SSD DRIVES

A global group present in 60 countries...

SSD Drives, formerly Eurotherm Drives is an industry leading manufacturer of AC, DC, servo drives and servo motors. In 2000, the servo specialist Parvex joined the group as a division of SSD Drives, which expanded the product offering to high quality servo motors.

We are renowned for our wide range of reliable, innovative, state of the art products, applications experience, and global support.

The group is born in September 2002 from the buyout of the Eurotherm Drives Division of Invensys by its management team backed by a financial partner and banks. From November 2004, the new group name is SSD Drives; Parvex has been renamed SSD Parvex.

Looking forward, our company has the critical mass and knowledge base to continue our pipeline of innovative technologies, key to building and growing our business.

1500 specialists in drives and servo systems , SSD Parvex motor quality

For almost 30 years, we have supplied drives to the leading OEMs and end users in industry. We develop and produce advanced servo motors and servo drives for the most demanding applications in which motion quality is the key point.

Now we offer a complete line of the world's most advanced AC, DC, and servo drives and motors. These products bring the right mix of features and functionality that were developed from over three decades of worldwide industry experience.

A strong industrial presence in Europe

A worldwide network of SSD Drives companies and agents ensure you get expert application and service support in over 40 countries. You can install our products wherever you are, with the confidence of full back up and support.

SSD Drives are particularly present in Europe and enjoy an excellent reputation. Our network is the link between SSD Drives and our customers, providing real sales and technical support within the shortest times.

A unique range of drives, servo motors and customised solutions...

SSD Drives offers you a complete range of motors and drives in the technology the most adapted to your requirements :

- Flux vector control with or without sensor
- Servo drives for brushless or DC servo motors
- Axis or spindle servo motors
- DC drives

To complete this standard range, SSD Parvex is organised to develop complete customised solutions :

- Servo motor kits
- Special servo motors and servo drives
- Drive system design service
- Field service and start-up assistance

SERVO DRIVES

631 1 to 6A

The 631 is much more than a basic brushless servo drive. With built-in motion controller, emc compliant filter, PLC functionality and even extended I/O option, it's a complete positioning system in a single module. The 631 is designed for direct connection to a 230Vac single phase supply without the need for any interposing transformer.

SERVO DRIVES

**635
1 to 10A**

Torque, speed, position or motion control are all standard operations of the 635 series ac brushless servo drive – without the need for external controllers. Each has its own internal power supply for direct connection to 230V ac supplies and is available as part of a total servo package including motors, servo gearboxes and interconnecting cables.

The 635 is available as either individual compact modules or as rack mounted assemblies with up to 9 drives in a single rack.

TECHNICAL SPECIFICATIONS

635 Series

Power Supply – 220 - 230V ($\pm 10\%$ single or three phase up to 7A, three phase only 10A) 50 - 60 Hz $\pm 5\%$

| Type | Output current continuous (Arms) | Output current peak (Arms) |
|------------|----------------------------------|----------------------------|
| 635-K 01-3 | 1.0 | 2.0 |
| 635-K 03-3 | 2.5 | 5.0 |
| 635-K 05-3 | 5.0 | 10 |
| 635-K 07-3 | 6.5 | 10 |
| 635-K 10-3 | 10 | 20 |

Peak Output Current – Stated peak output currents are for a minimum 5 seconds

Ambient – 0 - 40°C (Derate 2%/°C up to 50°C max) Up to 1000m ASL (Derate 1%/100m up to 4000m max)

Input/Output

- 8 - Digital Inputs (inc 2 interrupts)
- 5 - Digital Outputs (3 x Opto-coupled, 2 x Relay)
- 2 - Analogue Inputs (-10V / 0 / +10V)
- 1 - Analogue Output (0 - 10V)
- Motor Resolver Input
- Encoder (Configurable Input or Output)

