LOGIQ™ 400
Service Manual

Copyright © 1995, 1996, 1997, 1998, 1999, 2000 by General Electric Company

LIST OF EFFECTIVE PAGES

REV	DATE	PRIMARY REASON FOR CHANGE
0	July 27, 1995	Initial release
1	October 6, 1995	Software version 2.10 release, error correction
2	July 10, 1996	Software version 3.00 release, error correction
3	March 10, 1997	Software version 3.10 release, error correction
4	December 17, 1997	LOGIQ™ 400CL release, error correction
5	June 19, 1998	Software version 3.40 and 3.41 for LOGIQ™ 400CL release and error correction
6	April 21, 1999	Software version 4.01y and 4.02y release and error correction
7	September 17, 1999	Additional information for SGMS Manufacturing
8	October 15, 1999	Software version 4.31y and 4.32y release and error correction
9	March 17, 2000	Software version 5.01 release and error correction

CHAPTER 6 – RENEWAL PARTS

6-1	RENEWAL PARTS	6-7
6-2	DISASSEMBLY/RE-ASSEMBLY	6-69
6-2-1	Monitor Assy (FRU No. 100)	6-70
6-2-2	Monitor Cover Set (FRU No. 101)	6-72
6-2-3	Escutcheon Latch (FRU No. 103)	6-76
6-2-4	Escutcheon Front Door (FRU No. 107)	6-77
6-2-5	CRT Cap Set (FRU No. 108)	6-78
6-2-6	CRT Filter (FRU No. 109), CRT Filter Clamp Set (FRU No. 110)	6-79
6-2-7	Accessory Assy (FRU No. 111)	6-80
6-2-8	Speaker Assy (FRU No. 112)	6-82
6-2-9	CRT Lamp Assy (FRU No. 113), CRT Lamp (FRU No. 114)	6-84
6-2-10	CRT Assy (FRU No. 115)	6-86
6-2-11	CRT Cable Set (FRU No. 116)	6-88
6-2-12	Monitor Assy NTSC (FRU No. 150), Monitor Assy PAL (FRU No. 151)	6-90
6-2-13	Monitor Cover (FRU No. 152)	6-92
6-2-14	Escutcheon Assy (FRU No. 153)	6-93
6-2-15	Fixing Metal Plate (FRU No. 154)	6-96
6-2-16	CRT Filter (FRU No. 155), CRT Filter Clamp Set (FRU No. 156)	6-97
6-2-17	Monitor Bottom Assy (FRU No. 157)	6-98
6-2-18	CRT Assy NTSC (FRU No. 158), CRT Assy PAL (FRU No. 159)	6-100
6-2-19	CRT Cable Set (FRU No. 160)	6-102
6-2-20	CRT Lamp (FRU No. 161)	6-103
6-2-21	Monitor15 Assy (FRU No. 170)	6-104
6-2-22	Monitor15 Cover Set (FRU No. 171)	6-106
6-2-23	Speaker Assy (FRU No. 178)	6-109
6-2-24	Task Lamp (FRU No. 180)	6-110
6-2-25	CRT Cable Set (FRU No. 182)	6-111
6-2-26	Neck Assy (FRU No. 201 for Color Monitor, No. 202 for B/W Monitor)	6-114
6-2-27	Neck Grip (FRU No. 203)	6-117
6-2-28	Neck Space Plate (FRU No. 204)	6-120
6-2-29	Neck Space Plate 2 (FRU No. 205)	6-122
6-2-30	Rotation Spacer (FRU No. 206)	6-124
6-2-31	Side Cover Left (FRU No. 301)	6-127
6-2-32	Side Cover Right (FRU No. 302)	6-128
6-2-33	Rear Cover (FRU No. 303)	6-129
6-2-34	Rear Door Assy (FRU No. 304)	6-130
6-2-35	Front Base Cover (FRU No. 305)	6-131
6-2-36	Front Cover (FRU No. 306)	6-132
6-2-37	Keyboard Bottom Cover (FRU No. 307)	6-134
6-2-38	Top Cover (FRU No. 308)	6-135
6-2-39	Front Bumper Set (FRU No. 310)	6-136
6-2-40	Corner Guard (FRU No. 311)	6-137
6-2-41	Probe Holder (FRU No. 312)	6-138

6-2-42	Gel Holder (FRU No. 313), Gel Holder Bottom (FRU No. 314)	6-139
6-2-43	Handle (FRU No. 315)	6-140
6-2-44	Air Filter (FRU No. 316)	6-141
6-2-45	Cable Arm Assy (FRU No. 317)	6-142
6-2-46	Front Caster Assy (FRU No. 318)	6-143
6-2-47	Rear Caster Assy (FRU No. 319)	6-144
6-2-48	Caster Cover Assy (FRU No. 320)	6-145
6-2-49	Keyboard Panel Assy (FRU No. 400)	6-147
6-2-50	Keyboard Assy (FRU No. 401), Keyboard Cover (FRU No. 402), Key Sheet (FRU No. 403)	6-148
6-2-51	Keyboard Knob Set (FRU No. 404)	6-151
6-2-52	Trackball (FRU No. 405)	6-152
6-2-53	Gain Encoder (FRU No. 410)	6-153
6-2-54	Keyboard Panel Assy (FRU No. 450)	6-155
6-2-55	Keyboard Cover Assy (FRU No. 451), SW PWB (FRU No. 462), Rubber Key (FRU No. 452, 453, 454, and 455)	6-156
6-2-56	Keyboard Knob Set (FRU No. 464)	6-159
6-2-57	Trackball (FRU No. 457)	6-160
6-2-58	TGC Assy (FRU No. 458)	6-161
6-2-59	Freeze Key Assy (FRU No. 459)	6-162
6-2-60	Rotary Encoder (FRU No. 460)	6-163
6-2-61	Rear CONN Panel Assy (FRU No. 501)	6-166
6-2-62	CNTIF Assy (FRU No. 502)	6-168
6-2-63	AVIF Assy or BVIF Assy (FRU No. 503)	6-169
6-2-64	Circuit Protector (FRU No. 504: 15A, FRU No. 505: 7.5A)	6-170
6-2-65	ECG Board Assy (FRU No. 506)	6-171
6-2-66	ECG Panel Assy (FRU No. 507)	6-172
6-2-67	Nest Fan Assy (FRU No. 511)	6-174
6-2-68	Probe CONN Set Assy (FRU No. 512 for 3 slots model, FRU No. 513 for 2 slots model)	6-176
6-2-69	Connector Cover (FRU No. 514)	6-178
6-2-70	Shield Finger Long (FRU No. 515), Shield Finger Short (FRU No. 516)	6-179
6-2-71	Probe CONN 1 Assy (FRU No. 517) or DCON Assy (FRU No. 518)	6-180
6-2-72	PRAG Assy (FRU No. 519)	6-182
6-2-73	MODD (FRU No. 520), MODD Fan (FRU No. 521), MODD Holder Assy (FRU No. 522)	6-184
6-2-74	HDD Assy (FRU No. 523), HDD Holder Assy (FRU No. 524)	6-189
6-2-75	HDDB Assy (FRU No. 525)	6-195
6-2-76	HDD LED Assy (FRU No. 526)	6-196
6-2-77	Power Switch Assy (FRU No. 527)	6-197
6-2-78	P.C. Board(s) (FRU No. 601 through 612)	6-198
6-2-79	Time Keeper RAM (FRU No. 613)	6-200
6-2-80	Time Keeper Battery (FRU No. 613B)	6-202

1-1 SERVICE MANUAL CONTENTS

This manual provides service information on the LOGIQ™ 400 Ultrasound Scanning System. It contains the following chapters:

1. **Chapter 1, Introduction:** Contains a content summary and warnings;
2. **Chapter 2, Installation:** Contains physical and electrical requirements that must be considered prior to installation and a complete LOGIQ™ 400 installation procedure with installation checklist;
3. **Chapter 3, System Configuration:** Contains system configuration and specifications;
4. **Chapter 4, Functional Checks:** Contains functional checks that must be performed as part of the installation, or as required during servicing and periodic maintenance;
5. **Chapter 5, Diagrams:** Contains block diagrams and functional explanations of the LOGIQ™ 400 electronics;
6. **Chapter 6, Renewal Parts:** Contains a complete list of replacement parts for the LOGIQ™ 400 and disassembly procedures for all changeable FRU;
7. **Chapter 7, Periodic Maintenance:** Provides periodic maintenance procedures for the LOGIQ™ 400.
8. **Chapter 8, Options:** Provides installation procedures and changeable FRU for the optional devices.

1-2 SAFETY

1-2-1 Warnings

CAREFULLY READ ALL THE WARNINGS LISTED BELOW!

1. The operator manual should be fully read and understood before operating the LOGIQ™ 400 and kept nearby for quick reference.
2. Although the ultrasound energy transmitted from the LOGIQ™ 400 transducer is within AIUM/NEMA standards, unnecessary exposure should be avoided. Only trained personnel should operate the LOGIQ™ 400.
3. To prevent electrical shock, the LOGIQ™ 400 should be connected to a properly grounded power receptacle. Do not use a three prong to two prong adapter. This defeats safety grounding.
4. Do not use with Defibrillator when LOGIQ™ 400 is being operated .
5. Probes are fragile, please handle with care.
6. Concerning Outside Markings, refer to Illustration 1-1, 1-2, 1-3, 1-4, 1-5, 1-6, and 1-7.
7. For the cleaning, disinfection, and sterilization, refer to Probe section in LOGIQ™ 400 User Manual and Caution Sheet supplied with each probe.

NOTICE

This medical equipment is approved, in terms of the prevention of radio wave interference, to be used in hospitals, clinics and other institutions which are environmentally qualified. The use of this equipment in an inappropriate environment may cause some electronic interference to radios and televisions around the equipment. Proper handling of this equipment is required in order to avoid such trouble according to the operator and service manuals.

This equipment can be used in residential areas only under the supervision of physicians or qualified technicians.

Improper performance possibility. Do not use the following devices near this equipment. Cellular phone, radio transceiver, mobile radio transmitter, radio-controlled toy, etc. Use of these devices near this equipment could cause this equipment to perform outside the published specifications. Keep power to these devices turned off when near this equipment.

WARNING 警告 WARNING AVERTISSEMENT AVVERTENZE AVVERTENCIA AVVERTENCIA

Hazardous movement can cause serious injury. Keep your head and body away from above video monitor support arm. Video monitor support arm is spring loaded. Releasing arm when monitor is not attached will cause sudden upward movement.

危険を避けるのに注意。頭や手をモニターアームの上から離さないこと。ビデオモニターが接続されていない状態でモニターアームのロックを解除すると、モニターアームが飛び出します。

Gefährliche Bewegungen können zu schweren Verletzungen führen. Bringen Sie nicht Gesicht oder Hände in die Nähe des Videomonitortagearms. Der Videomonitortagearm ist federbelastet. Entriegelung des Arms ohne aufgesetzten Monitor läßt den Arm nach oben federn.

Tout mouvement dangereux peut provoquer des blessures sérieuses. Se tenir à bonne distance du bras de support à ressorts du moniteur vidéo. Quand le moniteur n'est pas monté, la libération du bras provoquera son soulèvement brutal.

Bruschi movimenti possono provocare ferite. Tenete la testa ed il corpo lontano dal supporto del monitor quando il monitor non è montato. Lo sganciamento accidentale del supporto può causare un improvviso movimento di quest'ultimo verso l'alto.

Movimentos perigosos podem causar sérios danos. Mantenha sua cabeça e corpo afastados da parte superior da alavanca de suporte do monitor de vídeo. Alavanca de suporte do monitor de vídeo é equipada de mola. Liberando a alavanca, quando o monitor não estiver fixado, causará repentino movimento dirigido para cima.

El movimiento peligroso puede ocasionar daños serios. Mantenga la cabeza y el cuerpo apartados de la parte superior del brazo de soporte del monitor de vídeo. El brazo de soporte del monitor de vídeo tiene carga de resorte. Si se suelta el brazo cuando no está montado el monitor, se ocasionará el movimiento súbito hacia arriba.

Do not use the following devices near this equipment. Cellular phone, radio transceiver, mobile radio transmitter, radio controlled toy, etc. Use of these devices near this equipment could cause this equipment to perform outside the published specifications. Keep power to these devices turned off when near this equipment.

本機付近では以下の機器を使用しないでください。本機が仕壊から外れた動作をすることがあります。携帯電話、トランシーバー、携帯無線機、ラジオコンのおもちゃなど。本機の近くではこれらの機器の電源スイッチを切ってください。

In der Nähe dieses Systems folgende Geräte nicht benutzen: Funktelefone, Radioempfänger, mobile Radiosender, ferngesteuertes Spielzeug, usw. Der Gebrauch dieser Geräte könnte während des Betriebes Fehlfunktionen verursachen. Schalten Sie die Stromversorgung dieser Geräte in der Nähe der Ausrüstung ab.

Près de ne pas utiliser les appareils suivants à proximité de cet équipement: téléphones portables, émetteurs-récepteurs, appareils radio-commandés, etc. Ce type d'appareil peut faire dévier les performances du système en dehors des spécifications annoncées. Mettre ces appareils hors tension lorsqu'ils se trouvent à proximité de cet équipement.

Non utilizzare mai i seguenti dispositivi nelle vicinanze di questa apparecchiatura: telefoni cellulari, ricevatrasmettitori radio, trasmettitori radiomobili, giocattoli telecomandati, ecc. L'utilizzo di tali dispositivi potrebbe provocare il disfunzionamento di questa apparecchiatura. Tenere spenti tali dispositivi nelle vicinanze di questa apparecchiatura.

Favor não utilizar os seguintes aparelhos perto deste equipamento. Telefone móvel, rádio trans-receptor, rádio transmissor móvel, brinquedos de controle remoto, etc. A utilização desses aparelhos perto deste equipamento pode fazer com que não funcione segundo as especificações publicadas. Favor manter esses aparelhos desligados quando estiverem perto deste equipamento.

No utilice los siguientes aparatos cerca de este equipo. Teléfono móvil, transmisor-receptor, transmisor de radio móvil, juguete radio controlado, etc. La utilización de estos aparatos cerca de este equipo puede hacer que el equipo no funcione según las especificaciones publicadas. Mantenga estos aparatos apagados cuando esté cerca de este equipo.

Possible shock hazard. Do not remove Covers or Panels. Refer servicing to qualified personnel.

感電の危険あり。カバー(または背板)を取り除かないこと。修理点検はサービスセンターに依頼すること。

Gefahr eines elektrischen Schlags! Abdeckungen oder Verkleidungen nicht entfernen. Wartungsarbeiten nur durch qualifiziertes Fachpersonal durchführen lassen.

Risque de décharge électrique. Les capots et panneaux ne doivent être retirés que par un personnel qualifié.

Rischio di scosse elettriche. I pannelli di chiusura devono essere rimossi solo da personale qualificato.

Possível choque. Não remova tampas ou painéis. Solicite assistência técnica por pessoal qualificado.

Peligro de descargas eléctricas. No saque las cubiertas ni los paneles. El servicio debe realizarlo el personal cualificado.

For continued protection against fire or shock hazard. Replace only with same type and rating of Fuse.

火災の危険あり。表示されたヒューズと交換のこと。

Zum dauerhaften Geräteschutz und zur Vermeidung elektrischer Schläge nur Sicherungen des gleichen Typs und Nennwertes verwenden.

Pour éviter tout risque de décharge électrique ou d'incendie, les fusibles de remplacement doivent respecter le type et le calibre spécifiés pour la tension réseau choisie.

Sostituire i fusibili utilizzando soltanto fusibili dello stesso tipo, dimensione e amperaggio.

Para proteção contínua contra fogo ou choque. Substitua somente com fusível do mesmo tipo e capacidade.

Como protección continua contra descargas eléctricas e incendios, reemplaza el fusible sólo por otro que sea del mismo tipo y del mismo amperaje.

Grounding reliability can only be achieved when this equipment is connected to a receptacle marked "Hospital Only" or "Hospital Grade".

この機器は「医用コンセント(Ⓜマーク)」に接続したときのみ保護接地の信頼性が保証されません。

United States law restricts this device to sale or use by or on the order of a physician.

1-2-1 Warnings (Continued)

The following table describes the purpose and location of safety labels and other important information provided on the equipment.

Label/Symbol	Purpose/Meaning	Location
Identification and Rating Plate	<ul style="list-style-type: none"> • Manufacturer's name and address • Date of manufacture • Model and serial numbers • Electrical ratings 	Rear of console near power inlet
Type/Class Label	Used to indicate the degree of safety or protection.	
	Equipment Type BF (man in the box symbol) IEC 878-02-03 indicates B Type equipment having a floating applied part.	Probe connectors and PCG connector
	Equipment Type CF (heart in the box symbol) IEC 878-02-05 indicates equipment having a floating applied part having a degree of protection suitable for direct cardiac contact.	ECG connector and surgical probes
Device Listing/ Certification Labels	Laboratory logo or labels denoting conformance with industry safety standards such as UL or IEC.	Rear of console
"DANGER – Risk of explosion used in..."	The system is not designed for use with flammable anesthetic gases.	Rear of console
	<ul style="list-style-type: none"> • "CAUTION" The equilateral triangle is usually used in combination with other symbols to advise or warn the user. 	Various
	<ul style="list-style-type: none"> • "ATTENTION – Consult accompanying documents" is intended to alert the user to refer to the operator manual or other instructions when complete information cannot be provided on the label. 	Various
	<ul style="list-style-type: none"> • "WARNING – Dangerous voltage" (the lightning flash with arrowhead) is used to indicate electric shock hazards. 	Left and right side of power supply unit

1-2-1 Warnings (Continued)

Label/Symbol	Purpose/Meaning	Location
	<ul style="list-style-type: none"> • "Mains OFF" Indicates the power off position of the mains power switch. 	Rear of system Adjacent to mains switch
	<ul style="list-style-type: none"> • "OFF/Standby" Indicates the power off/standby position of the power switch. CAUTION This Power Switch DOES NOT ISOLATE Mains Supply	Adjacent to On-Off/Standby Switch
	<ul style="list-style-type: none"> • "Mains ON" Indicates the power on position of the mains power switch. 	Rear of system Adjacent to mains switch
	<ul style="list-style-type: none"> • "ON" Indicates the power on position of the power switch. CAUTION This Power Switch DOES NOT ISOLATE Mains Supply	Adjacent to On-Off/Standby Switch
	<ul style="list-style-type: none"> • "Protective Earth" Indicates the protective earth (grounding) terminal. 	Not used
	<ul style="list-style-type: none"> • "Equipotentiality" Indicates the terminal to be used for connecting equipotential conductors when interconnecting (grounding) with other equipment. 	Rear of console
	<ul style="list-style-type: none"> • "Non-ionizing Radiation" indicates that the system applies RF energy. 	Rear of console near power inlet

1-2-2 Specifications

- Type of protection against electric shock: Class I EQUIPMENT (*1)
- Degree of protection against electric shock: Type BF EQUIPMENT (*2) (Except ECG)
Type CF EQUIPMENT (*3) (ECG Only)

Ordinary Equipment
Continuous Operation

***1. Class I EQUIPMENT**

EQUIPMENT in which protection against electric shock does not rely on BASIC INSULATION only, but which includes an additional safety precaution in that means are provided for the connection of the EQUIPMENT to the protective earth conductor in the fixed wiring of the installation in such a way that ACCESSIBLE METAL PARTS cannot become LIVE in the event of a failure of the BASIC INSULATION.

***2. Type BF EQUIPMENT**

TYPE B EQUIPMENT with an F-TYPE APPLIED PART

TYPE B EQUIPMENT: EQUIPMENT providing a particular degree of protection against electric shock, particularly regarding:

- allowable LEAKAGE CURRENT;

	Normal mode	Single failure mode
Patient leakage current	Less than 100µA	Less than 500µA

***3. Type CF EQUIPMENT**

EQUIPMENT providing a particular degree of protection higher than that for TYPE OF BF EQUIPMENT against electric shock particularly regarding allowable LEAKAGE CURRENT, and having an F-TYPE APPLIED PART.

- allowable LEAKAGE CURRENT;

	Normal mode	Single failure mode
Patient leakage current	Less than 10µA	Less than 50µA

1-3 EMC (Electromagnetic Compatibility)

1-3-1 EMC Performance

All types of electronic equipment may characteristically cause electromagnetic interference with other equipment, either through air or connecting cables. The term EMC (Electromagnetic Compatibility) indicates capability of the equipment, which curbs electromagnetic influence from other equipment and at the same time does not affect other equipment with similar electromagnetic radiation from itself.

This product is designed to fully comply with the EN60601-1-2 (IEC601-1-2), in Medical electrical equipment EMC regulations.

Proper installation following this service manual is required in order to achieve the full EMC performance of the product.

The product must be installed as stipulated in 1-3-2, Notice upon Installation of Product.

In case of issues related to EMC, please follow procedures stated in 1-3-4, Countermeasures against EMC-related Issues.

1-3-2 Notice upon Installation of Product

- 1) Use either power supply cords provided by GEMS or ones designated by GEMS. Products equipped with power source plug should be plugged into the fixed power socket which has the protective grounding conductor.

Connect a three-pole plug to a three-pole socket without using a three-pole-to-two-pole converter.

- 2) Locate the equipment as far as possible from other electronic equipment.
- 3) Be sure to use either any cables provided by GEMS or ones designated by GEYMS. Wire these cables following these installation procedures.

(Example) Wire power cables separately from signal cables.

- 4) Lay out the main equipment and other peripherals following the installation procedures described in Chapter2, INSTALLATION.

1-3-3 General Notice

1) Designation of Peripheral Equipment Connectable to This Product

The equipment which conforms to EN60601-1-2 (IEC601-1-2), can be hooked up to the product without compromising its EMC performance.

Avoid using non-standardized equipment. Failure to comply with this instruction may result in poor EMC performance of the product.

2) Notice against User Modification

Never modify this product. Unilateral user modification may cause degradation in EMC performance. Modification of the product includes:

- a) Changes in cables (length, material, wiring etc.)
- b) Changes in system installation/layout
- c) Changes in system configuration/components
- d) Changes in means of fixing system/parts (cover open/close, cover screwing)

3) Operate the system with all covers closed. If you open any cover for some reason, be sure to shut it before starting/resuming operation.

Operating the system with any cover open may affect EMC performance.

1-3-4 Countermeasures against EMC-related Issues

Generally it is very difficult to grapple with issues related to EMC. It may take much time and cost.

General countermeasures

Electromagnetic interference with other equipment

- 1) Electromagnetic interference may be alleviated by positioning other equipment far from the system.
- 2) Electromagnetic interference may be mitigated by changing the relative location (installation angle) between the system and other equipment.
- 3) Electromagnetic interference may be eased by changing wiring locations of power/signal cables of other equipment.
- 4) Electromagnetic influence may be reduced by altering the path of power supply for other equipment.

1-3-5 Notice on Service

- 1) Ensure all screws are tight after servicing. Loose screws may cause degradation in EMC performance.
- 2) In case the high frequency gasket of this system is broken, replace it with a new one immediately.

1-4 ADDRESS

This system is not repairable by the customer. If this equipment does not work as indicated in the Operator Manual, please contact your service support center. If the service engineer needs additional information to repair this equipment, please contact the following address (The necessary information will be provided to the Service Engineer as needed):

2-1 PREINSTALLATION

2-1-1 Introduction

This section describes various general electrical, operational, and environmental considerations that must be considered before installing the LOGIQ™ 400 Ultrasound unit.

2-1-2 Power Line Requirements

The following power line parameters should be monitored for one week before installation. We recommend that you use an analyzer Dranetz Model 606-3 or Dranetz Model 626:

PARAMETER	:	LIMITS
Voltage Range	: Japan.	: 100 VAC ±10% (90–110 VAC)
	: Europe	: 220–240 VAC ±10% (198–264 VAC)
	USA	: 120 VAC ±10% (108–132 VAC)
Power	: Japan	: MAX. 1000 VA
	: Europe	: MAX. 1000 VA
	: USA	: MAX. 1000VA
Line Frequency	: All applications	: 50/60Hz (±2Hz)
Power Transients	:	Less than 25 % of nominal peak voltage for less than 1 millisecond for any type of transient, including line frequency, synchronous, asynchronous, or aperiodic transients.
Decaying Oscillation	:	Less than 15 % of peak voltage for less than 1 millisecond.

2-1-3 Physical Specifications

The LOGIQ™ 400 (excluding accessories) weighs 145 kg (320 lbs). See Chapter 3, ILLUSTRATION 3-1 for dimensions.

Operating Conditions

The LOGIQ™ 400 is designed to operate within a temperature range of 10 degrees C to 40 degrees C (50 degrees F to 104 degrees F), and a relative humidity range of 30 % to 85 % (Non-condensing).

Patient Comfort

Concerning permissible operating temperature and humidity tolerances, we recommend that ambient room temperature should be maintained between 20 to 26 degrees C (68 to 79 degrees F), Humidity should be maintained between 50 % and 70 % for patient comfort during ultrasound scanning.

Electromagnetic Interference (EMI)

Ultrasound machines are susceptible to interference from the radio frequencies, magnetic fields, and transients in the air or power leads. Possible EMI sources should be identified. Electrical and electronic equipment may produce EMI unintentionally as the result of a malfunction. These sources include medical lasers, cauterizing guns, computers, monitors, fans, gel warmers, microwave ovens, and cellular phones. The presence of broadcast station or van may also cause interference.

Carefully read the following precautions before installing the unit.

