## Chassis format for Line and Motor Modules

### Active Line Modules in chassis format

#### Overview

A wide range of single-axis Line Modules and Motor Modules with graded current/power ratings can be supplied:

- Active Interface Modules: Single-axis version  
Chassis format with  
rated power from 132 kW to 300 kW (200 to 450 HP)
- Active Line Modules: Single-axis version  
Chassis format with  
rated power from 132 kW to 300 kW (200 to 450 HP)
- Single Motor Modules: Single-axis design  
Chassis format with  
rated output currents of 210 A to 490 A

In principle, all Single Motor Modules can operate on Active Line Modules in the corresponding voltage range.

The self-commutated feed/feedback units (with IGBTs in infeed and regenerative feedback directions) generate a regulated DC link voltage. This means that the connected Motor Modules are decoupled from the line voltage. Line voltage fluctuations within the permissible supply tolerances have no effect on the motor voltage.

If required, the Active Line Modules can also provide reactive power compensation.

Active Line Modules are designed for connection to grounded-neutral (TN, TT) and non-grounded (IT) supply systems.

#### Design

The Active Line Modules in chassis format feature the following interfaces as standard:

- 1 power connection
- 1 connection for the 24 V DC electronics power supply
- 1 DC link connection (DCP, DCN) for supplying the connected Motor Module
- 1 DC link connection (DCPA, DCNA) for connecting a Braking Module
- 3 DRIVE-CLiQ sockets
- 2 PE (protective earth) connections

The status of the Active Line Modules is indicated via two multi-color LEDs.

The scope of supply of the Active Line Modules includes:

- Frame sizes FX and GX:  
- 0.60 m (1.97 ft) DRIVE-CLiQ cable for connection to the CU320 Control Unit or SINUMERIK solution line NCU

#### Technical specifications

##### General technical specifications

<b>Line connection voltage</b> (up to 2000 m (6562 ft) above sea level)	380 ... 480 V 3 AC ± 10% (-15% < 1 min)
<b>Line frequency</b>	47 ... 63 Hz
<b>Power factor</b>	
• Fundamental power factor ( $\cos \varphi_1$ )	1.0 (factory setting), can be altered by input of a reactive current setpoint
• Total ( $\lambda$ )	1.0 (factory setting)
<b>Oversupply category</b>	Class III to EN 60664-1
<b>DC link voltage <math>V_d</math></b>	The DC link voltage is regulated and can be adjusted as a voltage decoupled from the line voltage.  Factory setting for DC link voltage: 1.5 x line voltage
<b>Electronics power supply</b>	24 V DC, -15%/+20%
<b>Radio interference suppression</b>	
• Standard (with Active Interface Module)	Category C3 to EN 61800-3
<b>Type of cooling</b>	Increased air cooling by means of built-in fan
<b>Permissible ambient or coolant temperature (air)</b> in operation for line-side components, Line Modules and Motor Modules	0 ... 40 °C (32 ... 104 °F) without derating, > 40 ... 55 °C (104 ... 131 °F), see derating characteristics
<b>Installation altitude</b>	Up to 2000 m (6562 ft) above sea level without derating, > 2000 ... 4000 m (6562 ... 13124 ft) above sea level see derating characteristics
<b>Conformity</b>	CE (low-voltage and EMC directives)
<b>Approvals</b> Active Line Modules only 380 ... 480 V 3 AC	cULus (File No.: E192450)

#### Warning signs in foreign languages

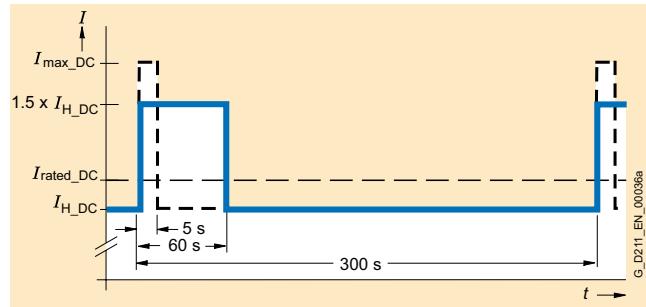

Warning signs in other languages can be placed on top of the standard warning signs in English or German.

Modules in chassis format are supplied as standard with the following signs:

Chinese, Czech, Danish, Dutch, Finnish, French, Greek, Italian, Japanese, Korean, Polish, Portuguese, Russian, Spanish, Swedish and Turkish.

