## Order catalogue

Drive solutions  
750 W up to 132 kW

With firmware:

**Basis** - for universal use

**PLC** - for machine sub-automation  
units

**The fast track to your  
order**

Order Catalogue Inverter Systems CDA3000

Id.-No.: 0840.24 B.4-00

Stand: January 2004

We reserve the right to make technical changes.

# The drive controller with **c-line** technology

The particular benefits to users of LUST drive controllers lie in the expert solutions delivered for automation with electric drives and in the high level of control engineering know-how available to handle the control of a wide range of motor types. Always keeping an eye on the physics, looking to make electric drive engineering the core element of machine optimisation and automation.

It is a long-established fact in electric drives that the various control methods can complement each other effectively in handling complex automation tasks. The best solution for complex motion tasks will always depend largely on the individual requirements of the user and on the provider's experience and range of equipment. It is therefore a decided advantage if all options can be tapped easily and without changing the equipment concept or even the provider.

## Our focus is on custom drive solutions with our:

- Inverter systems 0.75 kW to 132 kW
- Servo system
  - with asynchronous motors up to 425 Nm
  - with synchronous motors up to 245 Nm
- direct-drive system
  - - with hollow shaft motors up to 75 Nm
  - - with linear motors up to 20,000 N

## Inverters and servocontrollers based on the same concept

The **c-line** DRIVES are ideal for virtually any task. They include the CDE/CDB inverters with the Voltage Frequency Control (VFC) method, Field Oriented Regulation (FOR) with encoder evaluation, and Sensorless Flux Control (SFC). The CDD servocontrollers include a highly dynamic speed/torque/position control. For applications with high-torque motors there is the CTC TORQUECHAMPION for direct drives.

All **c-line** DRIVES drive controllers have the same basis, with a wide range of variants for specific solutions. A platform of this kind enables rapid, cost-effective response to new developments.

## Common features of the **c-line** DRIVES :

- their design, metal enclosure and cooling method for
  - wall mounting
  - cold plate
  - push-through heat sink
- their excellent EMC performance
- their user-friendly operation with the DRIVEMANAGER PC tool
- easy serial startups with KEYPAD and Chipcard
- the modular networking concept
- the comprehensive range of accessories and complementary components

# Inverter system CDA3000

## Experience and vision

CDA 3000 is the result of years of practical experience in drive technology for automation of machinery and plant. This inverter system is fit for the ever shortening innovation cycle in the automation of machinery.

## Founded on tradition

We have continued our long-standing tradition of setting control standards in the drive technology as well as creating standards for the future-oriented flexibility in machinery and plant.

## Fit for the future

The inverter module is the central unit of the system and information carrier for the various operator, user and communication modules. All modules are standalone components with all necessary certificates and are tested in terms of connectivity. The interfaces to the docking modules are open for new automation design concepts in future.

Very easy setting via automatic identification of the motor and by means of self-setting of all control circuits. The motto of the CDA3000 is „Starting and run“.

## Fast and easy

The concept of the new inverter system is that the user can configure and commission the optimum drive solution more easily and faster, in spite of extended functions and extensive system components.

With KEYPAD and the PC-user software DRIVEMANAGER comfortable setting and analysis possibilities are available for all LUST drive controllers. They convince by their stability and didactic sophistication.

Ready-made solutions for traction, lifting and rotation drives highlight only the important parameters. The underlying complexity can only be guessed.

## EMV with safety

All devices from 750 W up to 132 kW with sheet-steel housing with aluminium/zinc surface. The housing offers a high protection against interference to the direct environment. To reduce the interference RFI filters are always included in the inverter modules (up to 7.5 kW). This results in a reduction of expenditure as well as in the costs of the whole installation.

## Keep cool

Fully used power components require a cool inverter. The modular cooling concept offers free selection of the given mounting method. Using cold plate or heat sink in- or outside the mounting place depends on the situation.