Serial Communication Options

| | |
|--------|------------|
| RS232 | PROFIBUSDP |
| RS422 | INTERBUS S |
| RS485 | SUCONet K |
| CANbus | |

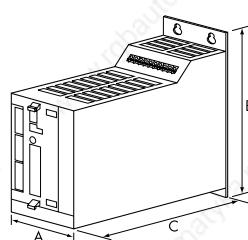

Input/Output Expansion Options

635 - Additional 5 Digital Inputs/2 Digital Outputs

Dimensions

| | | A | B | C |
|-----|------------|-------|-----|-------|
| 635 | 1 to 6.5 A | 91 | 249 | 216.5 |
| 635 | 10 A | 106.3 | 249 | 216.5 |

Allow extra 70mm in front of unit for plugs/cables.

637f

new

2 to 30A

The new 637f series is servo drives with integrated motion controller designed for the most demanding servo systems. Their ultra-fast control loops and process bus make them adapted to single or multi axis applications. Their EN954-1 category 3 safety input and their second optional application bus simplify their integration into machine. Furthermore the 637f drive integrate advanced PLC functions which can be built up with various input/output options. Available as compact version, the 637f series is also proposed as rack version integrating up to 9 axis for 230 or 400Vac power supply.

SERVO MOTORS

BRUSHLESS NX

0.45 to 64N.m

The NX series is the new brushless servo motor range.

The NX series brushless servo motors are characterized by a 10-pole innovative design for highest quality of motion, improved torque density and a compact and robust design.

With a large choice of torque and speed and an economical design, the NX series is the ideal solution for servo application.

NX Series

NX SERIES : A ROBUST AND SECURE CONSTRUCTION FOR HIGH LEVEL PERFORMANCES

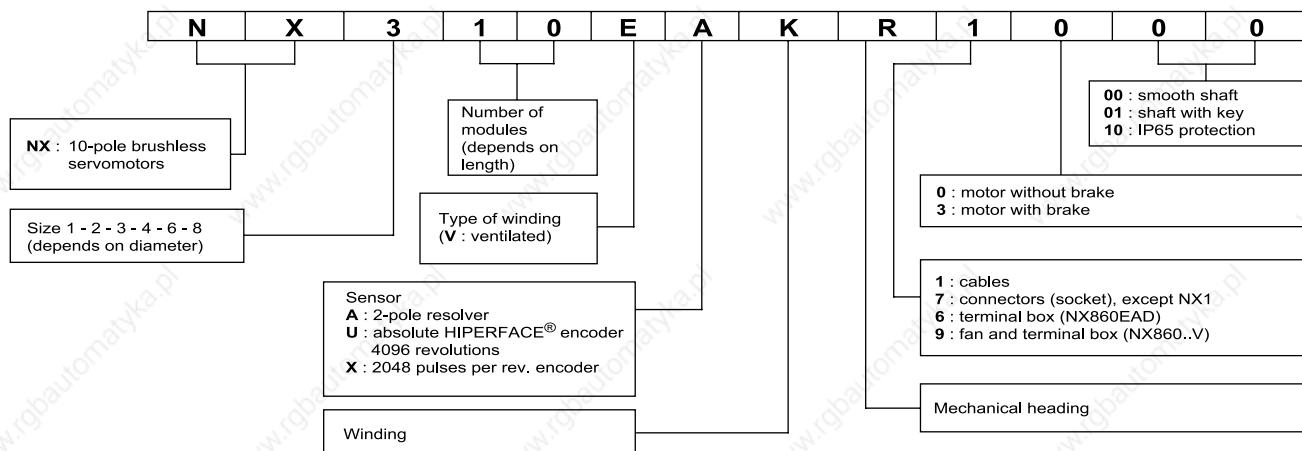

(1) : NX3 to NX6

(1)

NX SERVO MOTOR CODIFICATION

HIPERFACE® ENCODER OPTION For NX size 3 to 8

The HIPERFACE® encoder is a mixture of an absolute encoder (single or multturn) and of an incremental encoder of sine/cosine type.