1. Connect the power plug for any other equipment into the fixed outlet with ground wire.
2. Securely connect any equipment with permanent ground connection to the earth ground furnished in the building.
3. Install the unit as far from any electrical or electronic equipment as possible.

If any EMI troubles are known or suspected to be present, try to deal with the equipment suspected to have influence on the Ultrasound machine as follows:

1. Move the ultrasound machine as far from the equipment as possible.
2. Change the arrangement of the equipment in the room.
3. Plug the equipment into other outlet.
4. Move the power cable or signal cable connected with the equipment.

Securely re-tighten drive any screws for the Ultrasound machine after re-assembling for service operation.

2-1-4 Recommended Ultrasound Room Layout

Table 2-1 provides the requirements for an ultrasound room:

TABLE 2-1
ULTRASOUND ROOM REQUIREMENTS

POWER SOURCE	220-240VAC, 50Hz, SINGLE PHASE For Europe Version 115VAC, 60Hz, SINGLE PHASE For USA Version
CURRENT RATING	15A (115V, 100V) ; 7.5A (220-240V) CIRCUIT BREAKER
RADIATION SHIELDING	NONE REQUIRED for ULTRASOUND ENERGY
TEMPERATURE	20-26 DEG. C (68-79 DEG F) for PATIENT COMFORT
HUMIDITY	50% to 70% for PATIENT COMFORT
HEAT DISSIPATION	2000 BTU/Hr for LOGIQ™ 400 ;
FLOOR LOADING	Approximately 680 – 800 kg/m ² without Accessories
FLOOR CONDITION	Gradient : WITHIN 5 degrees
LOGIQ™ 400 Weight	145 kg (320lbs) without Accessories

2-1-4 Recommended Ultrasound Room Layout (Continued)

Optional Desirable Ultrasound Room Facilities

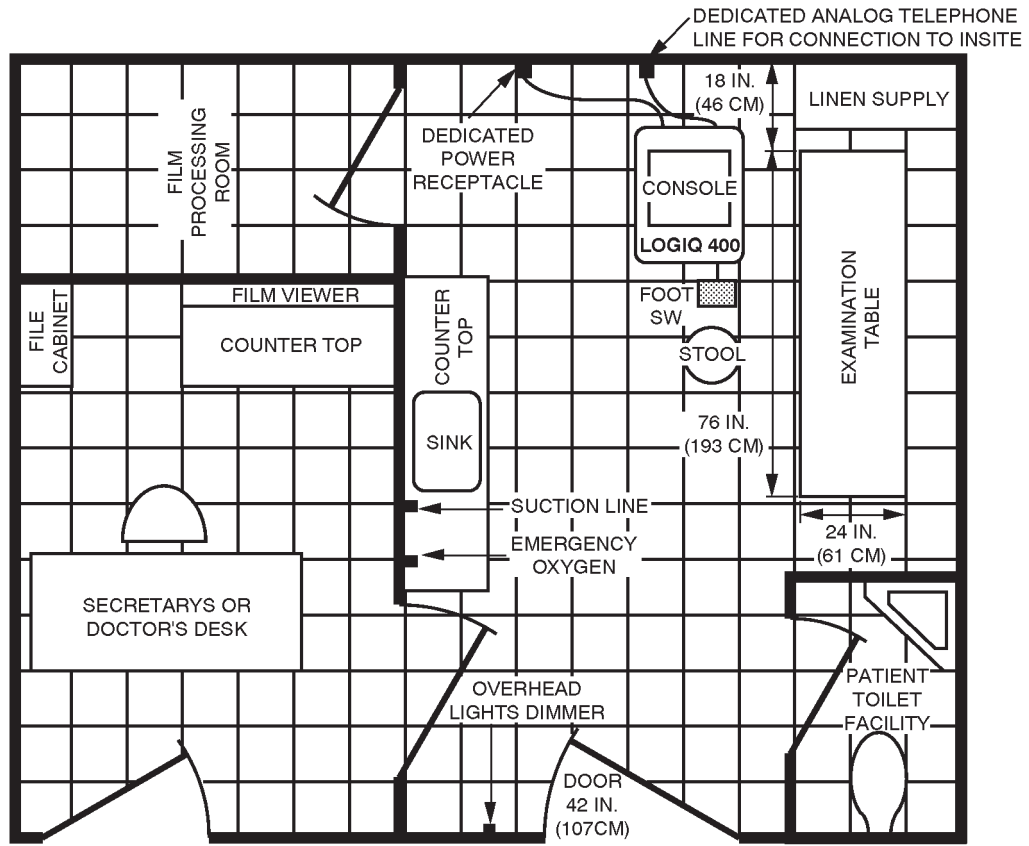

These facilities are:

1. Lab sink with hot and cold water;
2. Emergency oxygen supply;
3. Dimmer control for overhead lights;
4. Film viewer;
5. Film and linen storage;
6. Medical equipment storage;
7. Hospital grade equipment electrical outlet;
8. Analog telephone line for connection to InSite;
9. Document storage area for operating and service manuals;
10. Nearby waiting room, dressing room, lavatory
11. Trash bin.

2-2 INSTALLATION

2-2-1 Introduction

This section contains many of the procedures required to install the LOGIQ™ 400 console.

2-2-2 Average Installation Time

The LOGIQ™ 400 has been designed to be installed and checked out by an experienced service technician in approximately four hours. LOGIQ™ 400 consoles with optional equipment may take slightly longer.

2-2-3 Installation Warnings

1. Since the LOGIQ™ 400 weighs approximately 320 lbs (145 kg) without options, preferably two people should unpack it. Two people are also preferable for installing any additional bulky items.
2. There are no operator serviceable components. To prevent shock, do not remove any covers or panels. Should problems or malfunctions occur, unplug the power cord. Only qualified service personnel should carry out servicing and troubleshooting.

Note

For information regarding packing labels, refer to ILLUSTRATION 2-3, LABELS ON PACKAGE.

2-2-4 Checking the Components

When a new system arrives, check that any components are not damaged and are not in short supply. If shipping damage or shortage occurs, contact the address shown in Chapter 1.

2-2-5 Unpacking LOGIQ™ 400

Do not lift the unit by the Keyboard. Equipment damage may result.

The unit weighs approximately 145kg (320 lbs). Be prepared for a sudden shift of weight as the unit is removed from its base (pallet).

Refer to ILLUSTRATION 2-2 while performing the following procedure.

1. Cut the two PLASTIC BANDS.
2. Lift the TOP COVER up and off.
3. Lift the MONITOR CAP up and off.
4. Remove the three PLASTIC JOINTs from the OUTER SLEEVE.
5. Remove the OUTER SLEEVE.
6. Remove the INNER SLEEVE.
7. Remove the PLASTIC BAG.
8. Lift the Monitor up by pressing the <UP/DOWN Release> button located on the Monitor Arm.
9. Remove the MONITOR SUPPORTER.
10. Remove the adhesive tapes attached at the four corners of the TOP COVER.
11. Put the TOP COVER on floor and prepare the slope to put the console down as shown in ILLUSTRATION 2-2.
12. Unlock the brakes by stepping down on the brake pads in front, then carefully put the LOGIQ™ 400 console off the PALETTE.
13. Remove the Caution Label attached in front of the CRT (or CRT Filter) and clean the CRT (or CRT Filter).

Note

Check the shipping container for special instructions. Verify that the container is intact. In some cases a secondary container may be used. If so, ask the carrier for unpacking instructions.

2-2-6 Probe Cable Arm Installation

Probe Cable Arm is supplied with the LOGIQ™ 400 console (except to Japanese console). This provides the procedures for installing the probe cable arm onto console.

1. Set the arm spacer to the axis of the probe cable arm. Refer to ILLUSTRATION 2-4.
2. Insert the probe cable arm into the hole onto console as shown in ILLUSTRATION 2-4.

PROBE CABLE ARM INSTALLATION
ILLUSTRATION 2-4

2-2-7 MTZ Probe Holder Installation

One MTZ probe holder is supplied with the LOGIQ™ 400 console. Assemble the MTZ probe holder at the bottom of standard probe holder by screwing two screws (① and ②: supplied with the starter kit) as shown in ILLUSTRATION 2-5.

MTZ PROBE HOLDER INSTALLATION
ILLUSTRATION 2-5

2-2-8 Transducer Connection

Connect a transducer to the upper transducer receptacle as follows:

1. Ensure that the transducer twist lock lever points towards the 3 o'clock position.
2. Insert the transducer connector on the receptacle guide pin until it touches the receptacle mating surface.
3. Twist the transducer twist lock lever to the 7 o'clock position to lock it in place. Twist the lever to the 3 o'clock position to disconnect the transducer.

Note

It is not necessary to turn the system power OFF to connect or disconnect a transducer.

2-2-9 Powering-Up Procedure

1. Make sure that the circuit breaker located at the rear side of the PS Unit is set to OFF position (lower side). Refer to ILLUSTRATION 2-6.
2. Make sure that the main power switch located at the front side of console is set to OFF position. Refer to ILLUSTRATION 2-6.

CIRCUIT BREAKER AND MAIN POWER SWITCH
ILLUSTRATION 2-6

3. Plug the main power cable to a hospital grade power receptacle with the proper rated voltage checked during preinstallation.

Note

Never use a three-to-two prong adapter; this defeats the safety ground.

4. Set the circuit breaker to ON position (upper side).
5. Turn the main power switch ON. LOGIQ™ 400 will start the power-up sequence.

Note

Follow the procedures below when unplugging the system.

1. Turn the main power switch OFF.
2. Wait a while until the power off process is completed.
3. Set the circuit breaker to OFF position (lower side).
4. Unplug the main power cable.

2-2-10 Moving into Position

Do not lift the unit by the Keyboard.

Do not tilt the unit more than 5 degrees to avoid tipping it over.

To avoid injury by tipping over. Set the monitor to the lowest position before moving.

In general, a single adult can move the LOGIQ™ 400 along an even surface with no steep grades. At least two people should move the machine when large humps, grooves, or grades will be encountered. (It is better to pull from the rear rather than push from the front of the unit). Before moving, store all loose parts in the unit. Wrap transducers in soft cloth or foam to prevent damage.

Although LOGIQ™ 400 is a compact and mobile machine, two people should move it over rough surfaces or up and down grades.

2-2-11 Adjusting System Clock

Set the system clock for the LOGIQ™ 400 to the local time. For procedure of adjusting the system clock, refer to 4-3-3 Utility Menu, (A) TIME ADJUSTMENT, in Chapter 4, FUNCTIONAL CHECKS.

2-2-12 Product Locator Installation Card

Fill out proper customer information on the Product Locator Installation Card. Refer to ILLUSTRATION 2-7. Mail this Installation Card "Product Locator" to the address corresponding to your pole.

Note

The Product Locator Installation Card shown in ILLUSTRATION 2-7 may not be same as the provided Product Locator card.

3-1 INTRODUCTION

This chapter describes system configuration and specifications.

3-2 DIMENSIONS

Regarding LOGIQ™ 400 dimensions, Refer to ILLUSTRATION 3-1 and 3-2, for planning the position of your LOGIQ™ 400.

OVERALL DIMENSIONS (Color Monitor Models and B/W Monitor Models with S/W V4.01 or later)

ILLUSTRATION 3-1

3-2 DIMENSIONS (continued)

WEIGHT: 136 kg
300 lbs

NOTE

LENGTH : mm (inches)

ABERRATION : ±10%

OVERALL DIMENSIONS (B/W Monitor Models with S/W V3.40 or earlier)

ILLUSTRATION 3-2

Note

The ILLUSTRATION 3-2 shows the dimensions for the B/W console with the software version 3.40 or earlier. For the dimensions of the B/W console with the software version 4.01 or later, refer to ILLUSTRATION 3-1.

3-2 DIMENSIONS (continued)

ILLUSTRATION 3-3 shows the dimensions for the LOGIQ™ 400 console with the software version 5.01y or later.

Note

The tall type console is 75mm taller than the normal height console.

WEIGHT: 145 kg
320 lbs

NOTE

LENGTH : mm (inches)
ABERRATION : ±10%

OVERALL DIMENSIONS (15-INCH Monitor Models with S/W V5.01 or later)
ILLUSTRATION 3-3

3-3 ELECTRICAL SPECIFICATIONS

Electrical conduit, junction boxes, outlets, circuit breakers, and switches should be in place before installing the LOGIQ™ 400 console.

3-3-1 Power Supply

Voltage setup is performed in the factory, since different rear panels which contain different power cables and circuit breakers are used for the 100 VAC and 220 VAC versions.

3-3-2 Facility Power Receptacle

A separate power outlet with a 15 amp circuit breaker for 115 VAC units, or a 7.5 amp circuit breaker for 220 VAC units, is recommended. The specific power receptacle used depends on your country's power line standards.

The receptacle should have International Electrotechnical Commission (IEC) approval, or equivalent.

3-4 STORAGE AND OPERATION REQUIREMENTS

The LOGIQ™ 400 is shipped in a single container excluding PROBES. Shipping weight is approximately 395 lbs (179kg) [B/W monitor console: 375lbs (170kg)]. The size of the container is D1100 mm x W660 mm x H1390 mm. (43 in. x 26 in. x 55 in). TABLE 3-1 provides a summary of temperature, atmospheric pressure, and humidity tolerances for shipping, installation, and operation:

TABLE 3-1
STORAGE AND OPERATION REQUIREMENTS

PARAMETER	STORAGE	OPERATION
TEMPERATURE (DEG.C) (DEG.F)	-10 to 60 14 to 140	10 to 40 50 to 104
ATMOSPHERIC PRESSURE (hPa)	700 to 1060	700 to 1060
HUMIDITY (%) (Non-condensing)	30 to 95	30 to 85

3-5 OPTIONAL PERIPHERALS

3-5-1 Peripherals/Accessories Connector Panel

LOGIQ™ 400 peripherals and accessories can be properly connected using the rear connector panel located behind the rear door.

The serial ports for controlling recording devices, video input/output connectors, audio input/output connectors, camera expose connectors, foot switch connector, and power outlet connectors for peripherals are located on the rear panel.

This section indicates the pin assignment for each connector (①-⑥) in ILLUSTRATION 3-4 at pages 3-7 through 3-8.

REAR CONNECTOR PANEL
ILLUSTRATION 3-4

Note

The B/W console with the software version 4.01 or later has the same Rear Connector Panel,

3-5-1 Peripherals/Accessories Connector Panel (Continued)

Note

The Ethernet Port (⑥) in ILLUSTRATION 3-4) for the DICOM connection is available on the console with the software version 3.40 or later and the optional DICOM Upgrade Set.

Note

Each outer (case) ground line of peripheral/accessory connectors are protectively grounded. Signal ground lines are Not Isolated, except the Service port (①). All of signal lines (include signal GND) of the Service port are isolated.

① Pin Assignment of RS232C for Service

Connector: Female, D-SUB, 25-pin

Pin No.	Signal	Pin No.	Signal
1		14	
2	TXD	15	
3	RXD	16	
4	RTS	17	
5	CTS	18	
6		19	
7	Signal GND	20	DTR
8	DCD	21	
9		22	
10		23	
11		24	
12		25	
13			

② Pin Assignment of RS232C for VCR/Color Printer (A, B)

Connector: Female, D-SUB, 9-pin

Pin No.	Signal	Pin No.	Signal
1	DCD (+12V)	6	DSR (+12V)
2	RXD	7	RTS
3	TXD	8	CTS
4	DTR (+12V)	9	NC
5	Signal GND		

Note

Output level of RS232C signals:

High	+3V to +15V
Low	-15V to 0V

3-5-1 Peripherals/Accessories Connector Panel (Continued)

③ Pin Assignment of Mini Jack for Controlling B/W Printer

Connector: Stereo Mini Jack

Pin No.	Output Signal
1	PRINT *1
2	Signal GND

*1: Printer starts printing by receiving the LOW pulse more than 100ms.

④ Pin Assignment of Mini Jack for Controlling Color Poraloid Camera

Connector: Stereo Mini Jack

Pin No.	Output Signal
1	SHUTTER *2
2	Signal GND

*2: Camera starts printing by receiving the LOW pulse more than 2ms.

⑤ Pin Assignment of Connector for Foot Switch

Connector: Round 5-pin connector

Pin No.	Output Signal
1	FSW1+
2	FSW1-
3	FSW2+
4	FSW2-
5	Frame GND

Note

Output level of control signals indicated in the above tables are TTL level.

3-5-1 Peripherals/Accessories Connector Panel (continued)

⑥ Pin Assignment of Ethernet 

Connector: Male, D-SUB, 15-pin

Pin No.	Signal	Pin No.	Signal
1		9	CN
2	CP	10	TN
3	TP	11	
4		12	RN
5	RP	13	+12V
6	Signal GND	14	
7		15	
8			

Note

Output level of RS232C signals:

High	+3V to +15V
Low	-15V to 0V

3-5-2 List of Optional Peripherals

The tables below show the optional connectable peripherals for LOGIQ™ 400. Proper remote control and image recording when connecting these peripherals to LOGIQ™ 400, are verified.

1. RECORDING DEVICES

TABLE 3-2
LIST OF RECORDING DEVICES

DEVICE	MANUFACTURER	MODEL	VIDEO SIGNAL
Video Cassette Recorder	SONY	SVO-9500MD	NTSC
	SONY	SVO-9500MDP	PAL
Color Video Printer	SONY	UP-1850MD	NTSC
	SONY	UP-1850EPM	PAL
	SONY	UP-2950MD	NTSC
	SONY	UP-2850P	PAL
	SONY	UP-2900MD	NTSC
	SONY	UP-2800P	PAL
Video Graphic Printer	SONY	UP890MD	NTSC
	SONY	UP890CE	PAL
	SONY	UP890MDG	NTSC/PAL

Note

If the customer need to connect the other peripherals with LOGIQ™ 400 console, please contact the address shown in Chapter 1 of this manual.

Note

The “Quaf-Frm” format is available only for the following color printers:

UP-1850MD, UP-1850EPM, UP-2950MD, and UP-2850P

The “Quaf-Frmls” selection for the Color Printer Memory in the SYSTEM PARAMETER SETUP, is not available for those printers. This function is valid only for the UP-3030MD printer.

3-5-2 List of Optional Peripherals (Continued)

2. CONNECTING CABLES

Equipment damage possibility. Be sure to use the following recommended connecting cables to connect recording devices with LOGIQ™ 400 console.

TABLE 3-3
LIST OF CONNECTING CABLES

NAME	PART NO.	FIGURE	NOTE
POWER CABLE	P9509EE		For recording device
	P9509LH		Used only for installing B/W Video Printer on front of console
RS232C CABLE	P9509MN		For control signals
	2150410		For Insite connection
MINI PLUG CABLE	P9509BE		For control signals (used only for B/W Video Printer)
Ethernet Cable	2195662		For DICOM capability Included in the DICOM Support option with Tranceivers

Note

Some probes listed on the table above have two different part numbers. The number of upper row indicates the part number of probes for the region other than Japan. The number of lower row indicates the part number of probes for Japan.

Probes which have only one part number are not available in Japan.

Note

546L, S317, S611, C386, I739, T739 and LA39 probes are available on LOGIQ™ 400 console from software version 3.00.

Note

B510, S222, CWD2 and CWD5 probes are available on LOGIQ™ 400 console from software version 3.10.

Note

The following probes are not available on LOGIQ™ 400CL:

S220, B510, CWD2, CWD5, S317, S611, and S222

Note

The LD probe is available only for the Japanese console with the software version 3.40 or later.

Note

The C358 and ERB7 probes are available on LOGIQ™ 400 console with the software version 4.01 or later.

Note

The 3S probe is available on LOGIQ™ 400 console with the software version 5.01 or later.

3-5-3 Power Consumption of Optional Peripherals

The table below shows the power consumption of each optional peripheral for LOGIQ™ 400.

4-1 INTRODUCTION

This chapter provides procedures for quickly checking major functions of the LOGIQ™ 400 console, diagnostics by using the built-in service software, and power supply adjustments.

4-1-1 Required Equipment

To perform these tests, you'll need any of a sector, linear, or a convex transducer.

Note

The soft menu displayed on the CRT monitor screen disappears automatically by the time set with the CRT Menu Auto Erase Interval of the System Parameter (page 1/6). When the "Inf" is selected, the soft menu does not disappear automatically.

4-2 FUNCTIONAL CHECK PROCEDURES

4-2-1 Basic Controls

Step	Check	Expected result
1.	Connect a sector or convex transducer to "Probe 2" connector beneath keyboard.	
2.	Turn ON Power toggle switch.	
3.	Type USER ID and then press return key as necessary.	PATIENT ENTRY MENU should appear.
4.	Press New Patient key.	After a few seconds, the B mode screen should appear as shown in ILLUSTRATION 4-1.
5.	Press Top Menu Select key twice. 	The top menu should appear on the CRT monitor screen as follows:  Note  The items displayed on the Top Menu are different depending on the component options.
6.	Select B section using ◀ or ▶ key.	The B selection is displayed in reverse video.
7.	Press ▼ key.	The B mode sub-menu should appear on CRT monitor screen as follows: 
8.	Select Dynamic Range section using ◀ or ▶ key.	The Dynamic Range selection is displayed in reverse video.
9.	Change Dynamic Range up/down using ▲ or ▼ key.	Image grows softer and harder depending on position.
10.	Press Top Menu Select key twice.	The menus on CRT monitor screen should disappear.
11.	Rotate B/M Gain knob.	Image grows lighter and darker with rotation.
12.	Slide TGC potentiometers (pots).	Image grows darker or brighter at depth equivalent to pot's location.
13.	Rotate Depth knob.	The depth of image should be magnified/reduced.
14.	Press Reverse key.	The image reverses the left/right orientation.
15.	Press Reverse key again.	The image reverses the left/right orientation.

4-2-1 Basic Controls (Continued)

B-MODE DISPLAY SCREEN
ILLUSTRATION 4-1

4-2-1 Basic Controls (Continued)

Step	Check	Expected result												
16.	Press M key.	The M mode timeline should appear below the B image as shown in ILLUSTRATION 4-2. Whether it takes half the screen or two-thirds depends on the preset.												
17.	Roll trackball.	The M mode cursor should follow trackball movement and the timeline should update for new location of focus.												
18.	Press Scan Area key.	The indicator LED located at the left side of the Scan Area key should be ON and the color of the M mode cursor should change.												
19.	Roll trackball.	The width of B mode image should change wider or narrower.												
20.	Press M/D Cursor key.	The indicator LED located at the left side of the M Cursor key should be ON and the M mode cursor should become active again.												
21.	Press Top Menu Select key twice. 	The top menu should appear on the CRT monitor screen as follows:  Note  The items displayed on the Top Menu are different depending on the component options.												
22.	Select M section using  or  key.	The M selection is displayed in reverse video.												
23.	Press  key.	The M mode sub-menu should appear on CRT monitor screen as follows: <table border="1" data-bbox="738 1270 1104 1354"> <tr> <td>M</td> <td>1/2</td> <td>Rejectn</td> <td>Edge</td> </tr> <tr> <td>Dynamic Range</td> <td>Gray Map</td> <td></td> <td>Enhance</td> </tr> <tr> <td>60</td> <td>M-1</td> <td>OFF</td> <td>MID</td> </tr> </table>	M	1/2	Rejectn	Edge	Dynamic Range	Gray Map		Enhance	60	M-1	OFF	MID
M	1/2	Rejectn	Edge											
Dynamic Range	Gray Map		Enhance											
60	M-1	OFF	MID											
24.	Select Edge Enhance section using  or  key.	The Edge Enhance selection is displayed in reverse video												
25.	Change M Edge Enhance up/down using  or  key.	Changes the M-Mode image.												
26.	Press Top Menu Select key twice.	The menus on CRT monitor screen should disappear.												

4-2-1 Basic Controls (Continued)

M-MODE DISPLAY SCREEN
ILLUSTRATION 4-2

Note

You can select the two types of display format: Side by Side (with the 2-D display to the left of the M-mode display) and Top/Bottom (with the 2-D display on top of the M-mode display) by using the Preset Menu. For the Preset Menu, refer to Customizing Your System in the LOGIQ™ 400 User Manual.

4-2-1 Basic Controls (Continued)

Step	Check	Expected result
27.	Press B key.	The B mode screen should appear as shown in ILLUSTRATION 4-1.
28.	Press CFM key.	The CFM mode screen should appear as shown in ILLUSTRATION 4-3.
29.	Rotate Gain knob	Color image noise should appear.
30.	Press Freeze key.	The image should freeze.
31.	Rotate Cine Scroll knob.	The Cine gauge should appear under the B mode image.
32.	Press Freeze key again.	The image revives acquisition and the Cine gauge should disappear.
33.	Press CFM key again.	The B mode screen should appear as shown in ILLUSTRATION 4-1.

CFM MODE DISPLAY SCREEN
ILLUSTRATION 4-3

Note

You can select the four types of CFM window: Survey, Survey Detail, Map, and Map Detail by using the CUSTOM DISPLAY Preset Menu. For the CUSTOM DISPLAY Preset Menu, refer to Customizing Your System in the LOGIQ™ 400 User Manual.

4-2-1 Basic Controls (Continued)

Step	Check	Expected result
34.	Press PD key.	The Pulse Doppler mode screen should appear as shown in ILLUSTRATION 4-4.
35.	Rotate θ Angle knob.	A line should appear in the circle on the B mode image and that line displayed with circle should rotate.
36.	Rotate Gain knob.	The Doppler noise should increase/decrease.
37.	Rotate Audio Volume knob.	The Doppler audio volume should increase/decrease.
38.	Press B key.	The B mode screen should appear as shown in ILLUSTRATION 4-1.