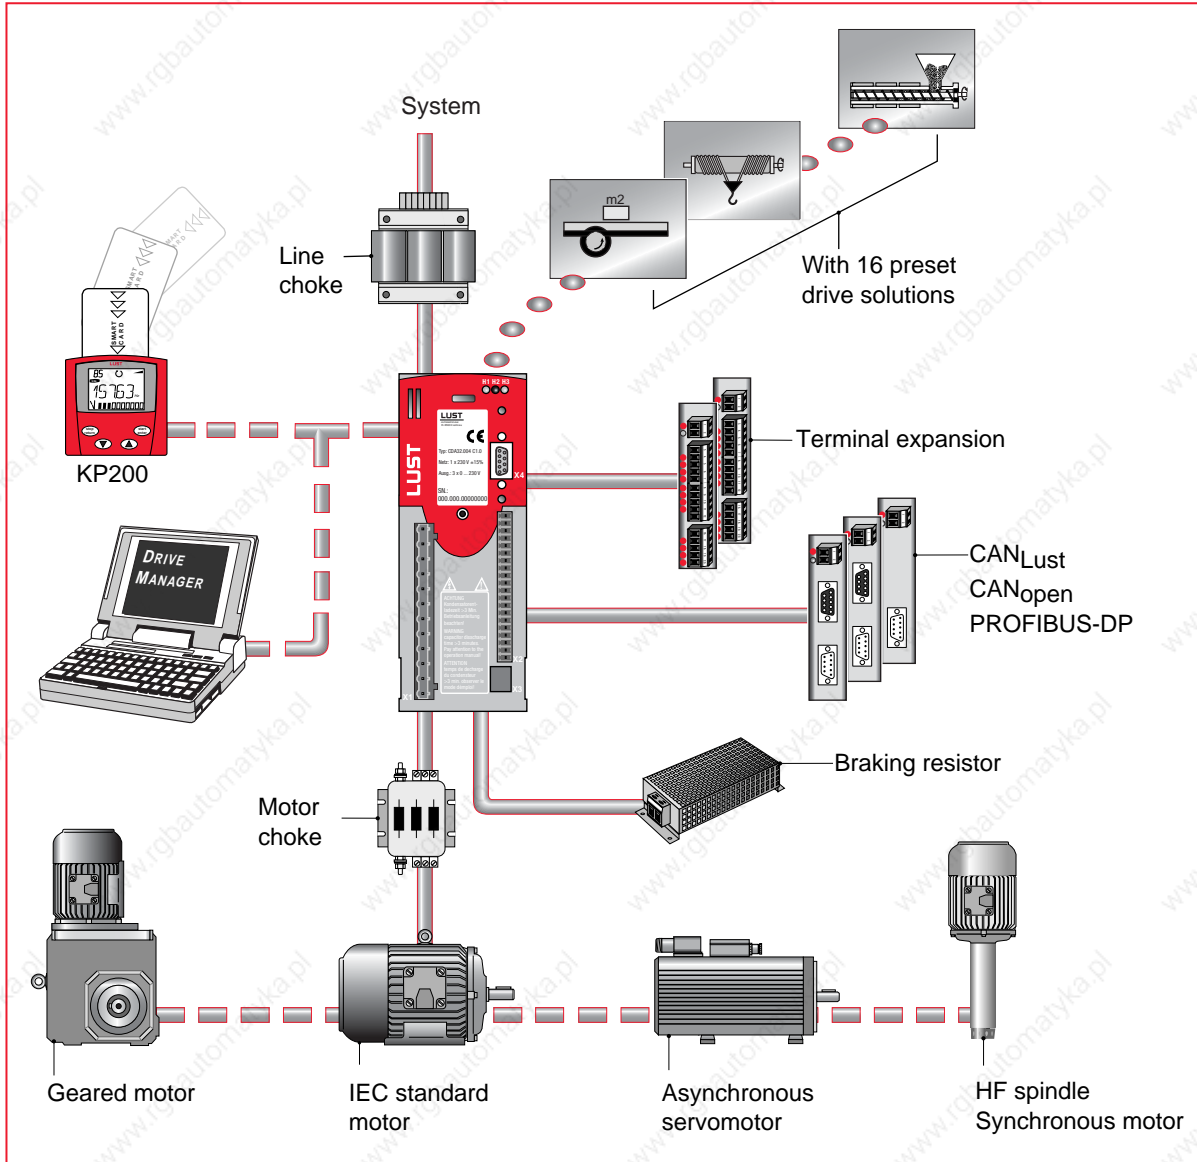

## Automatically more torque

Mature new technologies results in functional improvements with reliable specifications. With the sensorless flux control (SFC) of LUST attributes like higher output torques, dynamic disturbance control and a wide

speed manipulating range can be safely and reproducibly achieved.

**The system architecture for the flexible solutions of the future**

CDA34.060,Wx.x	30	43.8	60	90 <sup>2)</sup>	BG6	250 x 345 x 325
CDA34.072,Wx.x	37	52.5	72	108 <sup>2)</sup>	BG6	250 x 345 x 325
CDA34.090,Wx.x	45	65.6	90	135 <sup>2)</sup>	BG7	300 x 550 x 305
CDA34.110,Wx.x	55	80.0	110	165 <sup>2)</sup>	BG7	300 x 550 x 305
CDA34.143,Wx.x	75	104.0	143	214 <sup>2)</sup>	BG8	412 x 500 x 362
CDA34.170,Wx.x	90	124.0	170	255 <sup>2)</sup>	BG8	412 x 500 x 362
CDA34.250,Wx.x	132	173.0	250	300 <sup>3)</sup>	BG8	412 x 500 x 362
Mains voltage 3 x 460 V -25 % +10 %					1) 1.8 x I <sub>N</sub> for 30 s	
Rotating field frequency 0 ... 400 Hz (0,7 to 22 kW)					2) 1.5 x I <sub>N</sub> for 60 s	
Rotating field frequency 0 ... 200 Hz (30 to 132 kW)						

# Acceptance tests/ Ambient conditions

## CE mark

The inverter modules<sup>1)</sup> meet the requirements of the Low Voltage Directive DIN EN 50178 and of the product norm EN 61800-3 (EMV).

The inverter modules<sup>1)</sup> thus meet the requirements for the installation in a machine or plant under the terms of the Machinery Directive 98/37/EG.

The inverter modules CDA3000<sup>1)</sup> are marked according to CE. The CE mark on the name plate signifies conformance with the above mentioned directives.

On request we will be pleased to issue a Declaration of Conformity.

## cUL approbation

The inverter modules<sup>1)</sup> 0,75 up to 55 kW have the cUL-approbation. For inverter modules<sup>1)</sup> 75 up to 132 kW the cUL approbation is in preparation. This cUL approbation is equivalent to UL and CSA approbation.

## EMV acceptance tests

All inverter modules<sup>1)</sup> have a sheet-steel housing with an aluminium/zinc surface in order to enhance the interference resistance (acc. to EN61800-3, environments 1 and 2).

To limit line-bound interference emission to the permissible level, all inverter modules up to 7.5 kW are equipped with integrated mains filters, in order to comply with EMV product norm DIN EN 61800-3:

**Public Low Voltage Network:  
Residence up to 10 m motor cable**

**Industrial Low Voltage Network:  
Industry up to 25 m motor cable**

Additionally an extensive product line with external mains filters for side and substructure mounting is available. For detailed information see chapter „Supplementary Components“.

Feature		Inverter module	User and communication module and KP200
Operation temperature		-10 ...45 ° C (BG1 ... BG5) 0 ... 40 ° C (BG6 ... BG8) with power reduction up to 55 ° C	-10 ... 55 ° C
Storage temperature		-25 ... +55 ° C	
Transport temperature		-25 ... +70 ° C	
Relative air humidity		15 ... 85 %, condensation is not permitted	
Mechanical strength acc. IEC 68-2-6	during stationary use	Vibration: 0.075 mm in frequency range 10 ... 58 Hz Shock: 9.8 m/s <sup>2</sup> in frequency range >58 ... 500 Hz	
	during transport	Vibration: 3.5 mm in frequency range 5 ... 9 Hz Shock: 9.8 m/s <sup>2</sup> in frequency range >9 ... 500 Hz	
Protection	Device	IP20 (NEMA 1)	
	Cooling method	Cold Plate IP20 Push-through heat sink IP54 (3 ...15 kW)	Convection IP20
Touch protection		VBG 4	
Mounting height		up to 1000 m above MSL, over 1000 m above MSL with power reduction, max. 2000 m above MSL	

1) applies to user and communication modules, too.