Absolute position is sent via an RS485 connection at power-on; then position is incrementally counted from this absolute position by using sine/cosine signals.

SinCos HIPERFACE® encoder :

- Absolute position within 4096 revolutions
- 15 bits absolute position resolution on one rev.
- 1024 sine / cosine signals per rev.

With 637f Drive:

- Incremental encoder resolution : 16 bits (65536 points/rev)
- Maximum speed 6000 rpm
- Speed ripple : $\approx 0.3\%$ at 4000 rpm
- Maximum position error : ± 45 arc sec

MOUNTING OF STEGMANN SRM50 HIPERFACE® ENCODER ON NX3 TO NX8

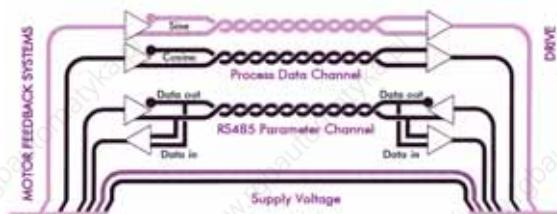

ABSOLUTE POSITION WITHIN 4096 REVOLUTIONS

ABSOLUTE POSITION RESOLUTION : 15 BITS PER REVOLUTION

SINE/COSINE SIGNALS : 1024 CYCLES PER REVOLUTION

ON NX3 TO NX8 MOTORS, SAME TORQUE, SPEED AND INERTIA AS FOR THE RESOLVER MOUNTING

HIPERFACE® ENCODER PRINCIPLE

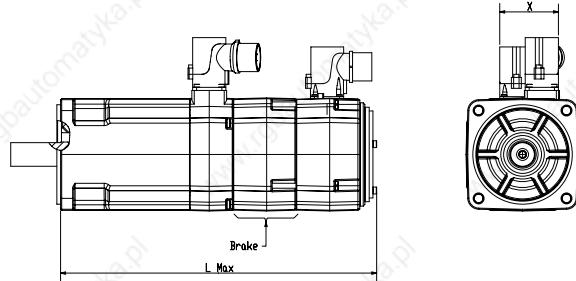

Extract from STEGMANN documentation

RS485 channel : parameter channel

- Encoder parameter setting
- Initial absolute position sent at power-on
- Sine / cosine : process data channel
- Analog sine / cosine signals with 1024 cycles per rev.
- Conversion of sine / cosine signals to incremental signals done inside drive

MECHANICAL AND ELECTRICAL ADAPTATIONS

Based on
standard offer

As a servo motor specialist, SSD Drives Parvex has developed its organization and know-how to adapt its standard motors for OEM and machine builders :

- **Mechanical adaptations** : shaft, flange, nema flange, housing, ...
- **Electrical adaptations** : speed, speed/torque, voltage, winding, ...
- **Specific sensor mounting** : Endat, Hiperface, incremental encoder, absolute encoder, hall effect sensor, ...
- **Motor accessories** like gearboxes, cables, connectors, ...

BRUSHLESS EX ATEX APPROVED

1.75 to 35 Nm*

new

EX servo motors are "d" flameproof apparatus designed to operate in potentially explosive atmosphere according to 94/9/CE "New Approach" ATEX directive.

Based on an innovative 10-pole design, they are characterised by an excellent motion quality for a high torque density.

In combination with GA gearboxes, they offer a complete, robust and powerful ATEX geared motor solution.

CUSTOM OEM SOLUTIONS

Servo motor kits : an innovative and customised solution for OEM applications

Servo motor kits are a unique customised solution to your most demanding applications, where **cost**, **space**, **rigidity** and **reliability** are your equally important concerns.

That innovative offering is based on the NX technology. The motor components are supplied instead of a standard motor.

The **rotor**, the **stator**, the **sensor** and **all relevant mechanical adaptations** are **designed for optimum integration** at the heart of your mechanical systems.

