Simpler and
Easier to Use

Simple & Easy Operation

Two levels of setting mode for easy operation of essential functions

The "RUN mode" is for threshold value setting, zero point adjustment and key lock setting / release setting, and the "detailed setting mode" allows for basic settings for sensor operation. The two-level setting mode configuration enables easy and immediate use of the product.

Main menu for detailed setting mode

Operation setting mode*

Select from EASY mode, hysteresis mode or window comparator mode.

NO / NC setting mode

Set the comparative output operation to NO or NC.

Response time setting mode

Select the response time from 2.5 ms, 25 ms or 250 ms.

Display color setting mode

Select the comparative output ON / OFF display color and the normal display color from red or white.

* For details of operation setting mode, see page 4.

Crisp clicking feel

Functional Design

Black body for enhanced visibility of LCD display

The unit body is completely black to make the LCD display easier to see.

Firm and crisp clicking feel

The buttons offer firm and crisp clicking feel for smooth and reliable setting operations.