PULSE DOPPLER MODE DISPLAY SCREEN
ILLUSTRATION 4-4

Note

You can select the two types of display format: Side by Side (with the 2-D display to the left of the PD-mode display) and Top/Bottom (with the 2-D display on top of the PD-mode display) by using the Preset Menu. For the Preset Menu, refer to Customizing Your System in the LOGIQ™ 400 User Manual.

4-3 DIAGNOSTICS

4-3-1 Service Software Menu

1. Press the Top Menu Select key located on the keyboard twice.

SOFTWARE MENU CONTROL KEYS
ILLUSTRATION 4-5

The top menu is displayed on CRT monitor screen as shown in ILLUSTRATION 4-6.

TOP MENU
ILLUSTRATION 4-6

Note

The items displayed on the Top Menu are different depending on the component options.

2. Select the Set Up Menu using the ◀ or ▶ key of Sub Menu Select keys on the keyboard. The Set Up selection is displayed in reverse video as shown in ILLUSTRATION 4-6.
3. Press ▼ key to select the Set Up Menu. The Set Up Menu is displayed on the CRT monitor screen as shown in ILLUSTRATION 4-7.

Set Up	1/1					
Custom Display	System Paramtr	Preset Program	Save Values	Utility	User Define	Diag.
▼▲	▼▲	▼▲	▼▲	▼▲	▼▲	▼▲

SET UP MENU
ILLUSTRATION 4-7

4. Select the Diag. section using the ◀ or ▶ key and press ▼ key to use the User Diagnostics function. The Diagnosis Menu is displayed on the CRT monitor screen. Refer to ILLUSTRATION 4-8. Select the Utility section using the ◀ or ▶ key and press ▼ key to use User Utility function. The Utility Menu is displayed on the CRT monitor screen. Refer to ILLUSTRATION 4-13.

4-3-2 Diagnosis Test Menu

Select the Diag. section using the ◀ or ▶ key and press ▼ key to use the User Diagnostics function. The Diagnosis Menu is displayed on the CRT monitor screen as shown in ILLUSTRATION 4-8.

```

SYSTEM TEST 1
ILLUSTRATION 4-9

The system beeps three times after checking all the tests.

If system does not pass the diagnostic test, please contact the qualified service engineer in your area. Please refer to Chapter 1 of this manual for the appropriate address/phone number to contact service.

4-3-2 Diagnosis Test Menu (Continued)**(B) TEST PATTERN BLACK & WHITE**

The black & white pattern permits the serviceman to accurately adjust the contrast of an optional equipment (such as a camera) to see the details in the lightest and darkest areas of the image.

Type **2** and then press Enter key when the Diagnosis Menu is displayed. The Test Pattern Black & White is displayed as shown in ILLUSTRATION 4-10.

TEST PATTERN BLACK & WHITE
ILLUSTRATION 4-10

4-3-2 Diagnosis Test Menu (Continued)

(C) TEST PATTERN COLOR

The color scale permits the serviceman to adjust the color contrast of an optional equipment (such as a color video printer).

Type **3** and then press Enter key when the Diagnosis Menu is displayed. The Test Pattern Color is displayed as shown in ILLUSTRATION 4-11.

TEST PATTERN COLOR
ILLUSTRATION 4-11

Note

In case of B/W monitor system, this function is invalid. The message "Not tested" is displayed on the CRT monitor screen when the option number 3, Test Pattern Color is selected.

4-3-2 Diagnosis Test Menu (Continued)**(D) TEST PATTERN GRAPHICS**

The vertical linearity and graphics perimeter pattern should be centered on the optional equipment display. This ensures all whitescale graphics overlays will be visible.

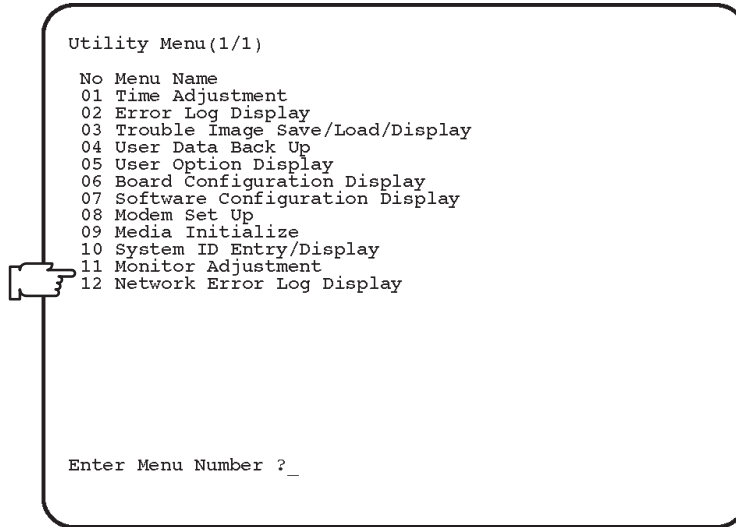

Type **4** and then press Enter key when the Diagnosis Menu is displayed. The Test Pattern Graphics is displayed as shown in ILLUSTRATION 4-12.

TEST PATTERN GRAPHICS
ILLUSTRATION 4-12

4-3-3 Utility Menu

Select the Utility section using the ◀ or ▶ key and press ▼ key to use the User Utility function. The Utility Menu is displayed on the CRT monitor screen as shown in ILLUSTRATION 4-13.

UTILITY MENU
ILLUSTRATION 4-13

Note

Press and hold the **Control** key and press **R** to display the previous screen in the User Utility mode.

Note

Item 12 (for V4.01, V4.02 or later) and item 11 (for V3.40 or V3.41), Network Error Log Display is the additional function for the console with the software version 3.40 or later. This menu is displayed and available only when the Storage/Print DICOM option is enabled.

Note

Item 11, Monitor Adjustment is available on the console with the software version 4.01 or later.

4-3-3 Utility Menu (Continued)

(A) TIME ADJUSTMENT

This changes the current time in the system.

Type 1 and then press Enter key when the Utility Menu is displayed. The system date and time previously set is displayed as shown in ILLUSTRATION 4-14.

TIME ADJUSTMENT SCREEN
ILLUSTRATION 4-14

Procedure

1. Input the time difference using the numeric keys on keyboard and then press <Enter>. The input format for the time is "HH:MM". You can change the current time within ± 12 hours

Note

Put a "-" character in front of the time difference to decrease the current time.

After changing the current time, the Utility Menu reappears on the CRT monitor.

4-3-3 Utility Menu (Continued)

(B) ERROR LOG DISPLAY

This loads and displays an error log file, or saves it into the MO (Magneto Optical) disk.

Type **2** and then press **Return** key when the Utility Menu is displayed. The Error Log Display is displayed as shown in ILLUSTRATION 4-15.

```

Error Log Display(1/1)
001 1995/06/27 18:27

Do you copy this file ? (Y/N)

```

ERROR LOG FILE DISPLAY
ILLUSTRATION 4-15

Procedure for Saving File

1. Type **Y** and then press **Return** key.
2. Insert an 128MB MO (Magneto Optical) disk (or 230MB disk for the console with software version 3.10 or later) into the MOD drive of console and press any key.

Note

Use new initialized MO disk. It is impossible to save the error log file into the disk which another file is already stored.

Note

The 230MB MO disk is available on the console with software version 3.10 or later.

During the time that the system is saving the error log file, "Copying now" is displayed on the CRT monitor.

4-3-3 Utility Menu (Continued)

(C) TROUBLE IMAGE SAVE/LOAD/DISPLAY

This saves the trouble image recorded in the Hard Disk into the MO (Magneto Optical) Disk. This also loads the image data saved in the MO Disk into the Hard Disk and displays the trouble image selected on the CRT monitor by using the image recall function.

Note

Press and hold the **Control** key and press **W** to save the trouble image into the hard disk. You can save the maximum 8 images into the hard disk.

Note

To save the trouble image into the hard disk, the optional VIPB Assy must be installed on the console instead of VIDO Assy. Otherwise, the message "This function is not available." will be displayed on the CRT monitor screen.

Type **3** and then press Return key when the Utility Menu is displayed. The following screen is displayed.

```

Trouble Image Save/Load/Display
  1:Save  2:Load  3:Display
Enter Menu Number ?
Set a media to drive and then press any key.
    
```

```

TROUBLE IMAGE SAVE/LOAD/DISPLAY (a)

ILLUSTRATION 4-16

4-3-3 Utility Menu (Continued)

(C) TROUBLE IMAGE RECORD & DISPLAY (Continued)

Procedure for Saving Trouble Images

1. Type **1** and then press **Return** key. The message "Set a media to drive and then press any key." is displayed.
2. Set an 128MB MO (Magneto Optical) disk (or 230MB disk for the console with software version 3.10 or later) into the MOD drive and press any key. The Trouble Image File Menu will be displayed on the CRT monitor screen. Refer to ILLUSTRATION 4-16.

Note

Use new initialized MO disk. It is impossible to save any trouble image files into the disk which another file is already stored.

Note

The 230MB MO disk is available on the console with software version 3.10 or later.

3. Input the file number you desire to save into the MO disk.
4. Press Return key.

During the system is saving the file, "Saving now" is displayed on the CRT monitor. After saving the file, "Succeeded" or "Failed" is displayed on the CRT monitor. Then, the message "Press Y to continue, Control + R to quit" is displayed. Type **Y** and press **Return** to continue to use this function. Press and hold the **Control** key, and press **R** to quit this function.

Procedure for Loading Trouble Images

1. Type **2** and then press **Return** key. The message "Set a media to drive and then press any key." is displayed.
2. Set an 128MB MO (Magneto Optical) disk (or 230MB disk for the console with software version 3.10 or later) into the MOD drive and press any key. The Trouble Image File Menu will be displayed on the CRT monitor screen. Refer to ILLUSTRATION 4-16.

Note

The 230MB MO disk is available on the console with software version 3.10 or later.

3. Input the file number you desire to load from the MO disk.
4. Press **Return** key.

During the system is loading the file, "Loading now" is displayed on the CRT monitor. After saving the file, "Succeeded" or "Failed" is displayed on the CRT monitor. Then, the message "Press Y to continue, Control + R to quit" is displayed. Type **Y** and press **Return** to continue to use this function. Press and hold the **Control** key, and press **R** to quit this function.

4-3-3 Utility Menu (Continued)**(C) TROUBLE IMAGE RECORD & DISPLAY (Continued)****Procedure for Displaying Trouble Images**

1. Type **3** and then press **Return** key. The Trouble Image File Menu will be displayed on the CRT monitor screen. Refer to ILLUSTRATION 4-16.
2. Input the file number you desire to display on the CRT monitor screen.
3. Press **Return** key.

Press and hold the **Control** key and press **Q** to display the Trouble Image Menu on the CRT monitor screen.

4-3-3 Utility Menu (Continued)

(D) USER DATA BACK UP

This saves the user preset data into the MO disk. This also loads the user preset data stored in the MO disk. System Parameter, Probe Parameter, and the User Table into the external recording media.

Note

The user preset data is different depending on each category.
You can select the user preset data from among the following menu.

1. System Data
2. Application (Rad/Abdomen) Data
3. Application (Obstetrics) Data
4. Application (Gynecology) Data
5. Application (Cardiology) Data
6. Application (Vascular) Data
7. Application (Ulorogy) Data
8. Application (Small Parts) Data
9. All System & Application Data

System data includes:

System Preset Data File, User Define Data File*, VCR Registration Information Data File*, VCR Patient Information Data File*, and Image Archive Search Data File*

Each application data includes:

Application Preset Data File, Probe Preset Data File, Report Format Data File, OB Table Data File, Fetal Trend Patient Data File*, and Cardiac Calc. Auto Sequence Data File*

The files with the symbol "*" listed above are saved only when the software options are installed and any files are stored in the hard disk.

Note

The 230MB MO disk is available on the console with software version 3.10 or later.

4-3-3 Utility Menu (Continued)

(D) USER DATA BACK UP (Continued)

Type **4** and then press **Return** key when the Utility Menu is displayed. The User Data Back Up Menu is displayed as shown in ILLUSTRATION 4-17.

USER DATA BACK UP MENU
ILLUSTRATION 4-17

Note

You cannot save two or more items into one MO disk. If you want to save two or more items of the User Data Menu into one MO disk, Choose the item 09, All System & Application Data.

Procedure for Saving User Data

1. Type **1** and then press the **Return** key. The message “Set a media to drive and then press any key” is displayed.
2. Insert an initialized 128MB MO (Magneto Optical) disk (or 230MB disk for the console with software version 3.10 or later) into the MOD drive of console and press the Return key. The User Data Menu is displayed on the CRT monitor screen as shown in ILLUSTRATION 4-18.

Note

Use new initialized MO disk. It is impossible to save any user data files into the disk which another file is already stored.

USER DATA MENU
ILLUSTRATION 4-18

4-3-3 Utility Menu (Continued)

(D) USER DATA BACK UP (Continued)

3. Input the file number you desire to save into the MO disk.
4. Press **Return** key. The system starts saving.

During the system is saving data, "Saving now" is displayed on the CRT monitor. After saving data, "Succeeded" or "Failed" is displayed on the CRT monitor. Then, the message "Press Y to continue, Control + R to quit" is displayed. Type **Y** and press **Return** key to continue to use this function. Press and hold **Control**, and press **R** to quit this function.

Procedure for Loading User Data

1. Type **2** and then press the **Return** key. The message "Set a media to drive and then press any key" is displayed.
2. Insert an initialized 128MB MO (Magneto Optical) disk (or 230MB disk for the console with software version 3.10 or later) into the MOD drive of console and press the **Return** key. The User Data Menu is displayed on the CRT monitor screen. Refer to ILLUSTRATION 4-18.
3. Input the file number you desire to load from the MO disk.
4. Press **Return** key. The system starts loading.

During the system is loading data, "Loading now" is displayed on the CRT monitor. After loading data, "Succeeded" or "Failed" is displayed on the CRT monitor. Then, the message "Press Y to continue, Control + R to quit" is displayed. Type **Y** and press **Return** key to continue to use this function. Press and hold **Control**, and press **R** to quit this function.

Note

After loading User Data, turn the system power OFF. Then, turn the system power ON again after completing the power off process.

4-3-3 Utility Menu (continued)

(E) USER OPTION DISPLAY

This displays the option names and the current status for each option.

Type **5** and then press **Return** key when the Utility Menu is displayed. The User Option Display is displayed as shown in ILLUSTRATION 4-19.

USER OPTION DISPLAY
ILLUSTRATION 4-19

Note

The status of options indicated on the user option display is different depending on the system configuration.

Note

This function can only display the option names. It is not possible for the user to change the option settings.

Note

The following three options are not available on the LOGIQ™ 400CL systems.

- Item 09: Phased Array Sector Probe
- Item 17: Heading VCR Playback
- Item 21: Advanced Cardiac Calculation

4-3-3 Utility Menu (continued)**(E) USER OPTION DISPLAY** (continued)**Note**

The following four (4) options are available only for the console with the software version 3.00 or later:

- Item 25: Multigestation calculation
- Item 26: Advanced Vascular Calculation
- Item 27: CFM/PDI Enhancement
- Item 28: MD Startup Display

The item 28, "MD Startup Display" is changed to "CL Startup Display" for the LOGIQ™ 400CL systems.

Note

The following four (4) options are available only for the console with the software version 3.40 or later:

- Item 29: 3DvieW-1
- Item 30: 3DvieW-2
- Item 31: Storage/Print (DICOM)
- Item 32: Worklist (DICOM)

Note

The following three (3) options are available only for the console with the software version 4.01 or later:

- Item 33: ACE-2
- Item 34: Realtime Doppler Calculation
- Item 35: MR3 Startup Display

Note

The ATO option (Item# 36) is not available on the console with the software version 4.01 and 4.02.

Note

The following four (4) options are available only for the console with the software version 5.01 or later:

- Item 36: ACE-2
- Item 37: Realtime Doppler Calculation
- Item 38: MR3 Startup Display
- Item 39: CL Startup Display

(I) MEDIA INITIALIZE

This initialize the floppy disk.

Type **9** and then press **Return** key when the Utility Menu is displayed. The Media Initialize screen is displayed as shown in ILLUSTRATION 4-23.

MEDIA INITIALIZATION
ILLUSTRATION 4-23

Procedure for Changing Each Settings

Insert an 128MB MO (Magneto Optical) disk (or 230MB disk for the console with software version 3.10 or later) and press the Return key. The system automatically starts initializing the MO disk. It takes approximately 15 minutes to complete initializing a disk.

Note

The 230MB MO disk is available on the console with software version 3.10 or later.

During the system is initializing MO disk, "Initializing" is displayed on the CRT monitor. After initializing, "Succeeded" or "Failed" is displayed on the CRT monitor. Then, the message "Press Y to continue, Control + R to quit" is displayed. Type **Y** and press **Return** to continue to use this function. Press and hold **Control**, and press **R** to quit this function.

4-3-3 Utility Menu (Continued)

(J) SYSTEM ID ENTRY/DISPLAY

This displays the current system ID number and sets the new one.

Type **10** and then press the **Return** key when the Utility Menu is displayed. The System ID Entry/Display menu is displayed as shown in ILLUSTRATION 4-24.

SYSTEM ID ENTRY/DISPLAY
ILLUSTRATION 4-24

4-3-3 Utility Menu (Continued)

(J) SYSTEM ID ENTRY/DISPLAY (Continued)

Procedure for Setting New System ID

1. Type **1** and then press the **Return** key. The system ID number entry menu is displayed on the CRT monitor screen as shown in ILLUSTRATION 4-24.
2. Type any 5-digit number within the limits of 00000 to 16383 and press the **Return** key. The new system ID number is set.

Procedure for Displaying Current System ID

1. Type **2** and then press the **Return** key. The current system ID number is displayed on the CRT monitor screen as shown in ILLUSTRATION 4-24.
2. Type **Y** and then press the **Return** key to continue this function. Press and hold the **Control** key and press **R** to exit this function.

4-3-3 Utility Menu (continued)**(K) MONITOR ADJUSTMENT**

This helps to adjust the settings of the Contrast and the Brightness on the CRT Monitor suitably.

Note

This function is available only for the console with the system software version 4.01 or later.

Type **11** and then press **Return** key when the Utility Menu is displayed. The Monitor Adjustment menu is displayed as shown in ILLUSTRATION 4-25.

```
Monitor Adjustment(1/1)

1: Dark Room
2: Bright Room
3: Cardiac
4: Dark Room (B/W)
5: Bright Room (B/W)
6: Cardiac (B/W)

Enter Menu Number ?_
```

MONITOR ADJUSTMENT
ILLUSTRATION 4-25

4-3-3 Utility Menu (continued)**(K) MONITOR ADJUSTMENT** (continued)**Procedure for Adjusting Monitor**

1. Input the item number according to the brightness of Exam room.
The Gray Scale Bar for adjustment will be displayed on the CRT monitor screen as shown in ILLUSTRATION 4-26.

GRAY SCALE BAR
ILLUSTRATION 4-26

2. Open the front door at the lower center of the Monitor Assy by pushing the top center of the door.
3. Move **Contrast** and **Brightness** slide potentiometers rightwards to the maximum to increase both settings.
4. Decrease brightness by moving **Brightness** slide potentiometer leftwards by degrees until "**B**" in the gray scale bar is not visible.
5. Decrease contrast by moving **Contrast** slide potentiometer leftwards by degrees until "**A**" in the gray scale bar is not visible.
6. Move **Brightness** slide potentiometer rightwards to the maximum again.
7. Decrease brightness by moving **Brightness** slide potentiometer leftwards by degrees until "**C**" in the gray scale bar is not visible.

4-3-3 Utility Menu (continued)**(L) NETWORK ERROR LOG DISPLAY**

This displays and copies an error log file into a MO disk.

Note

This function is available only when the optional Storage/Print DICOM is enabled on the console with the system software version 3.40 or later.

Type **11** (**12** on the console with the software V4.01 or later) and then press **Return** key when the Utility Menu is displayed. The Network Error Log Display menu is displayed as shown in ILLUSTRATION 4-27.

```
Network Error Log Display (1/1)
001 1998/06/23 14:23
    Error in Binding the application. [104]

Do you copy this file ? (Y/N)_
```

NETWORK ERROR LOG DISPLAY
ILLUSTRATION 4-27

Procedure for Saving File

1. Type **Y** and then press **Return** key.
2. Insert a MO disk into the MOD drive and press any key.

During the time that the system is copying the error log file, "Copying now" is displayed on the CRT monitor screen.

This page is left blank intentionally.

4-4 POWER SUPPLY ADJUSTMENTS

This section provides power supply adjustment procedures for the LOGIQ™ 400. Adjustments should be only made when necessary. Power supply adjustments should be made in accordance with the schedule for periodic maintenance in Chapter 7 of this manual.

LOGIQ™ 400 has two types of Power Supply Unit, Power Supply Unit (2126982 for 115V and 2126981 for 220V) and Power Supply Unit 2 (2144481 for 115V and 2144480 for 220V). The Power Supply Unit is installed on the console which is shipped before May, 1996. The Power Supply Unit 2 is installed on the console which is shipped after June, 1996. The part number, components, and adjustment procedures are different between both types of Power Supply Unit. The section 4-4 provides the adjustment procedures for both types of Power Supply Unit.

Before beginning the power supply adjustments procedure, make sure the power outlet should provide the power line standards. Refer to Chapter 2, Installation.

Note

If the adjustment pot is over-turned clockwise, the power supply output is down to protect the circuits against the over-voltage. In that case, power the LOGIQ™ 400 OFF and turn the pot counterclockwise all the way. Then power it ON and try to adjust the power supply again.

There are five adjustable DC power supplies on the LV Unit, Low Voltage Unit of Power Supply Unit. The LV Unit is located at the bottom of the console as shown in ILLUSTRATION 4-30 on page 4-39.

There are seven adjustable DC power supplies on the LV2 Unit, Low Voltage 2 Unit of Power Supply Unit2. The LV2 Unit is located at the bottom of the console as shown in ILLUSTRATION 4-30 on page 4-39.

There are five adjustable DC power supplies on the LV3 Unit, Low Voltage 3 Unit of Power Supply Unit3. The LV3 Unit is located at the bottom of the console as shown in ILLUSTRATION 4-30 on page 4-39.

4-4-1 Power Supply Access

- 1. Unscrew four screws and remove the Side Cover Left as shown in the ILLUSTRATION 4-28.

SIDE COVER LEFT REMOVAL
ILLUSTRATION 4-28

4-4-1 Power Supply Access (continued)

2. Unscrew four screws to remove the PS Cover Left. Refer to the ILLUSTRATION 4-29.

PS COVER LEFT REMOVAL
ILLUSTRATION 4-29

3. Unscrew two screws and pull the LV Unit out. Refer to the ILLUSTRATION 4-30.

Note

For the LV2 Unit and the LV3 Unit, the points for measuring and adjusting are located at the front of the unit. It is not necessary to pull the LV unit out of the Power Supply Unit2 and Power Supply Unit3.

LV UNIT
ILLUSTRATION 4-30

4-4-2 Power Supply Adjustment Procedure

1. Power LOGIQ™ 400 ON. Wait for about 30 seconds to warm up the console.
2. For each of the power supplies which are located on the LV Unit, connect a DVM to the appropriate place shown in TABLE 4-1 for the Power Supply Unit, TABLE 4-3 on page 4-42 for the Power Supply Unit 2 or TABLE 4-5 on page 4-44 for the Power Supply Unit 3.
3. Verify that the voltages are as shown in TABLE 4-2 for the Power Supply Unit, TABLE 4-4 on page 4-42 for the Power Supply Unit 2 or TABLE 4-6 on page 4-44 for the Power Supply Unit 3, respectively.

Note

Use a non-conductive trim-pot to adjust the power supply.

5-1 INTRODUCTION

LOGIQ™ 400 is a compact ultrasound scanner supporting a wide range of probes. This gives the system added benefits to meet diverse applications.

5-2 LOGIQ™ 400 SYSTEM

The LOGIQ™ 400 has a 64 channel beam former that digitizes the RF signal. It uses analog and digital delay to focus the beam. The analog delay is short and fixed. The digital delay is used for long delay and dynamic focus. This system also features many advanced image processing controls.

User surveys and the latest technology were used to increase console ease-of-use. Digital circuitry enables more reliable and precise operation.

System Features

The key design goals of this system are:

- High Image Quality
- Increased User Productivity
- Multiple Clinical Applications
- Planned Upgradeability
- High Mobility

Types of Applications

The system supports many clinical uses. Scan and display parameters may be user selected to default to desired values for each application. The system presets many parameters to clinically determined, optimal values.

- Radiology
- Cardiology
- OB/GYN, and
- Vascular

See Illustration 5-1, the LOGIQ™ 400 system can be divided into an analog signal processing section, a digital signal processing section, and the microprocessor driven system control section, which controls the system based on operator commands and system status information.

505	CIRCUIT PROTECTOR	U0026EK	1	1	For 220V console	6-2-64 

Note

New Rear CONN Panel2 Assy (2115619-2, 2115620-2, and 2115621-2) is released to support the Ethernet Connector for the DICOM connection. Old Rear CONN Panel Assy can be replaced with new one, respectively.

Note

The Rear CONN Panel Assemblies for B/W console (2138819, 2138820, and 2138821) are used only for the B/W console with the software version 3.40 or earlier.

