### Application

19" compatible power supplies are used to supply controls and systems with the required direct voltage. They are pluggable power supplies with a compact design and high efficiency.  
3.3, 5, 12, 15, 24, 48 and 60 volts are available as standard output voltages.  
Other output voltages available on request.

### Electrical design

The inputs and outputs are on the rear side using standardized male connectors to DIN 41612.  
A primary fuse is mounted in the power supplies.  
Operation is displayed at the front with LEDs.

### Mechanical design

Power supplies are 3 or 6 units (U) and a printed board depth of 160 mm.  
Depending on the output power, the power supplies have a width of 6 to 28 units (HP).

### Heat dissipation

Power supply heat dissipation is achieved without fans, and is possible up to an ambient temperature of 70°C. Output derating is from 40°C to 50°C.

### Standards/approvals

The power supplies are CE-certified and UL- and VDE/LGA-approved. Approval to EN 60950 applies to AC mains operation.  
The exterior dimensions of the systems correspond to the 19" standard DIN 41494, Part 1 and the mounting dimensions for the plug-in units to DIN 41494 Part 5.

- 19" compatible AC/DC power supply, pluggable 3 U
- Mains input voltage 230 V<sub>AC</sub> (can be converted to 115 V<sub>AC</sub> with conversion kit, see below)
- 1 output voltage
- High control accuracy
- Low residual ripple and very low-interference
- Suitable for medical applications (8 mm safety clearances)
- High reliability and long life
- PSM, PSG
  - Output voltage can be externally remote controlled (1 ... 10 V)
  - Conversion of the control curve for sensitive loads (U/I - Fold Back)
  - Current measurement via shunt

- 19" compatible AC/DC power supply, pluggable 3 U
- Mains input voltage 230 V<sub>AC</sub> (can be converted to 115 V<sub>AC</sub>)
- 1 output voltage
- Can be connected in series, parallel and redundancy operation
- Auxiliary voltage output (24 V/0.1 A) short-circuit protected, without galvanic separation
- Reset function (external on/off)
- High reliability and long life