That solution stems from a global approach backed by :

- a **sales network** capable of understanding your specific needs
- a **highly qualified technical staff** to offer assistance throughout the specification stage
- a **flexible industrial organisation**

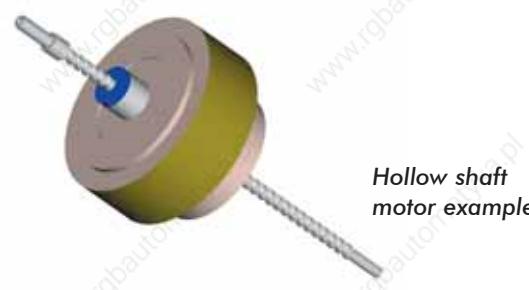

As a result, the size and cost constraints are handled with the maximum care.

Other benefits include the following :

- Accuracy, reliability and robustness
- Mechanical compactness and reduced weight
- Direct drive : accurate and robust mechanics
- Complete and optimised solution including sensor

Ball screw direct coupling example

Hollow shaft motor example

Servo motor kits can be designed for applications in the following range :

- Torque from 0.4 to 72 Nm
- Speed up to 15000 rpm

On top of mechanical customisations (iron length, frame, ...), many design variations are available :

- Custom windings
- Air or water cooling
- Hall effect sensor, resolver, high resolution sensor, optical encoder

GX GEARBOXES

Characterised by a low backlash, GX gearboxes are ideal for applications needing high torque and optimum motion quality.

In combination with NX servo motors, they offer a compact geared servo motor solution optimised to provide the best dynamic performances.

GX gearboxes - NX servo motors Mechanical associations

| Motor Torque ; Inertia | GX gearbox size | | | | | | |

r = gearbox ratio, torque (N.m) and Inertia ($10^{-5} \cdot \text{kgm}^2$)

Geared servo motor selection example

Targeted output speed (Ns) : 115 rpm
Targeted output torque (Cs) : 445 N.m
Load inertia (Jch) : 3 kgm²

Calculation of the gearbox ratio r

$$\begin{aligned}\text{Motor maximum speed (NmaxM)} &: 4000 \text{ rpm} \\ r = \text{NmaxM} / \text{Ns} &= 4000 / 115 = 34,78\end{aligned}$$

By choosing the existing ratio immediately above : R=35

Calculation of the motor torque

$$\begin{aligned}\text{Torque at low speed} = \text{Cs} / r / 0.85^* &= 445 / 35 / 0.85 = 14.9 \text{ N.m}\end{aligned}$$

Geared servo motor selection

Motor: NX820 (Torque : 16 N.m, Inertia (Jmot) : 320 kgm².10⁻⁵)
Gearbox : GX8N035R0900 (size 9 ; speed ratio 35)

Calculation of the inertia ratio**

$$\begin{aligned}\text{Inertia ratio} = \text{Jch} / (\text{Jmot} \times r^2) &= 3 / (320 \cdot 10^{-5} \times 35^2) = 0.77\end{aligned}$$

IMPORTANT : please confirm the operating limit of the association selected above with our technical service centre.

SERVO MOTORS

HV SPINDLE SERVO MOTORS 4 to 50kW

The HV series are permanent magnet synchronous motors used for machine tool spindle of traditional type (lathes, grinding machines, milling machines).

The control of synchronous technology gives the possibility to reach a speed range ratio at constant power up to 10.

Moreover the HV series present the same characteristics at low speed as an axis servo motor : high torque to weight ratio, low inertia, high torque at low speed...