MATERIAL LIST (9/12) (continued)

FRU NO.	PART NAME	PART NO.	QTY.	FRU	DESCRIPTION	SECTION FOR REFERENCE
608	DSCC ASSY	2123313-2	1	1	DSCC	6-2-78 
	DSCC ASSY	2123313-3	1	1	DSCC ASSY is used only for color monitor model. Old DSCC (2123313-2) can be replaced with new DSCC (2123313-3).	6-2-78 
609	VIDO2 ASSY	2117032-2	1	1	For color monitor model without VTR playback	6-2-78 
	VIDO2 ASSY	2117032-3	1	1	For MVME147-010	6-2-78 
610	VIPB ASSY	P9525VA	1	1	For color monitor model with VTR playback	6-2-78 
	VIPB ASSY	2149141	1	1	For MVME147-010	6-2-78 
	VIPB2 ASSY	2212616	1	1	available only for console with software version 3.40B or later for MD console (3.41B or later for CL console)	6-2-78 
	VIPB2 ASSY	2212616-2	1	1	From software version 4.31 for MD, MR3 or 4.32 for CL. Old VIPB (2212616) can be replaced with new VIPB2 (2212616-2)	6-2-78 
	VIPP ASSY	2245652	1	1	available on console with software version 5.01 or later	6-2-78

Note

VIDO2 ASSY, VIPB ASSY and VIDM ASSY are changed with the backward compatibility to correspond to the new OBC ASSY, MVME147-010. With this changes, the part numbers of VIDO2 ASSY, VIPB ASSY and VIDM ASSY are changed to 2117032-3, 2149141 and 2123337-2 from 2117032-2, P9525VA and 2123337, respectively. Be sure to use the new Video board to replace the VIDO2 ASSY, VIPB ASSY or VIDM ASSY installed in the console with the MPU ASSY including the new OBC ASSY, MVME147-010.

616	MOTHER IC	P9522PK	1	1		6-2-84

Note

There are two types of OBC (One Board Computer) ASSY (included in MPU ASSY), MVME147SRF and MVME147-010. Those two assemblies have functional compatibility. However, the type of time keeper RAM mounted on each board is different. In the case of MVME147SRF, the RAM with built-in back-up battery is used. On the other hand, RAM is soldered on the MVME147-010 and the battery is mounted on the RAM with a socket. Be sure to choose an appropriate one when replacing the time keeper RAM.

To know which OBC ASSY is installed in the console, check the 7-digit (or 9-digit) number displayed on the CRT monitor screen at the first of power-up sequence, 2136319 or 2136319-3 for MVME147SRF and 2136319-2 or 2136319-4 for MVME147-010.

OBC ASSY (included in MPU Assy)	MVME147SRF	MVME147-010
Time Keeper Battery Status	Built in the Time KeeperRAM	Use FRU 613B
Number displayed during power up sequence	2136319 or 2136319-3	2136319-2 or 2136319-4

6-2 DISASSEMBLY/RE-ASSEMBLY**WARNING!**

ONLY QUALIFIED SERVICE PERSONNEL SHOULD REMOVE ANY COVERS OR PANELS. ELECTRICAL HAZARDS EXISTS AT SEVERAL POINTS INSIDE. BECOME THOROUGHLY FAMILIAR WITH ALL HAZARDOUS VOLTAGES AND HIGH CURRENT LEVELS TO AVOID ACCIDENTAL CONTACT

**CAUTION**

Do not wear the ESD wrist strap when you remove a part of power supply unit. Turn OFF power and unplug the power cord before removing a part of power supply unit. However be sure to turn off power and wear the strap before you remove a circuit boards.

6–2–1 Monitor Assy (FRU No. 100)**Time Required**

0.25 Hours

Tool Required

Screwdriver

Hexagonal Wrench

Procedure**WARNING!**

PERSONAL INJURY HAZARD. THE NECK ASSY IS SPRING LOADED. RELEASING ARM WHEN MONITOR IS NOT INSTALLED WILL CAUSE SUDDEN UPWARD MOVEMENT. KEEP YOUR HEAD AND BODY AWAY FROM ABOVE NECK ASSY.

- Refer to ILLUSTRATION 6–14.
- 1. Turn OFF the system.
- 2. Remove the CRT Filter. Refer to 6–2–6 on page 6–79.
- 3. Unscrew four hexagonal screws (① – ④) located beneath the horizontal part of the Neck Assy.
- 4. Remove the cover located at the bottom of the Neck Assy.
- 5. Unscrew two screws (⑤ and ⑥) and remove the plate fixing the cables.
- 6. Disconnect the four connectors (⑦ – ⑩).
- 7. Remove the screw cap located at position (⑪).
- 8. Loosen one screw (⑪) and pull the Monitor Assy upwards.

Note

When replacing the monitor with the new Monitor Assy (2162081), be sure to attach the proper label included with the Monitor Assy on to the Escutcheon. To attach the new label, refer to the procedures in section 6–2–2 on page 6–72.

Note

The color of the Escutcheon for LOGIQ™ 400CL is different from the other color monitor assy. Use the proper FRU when replacing the monitor assy for the LOGIQ™ 400CL.

6-2-1 Monitor Assy (FRU No. 100) (continued)

MONITOR ASSY DISASSEMBLY
ILLUSTRATION 6-14

6–2–2 Monitor Cover Set (FRU No. 101)**Time Required**

20 Minutes

Tool Required

Screwdriver

Procedure

- Refer to ILLUSTRATION 6–15 on page 6–73.
- 1. Turn OFF the system.
- 2. Unscrew three screws (① – ③).
- 3. Remove the Monitor Cover L Assy (FRU 104).
- 4. Unscrew three screws (④ – ⑥).
- 5. Remove the Monitor Cover R Assy (FRU 105).
- 6. Remove the Monitor Cover Top Assy (FRU 106).
- 7. Push and open the Escutcheon Front Door (FRU 107).
- 8. Pull the two caps (⑦), FRU 108: CRT Cap Set) out.
- 9. Loosen four screws (⑧ – ⑪).
- 10. Disconnect one connector of task lamp switch.
- 11. Remove the Escutcheon Assy (FRU 102).

Note

Monitor Cover Set (FRU 101) includes the Escutcheon Assy (FRU 102), Escutcheon Latch (FRU 103), Monitor Cover L Assy (FRU 104), Monitor Cover R Assy (FRU 105), Monitor Cover Top Assy (FRU 106), and the Escutcheon Front Door (FRU 107).

Note

When replacing the Escutcheon with the new Monitor Cover Set (2162082) or replacing the Escutcheon Assy (2162083), be sure to attach the proper label on the Escutcheon. To attach the new label, refer to the procedures described in the following pages.

Note

The color of the Escutcheon for the LOGIQ™ 400CL is different from the other color monitor assy. Use the proper FRU when replacing the monitor cover set for the LOGIQ™ 400CL.

6-2-2 Monitor Cover Set (FRU No. 101) (continued)

MONITOR COVER SET DISASSEMBLY
ILLUSTRATION 6-15

6-2-2 Monitor Cover Set (FRU No. 101) (continued)

Note

The new Monitor Cover Set (2162082) and Escutcheon Assy (2162083) include the four different labels for the Escutcheon. When replacing the Escutcheon with the new Monitor Cover Set or replacing the Escutcheon Assy, be sure to attach the proper label on the Escutcheon as follows:

- a. Choose the proper label, "LOGIQ 400" or "LOGIQ 400 MD" indicating the same model name as the label on the removed Escutcheon.
- b. Remove the lower pasteboard from the proper label. Refer to ILLUSTRATION 6-16.

Lower Pasteboard

REMOVING LOWER PASTEBOARD
ILLUSTRATION 6-16

- c. Set and attach the label on the Escutcheon. Adjust the position of the label attached as shown in ILLUSTRATION 6-17. Be careful not to attach the label with a misalignment.

ATTACHING LABEL
ILLUSTRATION 6-17

6-2-2 Monitor Cover Set (FRU No. 101) (continued)

d. Press down the label all around.

e. Remove the upper pasteboard from the label. refer to ILLUSTRATION 6-18.

ILLUSTRATION 6-19

6-2-4 Escutcheon Front Door (FRU No. 107)**Time Required**

1 Minute

Tool Required

Not necessary

Procedure

- Refer to ILLUSTRATION 6-20.

1. Turn OFF the system.
2. Pull out the Escutcheon Front Door (FRU 107) from the Escutcheon Assy (FRU 102) as shown in ILLUSTRATION 6-20.

ESCUTCHEON FRONT DOOR REMOVAL
ILLUSTRATION 6-20

Note

The color of the Escutcheon for the LOGIQ™ 400CL is different from the other color monitor assy. Use the proper FRU when replacing the monitor cover set for the LOGIQ™ 400CL.

6-2-5 CRT Cap Set (FRU No. 108)

Time Required

1 Minute

Tool Required

Not necessary

Procedure

- Refer to ILLUSTRATION 6-21.
- 1. Turn OFF the system.
- 2. Remove the Escutcheon Front Door (FRU 107). Refer to 6-2-4 on page 6-77.
- 3. Pull out two CRT Caps from the front side of the Monitor Assy.

CRT CAP SET REMOVAL
ILLUSTRATION 6-21

Note

The CRT Cap Set (FRU108) includes the key top of lamp switch.

6-2-6 CRT Filter (FRU No. 109), CRT Filter Clamp Set (FRU No. 110)**Time Required**

1 Minutes

Tool Required

Not necessary

Procedure

■ Refer to ILLUSTRATION 6-22.

1. Turn OFF the system.
2. Slide the left side filter clamp leftwards and pull it out.
3. Slide the right side filter clamp rightwards and pull it out.
4. Remove the CRT Filter.

■
CRT FILTER REMOVAL
ILLUSTRATION 6-22

Note

The CRT Filter (FRU109) includes the CRT Filter Clamps (FRU110).

6-2-7 Accessory Assy (FRU No. 111)**Time Required**

0.5 Hours

Tool Required

Screwdriver

Procedure

- Refer to ILLUSTRATION 6-23.
- 1. Turn OFF the system.
- 2. Remove the Monitor Cover Set (FRU 101). Refer to 6-2-2 on page 6-72.
- 3. Unscrew five screws (① – ⑤).
- 4. Disconnect two connectors (⑥ and ⑦).
- 5. Remove the Accessory Assy.

ILLUSTRATION 6-33

6-2-15 Fixing Metal Plate (FRU No. 154)**Time Required**

5 Minute

Tool Required

Screwdriver

Procedure

- Refer to ILLUSTRATION 6-34.

1. Turn OFF the system.
- 2. Remove the Monitor Bottom Assy (FRU 157). Refer to 6-2-17 on page 6-98.
3. Pull out the Fixing Metal Plate (FRU 154) from the Escutcheon Assy (FRU 153).

FIXING METAL PLATE REMOVAL
ILLUSTRATION 6-34

6-2-16 CRT Filter (FRU No. 155), CRT Filter Clamp Set (FRU No. 156)**Time Required**

1 Minute

Tool Required

Not necessary

Procedure

■ Refer to ILLUSTRATION 6-35.

1. Turn OFF the system.
2. Slide the filter clamp at left side leftwards and pull it out.
3. Slide the filter clamp at right side rightwards and pull it out.
4. Remove the CRT Filter (FRU 155).

CRT FILTER CLAMP AND CRT FILTER REMOVAL
ILLUSTRATION 6-35

Note

When reinstalling the CRT filter, you will hear a “click” sound when the filter clamp is secured by the lock mechanism. This indicates it is properly installed.

6-2-17 Monitor Bottom Assy (FRU No. 157)**Time Required**

5 Minutes

Tool Required

Screwdriver

Procedure

- Refer to ILLUSTRATION 6-36.
- 1. Turn OFF the system.
- 2. Unscrew one screw (①).
- 3. Disconnect two connectors (② and ③).
- 4. Remove the Monitor Bottom Assy (FRU 157).
- 5. Remove the Stud.

6–2–22 Monitor15 Cover Set (FRU No. 171)**Time Required**

20 Minutes

Tool Required

Screwdriver

Procedure

Refer to ILLUSTRATION 6–41 on page 6–107.

1. Turn OFF the system.
2. Unscrew two screws (① – ②).
3. Remove the LAMP SHADE2 (FRU179).
4. Unscrew six screws (③ – ⑧).
5. Remove the Monitor Cover L2 Assy (FRU 173) and R2 Assy (FRU 174).
6. Remove the Tray2 Assy (FRU 175).
7. Loosen four screws (⑨ – ⑫).
8. Remove the Escutcheon2 Assy (FRU 172).
9. Disconnect one connector (⑬).
10. Disconnect one connector (⑭) from the back side of the Escutcheon2 Assy.

Note

Monitor15 Cover Set includes the Monitor Cover L2 Assy (FRU 173), Monitor Cover R2 Assy (FRU 174), Tray2 Assy (FRU 175), and the Escutcheon2 Assy (FRU 172).

6-2-22 Monitor15 Cover Set (FRU No. 171) (continued)

MONITOR COVER SET DISASSEMBLY
ILLUSTRATION 6-41

6-2-22 Monitor15 Cover Set (FRU No. 171) (continued)

Note

The new Escutcheon2 Assy (2265744) includes the two different labels for the Escutcheon. When replacing the Escutcheon with the new Escutcheon2 Assy, be sure to attach the proper label on to the Escutcheon as follows:

- a. Choose the proper label, "LOGIQ 400 PRO" indicating the same model name as the label on the removed Escutcheon.
- b. Remove the lower pasteboard from the proper label. Refer to ILLUSTRATION 6-42.

REMOVING LOWER PASTEBOARD
ILLUSTRATION 6-42

- c. Set and attach the label on the Escutcheon. Adjust the position of the label attached as shown in ILLUSTRATION 6-32. Be careful not to attach the label with a misalignment.

ATTACHING LABEL

6-2-61 Rear CONN Panel Assy (FRU No. 501)

Time Required

20 Minutes

Tool Required

Screwdriver

Procedure

Refer to ILLUSTRATION 6-85 on page 6-167.

1. Turn OFF the system.
2. Remove the Rear Door Assy (FRU 304). Refer to 6-2-34 on page 6-130.
3. Remove the Rear Cover Assy (FRU 303). Refer to 6-2-33 on page 6-129.

Note

The Linear Slide Cover is installed from the production unit of LOGIQ™400 console with software Version 5.01y or later. Refer to ILLUSTRATION 6-48 on page 6-116. Remove the Linear Slide Cover.

Note

Unscrew the two screws (① and ②) to remove the Rear CONN Spacer. Refer to ILLUSTRATION 6-84. The Rear CONN Spacer is installed from the production unit of LOGIQ™400 console with software Version 5.01y or later.

REAR CONN SPACER DISASSEMBLY

ILLUSTRATION 6-84

6-2-61 Rear CONN Panel Assy (FRU No. 501) (continued)

4. Unscrew three screws (① – ③).
5. Loosen one screw (④).
6. Disconnect one flat cable (⑤) out of the CNTIF Assy or CNTIF2 Assy.

Note

The CNTIF2 Assy includes the Ethernet port for the DICOM option.

7. Disconnect one flat cable (⑥) out of the AVIF Assy or BVIF Assy.
8. Disconnect two connectors (⑦ and ⑧). One of them is connected with the Power Supply Unit, and another is connected with the B/W Printer Panel.
9. Remove the Rear CONN Panel Assy.

REAR CONN PANEL ASSY DISASSEMBLY
ILLUSTRATION 6-85

6-2-62 CNTIF Assy and CNTIF2 Assy (FRU No. 502)

Time Required

30 Minutes

Tool Required

Screwdriver
Hexagonal box wrench

Procedure

- Refer to ILLUSTRATION 6-86.
- 1. Turn OFF the system.
- 2. Remove the Rear CONN Panel Assy (FRU 501). Refer to 6-2-61 on page 6-166.
- 3. Unscrew six hexagonal studs (① – ⑥) using box wrench.
- 4. Remove the CNTIF Assy or the CNTIF2 Assy.

CNTIF(2) ASSY DISASSEMBLY
ILLUSTRATION 6-86

Note

The CNTIF2 Assy includes the Ethernet port for the optional DICOM network connection.

■ 6-2-63 AVIF Assy or BVIF Assy (FRU No. 503)

Time Required

30 Minutes

Tool Required

Screwdriver

Procedure

■ Refer to ILLUSTRATION 6-87.

1. Turn OFF the system.
- 2. Remove the Rear CONN Panel Assy (FRU 501). Refer to 6-2-61 on page 6-166.
3. Disconnect three connectors (① – ③).

Note

In case of the BVIF Assy, disconnect two connectors (① and ③).

4. Unscrew eleven screws (④ – ⑭).
5. Remove the AVIF Assy or BVIF Assy.

6-2-73 MODD (FRU No. 520), MODD Fan (FRU No. 521), MODD Holder Assy (FRU No. 522)**Time Required**

30 Minutes

Tool Required

Screwdriver

Procedure

- Refer to ILLUSTRATION 6-99 on page 6-185.
 1. Turn OFF the system.
 - 2. Remove the Keyboard Panel Assy (FRU 400). Refer to 6-2-49 on page 6-147.
 3. Disconnect the MODD Fan Power Cable.
 4. Unscrew two screws (① and ②).
 5. Remove the MODD Fan Assy
 - 6. Remove the HDDB Assy (FRU 525). Refer to 6-2-75 on page 6-195.
 7. Unscrew four screws (③ – ⑥).
 8. Remove the upper metal plate.
 9. Disconnect the SCSI Cable and MODD Power Cable.
 10. Remove the MODD Holder Assy.
 11. Unscrew four screws (⑦ – ⑩).
 12. Remove the MODD.

Note

- There are two types of MODD for the spare parts. The folding method of CB24A (or CB24N) cable is different between the case of using the old MODD (U0052ZA) and the case of using the new one (2187012). For more details regarding the folding cable, refer to 6-6-4 on page 6-263.

6-2-73 MODD (FRU No. 520), MODD Fan (FRU No. 521), MODD Holder Assy (FRU No. 522) (continued)

ILLUSTRATION 6-103

6-2-73 MODD (FRU No. 520), MODD Fan (FRU No. 521), MODD Holder Assy (FRU No. 522) (continued)**Emergency Ejection**

When your disk is not mounted and the eject button does not function, eject the disk following the procedure below:

CAUTION

Use the emergency ejection procedure only in emergency situations. If this procedure is used while a MO disk is inserted, data in the disk can be destroyed.

1. Turn the system power OFF.
2. Unfold and straighten one end of a large wire paper clip.
3. Insert the straightened end of the clip into the emergency eject hole and press firmly.

This will eject the disk.

EMERGENCY EJECTION
ILLUSTRATION 6-104

6–2–74 HDD Assy (FRU No. 523), HDD Holder Assy (FRU No. 524)**Time Required**

15 Minutes

Tool Required

Screwdriver

Procedure

Refer to ILLUSTRATION 6–105.

1. Make sure the customer data is saved on a MO disk. Refer to 4–3–3 (D), USER DATA BACK UP on page 4–22.
2. Turn OFF the system.
3. Remove the Keyboard Panel Assy (FRU 400). Refer to 6–2–49 on page 6–147.
4. Remove the HDDB Assy (FRU 522). Refer to 6–2–75 on page 6–195.
5. Unscrew two screws (① and ②).
6. Remove the HDD Holder Assy.
7. Unscrew four screws (③ – ⑥).
8. Remove the HDD (FRU 523) out of the HDD Holder Assy (FRU 524).

Note

After replacing a HDD Assy with new one, the following works have to be done:

- a. Set up the system preset parameters without regard to current settings. For set-up procedures, refer to LOGIQ™ 400 Proprietary Manual, 2127662.
 - a–1. Set the Country/Zone properly. It takes approximately 40 minutes to complete this step.
 - a–2. Set other three parameters, Video Signal, Power Frequency and Modem Kind.
 - a–3. Reset the system using System Reset function of the Service Menu. Refer to LOGIQ™ 400 Proprietary Manual, 2127662.
- b. Install the customer data into new HDD using the back-up disk(s) after resetting the system. Refer to 4–3–3 (D), USER DATA BACK UP on page 4–22.
- c. Set the User Option properly. To set the User Option properly, it is necessary to record the status of the options using the User Option Display before replacing the HDD. For the User Options Set-Up, refer to LOGIQ™ 400 Proprietary Manual, 2127662.

6-2-74 HDD Assy (FRU No. 523), HDD Holder Assy (FRU No. 524) (continued)**Note**

In the case of the B/W monitor console, it is necessary to change the settings of Option Set and System Parameters after replacing a HDD Assy and setting the Country/Zone. If the required changes are not done properly, the system will not be functioning properly and the system error messages are displayed on the CRT monitor screen frequently because the system is initialized as a CFM console. The required changes are:

(1) The following items in the Option Set Menu shall be set to the "Not Installed".

02	PW Doppler
03	Color Flow Mapping
04	B Color
05	Dop/CFM for Intravaginal Probe
06	Segmented Doppler
07	Real Time Auto Doppler Trace
17	Heading VCR Playback

(2) The following parameters in the System Parameter shall be set to the "White".

Col Sys Inf
Col ImagCrs
Col Scale
Col Comment
Col Mes Crs
Col Applcat
Col Moving
Col Aux
Col DopTrace

For more details regarding the setting procedures, refer to LOGIQ™ 400 Proprietary Manual, 2127662 and User Manual.

■ 6–2–78 P.C. Board(s) (FRU No. 601 through 612)**Time Required**

15 Minutes

Tool Required

Screwdriver

Procedure

An electrostatic discharge may damage a component. Turn OFF power and wear the wrist strap before you remove circuit boards. Do not unplug the power cord to keep ground continuity.

Do not bend or flex the boards when mounting/dismounting each board. Surface mount IC boards are very susceptible to damage from flex/torque.

■ Refer to ILLUSTRATION 6–113.

1. Turn OFF the system.
- 2. Remove the Side Cover Left (FRU 301). Refer to 6–2–31 on page 6–127.
3. Unscrew the five Nest Cover screws.
4. Remove the Nest Cover.
5. Disconnect two connectors if removing the TRDR Assy. Otherwise, skip this step.
6. Disconnect one connector if removing one of two HBFR Assemblies. Otherwise, skip this step.
7. Move the upper and lower stopper in the direction indicated by the arrow ①.
8. Pull out the board, do not bend it (②).

Note

After replacing a CPU Assy with new one, it is necessary to install the system ID number into the time keeper RAM on new CPU Assy and set up two items among four system parameters, Video Signal and Power Frequency.

For system ID installation procedures, refer to Section 4–3–3 (J), SYSTEM ID ENTRY/DISPLAY in chapter 4 of this manual.

For set-up procedures of system preset parameter, refer to LOGIQ™ 400 Proprietary Manual, 2127662.

■ 6-2-81 Time Keeper RAM (for MVME167-002B) (FRU No. 613C)**Note**

The MVME167-002B is supplied with the optional DICOM option.

Time Required

1 Hour

Tool Required

Screwdriver
IC Remover

Procedure

- Refer to ILLUSTRATION 6-116 on page 6-205.
 1. Turn OFF the system.
- 2. Remove the Side Cover Left (FRU 301). Refer to 6-2-31 on page 6-127.
- 3. Unscrew the four Nest Cover screws.
- 4. Remove the Nest Cover.
- 5. Remove the CPU-A Assy (FRU 610). Refer to 6-2-78 on page 6-198.
- 6. Remove the Time Keeper RAM on the SBC-A Assy (MVME167-002B).

Note

After replacing a time keeper RAM with new one, it is necessary to install the system ID number into the time keeper RAM and to set up the factory preset data.

■ 6-2-81 Time Keeper RAM (for MVME167-002B) (FRU No. 613C) (continued)

■ TIME KEEPER RAM (for MVME167-002B) REMOVAL
ILLUSTRATION 6-116

6-2-82 OMEM Assy (FRU No. 614)**Time Required**

30 Minutes

Tool Required

Screwdriver

Procedure

Do not bend or flex the boards when mounting/dismounting the piggyback boards. Surface mount IC boards are very susceptible to damage from flex/torque.

- Refer to ILLUSTRATION 6-117 on page 6-207.
 1. Turn OFF the system.
- 2. Remove the Side Cover Left (FRU 301). Refer to 6-2-31 on page 6-127.
- 3. Unscrew five Nest Cover screws.
- 4. Remove the Nest Cover.
- 5. Remove the TLMC Assy (FRU 606). Refer to 6-2-78 on page 6-198.
- 6. Unscrew one screw (①).
- 7. Remove the OMEM Assy out of the TLMC Assy.

■ 6-2-82 OMEM Assy (FRU No. 614) (continued)

■ OMEM ASSY DISASSEMBLY
ILLUSTRATION 6-117

6-2-83 Nest Mother Assy (FRU No. 615)**Time Required**

2 Hours

Tool Required

Screwdriver
Hexagonal Wrench

Procedure

Refer to ILLUSTRATION 6-118 on page 6-209.

