

Upgrade Solution

What is a DynamAx ?

The DynamAx was a Vector drive spanning a range of 0.75 - 11kW or 1-15HP developed to operate standard squirrel-cage induction motors with precise speed using encoder feedback. The DynamAx was designed to accept a line voltage of 380V to 480V +/-10%.

What replaces DynamAx?

The Unidrive SP is an excellent replacement for the original DynamAx drive. The UnidriveSP family of drives offer many more internal features and can be setup using your Laptop PC. No pots to adjust or jumpers to set. Software for the Unidrive SP is free !

If serial communication was being used, some adaptation may be required for the upgrade.