SPEED UP TO 8000 RPM

TORQUE FROM 17 TO 240N.M

ROBUST AND COMPACT DESIGN

SPEED RANGE RATIO AT CONSTANT POWER UP TO 10

HIGH TORQUE AT LOW SPEED

LOW INERTIA FOR HIGH ACCELERATION, RAPID CHANGES IN SPEED FOR REDUCED TOOL CHANGING TIME

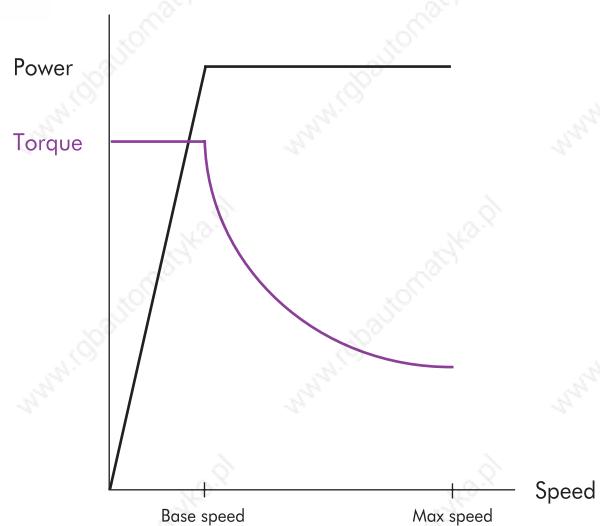

IP 54 PROTECTION

CLASS F INSULATION

HW ELECTROSPINDLE SYNCHRONOUS MOTORS

2 to 110kW

The HW range of synchronous electrospindle motors has been developed with the aim of solving the problems met in high speed machining.

Compared to conventional asynchronous motors, the HW motors have decisive advantages for quality spindle construction : machining of higher precision, longer bearing lifetime, greater acceleration capacity, higher compactness...

Controlled by the DIGIVEX Drive, the water cooled HW permanent magnets synchronous motors offer torque from 4 to 1250 Nm for speed up to 50000 rpm.

**PERMANENT MAGNETS,
COLD ROTOR TECHNOLOGY**

**LOW INERTIA AND HIGHER
COMPACTNESS COMPARED TO
ASYNCHRONOUS SOLUTION**

**HIGH TORQUE AT LOW SPEED AND
SPEED AT CONSTANT POWER
UP TO 50000 RPM**

**SPEED RANGE RATIO AT CONSTANT
POWER UP TO 10**

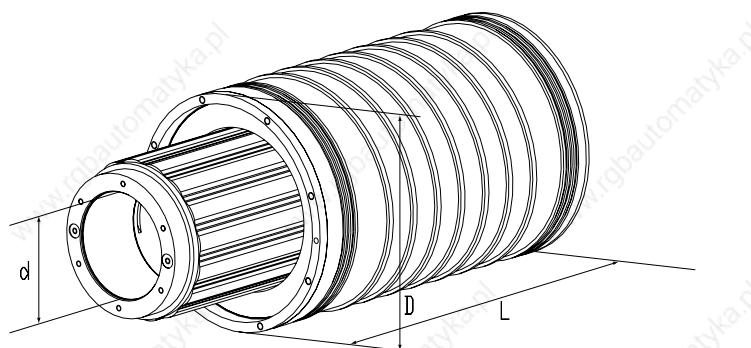

TORQUE FROM 4 TO 1250 N.M

INCREASED MACHINING PRECISION

BETTER SURFACE FINISHING

**HIGH ACCELERATION/DECELERATION
FOR RAPID CYCLES**

REDUCED MAINTENANCE

DC SERVO DRIVES

RTS

3 to 40A

The RTS servo amplifiers are designed for driving DC servo motors and are available in numerous ratings up to 6.5 kW.

These products enable speed control of DC motors with or without tachometers.

They integrate main supply, auxiliary supply and braking resistor circuits in a compact package.

TECHNICAL SPECIFICATIONS

Power supply - Single-phase, three-phase or battery

Ambient - 0-40°C (derate 35%/10°C up to 60°C max)

Up to 1000m ASL (derate 1%/100m up to 4000m max)

Protection - IP00, IP20 for versions with covering cap

DC SERVO MOTORS AND SERVO DRIVES

Tacho generators

Mounted directly on the shaft, making them very rigid, the tacho generators designed with high precision give a very good image of instantaneous speed, of zero speed and of rotation direction.