1. Turn OFF the system.
2. Remove the Side Cover Left (FRU 301). Refer to 6-2-31 on page 6-127.
3. Remove the Front Base Cover (FRU 305). Refer to 6-2-35 on page 6-131.
4. Remove the Side Cover Right (FRU 302). Refer to 6-2-32 on page 6-128.
5. Remove the Rear Cover (FRU 303). Refer to 6-2-33 on page 6-129.
6. Remove the Front Cover (FRU 306). Refer to 6-2-36 on page 6-132.
7. Remove the Top Cover (FRU 308). Refer to 6-2-38 on page 6-135.
8. Unscrew five Nest Cover screws.
9. Remove the Nest Cover.
10. Remove all the P.C. Boards. Refer to 6-2-78 on page 6-198.
11. Remove the Rear CONN Panel Assy (FRU 501). Refer to 6-2-61 on page 6-166.
12. Remove the HDD LED Assy (FRU 526). Refer to 6-2-76 on page 6-196.
13. Remove the Power Switch Assy (FRU 527). Refer to 6-2-77 on page 6-197.
14. Remove the Probe CONN Set Assy (FRU 512/513). Refer to 6-2-68 on page 6-176.
15. Remove the Nest Fan Assy (FRU 511). Refer to 6-2-67 on page 6-174.
16. Remove the Neck Assy (FRU 201/202). Refer to 6-2-26 on page 6-114.
17. Disconnect thirteen connectors connected with the mother board.

■ **6-2-83 Nest Mother Assy (FRU No. 615) (continued)**

21. Unscrew four hexagonal bolts (① – ③) on the left side of the console.
22. Unscrew three hexagonal bolts (④ – ⑥) on the right side of the console.
23. Remove the Nest Mother Assy (FRU No. 615).

■ **NEST MOTHER ASSY DISASSEMBLY**

6-3 FUSE REPLACEMENT

6-3-1 Introduction

LOGIQ™ 400 has two types of Power Supply Unit, Power Supply Unit and Power Supply Unit2. The fuses used are different between both units.

Old power supply unit (2126982 for 115V and 2126981 for 220V) has three replaceable fuses. The table below states the items of those fuses.

TABLE 6-1
REPLACEABLE FUSES FOR POWER SUPPLY UNIT

LOCATION	Ref. No.	RATING		REMARKS
TRDR ASSY	F501	3.2A	250V	Refer to 6-3-2 (A)
CNTIF ASSY	F1	1.0A	250V	Refer to 6-3-2 (B)
Power Supply Unit	F1	5A	300V	Refer to 6-3-2 (C)

New power supply unit2 (2144481 for 115V and 2144480 for 220V) has three replaceable fuses. The table below states the items of those fuses.

TABLE 6-2
REPLACEABLE FUSES FOR POWER SUPPLY UNIT2

LOCATION	Ref. No.	RATING		REMARKS
TRIAC ASSY	F301	20A	32V	Refer to 6-3-2 (D)
TRIAC ASSY	F302	25A	32V	Refer to 6-3-2 (D)
TRIAC ASSY	F303	3A	250V	Refer to 6-3-2 (D)

Concerning replacing each fuse of LOGIQ™ 400, refer to the following steps;

Note

This system contains no operator serviceable parts inside. Please refer servicing to qualified personnel from GE. (See Address of Chapter 1.)

6-3-2 Replacement Procedures

Parts Required

For Power Supply Unit:

FRU	PART NAME	QTY	PART #	REMARKS
801	Fuse Set	1	2135619	

For Power Supply Unit2:

FRU	PART NAME	QTY	PART #	REMARKS
801B	Fuse Set 2	1	2144490	

Tools Required

Screwdriver

6-3-2 Replacement Procedures (continued)**(A) F1 on TRDR Assy**

1. Turn the system power OFF. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Remove the Side Cover Left. Refer to 6-2-31 on page 6-127.
3. Unscrew five screws and remove the Nest Cover. Refer to 6-2-78 on page 6-198.
4. Pull the TRDR Assy out of slot 1. Refer to 6-2-78 on page 6-198.
5. Replace the defective fuse with new one. Make sure that only fuse with the required rated current and of same type is used for replacement. For the removal of the F1 fuse, refer to ILLUSTRATION 6-136.
6. After replacing Fuse, re-install the TRDR Assy, Nest Cover, and Side Cover Left.

REMOVING FUSE (F501) ON TRDR ASSY
ILLUSTRATION 6-136

6-3-2 Replacement Procedures (continued)**(B) F1 on CNTIF Assy**

1. Turn the system power OFF. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Remove the Rear Cover. Refer to 6-2-33 on page 6-129.
3. Remove the Rear CONN Panel Assy. Refer to 6-2-61 on page 6-166.

Note

It is not necessary to disconnect cables in order to replace the fuse.

4. Replace the defective fuse with new one. Make sure that only fuse with the required rated current and of same type are used for replacement.
5. After replacing Fuse, re-install the Rear CONN Panel Assy and Rear Cover.

REMOVING FUSE (F1) ON CNTIF ASSY
ILLUSTRATION 6-137

6-3-2 Replacement Procedures (continued)**(C) F1 in PS Unit**

1. Turn the system power OFF. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Remove the Side Cover Left. Refer to 6-2-31 on page 6-127.
3. Remove the Left PS Cover. Refer to 6-2-87 on page 6-218.
4. Remove the Power Control Unit. Refer to 6-2-88 on page 6-220.
5. Turn the cap 90 degrees counterclockwise and remove the defective fuse as shown in ILLUSTRATION 6-138.
6. Install the new fuse. Make sure that only fuse with the required rated current and of same type is used for replacement.
7. After replacing Fuse, re-install the Power Control Unit, Left PS Cover, and the Side Cover Left.

FUSE F1 REMOVAL
ILLUSTRATION 6-138

6-3-2 Replacement Procedures (continued)**(D) Fuses on TRIAC Unit of PS Unit2**

1. Turn the system power OFF. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Remove the Side Cover Left. Refer to 6-2-31 on page 6-127.
3. Remove the Left PS Cover. Refer to 6-2-87 on page 6-218.
4. Remove the defective fuse(s) located on the TRIAC Unit.

To remove the F301 or F302:

- i. Pull the defective fuse from the fuse socket on the TRIAC Unit. Refer to ILLUSTRATION 6-139 on page 6-249.

To remove the F303:

- ii. Turn the cap 90 degrees counterclockwise and pull the cap with the F303 fuse out.
Refer to ILLUSTRATION 6-139 on page 6-249.

5. Install the new fuse. Make sure that only fuse with the required rated current and of same type is used for replacement.
6. After replacing fuses, re-install the Left PS Cover and the Side Cover Left.

6-3-2 Replacement Procedures (continued)

(D) Fuses on TRIAC Unit of PS Unit2 (continued)

6-4 SYSTEM SOFTWARE INSTALLATION

Software MO (Magneto Optical) disk is not available in Europe. Please replace the hard disk for European systems instead of installing system software.

GEMS-AM recommends replacement of the HDD assy with the system software installed. Refer to the spare parts section of the service manual to identify the correct HDD assy with the correct version of software loaded.

6-4-1 Introduction

This section describes the procedures for installing the system software into the hard disk on LOGIQ™ 400.

Note

You can upgrade the version of LOGIQ™ 400 system software up using the Software Version Up function of LOGIQ™ 400 Service Software. Refer to LOGIQ™ 400 Proprietary Manual, 2127662.

Note

If you upgrade the system version, it is not necessary to backup the user data before installing new software. Because the user data remains unchanged after upgrading the system. If you install the system software a damaged hard disk, it is impossible to backup the user data before installation. Therefore, it is recommended to backup the user data periodically.

Tool Required

- Standard service tool
- Laptop PC with terminal emulation
- RS232C serial interface cable (cross type)
- System software MO disk
- Backup user data (MO disk)

Note

Refer to the following example or the pin assignment of Service port described in Chapter 3 and use the appropriate interface cable.

In the case of 9-pin to 25-pin interface cable:

Service Port of LOGIQ™ 400 :			Serial Port of Your PC :		
<u>Pin No.</u>	<u>Signal</u>		<u>Pin No.</u>	<u>Signal</u>	
2	TXD	-----	2	RXD	
3	RXD	-----	3	TXD	
4	RTS	-----	8	CTS	
5	CTS	-----	7	RTS	
7	GND	-----	5	GND	

6-4-2 Preparing before Installation

1. Turn the system power OFF.
2. Unplug the system. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
3. Replace the hard disk with new one if necessary. Refer to 6-2-74 on page 6-189 for the replacement procedure of hard disk.
4. Connect the RS232C cable with the serial port of the Laptop PC. Refer to ILLUSTRATION 6-140.
5. Connect the connector of another side with the Service port located at the rear side of the LOGIQ™ 400 as shown in ILLUSTRATION 6-140.

Note

You may have to disconnect the insite connection.

CHARACTER TERMINAL CONNECTION
ILLUSTRATION 6-140

6. Plug the system into a dedicated power receptacle.
7. Plug the Laptop PC into a wall outlet.

6-4-2 Preparing before Installation (continued)

8. Power the Laptop PC ON.
9. Start the terminal emulation software.
10. Make sure that the communication parameters are set as follows:

Baud Rate	:	9600 bps
Data Bits	:	8 bits
Stop Bit(s)	:	1 bit
Parity	:	None
Flow Control	:	None
Connector	:	COM1

6-4-3 Initializing Hard Disk

**Do not initialize the hard disk when upgrading the system software version up.
Initialize the hard disk before installing the system software only when the hard disk has been replaced with new one**

1. Turn the main power switch of the LOGIQ™ 400 system ON. The system does not perform the normal power up sequence and the message is indicated on the display of the Laptop PC as follows:

```
***VENUS RESET/START***  
***SCSI Device Mount Fail Device:HDD0 Error Code 20166  
ERROR CODE 200A  
VTSH>
```

MESSAGE ON PC DISPLAY
ILLUSTRATION 6-141

6-4-3 Initializing Hard Disk

2. Type the following command and press the return key.

```
VTSH>mediainit_0.0_PHILE_240000000_20_10000_4000
```

Note

For the console with software version 3.40 or later, use the following command:

```
VTSH>mediainit_0.0_PHILE_540000000_20_10000_4000
```

Note

The character “_” described in operating commands indicates the space.

After 20 minutes, the system completes the formatting of hard disk. The message “***Format Completed***” is displayed on the screen of Laptop PC.

3. Type the following command and press the return key. The hard disk become valid by entering this command.

```
VTSH>mount_0.0
```

6-4-4 Installing Software

1. Insert the appropriate system software MO disk into the MO disk drive of LOGIQ™ 400.
2. Type the following command and press the return key. The system will start writing software in the hard disk.

```
VTSH>cp_-r_2.0/*_0.0/
```

3. Turn the main switch of the system OFF after completing to write the software into the hard disk.
4. Turn the Laptop PC power OFF.
5. Disconnect the interface cable from the system.

6-4-5 Final Procedures

1. Turn the system power ON.
2. Check that the version number of the system software is correct, which is displayed on the CRT monitor screen during the power up sequence.
3. Set up the system preset parameters without regard to current settings. For set-up procedures, refer to LOGIQ™ 400 Proprietary Manual, 2127662.
 - 3-1 Set the Country/Zone properly. It takes approximately 40 minutes to complete this step.
 - 3-2. Set other three parameters, Video Signal, Power Frequency and Modem Kind.
 - 3-3. Reset the system using System Reset function of the Service Menu. Refer to LOGIQ™ 400 Proprietary Manual, 2127662.
4. Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, FUNCTIONAL CHECKS, in this manual.
5. Load the back-up user data into the system. For the procedure of loading back-up user data, refer to sub-section 4-3-3, Utility Menu in Chapter 4, FUNCTIONAL CHECKS.
6. This completes the installation of the LOGIQ™ 400 system software.

This page is left blank intentionally.

6-5 POWER SUPPLY REPLACEMENT

6-5-1 Introduction

This section describes the procedures for replacing the power supply unit of LOGIQ™ 400.

6-5-2 Replacement Procedures

PERSONAL INJURY HAZARD! POWER SUPPLY UNIT WEIGHS APPROXIMATELY 32 KILOGRAMS (71 POUNDS). PAY ATTENTION NOT TO BE INJURED. AT LEAST THREE PEOPLE SHOULD REPLACE THE POWER SUPPLY IN COOPERATION.

READ and UNDERSTAND these instructions thoroughly before proceeding with the replacement. Perform each step in sequence and check it off when completed. If a problem occurs after completion, go back through the procedure and check for implementation errors before contacting your Ultrasound Region Engineer.

Possible operational damage. Failure to strictly follow ESD (Electrostatic Discharge) precautions during this upgrade may cause constant or intermittent operational abnormalities. Strictly follow all precautions.

Check each step as it is completed.

Parts Required

To replace the 115V Power Supply Unit with new one, one of the followings is required:

FRU	PART NAME	QTY	PART #	REMARKS
711	115V Power Supply Unit	1	2126982	
757	115V Power Supply Unit2	1	2144481	
772	115V Power Supply Unit3	1	2212638	

To replace the 220V Power Supply Unit with new one, one of the followings is required:

FRU	PART NAME	QTY	PART #	REMARKS
712	220V Power Supply Unit	1	2126981	
758	220V Power Supply Unit2	1	2144480	
773	220V Power Supply Unit3	1	2212637	

6-5-2 Replacement Procedures (continued)**Time Required**

Approximately 1 Hour

Tools Required

Standard field Service Tool kit

(A) Replacing PS Unit

1. Turn the system power OFF. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Remove the Side Cover Left. Refer to 6-2-31 on page 6-127.
3. Remove the Side Cover Right. Refer to 6-2-32 on page 6-128.
4. Remove the Rear Cover. Refer to 6-2-33 on page 6-129.
5. Unscrew two screws (① and ②) to remove the Connector Guard Metal. Refer to ILLUSTRATION 6-142.

**CONNECTOR GUARD METAL DISASSEMBLY**

ILLUSTRATION 6-142

6-5-2 Replacement Procedures (continued)

6. Disconnect eight connectors (① – ⑧) from the PS Unit. All connectors are located above the Power Inlet unit at rear of the PS Unit. Refer to ILLUSTRATION 6-143.

CONNECTORS ON PS UNIT
ILLUSTRATION 6-143

6-5-2 Replacement Procedures (continued)

7. Support the left side of PS Unit by one person.
- 8. Unscrew three Hexagonal bolts (① – ③) at the left side. Refer to ILLUSTRATION 6-144.
9. Support the right side of PS Unit by one person.
- 10. Unscrew three Hexagonal bolts (④ – ⑥) at the right side. Refer to ILLUSTRATION 6-144.

PS UNIT DISASSEMBLY
ILLUSTRATION 6-144

6-5-2 Replacement Procedures (continued)

11. Gently put down the PS Unit on the floor.
12. Install new PS Unit by the counter procedures.
- 13. Connect eight cables with the PS Unit. Refer to ILLUSTRATION 6-143 on page 6-259.

(B) Final Procedures

1. Plug in the system, set the circuit breaker to the ON position and turn the main power switch ON.
2. Perform all power supply checks. Refer to 4-4, POWER SUPPLY ADJUSTMENT in Chapter 4.
3. Perform the leakage current test. Refer to 7-3, ELECTRICAL SAFETY TESTS in Chapter 7.
4. Re-install the covers removed.
5. Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, FUNCTIONAL CHECKS, in this manual.
6. This completes the replacement of the Power Supply Unit.

This page is left blank intentionally.

6-6 REPLACING 2.5-INCH HDD ASSY WITH 3.5-INCH HDD ASSY

6-6-1 Introduction

This section provides the installation procedures of the 3.5-Inch HDD Assy using the Installation Kit for LOGIQ™ 400 console.

6-6-2 Time Required

1 hour

6-6-3 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	3.5-inch HDD Assy	2	—	Part number is different depending on the software version.
2.	HDD Change Kit	1	2160057	For 3.5-inch HDD Assy, including screws MOD and HDD to MOTHER HDD to MOTHER HDD to HDD LED Ass through CB46 This part is required only for LOGIQ™ 500
	HDD Holder2 Assy	1	2145973	
	CB24N Cable Assy	1	2145889	
	CB5N Cable Assy	1	2145890	
	CB45N Cable Assy	1	2145891	
	Tie Wrap	2	—	

Note

If the console includes the Quantum™ FireBall™ 1280S 3.5-inch HDD Assy, it is necessary to use the CB45N Cable Assy for the HDD LED Assy. Because the HDD LED Assy is not available on the console with this type of 3.5-inch HDD Assy.

6-6-4 Procedures

(A) Removing 2.5-inch HDD Assy, HDDB Assy and Cables

1. Turn the main power switch OFF.
2. Wait a while until the power off process is completed.
3. Set the circuit breaker located at the rear of Power Supply unit to OFF position (lower side).
4. Unplug the unit. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
5. Remove the Keyboard Panel Assy. Refer to 6-2-49 on page 6-147.
6. Remove the Front Base Cover. Refer to 6-2-35 on page 6-131.
7. Remove the Side Cover Right. Refer to 6-2-32 on page 6-128.

6-6-4 Procedures (continued)

(A) Removing 2.5-inch HDD Assy, HDDB Assy and Cables (continued)

- 8. Unscrew four screws and remove the MODD Cover Metal.

REMOVING MODD COVER METAL
ILLUSTRATION 6-145

6-6-4 Procedures (continued)

(A) Removing 2.5-inch HDD Assy, HDDB Assy and Cables (continued)

- 9. Disconnect the CB24M cable. Refer to ILLUSTRATION 6-146.

DISCONNECTING CB24 CABLE
ILLUSTRATION 6-146

- 10. Disconnect three cables, CB24M, CB5, and CB46, from the HDDB Assy. Refer to ILLUSTRATION 6-147.

REMOVING HDDB ASSY
ILLUSTRATION 6-147

- 11. Unscrew four screws and remove the HDDB Assy. Refer to ILLUSTRATION 6-147.

6-6-4 Procedures (continued)

(A) Removing 2.5-inch HDD Assy, HDDB Assy and Cables (continued)

- 12. Unscrew two screws and remove the 2.5-inch HDD Assy with HDD Holder Assy. Refer to ILLUSTRATION 6-148.

REMOVING 2.5-INCH HDD ASSY
ILLUSTRATION 6-148

- 13. Disconnect the CB24M cable from the Mother Assy and Rear1 Assy and the CB5 cable from the Mother Assy. Refer to ILLUSTRATION 6-149.

MOTHER BOARD
REMOVING CABLES
ILLUSTRATION 6-149

- 14. Remove the CB24M and CB5 cables.

6-6-4 Procedures (continued)

(B) Connecting Cables

- 15. Connect the CB24N Cable with the P24A connector on the Mother Assy. Refer to ILLUSTRATION 6-150.
- 16. Connect the CB5N Cable with the P5A connector on the Mother Assy. Refer to ILLUSTRATION 6-150.

REMOVING CABLES
ILLUSTRATION 6-150

- 17. Pass another side of cables through the opening of Frame forward to the MODD and HDD.

6-6-4 Procedures (continued)

(C) Installing 3.5-Inch HDD Assy

- 18. Make sure that the four jumper switch are set as shown in ILLUSTRATION 6-151.
- 19. Make sure that the Terminator Module IC is not mounted on the 3.5-inch HDD Assy. Refer to ILLUSTRATION 6-151.

Fujitsu M1603SA

REMOVING CABLES
ILLUSTRATION 6-151

Note

The setting of jumper switches for the new 3.5-inch HDD Assy (Quantum™ Fireball™ 1280S) is different from the old one. Refer to ILLUSTRATION 6-152 to check and set the jumper switches properly.

Quantum™ Fireball™ 1280S

BOTTOM VIEW OF 3.5-INCH HDD (b)
ILLUSTRATION 6-152

6-6-4 Procedures (continued)

(C) Installing 3.5-Inch HDD Assy

Note

The setting of jumper switches for the new 3.5-inch HDD Assy (Quantum™ Fireball™ EL) is different from the other one. Refer to ILLUSTRATION 6-152 to check and set the jumper switches properly.

SETTING OF JUMPER SWITCHES OF HDD ASSY
ILLUSTRATION 6-153

6-6-4 Procedures (continued)

(C) Installing 3.5-Inch HDD Assy (continued)

- 20. Connect the CB45N cable with the 3.5-inch HDD Assy. Refer to ILLUSTRATION 6-154.
- 21. Connect another side of the CB45N cable to the CB46 cable.

Note

The CB45N and CB46 cables are not included in the LOGIQ™ 400CL. It is not necessary to install those cables to the LOGIQ™ 400CL console.

- 22. Set the 3.5-inch HDD Assy on the HDD Holder2 Assy. Refer to ILLUSTRATION 6-154.
- 23. Screw four screws supplied with the HDD Change Kit to install the 3.5-inch HDD Assy to the HDD Holder2 Assy. Refer to ILLUSTRATION 6-154.
-

INSTALLING 3.5-INCH HDD ASSY ON HDD HOLDER2 ASSY
ILLUSTRATION 6-154

Note

The HDD LED Assy is not available on the console with the new type of 3.5-inch HDD Assy (Quantum™ FireBall™ 1280S). In this case, the CB45N cable is not used. Hold the CB46 cable onto the metal frame with an adhesive tape.

6-6-4 Procedures (continued)

(C) Installing 3.5-Inch HDD Assy (continued)

24. Screw two screws supplied with the HDD Change Kit to install the 3.5-inch HDD Assy with HDD Holder2 Assy on the console. Refer to ILLUSTRATION 6-155.
25. Connect the CB24N and CB5N cables with the 3.5-inch HDD Assy as shown in ILLUSTRATION 6-155.

INSTALLING 3.5-INCH HDD ASSY ON CONSOLE
ILLUSTRATION 6-155

6-6-4 Procedures (continued)

(C) Installing 3.5-Inch HDD Assy (continued)

Note

Before connecting the CB24N cable, fold the CB24N cable suitably. Refer to ILLUSTRATION 6-156.

Note

The folding method of CB24N cable is different depending on the type of MODD (U0052ZA or 2187012). Before connecting the CB24N cable, fold the CB24N cable suitably. Refer to ILLUSTRATION 6-156.

INSTALLING 3.5-INCH HDD ASSY ON CONSOLE

ILLUSTRATION 6-156

6-6-4 Procedures (continued)

(C) Installing 3.5-Inch HDD Assy (continued)

- 26. Change the settings of jumper switches on the MODD Assy as shown in ILLUSTRATION 6-157.

MODD JUMPER SWITCH SETTINGS
ILLUSTRATION 6-157

6-6-4 Procedures (continued)

(C) Installing 3.5-Inch HDD Assy (continued)

Note

When the MODD installed is the type of "2187012-2", set the DIP switches and the jumper switches as shown in ILLUSTRATION 6-103.

SETTINGS OF SWITCHES ON MODD
ILLUSTRATION 6-158

27. Connect the CB24N with the MODD Assy. Refer to ILLUSTRATION 6-146 on page 6-265.
28. Screw four screws and install the MODD Cover Metal. Refer to ILLUSTRATION 6-145 on page 6-264.
29. Re-install the Side Cover Right. Refer to 6-2-32 on page 6-128.
30. Re-install the Front Base Cover. Refer to 6-2-35 on page 6-131.
31. Re-install the Keyboard Panel Assy. Refer to 6-2-49 on page 6-147.
32. This completes the Replacing 2.5-inch HDD Assy with 3.5-inch HDD Assy.

This page is left blank intentionally.

6-7 REPLACING LV2 UNIT WITH LV3 UNIT

6-7-1 Introduction

This section provides the procedures for replacing the LV2 Unit with the LV3 Unit on LOGIQ™ 400 console.

6-7-2 Time Required

Approximately 1 hour

6-7-3 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	LV3 UNIT	1	2211491	including CN31 CABLE (for LV3 UNIT) and PN LABEL

6-7-4 Procedures

(A) Removing LV2 Unit

1. Turn the LOGIQ™ 400 system power OFF.
2. Turn the circuit breaker located at the rear side of the Power Supply to the OFF position (lower side).
3. Unplug the unit. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147. Direction 46-015902).
4. Remove two screw caps (located at the place of the ③ and ④ screws).
- 5. Unscrew four screws (① – ④). Refer to ILLUSTRATION 6-159 on page 6-277.
6. Remove the Side Cover Left.
- 7. Unscrew three screws (⑤ – ⑦). Refer to ILLUSTRATION 6-159 on page 6-277.
8. Remove the Front Base Cover.
- 9. Unscrew five screws (⑧ – ⑫). Refer to ILLUSTRATION 6-159 on page 6-277.
10. Remove the Side Cover Right.

6-7-4 Procedures (continued)

(A) Removing LV2 Unit (continued)

REMOVING COVERS
ILLUSTRATION 6-159

6-7-4 Procedures (continued)

(A) Removing LV2 Unit (continued)

- 11. Unscrew four screws (① – ④). Refer to ILLUSTRATION 6-160.
- 12. Remove the Left PS Cover .

REMOVING LEFT PS COVER
ILLUSTRATION 6-160

- 13. Unscrew two screws (① and ②). Refer to ILLUSTRATION 6-161.
- 14. Pull the LV2 Unit outwards. Refer to ILLUSTRATION 6-161.

REMOVING LV2 UNIT
ILLUSTRATION 6-161

6-7-4 Procedures (continued)

(A) Removing LV2 Unit (continued)

- 15. Unscrew fourteen (14) screws (① – ⑭) to remove the wires. Refer to ILLUSTRATION 6-162.
- 16. Disconnect five connectors (⑮ – ⑲). Refer to ILLUSTRATION 6-162.
- 17. Pull the LV2 Unit Outwards.

FRONT VIEW OF LV2 UNIT
ILLUSTRATION 6-162

6-7-4 Procedures (continued)

(A) Removing LV2 Unit (continued)

18. Disconnect one connector (①) from the rear of LV2 Unit. Refer to ILLUSTRATION 6-163.
19. Unscrew three screws (② - ④) to remove the three wires. Refer to ILLUSTRATION 6-163.
20. Remove the LV2 Unit.