# Cooling methods

The basic model of the inverter offers three different mounting and cooling methods (e.g. size 3):

Size	Output	Inverter module	Cold Plate	Wall mounting	Push-through heat sink
BG1	0.75 kW	CDA32.004	YES	YES <sup>1)</sup>	NO
BG2	1.1 kW	CDA32.006	YES	YES <sup>1)</sup>	NO
	1.5 kW	CDA32.008			
BG2	0.75 kW	CDA34.003	YES	YES <sup>1)</sup>	NO
	1.5 kW	CDA34.005			
BG2	2.2 kW	CDA34.006	YES <sup>3)</sup>	YES	NO
BG3	3.0 kW	CDA34.008	YES <sup>3)</sup>	YES	YES <sup>2)</sup>
	4.0 kW	CDA34.010			
BG4	5.5 kW	CDA34.014	YES <sup>3)</sup>	YES	YES <sup>2)</sup>
	7.5 kW	CDA34.017			
BG5	11 kW	CDA34.024	YES <sup>3)</sup>	YES	YES <sup>2)</sup>
	15 kW	CDA34.032			
BG6	22 kW	CDA34.045	NO	YES	NO
	30 kW	CDA34.060			
	37 kW	CDA34.072			
BG7	45 kW	CDA34.090	NO	YES	NO
	55 kW	CDA34.110			
BG8	75 kW	CDA34.143	NO	YES	NO
	90 kW	CDA34.170			
	110/132 kW	CDA34.250			

1) Corresponds to cold plate with heat sink HS3X.xxx as accessories, not in design wall mounting CDA3 ..., Wx.x.  
 2) Type of protection IP54  
 3) For sufficient cooling an additional active cooler is necessary.

# Motor control method

During commissioning of the inverter three different control methods can be selected.

The necessary identification of the motor is provided automatically by the inverter module based on the „start and run“ concept. All control circuits are optimized in the process as well.

## Voltage frequency control (VFC)

With the VFC the voltage of the motor is changed proportionally to the output frequency of the inverter module. This method is suitable for drives of pumps, fans, extruders as well as traction and lifting drives with low dynamic equipped with special motors like reluctance motors.

## Sensorless Flux Control (SFC)

The new control method SFC, applicable for asynchronous motors, calculates the rotor speed and the current angle of the rotor from the electrical variables. Based on the calculated information, the currents for the torque formation can favourably be fed into the motor. So it is possible to attain excellent control characteristics without using an expensive encoder.

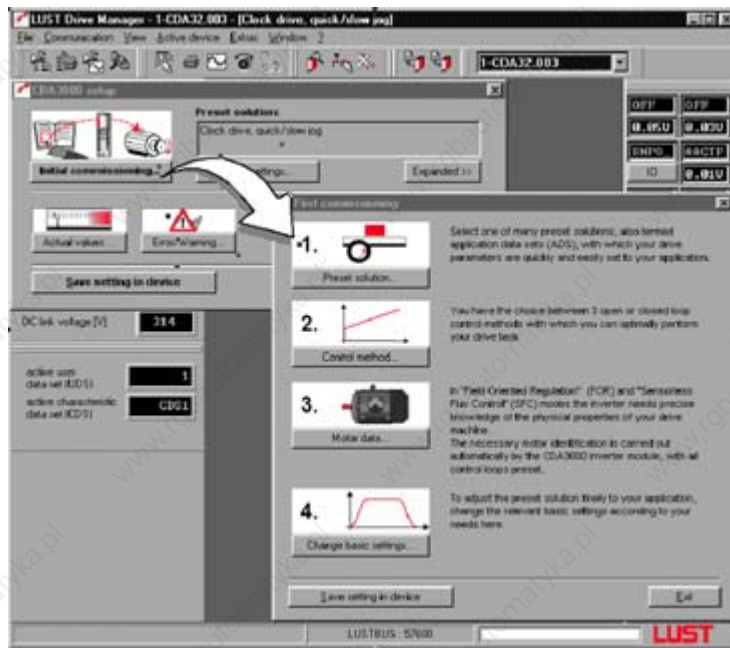

## Field-Oriented Regulation (FOR)

With the FOR rotor and speed positions are calculated with one encoder. Based on those measurement variables, flux and torque can be set independently. Maximum dynamic and high speed accuracy can be reached.

Characteristics	VFC Voltage frequency control	SFC Sensorless flux control	FOR Field-oriented regulation
Torque rise time	20-30 ms	< 2 ms	< 2 ms
Dynamic disturbance correction	NO	YES	YES
Standstill torque	NO	NO	YES
Acceleration torque ( $I_{\text{Inverter}} = 2 \cdot I_{\text{Motor}}$ )	$1.2 \cdot M_{\text{Nenn}}$	$1.8 \cdot M_{\text{Nenn}}$	$2 \cdot M_{\text{Nenn}}$
Current usage of inverter	60%	90%	100%
Anti-stall protection	limited	YES	YES
Speed manipulating range $M = M_{\text{Nenn}}$	1:20	1:20	1:10000
Static speed accuracy (refers to rated speed)	typically 1 to 5%	typically 0.5%	quartz accurate
Frequency resolution	0.01 Hz	0.0625 Hz	$2^{-16}$ Hz
Motor principle	asynchronous synchronous reluctance	asynchronous	asynchronous

# Easy first commissioning

With the PC-user software DRIVEMANAGER the first commissioning of the drive will be comfortable and plain. All you need to do is „click through“.

PC-user software DRIVEMANAGE „First commissioning“

## 1. Preset drive solution

Opens a dialog for selecting the required ready made settings via clicking-on.

- Conveyor belt drive, rack drive, carriage drive and lifting drive
- Spindle drive, extruder, stirrer, disperser and winding drive
- Electronic gear for worm drives, pack distribution plants and master shaft replacement
- Network operation via CANopen or PROFIBUS-DP

## 2. Control method

Opens a dialog for selecting one of three control methods:

- Voltage frequency control
- Sensorless speed control
- Field-oriented regulation

## 3. Motor identification

Starts a menu, supporting you at the input of the motor plate data. The automatic identification of the connected asynchronous motor with the automatic parameter setting of the control circuits completes this step.