Power-off holding brake

Static use : motor locking in the stopped position

Dynamic use : for emergency braking only

Encoder

Particularly compact, the K10 encoder is mounted directly on the shaft, accordingly axial loads on the shaft are not permitted.

The C4 encoder with its hollow shaft and flexible mounting arrangement allows a very compact design

The C6B encoder is well-adapted to highly industrial environment thanks to its reinforced thermal and mechanical protection.

Transformer and choke

The transformer and choke ranges offer a large choice for all applications of the RTS series.

ANCILLARY COMPONENTS

OPERATOR TERMINALS

Text terminals

VT50 - LCD - 2 x 20
L=166, H=86, P=41

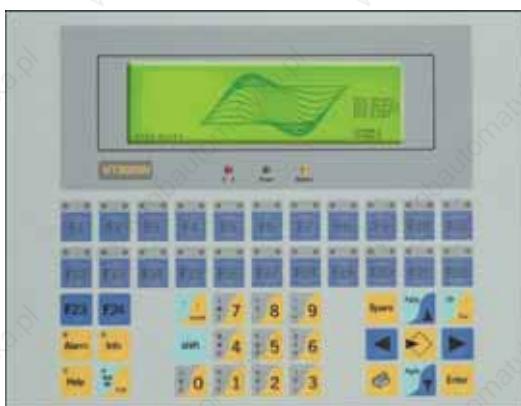

VT60 - LCD - 4 x 20
L=166, H=86, P=41

VT150 - LCD - 4 x 20
L=148, H=188, P=41

Graphic terminals

VT300 - LCD monochrome
L=252, H=196, P=60

VT155 - LCD touchscreen monochrome
L=100, H=166, P=39.6

VT505 - LCD touchscreen monochrome
L=210, H=158, P=54

TEXT AND GRAPHIC MODELS

OPERATOR TERMINALS WITH INTEGRATED CANOPEN CONNECTION

SSD DRIVES PROTOCOL EI ASCII RS232/RS485 (OPTION)

SOFTWARE

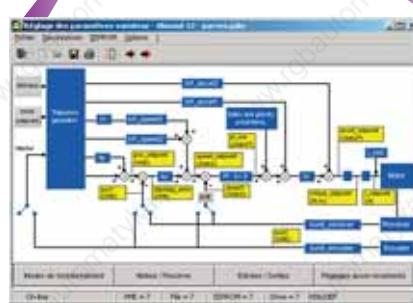

PARVEX MOTION EXPLORER SOFTWARE

Parvex Motion Explore is a powerful Windows based software for the DIGIVEX range.

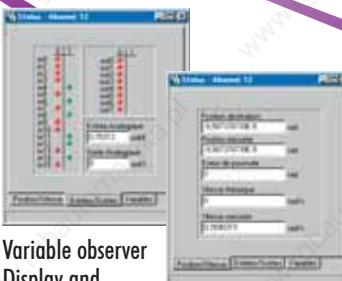

This software provides a convenient and straightforward working environment due to its graphic display of functions and an easy choice of different headings, in the form of thumbnails and menus.

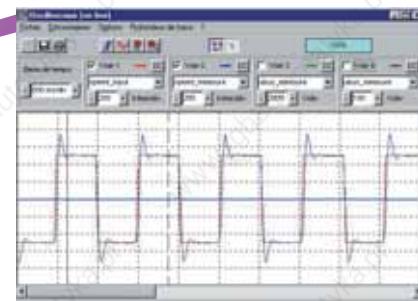

CANopen or PROFIBUS
network management
Simple click access to all subscribers on network.

Parameter adjustment
Axis, motor, sensor, input/output configuration;
tuning assistant...