REAR VIEW OF LV2 UNIT
ILLUSTRATION 6-163

21. Disconnect the CN31 cable from the TRIAC Unit. Refer to ILLUSTRATION 6-164.

DISCONNECTING CN31 CABLE
ILLUSTRATION 6-164

6-7-4 Procedures (continued)

(B) Installing LV3 Unit

1. Screw two screws (① and ②) to fix the two wires [LINE(L) and NEUTRAL(N)]. Refer to ILLUSTRATION 6-165.

REAR VIEW OF LV3 UNIT
ILLUSTRATION 6-165

2. Insert the LV3 Unit as shown in ILLUSTRATION 6-166.
3. Screw two screws (① and ②) to install the LV3 Unit. Refer to ILLUSTRATION 6-166.

INSTALLING LV3 UNIT
ILLUSTRATION 6-166

6-7-4 Procedures (continued)

(B) Installing LV3 Unit (continued)

4. Unscrew four (4) screws (① – ④). Refer to ILLUSTRATION 6-167.
5. Remove the Right PS Cover. Refer to ILLUSTRATION 6-167.
6. Unscrew three (3) screws (⑤ – ⑦). Refer to ILLUSTRATION 6-167.
7. Disconnect one connector (⑧). Refer to ILLUSTRATION 6-167.
8. Pull the HV Unit out.

RIGHT SIDE VIEW OF POWER SUPPLY
ILLUSTRATION 6-167

Note

It is not necessary to remove the HV Unit completely. Pull the HV Unit out to get the openings for accessing the rear of the LV3 Unit by a hand.

6-7-4 Procedures (continued)**(B) Installing LV3 Unit** (continued)

9. Connect one connector (①) as shown in ILLUSTRATION 6-168.

REAR VIEW OF LV3 UNIT (b)
ILLUSTRATION 6-168

10. Screw three (3) screws (⑤ – ⑦) to install the HV Unit. Refer to ILLUSTRATION 6-167 on page 6-282.
11. Connect one connector (⑧). Refer to ILLUSTRATION 6-167 on page 6-282.
12. Screw four (4) screws (① – ④) to install the Right PS Cover. Refer to ILLUSTRATION 6-167 on page 6-282.

6-7-4 Procedures (continued)

(B) Installing LV3 Unit (continued)

- Screw fourteen (14) screws (1) – (14) to fix the wires to the appropriate terminals. Refer to ILLUSTRATION 6-169.

FIXING WIRES
ILLUSTRATION 6-169

6-7-4 Procedures (continued)

(B) Installing LV3 Unit (continued)

14. Connect the CN31 cable for LV3 Unit (supplied with the LV3 Unit) to the TRIAC Unit. Refer to ILLUSTRATION 6-170.
15. Connect another side of CN31 cable for LV3 Unit to the connector located at the front of the LV3 Unit as shown in ILLUSTRATION 6-170 .

CONNECTING CN31 CABLE FOR LV3 UNIT
ILLUSTRATION 6-170

6-7-4 Procedures (continued)**(C) System Check-out**

1. Plug in the unit.
2. Turn the circuit breaker located at the rear side of the Power Supply to the ON position (upper side).
3. Turn the LOGIQ™ 400 system power ON.
4. Make sure that the power supplies are within each tolerance. Refer to the section 4-4 "POWER SUPPLY ADJUSTMENTS" in chapter 4. For the tolerances of the power supplies, refer to TABLE 4-3. For the measurement locations, refer to TABLE 4-4 and ILLUSTRATION 4-32 on page 4-43.
5. Adjust the power supplies to the appropriate voltage as necessary if they are out of tolerance.
6. Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, FUNCTIONAL CHECKS in the LOGIQ™ 400 Service Manual, 2127661.
7. Turn the LOGIQ™ 400 system power OFF.
8. Screw four screws (① – ④) to install the Left PS Cover. Refer to ILLUSTRATION 6-171.

IRE-INSTALLING LEFT PS COVER
ILLUSTRATION 6-171

6-7-4 Procedures (continued)

(C) System Check-out (continued)

9. Attach the label (PN LABEL supplied with the LV3 Unit) indicating the part number of the Power Supply Assy over the old label located at the front side of the Power Supply Unit as shown in ILLUSTRATION 6-172.

ATTACHING PN LABEL
ILLUSTRATION 6-172

Note

Two types of Indication labels are supplied with the LV3 Unit. One indicates the part number of the 220V Power Supply Unit and another indicates the part number of the 100/120V Power Supply Unit. Be sure to choose and attach the appropriate one.

7-1 INTRODUCTION

This chapter provides Periodic Maintenance procedures. It is an effective and efficient method of reducing equipment down time and service cost.

Note

Cleaning the Air Filters described in this chapter should be done by the customer following the procedures described in the LOGIQ™ 400 User Manual.

It is recommended that the Air Filter Cleaning be included as part of the periodic maintenance procedures performed on site with a maintenance contract.

7-1-1 Periodic Maintenance

Periodic Maintenance consists of visual inspections, system performance checks and periodic cleaning of certain critical parts. Perform this procedure at six month intervals. This schedule for maintenance is based on an estimated equipment usage of 40 hours per week.

7-2 PERIODIC MAINTENANCE PROCEDURE

7-2-1 Visual Inspection

- a. Check cables for cracks nicks and abrasions of their insulation.
- b. Check that cables sheath are securely clamped in cable glands/connector clamps where applicable.
- c. Check that cables are correctly routed and secured.
- d. Check that all screws are in place and not missing.
- e. Check that all detachable cable connectors are fully home in their sockets.
- f. Check that all equipment covers and fixing are in place and undamaged.
- g. Check that all plug-in boards are fully seated in cardcage connector.
- h. Check operation of the cooling fans and that the airflow paths are clear. LOGIQ™ 400 has five Fans : three for PC Boards, one for Power Supplies, one for MO drive.
- i. Check that the keyboard keys, some volumes and Track Ball have correct function and no mechanical damage.
- j. Check that three Air Filters indicated in the ILLUSTRATION 7-2 are clean and undamaged.

7-2-2 Cleaning

a. Clean the CRT filter.

a-1. Remove the CRT filter from the monitor. Refer to section 6-2-6 or 6-2-16 in Chapter 6, RENEWAL PARTS.

Equipment damage possibility. Do not use a hydrocarbon glass cleaner on a monitor with an anti-glare shield. Prolonged use of such cleaners damages the shield.

a-2. Wipe the monitor face and CRT filter using a soft, non-abrasive folded cloth with a glass cleaner.

a-3. Install the CRT filter after cleaning the monitor face and CRT filter. Set the CRT filter on the monitor, insert the CRT filter clamps (①), and slide them inwards securely (②).

INSTALLING CRT FILTER AND CLAMPS
ILLUSTRATION 7-1

Note

Make sure that the filter is securely fixed by the filter clamps. These are important to prevent a hazard from the filter falling. A “click” sound will be heard when the filter clamp is secured by the lock mechanism.

Note

The CRT Filter Clamps and Escutcheon mounted on the black and white monitor for the LOGIQ™ 400 B/W console are changed to strengthen the mounting grip of the CRT filter on the escutcheon. With these changes, the CRT Filter Clamp Kit are provided to improve the installed base systems. This is:

PART NAME	QTY	PART #	REMARKS
CRT Filter Clamp P Kit	1	2152056	For CRT FILTER (plastic filter, P9514BY)

■ 7-2-2 Cleaning (Continued)

- b. Clean the Fans and the Finger Guards by using a vacuum cleaner and bristled brush.
- c. Clean two Air Filters and one PW Air Filter by using a bristled brush. If these filters are damaged, replace them. For the positions of three Air Filters, refer to ILLUSTRATION 7-2.

AIR FILTERS REMOVAL
ILLUSTRATION 7-2

- d. Clean out the interior of the Console by using a vacuum cleaner.

7-2-3 Measurement

- a. Make sure that electrical outlet of hospital should provide the power line standard.
Refer to Chapter 2, Installation.
- b. Ensure all power supply voltages are within tolerance.
Refer to section 4-4, Power Supply Adjustment in Chapter 4, Functional Checks, for adjustment procedure.

7-2-4 User Data Backup

- a. Keep user preset data into a MO (Magneto Optical) disk using the User Data Backup of LOGIQ™ 400 Utility Menu. Refer to 4-3-3, Utility Menu in Chapter 4, FUNCTIONAL CHECKS.

Note

Use new initialized MO disk. It is impossible to save any user data files into the disk which another file is already stored.

7-2-5 Note

Visual inspection of probes (“head”, cable and connector)

7-3 ELECTRICAL SAFETY TESTS

The following tests are performed at the factory and should be performed at the site. These tests are: grounding continuity, chassis leakage current, probe leakage current, and ECG leakage current. All measurements are made with an Electrical Safety Analyzer Model Dale 600/600E built by Dale Technology Corporation or equivalent device.

Note

In GEMS–America region, it is NOT necessary to do the leakage current test when installing the LOGIQ™ 400 systems on condition that no optional devices are installed with the console. For more details, contact your regional service support center.

Recommended Tool

<u>PART NUMBER</u>	<u>NAME</u>	<u>DESCRIPTION</u>
46-285652G1	Electric Safety Analyzer DALE 600	For 120V Units
46-328406G2	Electric Safety Analyzer DALE 600E	For 220V Units
2113015	Leakage Current Ultrasound Kit	For 120V and 220V Units

7-3-1 Outlet Test Wiring Arrangement

Test all outlets in the area for proper wiring arrangement by plugging in the Dale 600/600E and noting the combination of lights that are illuminated (Refer to ILLUSTRATION 7-3).

Combination of Lights	● ☀ ☀	☀ ☀ ●	● ☀ ●	● ● ●	☀ ● ☀
Condition	CORRECT WIRING	REVERSE POLARITY	OPEN GROUND	OPEN HOT	HOT/GROUND REVERSED

OUTLET TEST
ILLUSTRATION 7-3

Note

No outlet tester can detect the condition where the Neutral (grounded supply) conductor and the Grounding (protective earth) conductor are reversed. If later tests indicate high leakage currents, this should be suspected as a possible cause and the outlet wiring should be visually inspected.

7-3-2 Grounding Continuity

Electric Shock Hazard. The patient must not be contacted to the equipment during this test.

Measure the resistance from the third pin of the attachment plug to the exposed metal parts of the case (ILLUSTRATION 7-4). The ground wire resistance should be less than **0.2** ohms.

**Meter Procedure**

Follow these steps to test the ground wire resistance.

1. Turn the LOGIQ™ 400 unit OFF.
2. Plug the unit into the meter, and the meter into the tested AC wall outlet (Refer to ILLUSTRATION 7-6).
3. Plug the black chassis cable into the meter's "CHASSIS" connector and attach the black chassis cable clamp to an exposed metal part of the LOGIQ™ 400 unit (Refer to ILLUSTRATION 7-6).
4. Set the meter's "FUNCTION" switch to the RESISTANCE position.
5. Set the meter's "POLARITY" switch to the OFF (center) position.
6. Measure the ground wire resistance and keep a record of the results with other hard copies of PM data kept on site.

7-3-3 Chassis Leakage Current Test

Definition

Leakage current is the electrical current that could flow through the patient or sonographer should a ground wire break. The unit, the probes, the ECG module, and all external peripherals must be tested.

Generic Procedure

The test verifies the isolation of the power line from the chassis. The testing meter is connected from accessible metal parts of the case to ground. Measurements should be made with the unit ON and OFF, with the power line polarity Normal and Reversed. **Record the highest reading of current.**

SETUP FOR CHASSIS SOURCE LEAKAGE CURRENT
ILLUSTRATION 7-5

7-3-3 Chassis Leakage Current Test (Continued)

Meter Procedure

Follow these steps to test the unit for leakage current.

1. Turn the LOGIQ™ 400 unit OFF.
2. Plug the unit into the meter, and the meter into the tested AC wall outlet (Refer to ILLUSTRATION 7-6).

GROUND AND CHASSIS LEAKAGE CURRENT TEST
ILLUSTRATION 7-6

3. Plug the black chassis cable into the meter's "CHASSIS" connector and attach the black chassis cable clamp to an exposed metal part of the LOGIQ™ 400 unit (Refer to ILLUSTRATION 7-6).
4. Set the tester's "FUNCTION" switch to CHASSIS position.
5. Follow the test conditions described in the following table for every test point on the unit.

TABLE 7-1
CHASSIS LEAKAGE CURRENT TEST CONDITIONS

TEST	CONDITION
1	Mounting screw for transducer receptacle
2	Wheel support
3	Mounting screw for CRT housing
4	Mounting screw for peripheral plugged into unit
5	Mounting screw for other peripheral powered by unit

6. Keep a record of the results with other hard copies of PM data kept on site.

7-3-3 Chassis Leakage Current Test (Continued)

Data Sheet for Chassis Source Leakage Current

Follow the foregoing test procedure. The test passes when all readings measure less than the value shown in the table below (TABLE 7-2).

TABLE 7-2
MAXIMUM ALLOWANCE LIMIT FOR CHASSIS SOURCE LEAKAGE CURRENT

COUNTRY	NORMAL CONDITION	OPEN GROUND	REVERSE POLARITY	OPEN NEUTRAL
USA	N/A	0.3mA	0.3mA	N/A
OTHERS	0.1mA	0.5mA	0.5mA	0.5mA

Electric Shock Hazard. When the meter's ground switch is OPEN, don't touch the unit!

Equipment damage possibility. Never switch the Polarity and the status of Neutral when the unit is powered ON. Be sure to turn the unit power OFF before switching them using the POLARITY switch and/or the NEUTRAL switch. Otherwise, the unit may be damaged.

TABLE 7-3
DATA SHEET FOR CHASSIS SOURCE LEAKAGE CURRENT

OFF	REV	CLOSED					

7-3-4 Probe Leakage Current Test

Definition

This test measures the current that would flow to ground from any of the probes through a patient who is being scanned and becomes grounded by touching some other grounded surface.

Generic Procedure

Measurements should be made with the ground open and closed, with power line polarity normal and reversed, and with the unit Off and On. For each combination, the probe must be active to find the worst case condition.

SETUP FOR PROBE LEAKAGE CURRENT
ILLUSTRATION 7-7

Note

Each probe will have some amount of leakage current, dependent on its design. Small variations in probe leakage currents are normal from probe to probe. Other variations will result from differences in line voltage and test lead placement.

7-3-4 Probe Leakage Current Test (Continued)

Meter Procedure Using Probe Adapter

The Dale 600/600E provides a method for testing probes independently from the system. The meter utilizes a probe adapter to apply a test potential commonly to all connector pins.

The probe's imaging area is immersed in a saline solution along with a grounding probe from the meter to complete the current path. Saline solution is a mixture of water and salt. The salt adds a free ion to the water, making it conductive. Normal saline solution is 0.9% salt or 1/2 gram salt per 1 liter of water. If saline is not available, a mixture of 1 quart water with one or more grams of table salt, mixed thoroughly, will substitute.

CAUTION

To avoid probe damage and possible electric shock, do not immerse probes into any liquid beyond the level indicated in the probe users manual. Do not touch the probe, conductive liquid or any part of the unit under test while the ISO TEST switch is depressed.

Follow these steps to test each transducer for leakage current.

1. Turn the LOGIQ™ 400 unit OFF.
2. Plug the unit into the test meter, and the meter into the tested AC wall outlet.
3. Connect the probe for test with the meter's appropriate adapter (Refer to ILLUSTRATION 7-8).
4. Plug the saline probe into the meter's "CHASSIS" connector (Refer to ILLUSTRATION 7-8).

TRANSDUCER SOURCE LEAKAGE CURRENT TEST

ILLUSTRATION 7-8

7-3-4 Probe Leakage Current Test (Continued)

5. Plug the probe adapter into the meter's connector marked "EXTERNAL" (Refer to ILLUSTRATION 7-8).
6. Set the meter's "FUNCTION" switch to EXTERNAL position.
7. Add the saline probe and the imaging area of the probe into the saline bath.
8. Have unit power ON for the first part; turn it OFF for the second half.
9. Depress the ISO TEST rocker switch and record the highest current reading.
10. Follow the test conditions described in the following table (TABLE 7-5) for every transducer.
11. Keep a record of the results with other hand copies of PM data.

Meter Procedure

Follow these steps to test each transducer for leakage current.

1. Turn the LOGIQ™ 400 unit OFF.
2. Plug the unit into the test meter, and the meter into the tested AC wall outlet.
3. Plug the external probe into the meter's "EXTERNAL" connector.
4. Set the meter's "FUNCTION" switch to EXTERNAL position.
5. Connect the probe for test with the connector of the console.
6. Apply a liberal amount of gel to the transducer's lens.
7. Wrap the transducer in aluminum foil, making sure there is good contact with its acoustic aperture.
8. Either suspend the transducer by its cable or place it on an insulated surface.
9. Have unit power ON for the first part; turn it OFF for the second half.
10. Hold the external probe against the aluminum foil on the transducer when the unit is ready to scan.
11. Depress the ISO TEST rocker switch and record the highest current reading.
12. Follow the test conditions described in the following table (TABLE 7-5) for every transducer.
13. Keep a record of the results with other hand copies of PM data.

7-3-4 Probe Leakage Current Test (Continued)

Data Sheet for Transducer Source Leakage Current

Follow the foregoing test procedure for every transducer. The test passes when all readings measure less than the value shown in the table below (TABLE 7-4).

TABLE 7-4
MAXIMUM ALLOWANCE LIMIT FOR PROBE LEAKAGE CURRENT

1. Type BF Applied Part Leakage Current Limits
 [Non-conductive (floating) Surface and Cavity Transducers]

COUNTRY	NORMAL CONDITION	OPEN GROUND	REVERSE POLARITY	OPEN NEUTRAL
USA	0.05mA	0.05mA	0.05mA	0.05mA
OTHERS	0.1mA	0.5mA	0.5mA	0.5mA

2. Type CF Applied Part Leakage Current Limits
 [Surgical Transducer and ECG Connections]

COUNTRY	NORMAL CONDITION	OPEN GROUND	REVERSE POLARITY	OPEN NEUTRAL
USA	0.01mA	0.01mA	0.01mA	0.01mA
OTHERS	0.01mA	0.05mA	0.05mA	0.05mA

Equipment damage possibility. Never switch the Polarity and the status of Neutral when the unit is powered ON. Be sure to turn the unit power OFF before switching them using the POLARITY switch and/or the NEUTRAL switch. Otherwise, the unit may be damaged.

7-3-5 ECG Leakage Current Test

Definition

This test measures the current which would flow to ground from any of the isolated ECG leads. The meter simulates a patient who is contacted to the monitoring equipment and is grounded by touching some other grounded surface.

Generic Procedure

Measurements should be made with the ground open and closed, with power line polarity normal and reversed, and with the unit Off and On. For each combination, the operating controls such as the lead switch should be operated to find the worst case condition.

TEST CIRCUIT FOR MEASURING NON-ISOLATED PATIENT LEADS (PROBES & ECG)
ILLUSTRATION 7-9

7-3-5 ECG Leakage Current Test (Continued)

Meter Procedure

The Dale 600/600E provides five snap type ECG buttons for testing patient leads. Snap on all patient leads to the meter and assure that the ground clip is connected to the system's ground terminal.

CAUTION

Line voltage is applied to the ECG leads during this test. To avoid possible electric shock hazard, the system being tested must not be touched by patients, users or anyone while the ISO TEST switch is depressed.

When the meter's ground switch is OPEN, don't touch the unit!

Follow these steps to test the ECG module for leakage current.

1. Turn the LOGIQ™ 400 unit OFF.
2. Plug the unit into the meter, and the meter into the tested AC wall outlet (Refer to ILLUSTRATION 7-10).
3. Plug the black chassis cable into the meter's "CHASSIS" connector and attach the black chassis cable clamp to an exposed metal part of the LOGIQ™ 400 unit (Refer to ILLUSTRATION 7-10).
4. Connect the patient leads to the corresponding snaps located at the upper front of the Dale 600/600E. Lead nomenclature for this test is not important (Refer to ILLUSTRATION 7-10).

ECG LEAKAGE CURRENT TEST

ILLUSTRATION 7-10

7-3-5 ECG Leakage Current Test (Continued)

5. Set the meter's "FUNCTION" switch to LEAD TO GROUND position to measure the patient lead to ground leakage current.
6. Select and test each ECG lead positions (except ALL) of the LEAD selector, testing each to the power condition combinations shown in TABLE 7-6.

TABLE 7-6
TESTING POWER CONDITIONS

ECG Power	Meter's Polarity Switch	Meter's Neutral Switch
ON	NORM	CLOSED
ON	NORM	OPEN
ON	REVERSE	CLOSED
ON	REVERSE	OPEN
OFF	NORM	CLOSED
OFF	NORM	OPEN
OFF	REVERSE	CLOSED
OFF	REVERSE	OPEN

7. Record the patient lead to ground leakage current measured on the data sheet (Refer to TABLE 7-8).
8. Set the meter's "FUNCTION" switch to LEAD TO LEAD position to measure the lead to lead leakage current.
9. Select and test each ECG lead positions (except ALL) of the LEAD selector, testing each to the power condition combinations shown in TABLE 7-6.
10. Record the lead to lead leakage current measured on the data sheet (Refer to TABLE 7-8).
11. Set the meter's "FUNCTION" switch to LEAD ISO position to measure the patient lead isolation current.
12. Select and test each ECG lead positions (except ALL) of the LEAD selector, testing each to the power condition combinations shown in TABLE 7-6.
13. Depress the rocker switch to ISO TEST and read the isolation current. To apply the voltage to the lead safely, the voltage is only applied when the rocker switch is depressed to ISO TEST.
14. Record the patient lead isolation current measured on the data sheet (Refer to TABLE 7-8).

7-3-5 ECG Leakage Current Test (Continued)

Data Sheet for ECG Leakage Current

Follow the foregoing test procedure. The test passes when all readings measure less than the value shown in the table below (TABLE 7-7).

TABLE 7-7
MAXIMUM ALLOWANCE LIMIT FOR ECG LEAKAGE CURRENT

	AC POWER SOURCE	MAXIMUM ALLOWANCE LIMIT	
		GROUND OPEN	GROUND CLOSED
Patient Lead to Ground Leakage Current Test and Patient Lead to Lead Leakage Current Test	115V	10 µA	10 µA
	220/240V	500 µA	10 µA
	AC POWER SOURCE	MAXIMUM ALLOWANCE LIMIT	
Patient Lead Isolation Current Test	115V	20 µA	
	220/240V	5mA	

Equipment damage possibility. Never switch the Polarity when the unit is powered ON. Be sure to turn the unit power OFF before switching the polarity using the POLARITY switch. Otherwise, the unit may be damaged.

7-3-6 When There's Too Much Leakage Current...

Chassis Fails

Check the ground on the power cord and plug for continuity. Ensure the ground is not broken, frayed, or intermittent. Replace any defective part.

Tighten all grounds. Ensure star washers are under all ground studs.

Inspect wiring for bad crimps, poor connections, or damage.

Test the wall outlet; verify it is grounded. Notify the user or owner to correct any deviations. As a work around, check the other outlets to see if they could be used instead.

Note

No outlet tester can detect the condition where the white neutral wire and the green grounding wire are reversed. If later tests indicate high leakage currents, this should be suspected as a possible cause and the outlet wiring should be visually inspected.

Probe Fails

Test the probe in another transducer interface connector.

If excessive leakage current is slot dependent, inspect the Transducer Interface board for bent pins, poor connections, and ground continuity.

If the problem still has stayed with the probe, replace the probe.

Peripheral Fails

Tighten all grounds. Ensure star washers are under all ground studs.

Inspect wiring for bad crimps, poor connections, or damage.

Still Fails

If all else fails, begin isolation by removing the probes, external peripherals, then the on board ones, one at a time while monitoring the leakage current measurement.

New Unit

If the leakage current measurement tests fail on a new unit and if situation can not be corrected, submit a Safety Failure Report to document the system problem. Remove unit from operation.

8-1 INTRODUCTION

This chapter provides the installation procedures and renewal parts for optional devices. The installation procedures for the following optional devices are included in this chapter.

Video Cassette Recorder	:	Sony SVO-9500
Color Video Printer	:	Sony UP-1850 and UP-2950 Series Printers
B/W Video Printer	:	Sony UP-890
ECG		
Expanded Cine Memory		
Foot Switch		
Swivel Lock		
Left Side Probe Holder		
MTZ Probe Holder		

8-2 VIDEO CASSETTE RECORDER INSTALLATION

8-2-1 Foreword

This section describes the installation of the optional Sony SVO-9500MD (NTSC)/SVO-9500MDP (PAL) Video Cassette Recorder for LOGIQ™ 400.

There are two ways for fixing the VCR on the LOGIQ™ 400. Two ways are:

- a. Installing the VCR on the Console.
- b. Installing the VCR on the Color Monitor.

Note

It is not possible to install the VCR or other peripherals onto the B/W monitor. Do not put any objects on the top of monitor.

Regarding installation procedure for each way, refer to 8-2-6, Installing VCR on Console or 8-2-7, Installing VCR on Color Monitor, Procedures, respectively.

8-2-2 Tools Required

Standard field Service Tool kit.