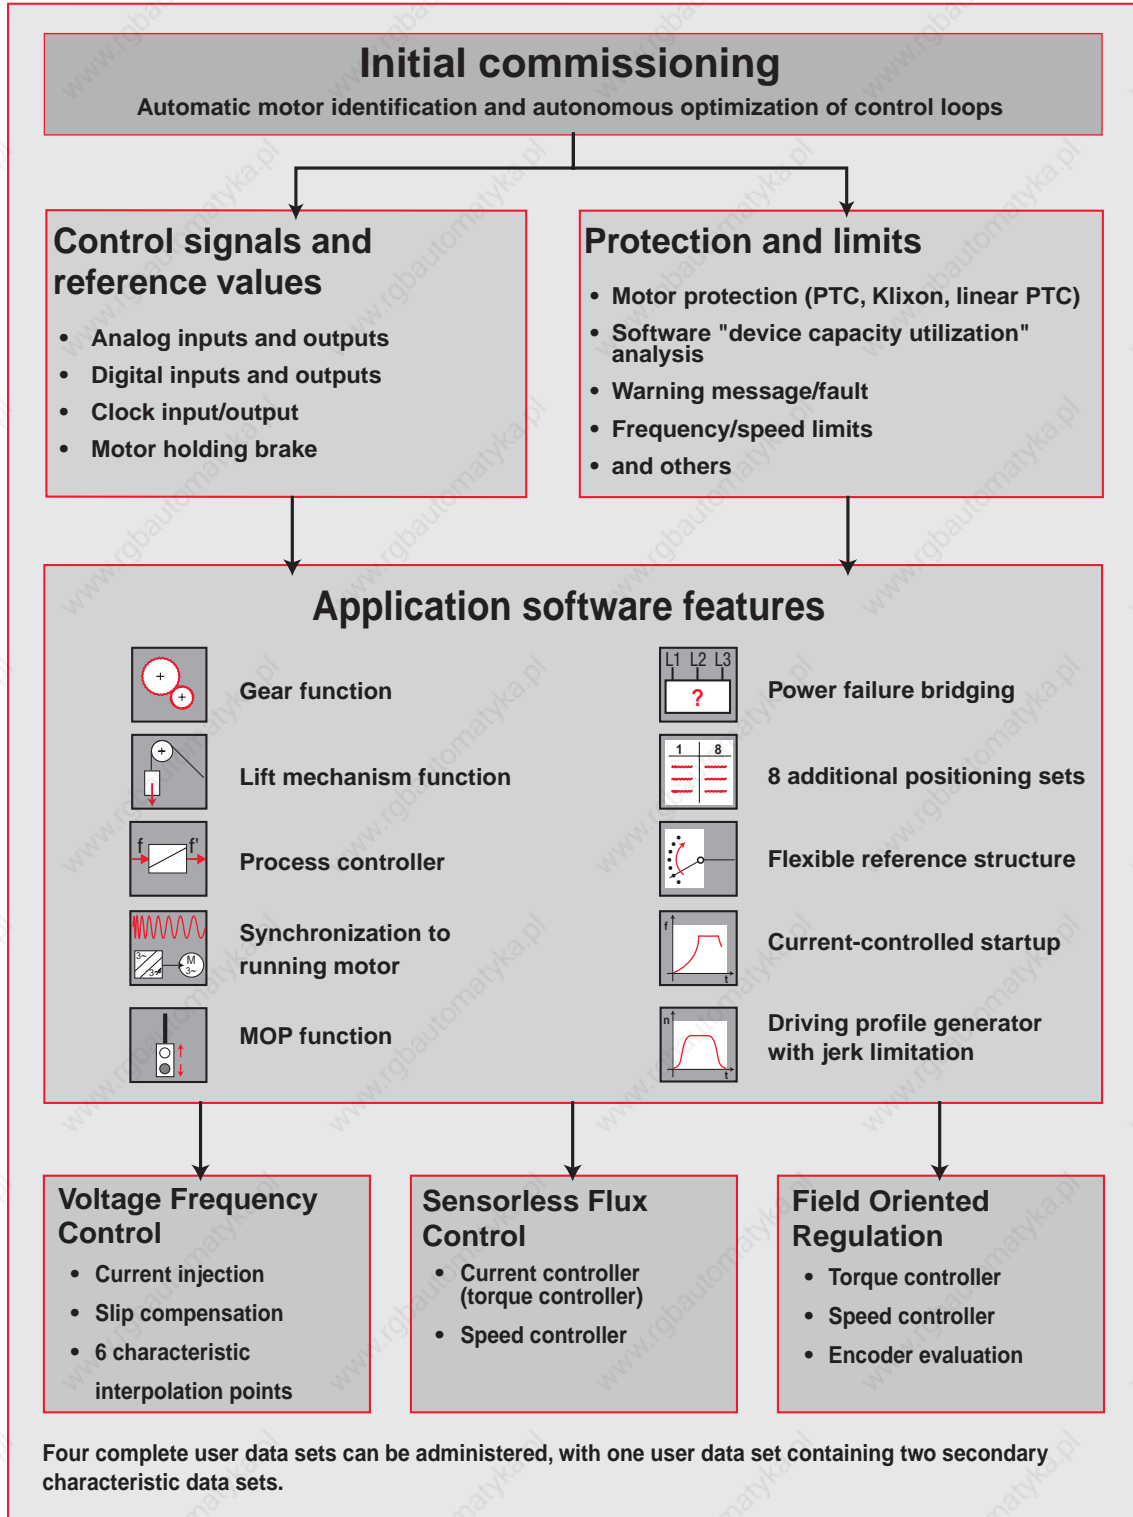

## 4. Basic setting

Starts a menu for fine-adjustment of your drive.

# Basic - Firmware

Among the hardware aspects the efficiency of the device firmware will be more and more significant. Finally only the firmware has the intelligence for managing the movement tasks in machinery and plants.

The firmware of the inverter modules CDA3000 supports a number of application features, unthinkable some years ago. The application features can be activated via the graphic user interface, to solve the complete movement tasks acc. to the given situation.

# PLC-Firmware

The new PLC firmware consists of the software performance of the basic firmware and an extending PLC-user platform.

Execution of the basic firmware is possible without support of the four user data sets and motor identification via KEYPAD. Therefore we included support of the standard CAN<sub>OPEN</sub> protocol, in order to manage the structure of a CAN<sub>OPEN</sub> network via a low cost communication module CM-CAN1.

## PLC-user Platform

Programming the PLC process program is line-oriented and similar to the program language BASIC. It reduces the time exposure for learning the amount of instructions. Furthermore it has the advantage that the user can read the programs without knowing the exact instruction sets.