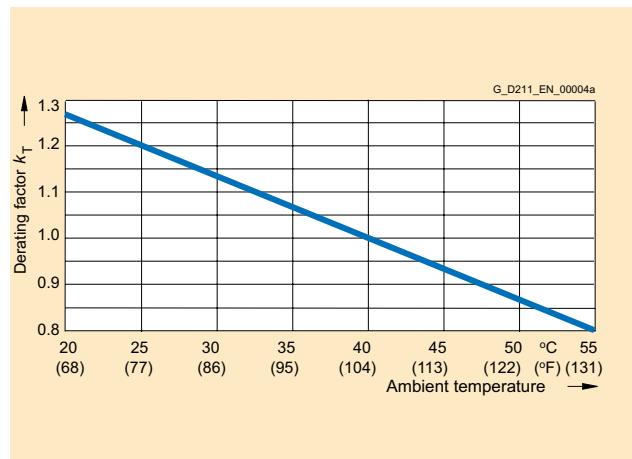

#### Characteristic curves

##### Overload capability

High overload

##### Derating characteristics

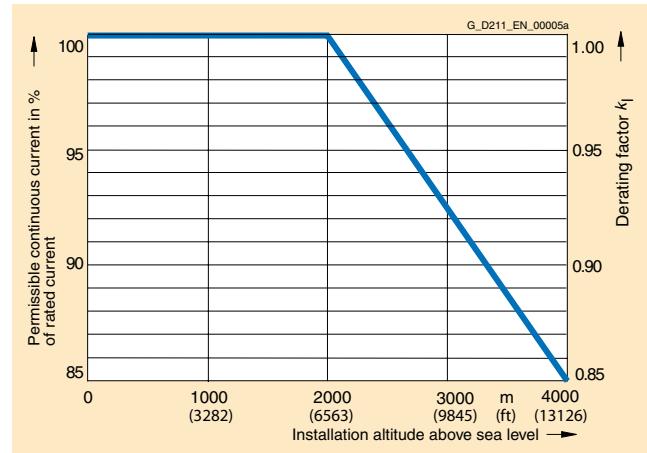

Current derating dependent on ambient temperature

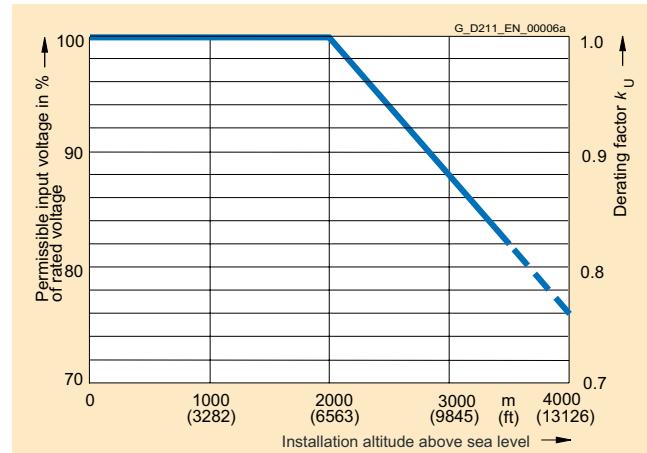

Note:

A derating factor  $k_T > 1.0$  must be taken into account only in conjunction with current derating dependent on installation altitude. See also system description.

##### Derating characteristics (continued)

Current derating dependent on installation altitude

Voltage derating dependent on installation altitude

## Chassis format for Line and Motor Modules

**Active Line Modules in chassis format**  
**Active Interface Modules**

### Overview

Active Interface Modules are used in combination with Active Line Modules in chassis format. Active Interface Modules contain a clean power filter with basic radio interference suppression, the pre-charging circuit for the Active Line Module, the line voltage sensing circuit and monitoring sensors. The bypass contactor is an integral component in types FI and GI, thereby making the module very compact. The bypass contactor must be provided separately for types HI and JI. The vast majority of line harmonics are suppressed by the clean power filter.

The scope of supply of the Active Interface Modules includes:

- Frame size FI:
  - 0.60 m (1.97 ft) DRIVE-CLiQ cable for connection between Active Interface Module and Active Line Module
  - 1.45 m (4.76 ft) DRIVE-CLiQ cable for connection between the CU320 Control Unit or the SINUMERIK solution line NCU and the first Motor Module.
- Frame size GI:
  - 0.95 m (3.12 ft) DRIVE-CLiQ cable for connection between Active Interface Module and Active Line Module
  - 1.45 m (4.76 ft) DRIVE-CLiQ cable for connection between the CU320 Control Unit or the SINUMERIK solution line NCU and the first Motor Module.

## Chassis format for Line and Motor Modules

### Active Line Modules in chassis format Recommended line-side components

#### Overview

Suitable line-side power components are assigned depending on the power rating of the Active Line Modules.

The tables below list recommended components.

Further information about the main contactors, switch disconnectors, fuses and circuit-breakers specified in the tables can be found in the Catalogs LV 1, LV 1 T and ET B1.

#### *Assignment of line-side power components to Active Line Modules in chassis format*

Infeed power	Input current	Assignment to Active Interface Module	Assignment to Active Line Module	Bypass connector
<b>Line voltage 380 ... 480 V 3 AC</b>				
132 kW (200 HP)	210 A	6SL3300-7TE32-6AA0	6SL3330-7TE32-1AA0	included in Active Interface Module