Variable observer
Display and
software forcing

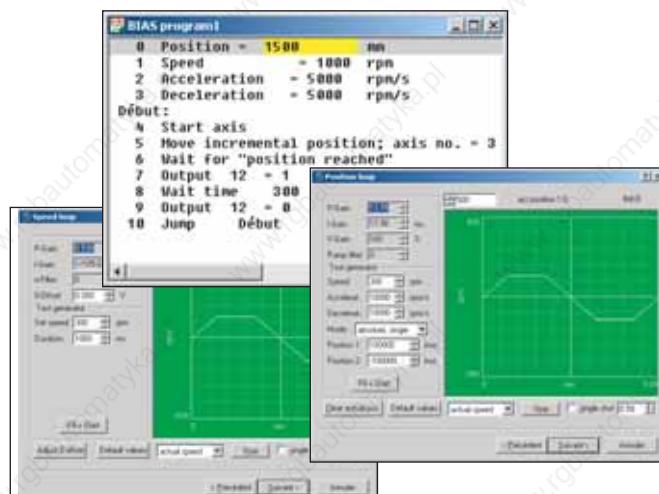

4 channel oscilloscope
Adjustable time base; adjustable trigger; RMS,
peak-to-peak, average, min, max measures...

Diagnostic help
event history; troubleshooting assistant;
firmware update...

EASYRIDER SOFTWARE

EasyRider is a graphical software for the 630 Series providing a single user interface for accessing all drive parameters, programming motion and calibrating the drive.

This unique assistant offer an autopilot mode helping user in all phases of application set-up : from the choice of the motor in the motor library to the drive auto-adjustment. All set-up steps are extremely simplified. Easyrider gives also the possibility to develop advanced motion in an intuitive way using its BIAS language.

INTUITIVE AND EASY USE

SET-UP ASSISTANT

INTEGRATED MOTOR LIBRARY

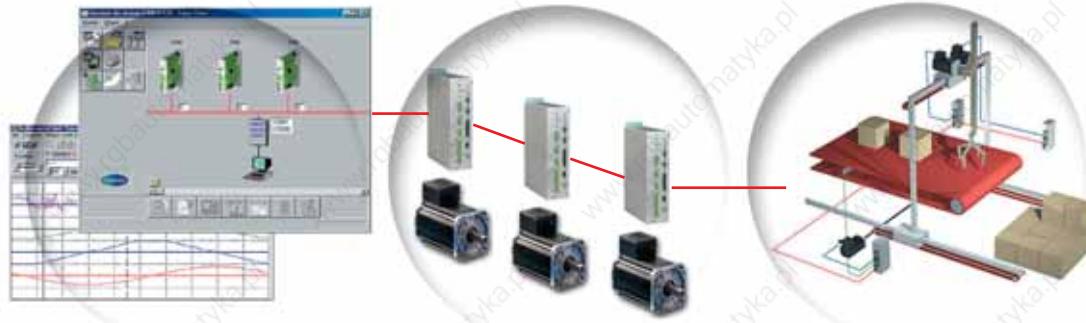

OSCILLOSCOPE FUNCTION

DRIVE AND FIELDBUS DIAGNOSTIC

DRIVE ADVANCED PROGRAMMING

APPLICATIONS

A COMPLETE MULTI-AXIS SERVO APPLICATION ON CANOPEN

Parvex Motion Explorer Use :

- Parameter definition
- Oscilloscope
- Control

DIGIVEX Motion Operating mode :

- Master slave synchronisation
- PDO messages, interpolation
- Multi-axis supervision

Applications Examples :

- Palletising
- Packaging
- Bending

One unique machine plug using CANopen bus gives opportunity to develop all the tasks for the realisation of an advanced application : Parameter Definition, Adjustment, Control.

