32C constantly monitors reference points and turns OFF the safety outputs when a shift in its position is detected.

(Per international standard IEC 61496-3, area scanners used in applications where the angle of approach exceeds  $\pm 30$  degrees with respect to the detection plane, must use RBM in the detection zone.)

Cable Access Options

To tailor the OS32C to your installation, two options are available for the location of the power and ethernet connections:

OS32C-BP(-4M)/OS32C-BP-DM(-4M) (Cable access from the back) OS32C-SP1(-4M)/OS32C-SP1-DM(-4M) (Cable access from the left side) These can be selected according to the needs of AGV or facilities design.

OS32C with cable access from the back (OS32C-BP(-4M)/OS32C-BP-DM(-4M))

OS32C with cable access from the left side (OS32C-SP1(-4M)/OS32C-SP1-DM(-4M))

Easy configuration of complex zones

The configuration of the safety zone and warning zones can be done in real time using a PC. Configurations can also be created or modified offline.

EtherNet/IP™ for Status and Measurement Data

The OS32C system status, zone status, and measurement data can all be monitored over EtherNet/IP.