8-2-3 Time Required

Approx. 1 hour for installing the VCR on the console
 Approx. 1.5 hour for installing the VCR on the color monitor

8-2-4 Parts Required

- a. When installing the VCR on the Console:

ITEM	PART NAME	QTY	PART #	REMARKS
1.	Video Cassette Recorder	1	—	SVO-9500MD for NTSC SVO-9500MDP for PAL (E11801AA)
2.	VTR Assy	1	2127668	
	Option Tray 1	1	2127115	
	Option Tray 2	1	2127116	
	Edging	1	U0507AC	
	Screw	4	—	
	Screw	8	—	
3.	Power Cable Assy	1	P9509EE	
4.	RS232C Cable Assy	1	P9509MN	

Note

SVO-9500MDP (PAL) includes the video cables.

8-2-4 Parts Required (Continued)

b. When installing the VCR on the Color Monitor:

ITEM	PART NAME	QTY	PART #	
1.	Video Cassette Recorder	1	—	SVO-9500MD for NTSC SVO-9500MDP for PAL (E11801AA)
2.	VTR on Monitor Assy	1	P9522YE	
	VTR Base	1	P9524JY	
	VTR Belt	1	P9524JT	
	Stopper Block	1	P9524HH	
	Plate	2	P9524JN	
	Caution Label	1	P9524PU	
	Screw	4	—	
	Screw	4	—	
3.	Power Cable Assy	1	P9509EE	
4.	RS232C Cable Assy	1	P9509MN	

8-2-5 Functional Check-out

READ and UNDERSTAND these instructions thoroughly before proceeding with the installation. Perform each step in sequence and check it off when completed. If a problem occurs after completion, go back through the procedure and check for implementation errors before contacting your Ultrasound Region Engineer.

Equipment damage possibility. If the video cassette recorder is installed on the monitor, it is necessary to lock the monitor's tilt and up/down mechanism to prevent the equipment damage. Call customer's attention to that effect.

Possible operational damage. Failure to strictly follow ESD (Electrostatic Discharge) precautions during this upgrade may cause constant or intermittent operational abnormalities. Strictly follow all precautions.

Check each step as it is completed.

Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, Functional Checks.

8-2-6 Installing VCR on Console

1. Turn the system power OFF and unplug the unit. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Remove the Top Cover Sheet out of the system. Refer to ILLUSTRATION 8-1
3. Raise the monitor up by pushing down the Up/Down Release Button located on the Monitor Arm. Refer to ILLUSTRATION 8-1.

CONSOLE
ILLUSTRATION 8-1

8-2-6 Installing VCR on Console (Continued)

4. Put the OPTION TRAY 1 on the console and screw four screws supplied with VTR ASSY (2127668) to fix the OPTION TRAY 1 as shown in ILLUSTRATION 8-2.

OPTION TRAY 1 INSTALLATION
ILLUSTRATION 8-2

8-2-6 Installing VCR on Console (Continued)

- 5. Unscrew four screws fixing the rubber feet of the Video Cassette Recorder as shown in ILLUSTRATION 8-3.

VIDEO CASSETTE RECORDER
ILLUSTRATION 8-3

8-2-6 Installing VCR on Console (Continued)

6. Screw four screws supplied with VTR ASSY (2127668) to install the OPTION TRAY 2 to the Video Cassette Recorder as shown in ILLUSTRATION 8-4.

TRAY INSTALLATION
ILLUSTRATION 8-4

8-2-6 Installing VCR on Console (Continued)

7. Place the OPTION TRAY 2 with the Video Cassette Recorder on the OPTION TRAY 1 and screw four screws supplied with VTR ASSY (2127668) as shown in ILLUSTRATION 8-5.

FIXING TRAY
ILLUSTRATION 8-5

8-2-7 Installing VCR on Color Monitor

1. Turn the system power OFF and unplug the unit.
2. Remove four seals blinding the screw hole from the top of Color Monitor.

SEALS REMOVAL
ILLUSTRATION 8-6

8-2-7 Installing VCR on Color Monitor (Continued)

3. Remove the Monitor Cover Left and Monitor Cover Right. Refer to the 6-2-2 in Chapter 6, Renewal Parts.
4. Remove the left and right speakers. Refer to the 6-2-8 in Chapter 6, Renewal Parts.
5. Install the Plates to the Monitor at the both left and right side as shown in ILLUSTRATION 8-7. Use four screws supplied with the VTR ON MONITOR ASSY (P9522YE) to fix the Plates.
6. Attach the Stopper Block on the Monitor Arm so as to cover the Up/down Release Button. Refer to ILLUSTRATION 8-7.

PLATES AND STOPPER BLOCK INSTALLATION
ILLUSTRATION 8-7

8-2-7 Installing VCR on Color Monitor (Continued)

7. Install the speakers removed.
8. Install the Monitor Cover Left and Right removed.
9. Screw four screws supplied with VTR ON MONITOR ASSY (P9522YE) to install the VTR BASE onto the console as shown in ILLUSTRATION 8-8.

VTR BASE INSTALLATION
ILLUSTRATION 8-8

8-2-7 Installing VCR on Color Monitor (Continued)

- 10. Pass the VTR BELT (supplied with the VTR on Monitor Assy, P9522YE) through the two slits of the VTR BASE as shown in ILLUSTRATION 8-9.

VTR BELT
ILLUSTRATION 8-9

8-2-7 Installing VCR on Color Monitor (Continued)

11. Put the Video Cassette Recorder onto the VTR BASE and fix the VCR with the VTR BELT. Refer to ILLUSTRATION 8-10.

OPTION TRAY FIXATION
ILLUSTRATION 8-10

8-2-7 Installing VCR on Color Monitor (Continued)

12. Attach the Caution Label (supplied with the VTR on Monitor Assy, P9522YE) onto the Video Cassette Recorder. Refer to ILLUSTRATION 8-11.

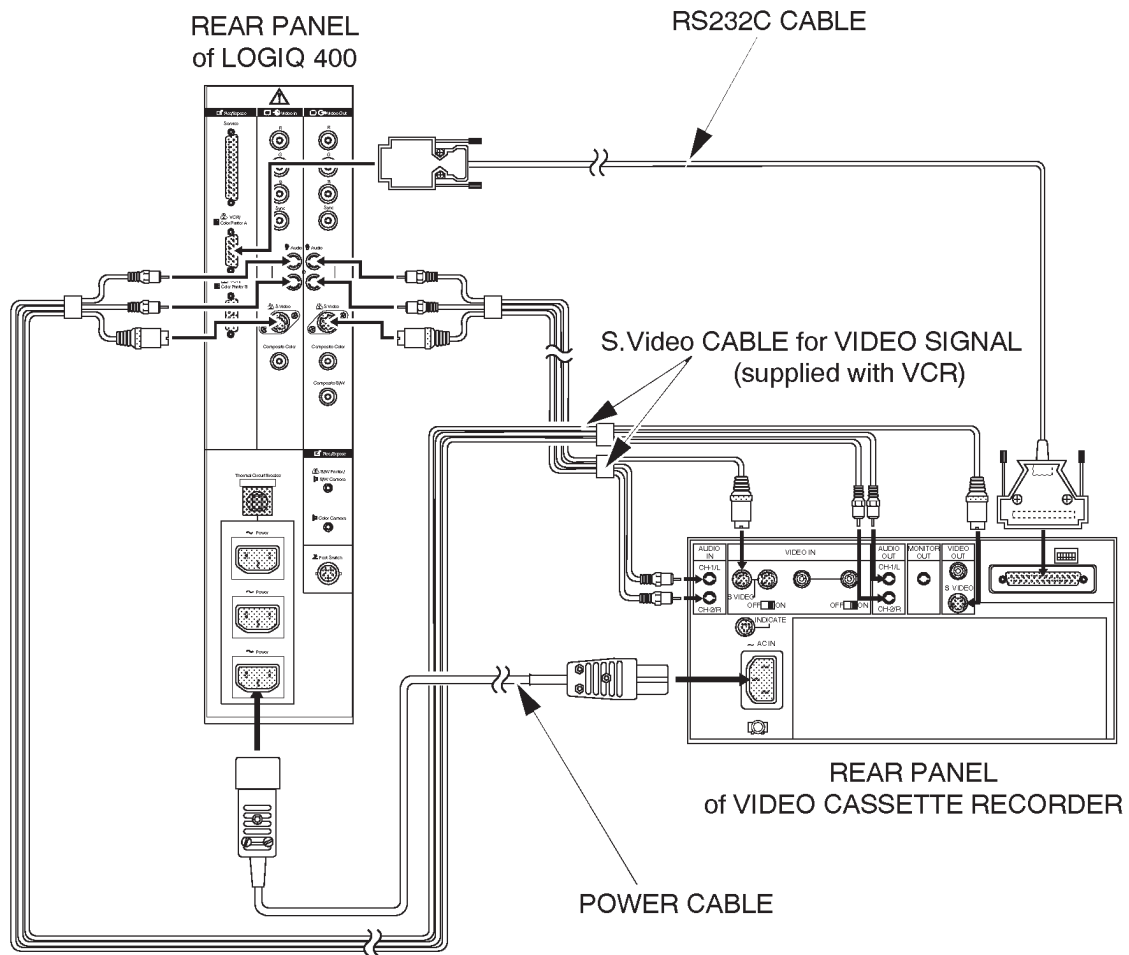

CAUTION LABEL
ILLUSTRATION 8-11

8-2-8 Connecting Cables

Use only the exclusive power cable to supply power to the peripheral recording devices from the LOGIQ™ 400. If a peripheral device is supplied power by other outlet, the system may be damaged by electrical noise transferred with the video signal or may not pass leakage current test.

1. Connect the power cable, RS232C cable, and the two S.Video cables between the Video Cassette Recorder and the console as shown in ILLUSTRATION 8-12.

CONNECTING CABLES
ILLUSTRATION 8-12

Note

The arrangement of I/O ports on the Rear Panel of B/W monitor system is different from the Color Monitor System.

8-2-8 Connecting Cables (Continued)

Note

In case of B/W monitor system, the header information data may be displayed on the playback screen when using the S Video connection. It is recommended that the Color Composite connection is used.

Note

The LOGIQ™ 400CL does not provide the VCR remote control function. It is not necessary to connect the RS-232C cable for the remote control with the LOGIQ™ 400CL console.

8-2-9 Setting DIP Switches

1. Set the DIP switches located on the rear panel of the video cassette recorder as shown in ILLUSTRATION 8-13.

Note

The LOGIQ™ 400CL does not provide the VCR remote control function. Set the DIP switched as shown in ILLUSTRATION 8-13.

OTHERS:

LOGIQ™ 400CL:

SW1, 2, 3, 4, 6 : OFF
SW5 : ON

SW1, 2, 3, 6 : OFF
SW4, 5 : ON

8-2-10 Operational Check-out

1. Plug in the system and power the system ON.
2. Make sure that the CTL/MENU switch located at the front of VCR is set to the CTL position (upper side).

CTL/MENU Switch

CTL/MENU SWITCH SETTING
ILLUSTRATION 8-14

Note

The VCR does not perform properly when the CTL/MENU switch is set to MENU position.

8-2-10 Operational Check-out (Continued)

3. Power the Video Cassette Recorder ON.
4. Press New Patient key when the PATIENT ENTRY MENU is displayed on the CRT monitor screen of LOGIQ™ 400.
5. Set the system so that the Video Cassette Recorder can work by the key operation on the console. The following steps (step a. to k.) indicates one example when you set the VCR control with the following conditions:

- I. Use S-Video cable for connecting between LOGIQ™ 400 and VCR.
- II. Connect RS232C cable with "port A" located at rear panel of LOGIQ™ 400.

- a. Press the Top Menu Select key located on the keyboard. The sub-menu selected previously is displayed on the CRT monitor screen.

SOFTWARE MENU CONTROL KEYS

 - k. Press the Top Menu Select key twice to exit the System Parameter Set-Up menu.
6. Make sure that the Video Cassette Recorder is properly controlled by the console. For the VCR operation, refer to LOGIQ™ 400 User Manual.
 7. Perform leakage current test.
 8. Turn OFF the power switch of the main unit.

8-2-11 Final Procedures

1. Properly dispose of excess material.
2. This completes the installation of the Video Cassette Recorder.

8-2-12 Renewal Parts

8-3 COLOR VIDEO PRINTER INSTALLATION

8-3-1 Foreword

This section describes the installation of the following optional Color Video Printer for LOGIQ™ 400.

MANUFACTURER	MODEL	VIDEO SIGNAL
SONY	UP-1850MD	NTSC
SONY	UP-1850EPM	PAL
SONY	UP-2950MD	NTSC
SONY	UP-2850P	PAL
SONY	UP-2900MD	NTSC
SONY	UP-2800P	PAL

Note

We cannot control the Color Video Printers, UP-2950MD, UP-2850P, UP-2900MD, and UP-2800P from the LOGIQ™ 400 keyboard using the RS232C cable if the software version of the console is V3.30B or former (V3.20B or former for LOGIQ™ 400CL). In this case, we have to use those printers with connecting a mini plug cable to enable the LOGIQ™ 400 console to control only the print function. Other remote functions are not available in the case of the connection with the mini plug cable.

8-3-2 Tools Required

Standard field Service Tool kit.

8-3-3 Time Required

Approx. 1 hour

8-3-4 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	Color Video Printer	1	—	UP-1850MD, UP-2900MD, or UP-2950MD for NTSC UP-1850EPM, UP-2800P, or UP-2850P for PAL
2.	CP Front Assy	1	2127666	
	Option Tray 1	1	2127115	
	Option Tray 3	1	P9524ND

8-3-5 Functional Check-out

READ and UNDERSTAND these instructions thoroughly before proceeding with the installation. Perform each step in sequence and check it off when completed. If a problem occurs after completion, go back through the procedure and check for implementation errors before contacting your Ultrasound Region Engineer.

Possible operational damage. Failure to strictly follow ESD (Electrostatic Discharge) precautions during this upgrade may cause constant or intermittent operational abnormalities. Strictly follow all precautions.

Check each step as it is completed.

Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, Functional Checks.

8-3-6 Installing Color Video Printer on Console

1. Turn the system power OFF and unplug the unit. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147 Direction 46-015902).
2. Remove the Top Cover Sheet out of the system. Refer to ILLUSTRATION 8-21.
3. Raise the monitor up by pushing down the Up/down Release Button located on the Monitor Arm. Refer to ILLUSTRATION 8-21.

CONSOLE
ILLUSTRATION 8-21

8-3-6 Installing Color Video Printer on Console (Continued)

4. Put the OPTION TRAY 1 on the console and screw four screws supplied with CP FRONT ASSY (2127666) as shown in ILLUSTRATION 8-22.

OPTION TRAY 1 INSTALLATION
ILLUSTRATION 8-22

8-3-6 Installing Color Video Printer on Console (Continued)

- 5. Set the TRAY on the OPTION TRAY 1 and screw four screws as shown in ILLUSTRATION 8-23.

TRAY INSTALLATION
ILLUSTRATION 8-23

8-3-6 Installing Color Video Printer on Console (Continued)

6. Put the OPTION TRAY 3 on the TRAY and screw four screws as shown in ILLUSTRATION 8-24.

OPTION TRAY 3 INSTALLATION
ILLUSTRATION 8-24

8-3-6 Installing Color Video Printer on Console (Continued)

- 7. Pass the VTR BELT through the two slits of the OPTION TRAY 3 as shown in ILLUSTRATION 8-25.

VTR BELT
ILLUSTRATION 8-25

- 8. Put the Color Video Printer onto the OPTION TRAY 3 and fix the Color Video Printer with the VTR BELT as shown in ILLUSTRATION 8-26.

COLOR VIDEO PRINTER INSTALLATION
ILLUSTRATION 8-26

8-3-7 Connecting Cables

CAUTION

Use only the exclusive power cable to supply power to the peripheral recording devices from the LOGIQ™ 400. If a peripheral device is supplied power by other outlet, the system may be damaged by electrical noise transferred with the video signal or may not pass leakage current test.

1. Connect the power cable, RS232C cable, and the BNC video cables between the Color Video Printer and console as shown in ILLUSTRATION 8-27.

CONNECTING CABLES
ILLUSTRATION 8-27

8-3-7 Connecting Cables (Continued)

Note

The Color Video Printers, UP-2950MD, UP-2850P, UP-2900MD, and UP-2800P can be controlled from the LOGIQ™ 400 keyboard using the RS232C cable only for the MD console with the software version 3.30A or later and for the CL console with the software version 3.20A or later. For the console with the other software version, we have to use those printers with connecting a mini plug cable to enable the LOGIQ™ 400 console to control only the print function. Other remote functions are not available under this condition. For the connection of the mini plug cable, refer to ILLUSTRATION 8-28.

MINI PLUG CABLE CONNECTION WITH UP-2950 SERIES PRINTERS
ILLUSTRATION 8-28

8-3-8 Setting DIP Switches

1. Set the DIP switches located on the rear panel of the Color Video Printer as shown in ILLUSTRATION 8-29.

Note

The UP-2950MD series printers do not have the DIP switches. When you install those printers, you have to check and set the preset parameters of the printer. Follow the procedures in Section 8-3-9.

DIP SWITCH SETTINGS
ILLUSTRATION 8-29

8-3-9 Setting Parameters of UP-2950 Series Printers

This section provides the information for the required preset parameters of the UP-2950 series printers with the LOGIQ™ 400 console.

1. Plug in the system and power the system ON.
2. Power the Color Video Printer ON.
3. Open the Front Door of the UP-2950 MD or UP-2850P printer. Check and set some preset parameters using the control panel as shown in ILLUSTRATION 8-30.

CONTROL PANEL OF UP-2950 SERIES COLOR PRINTER
ILLUSTRATION 8-30

8-3-9 Setting Parameters of UP-2950 Series Printers (Continued)

4. Press the MENU key. The COLOR SETUP top menu will be displayed on the LCD of the printer. Refer to ILLUSTRATION 8-31

SETUP MENU OF PRINTER (a)
ILLUSTRATION 8-31

Note

There are five (5) setup categories in the preset menu, COLOR (c), LAYOUT (l), PRINTER (p), INPUT (i), and OUTPUT (o). We can select the setup category on the Top menu of each category.

5. Press the RIGHT arrow key once to select the LAYOUT setup menu. Refer to ILLUSTRATION 8-32.

SETUP MENU OF PRINTER (b)
ILLUSTRATION 8-32

6. Press the DOWN arrow key twice to display the "MULTI PIX" menu. Refer to ILLUSTRATION 8-33.

SETUP MENU OF PRINTER (c)
ILLUSTRATION 8-33

7. Make sure that the "4" is selected for the MULTI. PIX ("--/--/4/--" is displayed on the LCD when the "4" is selected). Refer to ILLUSTRATION 8-33. Otherwise, select the "4" using the LEFT arrow or RIGHT arrow key.

8. Press the DOWN arrow key once to display the "SEPARATE" menu. Refer to ILLUSTRATION 8-34.

SETUP MENU OF PRINTER (d)
ILLUSTRATION 8-34

9. Make sure that the SEPARATE is set to "OFF" ("OFF/on" is displayed on the LCD when the SEPARATE is set to OFF). Refer to ILLUSTRATION 8-34. Otherwise, set the SEPARATE to "OFF" using the LEFT arrow or RIGHT arrow key.

8-3-9 Setting Parameters of UP-2950 Series Printers (Continued)

10. Press the UP arrow key three times to display the “LAYOUT SETUP” Top menu again. Refer to ILLUSTRATION 8-32.
11. Select the INPUT setup menu using the LEFT arrow or RIGHT arrow key (“/c//p/IN/o/” is displayed on the LCD when the INPUT setup menu is selected).
12. Press the DOWN arrow key once to display the “INPUT SEL” menu. Refer to ILLUSTRATION 8-35.

INPUT SEL :
v / sv / RGB

SETUP MENU OF PRINTER (e)
ILLUSTRATION 8-35

13. Make sure that the “RGB” is selected (“v/sv/RGB” is displayed on the LCD when the RGB is selected). Refer to ILLUSTRATION 8-35. Otherwise, select the “RGB” using the LEFT arrow or RIGHT arrow key.
14. Press the UP arrow key once to display the “INPUT SETUP” Top menu.
15. Select the PRINTER setup menu using the LEFT arrow or RIGHT arrow key (“/c//PRN/i/o/” is displayed on the LCD when the PRINTER setup menu is selected).
16. Press the DOWN arrow key four times to display the “SYSTEM SETUP” menu. Refer to ILLUSTRATION 8-36.

SYSTEM SETUP :
PRESS [>]

SETUP MENU OF PRINTER (f)
ILLUSTRATION 8-36

17. Press the RIGHT arrow key to display the SYSTEM SETUP sub-menu.
18. Press the DOWN arrow key twice to display the “BAUDRATE” menu. Refer to ILLUSTRATION 8-37.

BAUDRATE :
12 / 24 / 48 / 9600

SETUP MENU OF PRINTER (g)
ILLUSTRATION 8-37

19. Make sure that the “9600” is selected for the BAUDRATE (“12/24/48/9600” is displayed on the LCD when the 9600bps is selected). Refer to ILLUSTRATION 8-37. Otherwise, select the “9600” using the LEFT arrow or RIGHT arrow key.

8-3-9 Setting Parameters of UP-2950 Series Printers (Continued)

20. Press the UP arrow key twice and then the RIGHT arrow key once to display the "PRINTER SETUP" menu.
21. Press the DOWN arrow key five times to display the "FUNCTION SETUP" menu. Refer to ILLUSTRATION 8-38.

SETUP MENU OF PRINTER (h)
ILLUSTRATION 8-38

22. Press the RIGHT arrow key to display the FUNCTION SETUP sub-menu.
23. Press the DOWN arrow key twice to display the "IMMED. CAP" menu. Refer to ILLUSTRATION 8-39.

SETUP MENU OF PRINTER (i)
ILLUSTRATION 8-39

24. Make sure that the IMMED. CAP is set to "ON" ("off/ON" is displayed on the LCD when the IMMED. CAP is set to ON). Refer to ILLUSTRATION 8-39. Otherwise, set the IMMED. CAP to "ON" using the LEFT arrow or RIGHT arrow key.
25. Press the MENU key to exit the setup menu.

8-3-10 Operational Check-out

1. Plug in the system and power the system ON.
2. Power the Color Video Printer ON.
3. Press New Patient key when the PATIENT ENTRY MENU is displayed on the CRT monitor screen of LOGIQ™ 400.
4. Set the system so that the Color Video Printer can work by the key operation on the console. The following steps (step a. to o.) indicates one example when you set the Color Video Printer control with the following conditions:
 - I. Select UP-1850 color video printer.
 - II. Select Single memory as type of color printer memory.
 - III. Use RGB-Sync color printer signal.
 - IV. Connect RS232C cable with "port A" located at rear panel of LOGIQ™ 400.
 - V. Set that pressing Record1 key causes the color video printer to print image including color data. (Image including only B/W data is printed by B/W video printer.)

8-3-10 Operational Check-out (Continued)

Note

When installing the UP-3030 printer, the "UP3030" shall be selected for the Color Printer Type parameter on the SYSTEM PARAMETER SETUP menu.

Note

When installing the UP-2950MD or UP-2850P printer, the "UP1850" shall be selected for the Color Printer Type parameter on the SYSTEM PARAMETER SETUP menu.

- a. Press the Top Menu Select key located on the keyboard. The sub-menu selected previously is displayed on the CRT monitor screen.

SOFTWARE MENU CONTROL KEYS
ILLUSTRATION 8-40

- b. Press the Top Menu Select key again. The top menu is displayed on CRT monitor screen as shown in ILLUSTRATION 8-41.

- e. Select the System Paramtr section using the **◀** or **▶** key of Sub Menu Select keys. The System Paramtr selection is displayed in reverse video as shown in ILLUSTRATION 8-42.
- f. Press **▼** key to select the System Parameter Set-Up Menu. The system parameter set-up menu is displayed on the CRT monitor screen as shown in ILLUSTRATION 8-43.

SYSTEM PARAMETER SET-UP MENU (1/6)
ILLUSTRATION 8-43

8-3-10 Operational Check-out (Continued)

- g. Move the cursor to "NEXT" position by rotating the trackball and press the Set button four times to display the fifth page (5/6).

SYSTEM PARAMETER SET-UP MENU (5/6)

ILLUSTRATION 8-44

Note

The "Quaf-Frm" format is available only for the following color printers:

UP-1850MD, UP-1850EPM, UP-2950MD, and UP-2850P

The "Quaf-Frmls" selection for the Color Printer Memory in the SYSTEM PARAMETER SETUP, is not available for those printers. This function is valid only for the UP-3030MD printer.

- h. Select the "Black and White Printer" from among Record1 B&W parameters. Refer to ILLUSTRATION 8-44.
- i. Select the "Color Printer" from among Record1 Color parameters. Refer to ILLUSTRATION 8-44.

Note

Use Ellipse keys to select the Record1 and Record2 parameters. Other option is displayed by pressing the Ellipse keys when the current selection of Record1 parameter or Record2 parameter is displayed in reverse video.

- j. Move the cursor to "UP1850" for the Color Printer Type parameter and press **Set** to select it. Refer to ILLUSTRATION 8-44.
- k. Move the cursor to "Single" for the Color Printer Memory parameter and press **Set** to select it. Refer to ILLUSTRATION 8-44.
- l. Move the cursor to "RGB" for the Color Printer Signal parameter and press **Set** to select it. Refer to ILLUSTRATION 8-44.

8-3-10 Operational Check-out (Continued)

- m. Move the cursor to “Col-Prnt” for the Port A parameter and press **Set** to select it. Refer to ILLUSTRATION 8-44.