PLC-Process Program allows

- flexible setting of control and reference information for all motor control types
- set/read analog and digital i/O's
- direct writing/reading access for all parameters
- mathematic operands (+, -, \*, modulo, ABS, round)
- timer and counter functions (12 timer, 11 counter)
- using integer variables, floating point variables and flags
- easy position control

Instruction set consists of:

- Jump signals
- Subroutine call
- Set signals
- Wait signals
- Control, positioning and process signals

## PLC-Editor

The PLC editor is a part of the PC-user software DRIVEMANAGER and only necessary for engineering and initial commissioning of your PLC program. The serial commissioning of inverter modules will be effected via the known DriveManager data set or the new SMARTCARD SC-XL.

## The PLC-program editor offers the functions:

- Program generation
  - Editor for program generation
  - Generation of a text declaration file <project name>.txt for the variables to indicate application-specific tests in the DRIVEMANAGER
  - Syntax check of opcode
  - Renumbering line numbers
- Program handling:
  - Load/Save/Print/Regeneration of programs
  - Load/Save a program from/in a connected drive control.
  - Load/Save a program from/in DRIVEMANAGER-data sets
- Online help to PLC-Editor and to the command syntax with examples

All PLC-functions can be selected via function buttons.

## New solution with PLC-firmware

The operational area of PLC-user platform for the generation of automation programs allows a number of new solutions. Solutions, supported by graduated series of Operator Panels.

Already solved machine sub-automation units are:

### I/O oriented processes

Motion solution, mainly defining the sequences of the sub-automation process via I/O-signals from the working procedures. Typical applications are:

- Feed unit for drilling and lowering
- Belt and carriage drives
- Drives for doors and gates
- Pumping stations with float switch
- Lifting and rotating tables

### Time-controlled processes

Motion solution, mainly defining the sequences of the sub-automation process temporarily. Typical applications are:

- Melting and mixing plants for paints
- different centrifuges and dispersers
- Mills and shredders

### Regulated processes

Motion solution, to keep process sizes like torque, traction, pressure, temperature or position constant during the working procedure. It deals with sub-automation processes, like:

- Warbler or dancer control for winders
- Block protection control for shredder
- Simple positioning controls for drives of doors and gates, carriage and rotating drives
- classic pressure, temperature and flow control

## Example: Drill feed unit

# Service

Lust Antriebstechnik offers a lot of information via internet.

Please visit our homepage - <http://www.lust.tec.de> - for further technical information of our products or engineering, or contact your nearest local office.

## Software-Update-Service

As a part of our product maintenance function we are continuously improving the quality of the drive systems. Our software-update-service provides you with information on new releases and revisions of the various software versions.

This information, together with the latest firmware, is available for downloading on our info server.

## Design-In

An important part for a common success is a professional project management, to keep the time and cost schedule. The earlier your new solution will enter the market the better. We will assist you in:

- the analysis of the requirements
- engineering and design
- working out the specification
- the analysis of the total costs
- the project management

## Logistics

We are of course willing to support your logistic concept and it would be a pleasure to coordinate the following with you:

- KANBAN-concept
- KANBAN with control via webcam
- Buffer storage
- Delivery just in time
- Complete shipment of systems
- Commissioning
- Delivery of replacement parts and devices

## After Sales

We will assist and support you whenever and wherever it is required. Based on our flexibility, quick reaction times, high technical know-how and a lot of application experience we offer the following services

- Commissioning on site
- Advice and Trainings
- Repair/ Service concept

## Helpline

The helpline will be glad to support you with:

- commissioning of standard products and systems by phone
- evaluation of error and diagnose indications
- localizing and clearing of reproducible failures and
- software-updates

Availability:

Mo.-Th.: 8 a.m. to 4.30 p.m.

Fr.: 8 a.m. to 4 p.m.

# Current capacity of inverter modules

The maximum allowed inverter output current and the peak current are depending on the mains voltage, the motor cable length, the power stage switching frequency and the ambient temperature. A changing of the conditions causes a changing of the maximum allowed current capacity of the inverter modules. Please find the allowed current capacities under changed conditions in the following table, shown as characteristic lines.

- (1) **Continuous mode**
- (2) **Intermittent mode\* > 5 Hz rotating field frequency**  
**Inverter modules 0,7 to 15 kW**  
 $I/I_N = 1.8$  for 30 s at 4 kHz  
 $I/I_N = 1.8$  for 30 s at 8 kHz  
 $I/I_N = 1.8$  for 30 s at 16 kHz  
**Inverter modules 22 to 132 kW**  
 $I/I_N = 1.5$  for 60 s at 4 kHz  
 $I/I_N = 1.5$  for 60 s at 8 kHz
- (3) **Intermittent mode\* 0 to 5 Hz rotating field frequency**  
**Inverter modules 0,7 to 15 kW**  
 $I/I_N = 1.8$  für 30 s at 4 kHz  
 $I/I_N = 1..25-1.8$  for 30 s at 8 kHz  
**Inverter modules 22 to 132 kW**  
 $I/I_N = 1.5$  for 60 s at 4 kHz  
 $I/I_N = 1-1.5$  for 60 s at 8 kHz
- (4) **Pulse mode**  
**Inverter modules 0,7 to 15 kW**  
 $I/I_N = \text{approx. } 2.2$  at 4, 8, 16 kHz  
**Inverter modules 22 to 132 kW**  
 $I/I_N = \text{approx. } 1.8$  at 4, 8 kHz

## Features

\* Intermittent mode  $I_N > I_{eff}$   $I_{eff} = \sqrt{\frac{1}{T} \cdot \sum_{i=1}^n I_i^2 \cdot t_i}$

Inverter modules for 230 V systems:

Inverter module	Rec. 4-pole standard motor [kW]	Switching frequency of power stage [kHz]	Rated current [A]	Peak current for intermittent mode 0 to 5 Hz [A]	Peak current for intermittent mode > 5 Hz [A]

For complete ordering data please refer to the following tables.