TEST BENCH FOR WIND TUNEL

SSD Drives Parvex offer

1 HX820VR servo motor controlled by a DIGIVEX Single Motion positioning-drive. Dedicated PC software, specifically developed by SSD Drives Parvex, allowing cam construction using customer data, program compilation with new values and its transfer to drive.

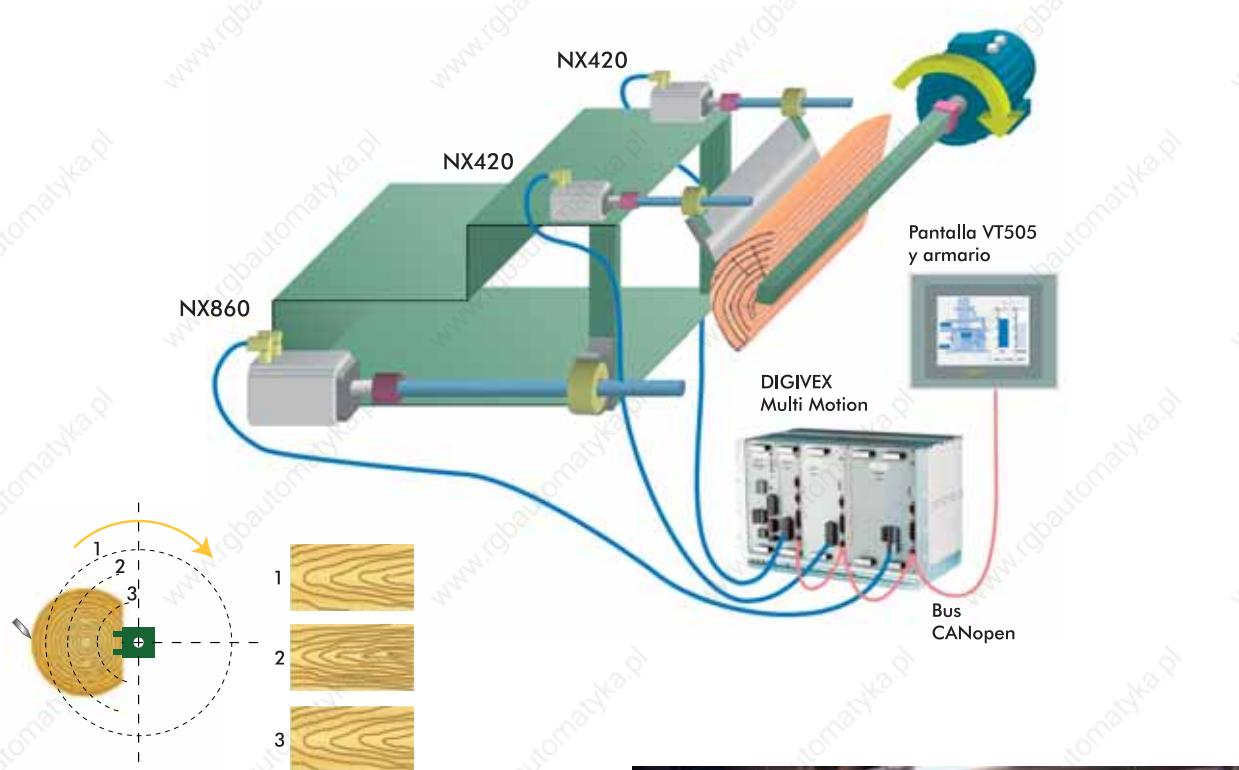

Customer benefits

Application of positioning integrally managed by SSD Drives Parvex including cabinet wiring and DIGIVEX Motion and PC software development.

APPLICATIONS

STAYLOG SLICING MACHINE

SSD Drives Parvex offer

2 NX420 servo motor and 1 NX 860 servo motor powered by a 3 axis DIGIVEX Multi Motion positioning system for the position control of knife and carriage. 1 VT505 graphic terminal for input of production data and operating modes.

Customer benefits

Positioning-drive replacing axis card for an improved reliability and increased performances.