Note

If you install the UP-2950 series printer on the LOGIQ™ 400 console with the version 3.30 or older for MD console (3.20 or older for CL console) and connect the mini plug cable between the Plug-2 jack of the LOGIQ™ 400 console and the Remote-2 jack of the printer, select the “Color poraloid camera” from among the Record1 Color parameter and the “Col-Pola” from among the Plug-2 parameter.

- n. Move the cursor to “SAVE” position and press Set button to save the selected parameters.
 - o. Press the Top Menu Select key twice to exit the System Parameter Set-Up menu.
5. Make sure that the Color Video Printer is properly controlled by the console.

Note

If the UP-2950 series printer is connected with the LOGIQ™ 400 console using the mini plug cable, only the print function can be controlled from the keyboard operation.

6. Perform leakage current test.
7. Turn OFF the power switch of the main unit.

8-3-11 Final Procedures

1. Properly dispose of excess material.
2. This completes the installation of the Color Video Printer.

8-4 B/W PRINTER INSTALLATION

8-4-1 Foreword

This section describes for the installation of the optional Sony UP-890 B/W Video Printer LOGIQ™ 400.

8-4-2 Tools Required

Standard field Service Tool kit.

8-4-3 Time Required

Approx. 45 Minutes

8-4-4 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	B/W Video Printer	1	—	Sony UP-890 B/W video printer is shipped separately
2.	B/W Printer Assy	1	P9522XG	
	Printer PL	1	P9524BZ	
	Screw	4	—	
	Screw	2	—	
3.	Power Cable Assy	1	P9509LH	
4.	Mini Plug Cable	1	P9509BC	

8-4-5 Functional Check-out

READ and UNDERSTAND these instructions thoroughly before proceeding with the installation. Perform each step in sequence and check it off when completed. If a problem occurs after completion, go back through the procedure and check for implementation errors before contacting your Ultrasound Region Engineer.

Possible operational damage. Failure to strictly follow ESD (Electrostatic Discharge) precautions during this upgrade may cause constant or intermittent operational abnormalities. Strictly follow all precautions.

Check each step as it is completed.

Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, Functional Checks.

8-4-6 Setting DIP Switches

1. Make sure that the DIP switches located on the rear panel of the B/W Video Printer are set as shown in ILLUSTRATION 8-46. Refer to the Sony B/W Video Printer operator manual.

DIP SWITCH SETTINGS
ILLUSTRATION 8-46

8-4-7 Installing B/W Video Printer on Console

1. Turn the system power OFF and unplug the unit. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Unscrew four screws fixing the rubber feet of the B/W Video Printer as shown in ILLUSTRATION 8-47.

B/W VIDEO PRINTER
ILLUSTRATION 8-47

8-4-7 Installing B/W Video Printer on Console (Continued)

- 3. Screw four screws supplied with the B/W Printer Assy to install the Printer PL to the B/W Video Printer. Refer to ILLUSTRATION 8-48.

PRINTER PL INSTALLATION
ILLUSTRATION 8-48

8-4-7 Installing B/W Video Printer on Console (Continued)

4. Connect three cables, the power cable, BNC-BNC cable, and the mini plug cable, between the front CONN panel of the console and the rear panel of the B/W Video Printer. Refer to 8-4-8, Connecting Cables.

CONNECTING CABLES
ILLUSTRATION 8-49

8-4-7 Installing B/W Video Printer on Console (Continued)

- 5. Insert the B/W Video Printer with the Printer PL into the Printer Tray as shown in ILLUSTRATION 8-50.
- 6. Screw two screws as shown in ILLUSTRATION 8-50.

B/W VIDEO PRINTER INSTALLATION
ILLUSTRATION 8-50

8-4-8 Connecting Cables

CAUTION

Use only the exclusive power cable to supply power to the peripheral recording devices from the LOGIQ™ 400. If a peripheral device is supplied power by other outlet, the system may be damaged by electrical noise transferred with the video signal or may not pass leakage current test.

1. Connect the power cable, mini plug cable, and the BNC-BNC cable between the B/W Video Printer and the console as shown in ILLUSTRATION 8-51.

CABLE CONNECTION
ILLUSTRATION 8-51

8-4-9 Operational Check-out

1. Plug in the system and power the system ON.
2. Power the B/W Video Printer ON.
3. Press New Patient key when the PATIENT ENTRY MENU is displayed on the CRT monitor screen of LOGIQ™ 400.
4. Set the system so that the B/W Video Printer can work by the key operation on the console.
The following steps (step a. to m.) indicates one example when you set the B/W Video Printer control with the conditions below:

- I. Connect Mini Plug cable with Plug 1 "B/W Printer" located at front panel of LOGIQ™ 400. Refer to ILLUSTRATION 8-51.
- II. Set that pressing Record1 key causes the B/W video printer to print image including only B/W data. (Image including color data is printed by color video printer.)
- III. Select B/W printer for printing report page.
- IV. Select inverse print for printing report page.

- a. Press the Top Menu Select key located on the keyboard. The sub-menu selected previously is displayed on the CRT monitor screen.

SOFTWARE MENU CONTROL KEYS
ILLUSTRATION 8-52

- b. Press the Top Menu Select key again. The top menu is displayed on CRT monitor screen as shown in ILLUSTRATION 8-53.

TOP MENU
ILLUSTRATION 8-53

- c. Select the Set Up Menu using the ◀ or ▶ key of Sub Menu Select keys. The Set Up selection is displayed in reverse video as shown in ILLUSTRATION 8-53.

8-4-9 Operational Check-out (Continued)

- d. Press **▼** key to select the Set Up Menu. The Set Up Menu is displayed on the CRT monitor screen as shown in ILLUSTRATION 8-54.

8-5-5 Functional Check-out

READ and UNDERSTAND these instructions thoroughly before proceeding with the installation. Perform each step in sequence and check it off when completed. If a problem occurs after completion, go back through the procedure and check for implementation errors before contacting your Ultrasound Region Engineer.

Possible operational damage. Failure to strictly follow ESD (Electrostatic Discharge) precautions during this upgrade may cause constant or intermittent operational abnormalities. Strictly follow all precautions.

Check each step as it is completed.

Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, Functional Checks.

8-5-6 Installing ECG Board Assy

1. Turn the system power OFF and unplug the unit. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Remove the Side Cover Right. Refer to 6-2-27 in Chapter 6, Renewal Parts.
3. Unscrew four screws (① – ④) and remove the CONN panel 2.

Note

Keep removed screws because they are required to mount the ECG panel assy onto console.

CONN PANEL 2 REMOVAL
ILLUSTRATION 8-58

8-5-6 Installing ECG Board Assy (Continued)

- 4. Install the ECG Board Assy by screwing two screws (2) and (3) as shown in ILLUSTRATION 8-59.
- 5. Connect the cable (1): CB22) from the Mother Board with the connector on the ECG board assy. Refer to ILLUSTRATION 8-59.

ECG BOARD ASSY INSTALLATION
ILLUSTRATION 8-59

8-5-7 Installing ECG Panel Assy

1. Connect three cables (①-③) on the ECG panel assy with the ECG board assy. Refer to ILLUSTRATION 8-60.

CONNECTING CABLES
ILLUSTRATION 8-60

Note

The additional 4-pin connector (P69) is supplied with the ECG Board2 Assy for the reserved function. Be sure to plug the CB68 cable for the AUX to the P68 connector on the ECG Board2 Assy. Otherwise, the Auxiliary function shall not be functioning properly.

8-5-7 Installing ECG Panel Assy (Continued)

- 2. Screw four screws (1) – (4) to install the ECG panel assy as shown in ILLUSTRATION 8-61.

INSTALLING ECG PANEL ASSY
ILLUSTRATION 8-61

- 3. Re-install the Side Cover Right.

8-5-8 Operational Check-out

1. Connect the ECG patient cable with the connector on the ECG panel as shown in ILLUSTRATION 8-62.

CONNECTING ECG PATIENT CABLE
ILLUSTRATION 8-62

2. Connect the electrodes of ECG patient cable with the ECG simulator.
3. Plug in the system and turn the system power ON.

ECG MENU (d)
ILLUSTRATION 8-69

- 20. Press ▼ key to select the dual function.

8-5-8 Operational Check-out (Continued)

21. Check that the delay 1 markers (solid line) and delay 2 markers (broken line) appear on the CRT monitor screen as shown in ILLUSTRATION 8-70.

ECG WAVEFORM (b)
ILLUSTRATION 8-70

22. Rotate the trackball when the R delay displayed on the CRT monitor screen is highlighted and set the delay time 1 (S1) to 100 msec. The delay time 1 (S1) and 2 (S2) are displayed at the upper left position on the CRT monitor screen. Refer to ILLUSTRATION 8-70.

23. Select the Sync. Selectn section using the ◀ or ▶ key of Sub Menu Selectn keys. The Sync. Selectn section is displayed in reverse video.

24. Press ▼ key to set the delay time 2 (S2).

25. Rotate the trackball and set the delay time 2 (S2) to 500 msec.

26. Check that the frozen images are displayed continuously in accordance with the timing when each delay marker appears on the CRT monitor screen.

8-5-8 Operational Check-out (Continued)

27. Select the ECG Wave section using the ◀ or ▶ key of Sub Menu Select keys.

28. Press ⏏ key to exit the ECG mode. The ECG waveform will disappear.

■ 29. Connect the PCG sensor with the ECG panel. Refer to ILLUSTRATION 8-71.

Note

If your customer does not need the PCG sensor or you have not any PCG sensors, skip to step 42.

CONNECTING PCG SENSOR
ILLUSTRATION 8-71

8-5-8 Operational Check-out (Continued)

- 30. Select the PCG Wave section using the ◀ or ▶ key of Sub Menu Select keys. The PCG Wave section is displayed in reverse video as shown in ILLUSTRATION 8-72.

- 33. Check that the PCG waveform is displayed by means of patting the PCG sensor.

8-5-8 Operational Check-out (Continued)

- 34. Press the ◀ and ▶ keys of Sub Menu Select keys simultaneously to display the second menu. The ECG second menu is displayed as shown in ILLUSTRATION 8-68.
- 35. Select the PCG Positn section using the ◀ or ▶ key of Sub Menu Select keys. The PCG Positn section is displayed in reverse video.
- 36. Check that the position of the PCG waveform moves vertically by means of pressing the ▲ or ▼ key of Sub Menu Select keys.
- 37. Select the PCG Gain section using the ◀ or ▶ key of Sub Menu Select keys. The PCG Gain section is displayed in reverse video.
- 38. Check that the size of the PCG waveform changes by means of pressing the ▲ or ▼ key of Sub Menu Select keys.
- 39. Press the ▼ and ▶ keys of Sub Menu Select keys simultaneously to display the first menu. The ECG first menu is displayed on the CRT monitor screen.
- 40. Select the PCG Wave section using the ◀ or ▶ key of Sub Menu Select keys.
- 41. Press ▼ key to exit the PCG mode. The PCG waveform will disappear.
- 42. Connect the function generator with the AUX connector on the ECG panel assy.

Note

Use a adapter plug to connect the function generator as necessary.

- 43. Input the 2Vp-p, 1Hz signal into the system using the function generator.
- 44. Select the AUX Wave section using the ◀ or ▶ key of Sub Menu Select keys. The AUX Wave section is displayed in reverse video as shown in ILLUSTRATION 8-74.

49. Check that the position of the AUX waveform moves vertically by means of pressing the ▲ or ▼ key of Sub Menu Select keys.
50. Select the AUX Gain section using the ◀ or ▶ key of Sub Menu Select keys. The AUX Gain section is displayed in reverse video.
51. Check that the size of the AUX waveform changes by means of pressing the ▲ or ▼ key of Sub Menu Select keys.
52. Press the ▼ and ▶ keys of Sub Menu Select keys simultaneously to display the first menu. The ECG first menu is displayed on the CRT monitor screen.
53. Select the AUX Wave section using the ◀ or ▶ key of Sub Menu Select keys.
54. Press ▼ key to exit the AUX mode. The AUX waveform will disappear.
55. Perform leakage current test.

8-5-9 Attaching Caution Label

1. Turn the system power OFF.
2. Attach the Caution Label onto the Side Cover Right as shown in ILLUSTRATION 8-77.

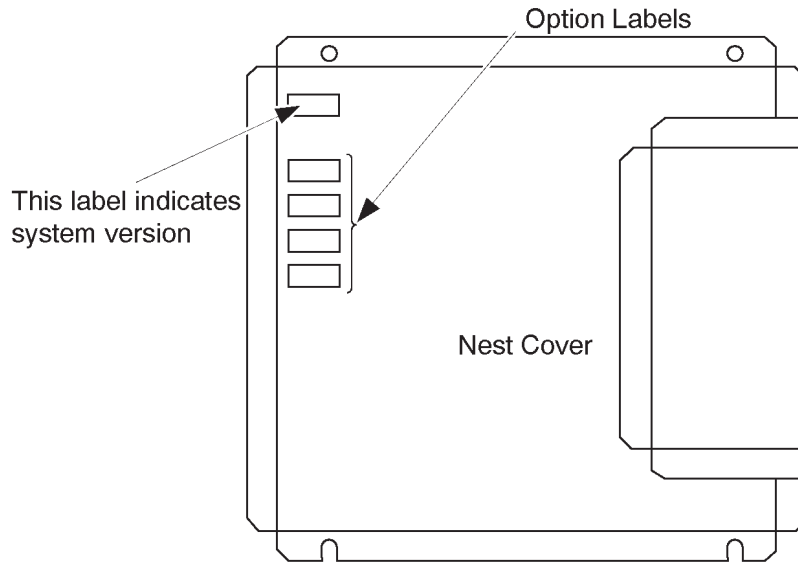

ATTACHING CAUTION LABEL

ILLUSTRATION 8-77

8-5-10 Final Procedures

1. Remove the Side Cover Left. Refer to 6-2-26 in Chapter 6, Renewal Parts.
- 2. Attach the Option Label onto the Nest Cover. Refer to ILLUSTRATION 8-78.

NEST COVER
ILLUSTRATION 8-78

3. Re-install the Side Cover Left.

8-5-10 Final Procedures (Continued)

- 4. Fill out the proper customer information on the Product Locator Card. Refer to ILLUSTRATION 8-79. Mail the installation card "Product Locator" to the address corresponding to your region.

8-6 EXPANDED CINE MEMORY INSTALLATION

8-6-1 Foreword

This section describes the installation of the Expanded Cine Memory option for LOGIQ™ 400. This upgrade expands the capacity of cine memory by 5 times over the standard capacity.

8-6-2 Tools Required

Standard field Service Tool kit

8-6-3 Time Required

Approx. 1 Hour

8-6-4 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	Add Cine Memory	1	P9523UC	
	OMEM Assy	1	P9525WU	
	Stud	1	U0053AG	
	Screw	2	—	
	Option Label	1	—	

8-6-5 Functional Check-out

READ and UNDERSTAND these instructions thoroughly before proceeding with the installation. Perform each step in sequence and check it off when completed. If a problem occurs after completion, go back through the procedure and check for implementation errors before contacting your Ultrasound Region Engineer.

Possible operational damage. Failure to strictly follow ESD (Electrostatic Discharge) precautions during this upgrade may cause constant or intermittent operational abnormalities. Strictly follow all precautions.

Check each step as it is completed.

Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, Functional Checks.

8-6-6 Accessing Board Assy

CAUTION

Possible operational damage. Be sure to turn OFF power and wear the ESD wrist strap before you remove a circuit boards.

1. Turn the system power OFF and unplug the unit. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Remove the Side Cover Left. Refer to 6-2-26 in Chapter 6, Renewal Parts.
3. Unscrew five screws and remove the Nest Cover as shown in ILLUSTRATION 8-81.
4. Turn the upper and lower ejectors on slot 9 in the direction indicated by the arrow (①). Refer to ILLUSTRATION 8-81.
5. Pull the TLMC Assy straightforwards in the direction indicated by the arrow (②). Refer to ILLUSTRATION 8-81.

ACCESSING BOARDS
ILLUSTRATION 8-81

8-6-7 Installing OMEM Assy

- 1. Screw one screw (①) to assemble the stud onto the TLMC Assy as shown in ILLUSTRATION 8-82.

ASSEMBLING STUD
ILLUSTRATION 8-82

8-6-7 Installing OMEM Assy (Continued)

2. Connect the two connectors and screw one screw (①) to assemble the OMEM Assy onto the TLMC Assy as shown in ILLUSTRATION 8-83.

ASSEMBLING OMEM ASSY
ILLUSTRATION 8-83

3. Re-install the TLMC Assy into the slot 9 of the Nest and turn the upper and lower ejectors to fix the board firmly.
4. Screw five screws to install the Nest Cover.

8-6-8 Operational Check-out

1. Plug the unit and turn the system power ON.
2. Set the following conditions by operating the keyboard. Refer to LOGIQ™ 400 User Manual.
 - a. B/CFM mode
 - b. Depth: Maximum (20 cm)
 - c. CFM Area: Maximum
 - d. Adjust the BW Gain and CFM Gain so that the CFM noise appears wholly in the CFM area.
3. Do the scanning for 30 seconds and press the Freeze button.
4. Turn the Cine Scroll potentiometer clockwise.
5. Check that the cine gauge appears at the bottom of the B-mode image as shown in ILLUSTRATION 8-84.

CINE MODE SCREEN
ILLUSTRATION 8-84

6. Turn the Cine Scroll potentiometer counterclockwise to move the cursor indicating the current frame to the right-most position of the cine gauge.
7. Check that the approximately 150 frames are stored in memory by reading the CN number displayed at the left side of the screen.
8. Check that the cine images are displayed normally.

8-6-9 Final Procedures

1. Turn the system power OFF.
2. Attach the Option Label onto the Nest Cover.

OPTION LABEL
ILLUSTRATION 8-85

3. Install the Side Cover Left. Refer to 6-2-26 in Chapter 6.

8-6-9 Final Procedures (Continued)

- 4. Fill out the proper customer information on the Product Locator Card. Refer to ILLUSTRATION 8-86. Mail this installation Card "Product Locator" to the address corresponding to your pole.

8-7 FOOT SWITCH INSTALLATION

8-7-1 Foreword

This section describes the installation of the Foot Switch option for LOGIQ™ 400.

8-7-2 Tools Required

Standard field Service Tool kit

8-7-3 Time Required

Approx. 15 Minutes

8-7-4 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	Foot Switch	1	P9509NB	

8-7-5 Functional Check-out

READ and UNDERSTAND these instructions thoroughly before proceeding with the installation. Perform each step in sequence and check it off when completed. If a problem occurs after completion, go back through the procedure and check for implementation errors before contacting your Ultrasound Region Engineer.

Possible operational damage. Failure to strictly follow ESD (Electrostatic Discharge) precautions during this upgrade may cause constant or intermittent operational abnormalities. Strictly follow all precautions.

Check each step as it is completed.

Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, Functional Checks.

8-7-6 Connecting Foot Switch

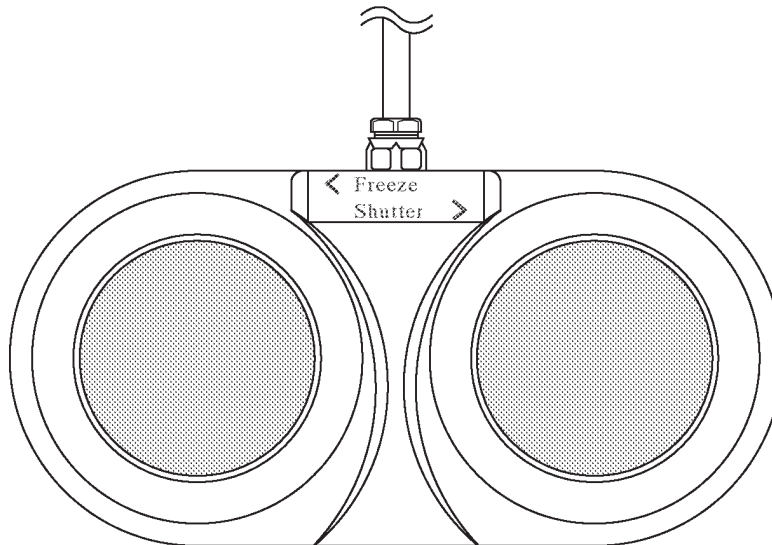

1. Turn the system power OFF. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Open the Rear Door.
- 3. Connect the Foot Switch with the connector on the rear panel as shown in ILLUSTRATION 8-88.

FOOT SWITCH CONNECTION
ILLUSTRATION 8-88

8-7-7 Operational Check-out

1. Turn the system power ON.
2. Check that depressing the left switch of the Foot Switch causes the image displayed on the CRT monitor screen to freeze.
3. Check that depressing the right switch of the Foot Switch causes the recording device, assigned to Record 1 by system parameter set-up, to record the currently displayed image.

FOOT SWITCH
ILLUSTRATION 8-89

8-7-8 Final Procedures

1. Properly dispose of excess material.
2. This completes the installation of the LOGIQ™ 400 Foot Switch Option.

8-8 SWIVEL LOCK INSTALLATION

8-8-1 Foreword

This section describes the installation of the Swivel Lock option for LOGIQ™ 400.

8-8-2 Tools Required

Standard field Service Tool kit

8-8-3 Time Required

Approx. 30 Minutes

8-8-4 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	Swivel Lock	1	U0144AE	

8-8-5 Functional Check-out

READ and UNDERSTAND these instructions thoroughly before proceeding with the installation. Perform each step in sequence and check it off when completed. If a problem occurs after completion, go back through the procedure and check for implementation errors before contacting your Ultrasound Region Engineer.

Possible operational damage. Failure to strictly follow ESD (Electrostatic Discharge) precautions during this upgrade may cause constant or intermittent operational abnormalities. Strictly follow all precautions.

Check each step as it is completed.

Perform functional checks to verify that the system is functioning properly. Refer to Chapter 4, Functional Checks.

8-8-6 Installing Swivel Lock

1. Turn the system power OFF. Follow the OSHA Lockout/Tagout Requirements (29 CFR 1910.147, Direction 46-015902).
2. Unscrew inside two hexagonal bolts fixing the left-side front caster to the frame as shown in ILLUSTRATION 8-90.

HEXAGONAL BOLTS REMOVAL
ILLUSTRATION 8-90

8-8-6 Installing Swivel Lock (Continued)

- 3. Reinstall two hexagonal bolts to install the swivel lock as shown in ILLUSTRATION 8-91.

SWIVEL LOCK INSTALLATION
ILLUSTRATION 8-91

8-8-7 Operational Check-out

1. Push the front side of swivel lock downwards by foot as shown in ILLUSTRATION 8-92.

SWIVEL LOCK
ILLUSTRATION 8-92

2. Move the LOGIQ™ 400 console. When the lock lever on the front caster faces just forwards, the swivel mechanism is locked.
3. Try to roll the LOGIQ™ 400 console and check that the left-side front caster does not rotate.
4. Push the back side of swivel lock down by foot.
5. Try to roll the LOGIQ™ 400 console again and check that the swivel lock mechanism is released.

8-8-8 Final Procedures

1. Properly dispose of excess material.
2. This completes the installation of the optional Swivel Lock for LOGIQ™ 400.

8-9 LEFT SIDE PROBE HOLDER INSTALLATION

8-9-1 Foreword

This section describes the installation of the Left Side Probe Holder option for LOGIQ™ 400.

8-9-2 Tools Required

Standard field Service Tool kit

8-9-3 Time Required

Approx. 30 Minutes

8-9-4 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	Left Side Probe Holder	1	P9522XD	

8-9-5 Installing Left Side Probe Holder

1. Turn the system power OFF.
2. Unscrew three screws to remove the keyboard panel assy. Refer to sub-section 6-2-49 in Chapter 6, RENEWAL PARTS.
3. Unscrew two screws and remove the box holder cover as shown in ILLUSTRATION 8-93.

BOX HOLDER COVER REMOVAL
ILLUSTRATION 8-93

8-9-5 Installing Left Side Probe Holder (Continued)

4. Install the left side probe holder as shown in ILLUSTRATION 8-94.

LEFT SIDE PROBE HOLDER INSTALLATION

ILLUSTRATION 8-94

5. Re-assemble the keyboard panel assy.

8-9-6 Operational Check-out

1. Turn the system power ON.
2. Perform functional checks to verify that the keyboard panel assy is assembled correctly. Refer to Chapter 4, FUNCTIONAL CHECKS.
3. Check that the left side probe holder is installed firmly.

8-9-7 Final Procedures

1. Properly dispose of excess material.
2. This completes the installation of the optional Left Side Probe Holder for LOGIQ™ 400.

8-10 MTZ PROBE HOLDER INSTALLATION

8-10-1 Foreword

This section describes the installation of the MTZ Probe Holder option for LOGIQ™ 400.

8-10-2 Tools Required

Standard field Service Tool kit

8-10-3 Time Required

Approx. 10 Minutes

8-10-4 Parts Required

ITEM	PART NAME	QTY	PART #	REMARKS
1.	MTZ Probe Holder	1	P9522XM	

8-10-5 Installing MTZ Probe Holder

Note

The MTZ probe holder is supplied with a console except for the Japanese system.

1. Install the MTZ probe holder as shown in ILLUSTRATION 8-95.

MTZ PROBE HOLDER INSTALLATION

ILLUSTRATION 8-95

2. Check that the MTZ probe holder is installed firmly.

8-10-6 Final Procedures

1. Properly dispose of excess material.
2. This completes the installation of the optional MTZ Probe Holder for LOGIQ™ 400.