Techn. data	Order code	CDA32.004	CDA34.003
<b>Output, motor side</b>			
Recommended rated power with 4-pole standard motor		0.75 kW	0.75 kW
Device rated power		1.7 kVA	1.6 kVA
Voltage		3 x 0 ... 230 V	3 x 0 ... 400/460 V <sup>1)</sup>
Effected rated current (I <sub>N</sub> at 4/8 kHz)		4.0 A	2.2 A
Peak current 1,8 x I <sub>N</sub> (4/8 kHz) for 30s		7.2 A <sup>2)</sup>	4.0 A <sup>2)</sup>
Rotating field frequency		0 ... 400 Hz	
Switching frequency of power stage		4, 8, 16 kHz (factory setting 8 kHz at 40° C cooling air temperature)	
<b>Input, mains side</b>			
Mains voltage		1 x 230 V -20 % +15 %	3 x 460 V -25 % +10 %
Asymmetry of mains voltage		-	±3 % max.
Frequency		50/60 Hz ±10 %	
Power loss 4, 8 (16) kHz		48, 55 W	55, 70 W
<b>Braking chopper power electronics</b>			
Minimum ohmic resistance of an externally installed braking resistor		100 Ω	180 Ω
<p>1) Allowed currents at 460 V are documented on page 2-2 and 2-3</p> <p>2) For further data of currents see page 2-2 and 2-3</p>			

Colling method	CDA32.004, C x.x	CDA34.003, C x.x
<b>Mechanics</b>		
Protection type	IP20	
Cooling air temperature	45 °C ( at 4 kHz switching frequency of power stage)	
Weight	1.6 kg	2.3 kg
<b>Mounting</b>		
Single mounting	additional cooling via mounting plate (unvarnished) of 0.3 m <sup>2</sup>	
End-to-end mounting of multiple inverter modules	with accessories HS32.1BR	with accessories HS32.200 or HS34.2BR
<b>Dimensions</b>	<b>BG1 [mm]</b>	<b>BG2 [mm]</b>

Invertermodule

Accessories for Invertermodule

User- und Communicationmodule

Supplementary Componentes

KP200

KP200-XL (Symbolic graph)

Order code	Short explanation
KP100 (w/o picture)	KEYPAD for parameter setting, actual value indication and serial commissioning of ED1200 inverter. The KEYPAD supports the SMARTCARD „SC“.
KP200	KEYPAD for parameter setting, actual value indication and serial commissioning of inverter modules with firmware: „Basis and HF“. The KEYPAD supports the SMARTCARD „SC“.
KP200-XL	KEYPAD for parameter setting, actual value indication and serial commissioning of inverter modules with firmware: „Basis, HF and PLC“. The KEYPAD supports the SMARTCARD „SC-XL“.

Mechanic KP100 (w/o picture)	
Dimension	62 x 158 x 21 mm (W x H x D)
Weight	170 g

Mechanic KP200 und KP200-XL	
Dimension (see picture)	70 x 73 x 33 mm (W x H x D)
Weight	150 g
<b>Connection (RS232)</b>	
Standard (6)	can be plugged directly into inverter module

Cable connection	Installation in switching cabinet door
Connection between KP200/ KP200-XL and inverter module CDA3000 via cable CCD-SUB90X	<p>Mounting in the cabinet door requires two holes for the fixing screws and a break-through for the connector.</p> <p>Please use only self-tapping screws for thermoplastics (e.g. EJOT PT screw, Type K30 x 8 WN1412).</p>

### SMARTCARD

### Order code

Order code	Short explanation
SC	Data of inverter modules can be saved and transferred to further inverter modules without problems. Suitable for KP100 and KP200.
SC-XL	Data set of inverter modules with firmware „PLC“ can be saved and transferred to further inverter modules without problems. Suitable for KP200-XL.

System layout	Explanation
	<ol style="list-style-type: none"> <li>(1) Connection X4 for operating modules or PC-connection (RS232 interface)</li> <li>(2) Chip card SC/ SC-XL</li> <li>(3) Operator module KP200/ KP200-XL</li> <li>(4) PC with user software DRIVEMANAGER</li> </ol>

## Programming of Operator Panels

VTWINCD

## Order code

**VTWIN**

Program software  
VT-series

Order code	VTWIN
<b>Techn. data</b>	
<b>Software performance</b>	<p>The program software VTWIN offers the following functions:</p> <ul style="list-style-type: none"> <li>- Only one software for all Operator Panels</li> <li>- Configuration of RS232-interface</li> <li>- Configuration of CANopen-network</li> <li>- Text and graphic display free programmable</li> <li>- Set-up of Touch-Buttons (only VT155W and VT505W)</li> <li>- Project conversion of projects between the operator panels</li> <li>- free updates for new drivers and new functions</li> </ul>
<b>Hard- and software requirements</b>	<ul style="list-style-type: none"> <li>- Microsoft Windows® 95/98/ME or Windows® NT, 2000, XP</li> <li>- CD-ROM drive (recommended min. read 24-fold)</li> </ul>
<b>Supply package</b>	<ul style="list-style-type: none"> <li>- 1 CD-ROM to install VTWIN</li> <li>- Hard- and Software Manuals</li> </ul>
<b>Languages</b>	<ul style="list-style-type: none"> <li>- Selection out of five languages (German, English, French, Italian, Spanish)</li> </ul>

Order Code	Licences
<b>VTWIN</b>	<ul style="list-style-type: none"> <li>- Contains the full scope for parameter setting, control and monitoring. The software licence permits simultaneous use on any number of workstations.</li> <li>- We supply always the actual software version at time of delivery.</li> </ul>

## Cables for Operator Panels

Progming cable  
CVCOM 11102

Adapter for programming cable  
CVCOM 25F8M

RS-232 Interface cable to drive device OPK-  
RS03

Order Code	Short explanation	Use
CVCOM 11102	Programming cable for connection between PC + Operator Panel (PC 9poles --> MSP 25poles)	necessary for all Operator Panels
CVCOM 25F8M	Adapter for programming cable, of PC 25poles --> ASP 8poles DIN-round plug (CVCOM 11102 must be available)	necessary for - VT050 000 CNN - VT150W 000 CNN - VT505W 000 CNN - VT155W 000 00N - VT155W 000 CNN
OPK-RS03 (Length = 3 m)	Serial RS232-interface cable to connect the Operator Panels with the drive device	suitable for - VT050 000 00N - VT150W 000 00N - VT505W 000 00N - VT155W 000 00N
OPK-RS05 (Length = 5 m)	Serial RS232-interface cable to connect the Operator Panels with the drive device	suitable for - VT050 000 00N - VT150W 000 00N - VT505W 000 00N - VT155W 000 00N

