The TSR-1 series step-down switching regulators are drop-in replacement for inefficient 78Xx linear regulators. A high efficiency up to 96 % allows full load operation up to $+60^{\circ}\text{C}$ ambient temperature without the need of any heat-sink or forced cooling. The TSR-1 switching regulators provide other significant features over linear regulators, i.e. better output accuracy ($\pm 2\%$), lower standby current of 2 mA and no requirement of external capacitors. The high efficiency and low standby power consumption makes these regulators an ideal solution for many battery powered applications.