PLCEditor

Order code	PLC-editor
<b>Techn. data</b>	
<b>Software performance</b>	<p>PC-User software „PLCEditor“ is a supplement to the DRIVEMANAGER:</p> <ul style="list-style-type: none"> <li>• Editor for making of PLC-process program</li> <li>• Program-Handling               <ul style="list-style-type: none"> <li>– Load/ Save/ Print/ Regeneration of programs</li> <li>– Load/ Save a program from/in DRIVEMANAGER data set</li> <li>– Load/ Save a program from/in a connected drive device</li> </ul> </li> <li>• Online-Help to the PLC-editor and to the command syntax with examples</li> </ul>
<b>Hard- and software requirements</b>	<ul style="list-style-type: none"> <li>- Microsoft Windows® 95/98/ME or Windows® NT, 2000, XP</li> <li>- Working memory (RAM) min 32 MB (recommended 64 MB)</li> <li>- CD-ROM drive (recommended read min. 24-fold)</li> </ul>
<b>Supply package</b>	<ul style="list-style-type: none"> <li>- 1 CD-ROM with PLC-program editor, PLC-program examples,</li> <li>- PLC-System manual as PDF (on CD-ROM)</li> <li>- Firmware CDA3000,PLC</li> </ul>
<b>Languages</b>	<ul style="list-style-type: none"> <li>- During installation selected German or English.</li> </ul>

Order code	Licences
PLC-Editor	<ul style="list-style-type: none"> <li>- Contains the full scope for programming of the PLC-firmware. The software licence permits simultaneous use on any number of workstations.</li> </ul>

**PC-User Software**

DRIVEMANAGER 3.x

**Order code**

**DRIVEMANAGER, 3.x**

**PC User Software**

**Software version**

Order code	DRIVEMANAGER 3.x
<b>Techn. data</b>	
<b>Software performance</b>	<p>PC-User software „DRIVEMANAGER“ offers the following functions:</p> <ul style="list-style-type: none"> <li>- Can be operated via comfortable adjusting masks, so easy handling is guaranteed</li> <li>- Status indication to control the operation-specific actual values and references</li> <li>- Direct control of the inverter via PLC</li> <li>- Comfortable four-channel digital scope for real-time recording of actual values, like current curve or VFC-diagram</li> <li>- Comparing function to solve problems, data management and print functions.</li> </ul>
<b>Hard- and software requirements</b>	<ul style="list-style-type: none"> <li>- Microsoft Windows® 95/98/ME or Windows® NT, 2000, XP</li> <li>- Working memory (RAM) min. 32 MB (recommended 64 MB)</li> <li>- CD-ROM drive (recommend min. 24-fold read)</li> </ul>
<b>Supply package</b>	<ul style="list-style-type: none"> <li>- 1 CD-ROM to install the user software DRIVEMANAGER</li> <li>- Manual DRIVEMANAGER</li> <li>- All application manuals as well as software descriptions of the single device series as pdf-documents.</li> </ul>
<b>Languages</b>	<ul style="list-style-type: none"> <li>- At installation select German, English or French.</li> </ul>

Order Code	Licences
<b>DRIVEMANAGER 3.x TEST</b>	- Contains the full scope of functions and is intended for test and demo purposes. The runtime is limited to 180 days from date of installation.
<b>DRIVEMANAGER 3.x</b>	- Contains the full scope for parameter setting, control and monitoring. Unlimited running time. The software licence permits simultaneous use on any number of workstations.

CCD-SUB 90x

**Order code**

	<b>CC D-SUB 9 0x</b>

Supply voltage	24 VDC ±20 %		
Current consumption	0.6 A		
Eight inputs	Input voltage for signal „0“	from 0 to 5 V	
	Input voltage for signal „1“	>15 V	
	Input voltage with signal „1“	3.5 mA to 7.0 mA (6 mA at 24 VDC)	
Four outputs	Output current	allowed range with signal „1“	min. 5 mA max. 0.5 A
		Mean	125 mA
		Total current	0,5 A
		Short-circuit current per output	max. 1.2 A short-time
Dimensions (W x H x D)	28 x 90 x 90 [mm]		

System layout UM-8140	Explanation
	<ol style="list-style-type: none"> <li>(1) Inverter module CDA3000</li> <li>(2) User module UM-8140</li> <li>(3) External power pack 24 VDC</li> <li>(4) Eight control inputs (programmable)</li> <li>(5) Four control outputs (programmable)</li> </ol>

### Communication modules

CM-CAN1, CM-CAN2, CM-DPV1

### Order code

Order code	Short description
<b>CM-CAN1</b>	Communication module for CAN-Bus with data transfer protocol CAN <sub>Lust</sub>
<b>CM-CAN2</b>	Communication module for CAN-Bus with data transfer protocol CAN <sub>open</sub>
<b>CM-DPV1</b>	Communication module for PROFIBUS-DPV1 (for actual GSD-file see our homepage <a href="http://www.lust-tec.de">www.lust-tec.de</a> )

Technical data	CM-CAN1	CM-CAN2	CM-DPV1
Standardization	ISO 11898	ISO 11898	EN 50170
Communication	CiA/ DS102	CiA/ DS301	Directive 2.084
Device profile	DRIVECOM	CiA/ DS402	PROFIBUS
Transfer rate/ cable length	25 kBit/s up to 1000 m 500 kBit/s up to 100 m	20 kBit/s up to 1000 m 1 MBit/s up to 40 m	9.6 kBit/s up to 1200 m 12 MBit/s up to 100 m
Voltage supply	19 ... 29 VDC	18 ... 30 VDC	18 ... 30 VDC
Current consumption	max. 80 mA	max. 100 mA	max. 250 mA
Dimensions (W x H x D)	28 x 90 x 90 [mm]		

### System layout CAN<sub>LUST</sub>/ CAN<sub>open</sub>

### Explanation

- (1) Inverter module CDA3000
- (2) Communication module CM-CAN1 or CM-CAN2
- (3) Connecting cable CCD 90x, x.x
- (4) Bus termination plug
- (5) CAN-Bus control
- (6) Power pack (24 VDC)

max. 100 stations

### System layout PROFIBUS-DP

### Explanation

- (1) Inverter module CDA3000
- (2) Communication module CM-DPV1
- (3) PROFIBUS-DP system cable
- (4) Power pack 24 VDC
- (5) DP-Master

max. 127 stations

### Mounting package for UMxxx and CMxxx

MP-UMCM

### Order code

MP -

Mounting Package

Type

System selection

Invertermodule

Accessories for Invertermodule

User- und Communicationmodule

Supplementary Componentes

LUST

Order code	Short description
MP-UMCM	The mounting package is for fixing the user/communication module to inverter modules size BG6, BG7 and BG8.

System layout	Explanation
	<ol style="list-style-type: none"> <li>(1) Plug-in connection X7 (communication module)</li> <li>(2) Plug-in connection X6 (user module)</li> <li>(3) Control terminals</li> <li>(4) KP200</li> <li>(5) Slot for user module (z.B. UM-8140)</li> <li>(6) Slot for communication module 2 (e.g. CM-CAN1)</li> </ol>

MR34.10

Ambient conditions	MR34.xxx
Rated voltage	3 x 460 V, +10 %
Overload factor	1.8 x I <sub>N</sub> for 40 s up to a rated current of 32 A 1.5 x I <sub>N</sub> for 60 s at rated current from 45 up to 170 A
Ambient temperature	-25° C up to +45° C, with power loss up to 60° C ( 2.5 % / ° C)
Mounting height	1000 m, with power loss up to 2000 m (12.5 % / 1000 m)
Relative humidity	15 ... 85 %, condensation is not permitted
Storage temperature	-25° C up to +70° C
Protection	IP00, terminals VBG4
Permissible contamination	P2 according to EN 61558-1, vertical wall mounting
Connections	up to type MR34.24 screw terminals, larger motor chokes flat terminals with threaded bolt
UR-Recognition	all motor chokes have the UL-Recognition for the markets in the USA and Canada
Rotating field frequency/ clock frequency power stage	max. 150 Hz/ 4 up to 8 kHz
Standstill torque (Rotating field zero)	all 120 s, max. 5 s
du/dt	typical < 1000 V/ μs

MRF34.45

Ambient conditions	MRF34.xxx
Execution	Motor choke with condenser for inverters acc. to EN61558, VDE0570
Rated voltage	3 x 460 V, +10 %
Overload factor	1.8 x I <sub>N</sub> for 40 s up to rated current of 32 A 1.5 x I <sub>N</sub> for 60 sat rated current from 45 up to 250 A
Ambient temperature	-25° C up to +45° C, with power loss up to 60° C ( 2.5 % / ° C)
Mounting height	1000 m, with power loss up to 2000 m (7.5 % / 1000 m)
Relative humidity	15 ... 85 %, condensation is not permitted
Storage temperature	-25° C up to +70° C
Protection/ Connections	IP00, terminals VBG4 / screw terminals
Permissible contamination	P2 acc. to EN 61558-1, vertical wall mounting
UL-Recognition	all motor filters have the UL-Recognition for the markets in USA and Canada
Rotating field frequency/Clock frequency of power stage	max. 150 Hz from 4 up to 8 kHz
Standstill torque (rotating field zero)	max. 5 s, all 120 s
Motor cable length screened	max. 250 m
Output voltage	sinozoidal with low, overlaid ripple voltage

## Inverter ED12.005,C for simple applications

## Order Code

ED 12 . □□□, □x.x

Type

Technical data

Cooling method

For complete ordering data please refer to the following tables.

Order code	ED12.005
<b>Techn. data</b>	
<b>Output motor side</b>	
Recommended rated power with 4-pole standard motor	0.25 kW up to 0.75 kW
Device rated power	1.4 kVA
Voltage	3 x 0 ... 230 V
Effective rated current (at 4/8 kHz)	3.5 A
Peak current (4/8 kHz) for 10 s	7.0 A
Rotating field frequency	0 ... 400 Hz
Switching frequency of power stage	4, 8 kHz (factory setting 8 kHz at 40° C cooling air temperature)
<b>Input mains side</b>	
Mains voltageq	1 x 230 V -20 % +15 %
Frequency	50/60 Hz ±10 %
Power loss (at 4/8 kHz)	35 W

Order code	ED12.005
<b>Ambient cond.</b>	
<b>Temperature range</b>	
during operation	0 ... 40 °C, with power loss up to 50 °C (2,5 %/°C)
during storage	-25 ... +55 °C
during transport	-25 ... +70 °C
Relative humidity	15 ...85% no condensation
<b>Mechanical strength (IEC68-2-6)</b>	
stationary use	Vibration: 0.075 mm (10 ... 58 Hz) Shock: 9.8 m/s <sup>2</sup> (>9 ... 500 Hz)
during transport	Vibration: 3.5 mm (5 ... 9 Hz) Shock: 9.8 m/s <sup>2</sup> (>9 ... 500 Hz)
<b>Protection</b>	
Device	IP00 (NEMA 1)
Touch protection	VBG 4
Monting height	up to 1000 m above MSL, with power loss up to max. 2000 m above MSL

Norms/Acceptances	ED12.005
<b>CE-mark</b>	Conform to the requirements of the low voltage directive DIN EN 50178. The inverter is conform to the requirements for installation in a machine or plant under the terms of the Machinery Directive 98/37/EG.
<b>UL-Approbation</b>	The inverter ED1200 is „UL-Recognized“  . It is equivalent to UL and CSA for „UL-Recognized Components“.
<b>EMV-acceptance</b>	By taking the installation notes into consideration (see operation manual) the EMV product norm will EN 61800-3 will be met. Including <ul style="list-style-type: none"> <li>• Public low voltage system: Residential areas up to 10 m motor cable length</li> <li>• Industrial low voltage system: Industrial area up to 25 m motor cable length</li> </ul>

Cooling method	ED12.005, C x.x	Drawing
<b>Mechanics</b>		
Cooling air temperature	40 °C (at 4/8 kHz switching frequency)	
Weight	1.3 kg	
<b>Mounting method</b>	vertical mounting	
Single mounting	Additional cooling via mounting plate (unvarnished) of 0.25 m <sup>2</sup>	
<b>Dimensions</b>	[mm]	
W (Width)	65	
H (Height)	233	
D (Depth)	120	
A	20	
C	220	
E	105	
DØ	Ø 4.8	

Order code	Short description
HS12.005	Heat sink for use at thermally insulated mounting areas
ED12.005,C1x.x with HS12.005	<b>Drawing</b>

Order code		Short description
<b>Dimensions</b>	[mm]	<p>The technical drawing shows two views of the LUST inverter system. The front view (left) shows a vertical rectangular unit with a terminal block at the bottom and a control panel at the top. Dimensions A, B, C, D, E, and H are indicated. The side view (right) shows the unit's profile with a hatched heat sink area of thickness T and a total depth of F. A diameter dimension Dø is also shown.</p>
W (Width)	65	
H (Height)	232.5	
D (Depth)	67.5	
A	32.5	
C	246.5	
D	∅ 4.8	
E	256.5	
F	187.5	
<b>Weight</b>	[kg]	
Heat sink	0.9
